TOPICS SURE TO MAKE AWARE AGRICULTURE New Third

Opinions Expressed by Authors on the Subject of Land and Uncertain in the Autumn—A Mistakes Prevents Many from

Notwithstanding the rains held in Canebrake in late spring and early 1891, to prevent there is a great difference between the land crops where manure was applied in the last fall or winter, as compared to those that manured just before sowing. Wherever drought prevails, the third will often do more harm than prevention.

There would be much delay when the fall top dressing was given after the manure had been taken notice that the manure exposure thinly spread to the new vegetation. Some loss there may be by raking (Aug. 18, 1890), away the manure, but there is strength, except of water, by evaporation. The manure does not ferment while spread thinly, and therefore no ammonia is given off. When manure is applied, it is best to heap it up and heating ammonia stable doors, left by drawing and spreading them their strength should evaporate.

It is very difficult to keep manure in heaps from losing ammonia, but the same manure spread out, especially on grass land, merely dries. When rains come all its strength is there, and whatever is soluble will leach down to the soil. If grass land moves, not well plowed for corn or potatoes next spring there is no better time to top dress it to do the next crop the most good than now.

Agriculture Work in the Poultry House.

B. Benjamin, Queens county, N. Y., gives the following sensible advice:

If the young cockerels are to be disposed of this ought to be done at once, as the surplus included in yards separated from the pullets and fed preparatory to marketing or for home consumption. Where eggs are the special object the above advice is all important. Unfertilized eggs are not only more desirable for the table and market and keep longer, but here kept in separate yards will lay longer and less than others. As old hens are unprofitable, though there are occasional cases, as when these are good layers.

Generally speaking, old fowls ought to be weeded out and spayed flock. Poultry Union is a good service, depositing eggs and later business in further.

The work begins to the margin of the provision for the winter, also for feeding and housing in the event of a critical conflict now pending that who decides who is the owner of the property is the citizen or the state.

Monongah, W. Va., Dec. 13.—The miners' association legally restrained the company from decreasing the wages and shortening the hours of work, and I am concerned for trial. The men sent a committee to the company to endeavor to compromise, but the answer was "We will concede nothing, but will pay you more money." The miners' association, however, have the shooting. The miners escaped on a mile, has one eye out and is about six feet tall.

Some two weeks ago, we referred to the Advanced Teachers Course of Providence M & F Academy. More recently, we learn that the School will be divided into four divisions as follows:

First Divisions; Advanced Teachers Course, including Algebra, Geometry, Latin, Pages Theory and History of Kentucky.

This course is designed for Teachers who have experience and tact in teaching and who desire better schools and higher wages and have pluck and energy enough to try to get them.

Second Division; Intermediate Teachers Course, including all the common school branches. This course is designed for teachers who desire better schools and higher wages and have pluck and energy enough to try to get them.

Third Division; Preparatory Teachers Course, including all the common school branches. This course is designed for those who do not hold certificates but wish to prepare for examination and teaching.

Fourth Division; Elecine Course, including such studies as the pupil or his parents may wish him to study in order to secure a good business English education.

The school opens Dec. 29 1890. Any one desiring a circular of particulars should write to Coleman & Hicks, Providence, Ky.

Most truly,

S. Hicks.

Mr. S. G. Clark, of Livingston announces his candidacy for the Legislature in this issue of the Press.

Mr. Clark is pretty well known over the district, and has strong friends in every locality. Four years ago he came before the people almost a total stranger to a large portion of the district, and made an exceedingly fine race. He is a successful farmer an industrious, capable and honest man; has served the cause of the Peace of his district with credit to himself and honor to his constituency. He is a man of fine natural sense, mature judgement, and is well posted on the pertinent questions of the day. He is a sound Democrat in principles, and has always been unflinching in his support of the party. His election would give the district a good representative.
