PROTECTION OR TARIFF REFORM.

Beyond question the tariff is the issue upon which the coming camsaign will be ought, and it behooves every citizen who would vote intelligently to inform him-elf upon a subject which so closely affects his tenporal welfare.

Gen Leib's Book, The Protective Tariff.

What It Does for Us:

anders what is generally considered a most abstruce subject easy of comprehenion. It will serve as a Tariff primer for the learner and a text-book for the learned. This book shows the placetical effect of the Protective System upon the country. erh tos the most distinguishing feature of the book is its exact alignment with the lessage of President Cleveland. The position of Mr. Blaine's "Twonty Years in Congress" is taken up, his asserions upon the typist analyzed, and male is farnish their own resultation

Indorsements:

The form as well as the substance of the book is most admirable, and I have seen othing surrassing it for use in the great work of spreading the truth among the copie.

DON M. DICKINSON, Postmaster-General. It is an able and logical exposition of the injustice and delusions of the protective theory. The work is timely and a very vq table contribution to the literature of tariff reform.

B. W. TOWNSHEND, M. C.

We take pleasure in giving this work our hearty endorsement and recommend to ocal committees and clubs to assist in extending its circulation.
