OHIO REMAINS WEDDED TO HER IDOLS.

But New York, Massachusetts, and Iowa are in the Democratic Lines.

Tuesday's elections is most assuredly gratifying to the Democrats. Winning a victory in New York, Iowa and Massachusetts, all in one day, ought to appease the most voracious appetite of the most craving Democrat. It is true Ohio would have been a gratifying addition to the bill of fare, but we are not hogs.

The following is a list of the State elections held Tuesday:

Iowa elects State officers and Legislature.

Maryland elects State officers and Legislature, and votes on six constitutional amendments.

Massachusetts elects State officers and Legislature.

Mississippi elects three Railway Commissioners and Legislature.

Nebraska elects Associate Justices of the Supreme Court and two regents of the State University.

New Jersey elects parts of its Legislature.

New York elects State officers, Legislature, two Supreme Court Justices and Representatives in the Tenth Congressional district.

Ohio elects State officers, Legislature and votes on amendment to Constitution providing for uniform taxation.

Pennsylvania elects Treasurer and Attorney General, and votes on Constitutional Convention and elects delegates to same.

Virginia elects half its Legislature.

NEW YORK, Nov. 4.—The battle at the polls began at 6 o'clock this morning and did not cease until the stroke of four this afternoon. New York and King's counties give Flower 177,886; Fassett, 190,000. The same districts in 1888 gave Hill 197,824, Miller 242,279. The 1785 districts (outside New York and Kings), not yet heard from, gave, in 1888, Hill 201,254; Miller, 220,915. Miller thus had in these districts a plurality of 19,661.

In case Fassett should have this same plurality in the districts yet to hear from, his total plurality outside New York and King's counties would be 31,975. Flower's plurality in New York City being 58,293, and in Kings county about 14,000, it would thus appear probable that Mr. Flower's majority could be somewhat over 40,000.

CINCINNATI, O., Nov. 3.—The election to-day was one of the most quiet, orderly, business like and satisfactory ever held in Cincinnati since the good old times when everybody knew everybody else and all were honest. The new election law based on the Australian system was tried for the first time. The election day was entirely free from disorder.

At midnight Gov. Campbell conceded the election of McKinley by 58,293 plurality.

Chairman Hahn, of the Republican State Committee, at 1:45 a. m., claims the State by from 19,000 to 21,000, and the General Assembly by from 31 to 33 on joint ballot.

MASSACHUSETTS.

Boston, Nov. 3.—Up to midnight returns have been received from 100 towns, and the indications are that Russell, Democrat, is elected Governor by 5,000 majority. The Journal and Advertiser, both Republican, both concede Russell's election, but place his plurality at 3,000.

IOWA.

DES MOINES, Nov. 3.—At 2 o'clock this morning the Republican Committee have closed headquarters and gone home. Reports received at Democratic headquarters continue to show Democratic gains, and indicate a majority for Gov. Poies of from 6,000 to 10,000.

VIRGINIA.

RICHMOND, Nov. 3.—The Demo-

crats will have more than two-thirds majority in the Legislature

MARYLAND.

The Democratic candidate for Governor has been elected by from 15,000 to 20,000 majority.

The Republicans gain in Nebraska, Colorado, and South Dakota.

PENNSYLVANIA.

Philadelphia, Nov. 3.—The Republicans have carried the State by 50,00 majority.

NEW JERSEY.

Trenton, Nov. 4.—The Democrats will have the largest majority ever held by either party in the legislature.

KANSAS.

Topeka, Nov. 3.—The latest returns indicate that the Republicans have gained their lost ground. The People's Party did not hold its ground.

THE LATEST.

(Special to the Press.)

LOUISVILLE, Ky., Nov. 5.—New York gives Flower, the Democrat, 40,000 majority. McKinley carries Ohio by 19,000. Iowa re-elects Boies, Democrat, for Governor, by 8,000 majority.

THERE will be an abundance of committees at Frankfort this winter to look after the interests of various concerns; the farmers have recognized the virtue of lobbying and will have a committee there also. As there are fifty and seven farmers in the house, the interests of those people are not likely to be overlooked.

A RECENT earthquake in Japan killed 4,000 people, injured 5,000 and destroyed 5,000 houses; thousands are hungry in Russia; in Ireland they are breaking each others heads with clubs. The South American countries are continually at war; England has a Prince of Wales. The United States is still the best country on earth.

We hear no teachers complaining that their schools are slowly attended, but on the other hand many report the attendance so great that one teacher cannot do justice. This is a gratifying situation of affairs. It shows that the people of Crittenden are alive to their best interests, and appreciate the demands that will be made upon their children in the battle of life.

Boston furnishes a bank suspension this week; it was the Maverick bank, and President Potter and Directors French and Dana are under heavy bond to answer the charge of misappropriating the bank's fund. The only redeeming feature of many of the recent bank failures is that the dishonest officials are landing in the penitentiaries, a place peculiarly fitted for such ruffled bird thieves.

The English evidently sympathize with the Chilians in the misunderstanding between that country and the United States. The London Times says of the affair:

"The Chilians would be more or less than human if they did not resent Minister Egan's hectoring and brow-beating tone. Unless they were to his assistance by a departure from the moderate attitude they now maintain, it only remains for Mr. Blaine to climb down as softly and gently as he can. The American people are certainly concerned to discover and punish those who employed their ships and influence in ways which, if not absolutely corrupt, are at least extremely irregular and mischievous."

The new superintendent of Public Instructions, Thompson, is endeavoring to stir up more than usual interest in the educational affairs of the State. Two weeks ago he sent out a programme which the friends of education should heed. Since then he has sent out a letter asking suggestions in regard to changes in the school law. A meeting will be held in Louisville on December 2, for an interchange of ideas on this subject. A course of this kind will bring about a concert of thought and action on the subject of education, and arouse a deeper interest in this important subject. The public schools are growing in usefulness, as their work becomes more thorough, and the teachers more efficient, and a continual agitation will keep up the growth.

A Bridge at Evansville.

Courier Journal.

A company has been organized to be known as the Evansville Bridge and Terminal Company, which has

already taken the preliminary step toward constructing another bridge over the Ohio river, on the site of the Ohio Valley railroad ferry. On Monday the deal was closed for the actual purchase of the property. It is the intention of the Bridge and Terminal Company to erect handsome freight and passenger depots, which will require another large expenditure of money. Work on these new structures will begin as early as convenient, and they will be rushed to completion as early as possible. It will be a truss bridge, built of steel, with three spans, a channel span of 550 feet in length and two spans 430 feet each. It will be approached on a 1 per cent. grade and on a trestle, an engineering advantage. It will make the route to Henderson only ten miles, instead of twelve as at present, and will greatly shorten the time between the two cities, as half of the entire distance could be traversed while the transfer is being made at the ferry. The estimated cost of improvement is \$1,500,000, and it is expected to have the work completed before December 1, 1892.

Ex-Governor David Meriwether celebrated his ninety-second birthday last Friday. The Courier-Journal thus sums up his career: "Gov. Meriwether has had a career marked by few. He has seen three Constitutions in Kentucky, and was one of the framers of the one that only a few weeks ago went out of existence. Fifty-nine years ago found him an active member of the Kentucky Legislature, and he succeeded Henry Clay in the United States Senate. He was Governor of New Mexico long before the great Santa Fe route was built in that country, and made the long journey from the Missouri river in a stage coach. The first house erected on the site of Keokuk, Iowa, was by his hands. Gov. Meriwether is a native of Virginia, but, with the exception of his boyhood days, has spent almost his entire life in Kentucky."

President Polk is reported as saying, on a return trip from the west, that the Alliance is growing rapidly in the west. Our information is to the effect that President Polk is deceived by appearances. He estimates by the new sub-unions returns of which from the Secretaries reach headquarters, but takes no account of those passing into dormancy and decay. We speak for Kentucky when we say the real active membership is probably not half what it was a year ago. It may be that the names of more than that number will be found on the list, but they are not paying their dues and participating in the meetings. The cause for this is to be found in the fact of the attempt to make a political party of the organization. Where this has been attempted the membership has fallen off and it cannot be denied. President Polk receives his own cars and eyes with the greater noise made by the farmers was commended from the editors desk to the preachers pulpit as an uprising of a wronged class to right their wrongs. But when this movement becomes a separate political party demanding extreme legislation in advance of the proper discussion as to constitutionality, the rights of others, etc., the general public have to consider the effect.

The masses of farmers even will not be rushed pell-mell along into such deep waters. Nor will they hastily leave political associations in which they have confided to try their fortunes among adventurers whose experience in public affairs is too limited yet to make leaders of them. We predict that not one of the Alliance members in this part of the country will be dragged into the people's party. We predict further, that if the extremists get control of the State meeting at Elizabethtown the membership will soon fall to about the number of the People's party votes cast at the last State election. The conservative thinking members, whether their former affiliation was with one or the other of the old parties, will not go along with an organization that is drifting out in the unknown.

The policy of the Alliance should be to keep politics out of the State meeting—to elect no board of directors wholly from one political party—not all Democrats or Republicans, and by no means all People's party men. Of course, whoever may be chosen should be men above reproach and with good business leads on their shoulders. We do not here refer to any one, but the chief officers should be men who have not made failures in their own business affairs. We do not mean to reflect on a man because of having failed in business if it be in some great venture, or by a combination of adverse circumstances. But there is a class of easy-going, slipshod, careless men whose estates have been badly managed, and they cannot successfully manage the Alliance because, if it lives, it will have to deal in the near future with some giant problems of buying and selling. The importance of the selection of good officers is not to be overlooked.—Farmers Home Journal.

But when this movement becomes a separate political party demanding extreme legislation in advance of the proper discussion as to constitutionality, the rights of others, etc., the general public have to consider the effect.

The masses of farmers even will not be rushed pell-mell along into such deep waters. Nor will they hastily leave political associations in which they have confided to try their fortunes among adventurers whose experience in public affairs is too limited yet to make leaders of them. We predict that not one of the Alliance members in this part of the country will be dragged into the people's party. We predict further, that if the extremists get control of the State meeting at Elizabethtown the membership will soon fall to about the number of the People's party votes cast at the last State election. The conservative thinking members, whether their former affiliation was with one or the other of the old parties, will not go along with an organization that is drifting out in the unknown.

The policy of the Alliance should be to keep politics out of the State meeting—to elect no board of directors wholly from one political party—not all Democrats or Republicans, and by no means all People's party men. Of course, whoever may be chosen should be men above reproach and with good business leads on their shoulders. We do not here refer to any one, but the chief officers should be men who have not made failures in their own business affairs. We do not mean to reflect on a man because of having failed in business if it be in some great venture, or by a combination of adverse circumstances. But there is a class of easy-going, slipshod, careless men whose estates have been badly managed, and they cannot successfully manage the Alliance because, if it lives, it will have to deal in the near future with some giant problems of buying and selling. The importance of the selection of good officers is not to be overlooked.—Farmers Home Journal.

Ex-Governor David Meriwether celebrated his ninety-second birthday last Friday. The Courier-Journal thus sums up his career: "Gov. Meriwether has had a career marked by few. He has seen three Constitutions in Kentucky, and was one of the framers of the one that only a few weeks ago went out of existence. Fifty-nine years ago found him an active member of the Kentucky Legislature, and he succeeded Henry Clay in the United States Senate. He was Governor of New Mexico long before the great Santa Fe route was built in that country, and made the long journey from the Missouri river in a stage coach. The first house erected on the site of Keokuk, Iowa, was by his hands. Gov. Meriwether is a native of Virginia, but, with the exception of his boyhood days, has spent almost his entire life in Kentucky."

President Polk is reported as saying, on a return trip from the west, that the Alliance is growing rapidly in the west. Our information is to the effect that President Polk is deceived by appearances. He estimates by the new sub-unions returns of which from the Secretaries reach headquarters, but takes no account of those passing into dormancy and decay. We speak for Kentucky when we say the real active membership is probably not half what it was a year ago. It may be that the names of more than that number will be found on the list, but they are not paying their dues and participating in the meetings. The cause for this is to be found in the fact of the attempt to make a political party of the organization. Where this has been attempted the membership has fallen off and it cannot be denied. President Polk receives his own cars and eyes with the greater noise made by the farmers was commended from the editors desk to the preachers pulpit as an uprising of a wronged class to right their wrongs. But when this movement becomes a separate political party demanding extreme legislation in advance of the proper discussion as to constitutionality, the rights of others, etc., the general public have to consider the effect.

The masses of farmers even will not be rushed pell-mell along into such deep waters. IMBODEN IN JAIL.

The Reward Not Long in Finding Him.

Sunday Constable Wm. Dyer and Frank Heine, of Caseyville, came to Marion with John Imboden in their charge, and turned him over to Jailor Adams to answer the charge of murder at the December term of Circuit Court.

The \$200 reward offered by the Governor put them in search of the fugitive and they soon located him at a coal mine in Gallatin county, Ill. Saturday night they sent a boy to his house to tell him that a couple of men were at a certain place, near by, anxious for a game of poker.

Imboden soon appeared, and before he had time to take in the situation the muzzle of a pistol met his astonished gaze, and at the command, he threw up his hands.

The deed with which Imboden stands charged was committed on the 25th day of last December, and the circumstances of the killing as described in the Press at the time were as follows:

Monday evening, near Weston in this county, Imboden shot and probably fatally wounded Jordan Hughes, a negro boy about twenty years old.

Imboden, with a couple of friends was sitting on the roadside about half-mile south of Weston, when Jordan Hughes rode up to where they were, and the latter addressed Imboden and his friends in these words:

"Good evening, white man." The reply from the party addressed was:

"Good evening niggers," and at the same time Imboden raised his gun, saying, "I will kill a negro, too," and fired. The contents of the gun struck Jordan Hughes in the back, just as he wheeled his horse, and fell to the ground. All the parties except the wounded man, left the scene immediately.

Shortly afterwards passers by found the wounded man, who died the morning after he was shot.

Imboden had left for parts unknown.

Yesterday a telegram was received at this place announcing the death of Mr. A. L. McChesney at Greenwood, Ark., and his remains will be brought to this county for burial. He was a young man in his twenties, and is a son of Mr. Harry McChesney of this county. He went to Arkansas the first of September to engage in the timber business.

Charged With Burglary.

Horry Millican, a young man, was arrested at Carville Tuesday and brought to Marion Wednesday by Constable Kosminski. Millican is charged with burglarizing Clements store at Tolu several weeks ago.

Failing to give a \$500 bond, Judge Moore sent him to jail. It is said that he has been peddling watches, jewelry, etc., to the people of Livingston county, and the goods he was disposing of answered the description of those taken from the store. He was just ready to take a boat for "parts unknown" when arrested. Only a few months ago, he completed a twelve months' term in the penitentiary for burglarizing Farris' store at Salem.

Kukluxing.

Monday, at the instance of John Nelson, a warrant was issued charging Jas. Dailey and Wm. Dailey with 'banding themselves together for the purpose of intimidating, alarming and disturbing the family of Nelson by throwing rocks and nails at his house, thereby injuring members of his family.' Others were in the affair besides Dailey, but they were not identified. There is a special statute for such offenses and it provides that upon the conviction of the accused in such cases they shall be fined in any sum not less than \$100 or more than \$500, or sentenced to the penitentiary for a term of not less than six nor more than twelve months.

LATER.—The Dailey brothers were captured Wednesday by Deputy Sheriffs Wheeler and Dulany and brought to Marion. Failing to give a bond of \$500, they were placed in jail.

In Uncle Sam's Clutches.

Tuesday the Deputy United States Marshal from Paducah came to this county and arrested Dick Edmondson upon the charge of selling liquor without license, and took him to Paducah for investigation. The offense was committed at the Piney camp-meeting last August. Edmondson is said to be one of a gang who are making a business of peddling liquor through the country. The two Sam Walkers went to Paducah Wednesday as witnesses in the case.

Lyon County Trouble.

An effort to compromise the Lyon county railroad debt is still being made. Mr. James C. Glenn, chairman of the Sinking Fund Commissioners was in Louisville yesterday to meet the bond holders. The offense was committed at the Piney camp-meeting last August. Edmondson is said to be one of a gang who are making a business of peddling liquor through the country. The two Sam Walkers went to Paducah Wednesday as witnesses in the case.

Until yesterday it impossible to learn what the county offered the bond holders in the way of compromise. The bondholders stated that they would accept 50 per cent, and the interest due. The offer that they will consider to-day is 60 per cent. That is 60 per cent, on the \$100,000 without the interest due. The county offers to settle for \$60,000. The 50 per cent. of the bondholders is \$50,000, which with the \$48,000 interest makes \$128,000. The difference between the parties is \$32,000.

Chairman Glenn was seen at the Fifth Avenue Hotel last night. He stated that the offer of compromise made by the county was as given above; that it was the best the county would do, and if it was not accepted the matter would have to go into the courts again. He said when the bonds were voted the county was to be a stockholder of the road. The road was mortgaged and sold before it was completed, and the county lost the bonds. Lyon county had paid nearly \$100,000 in interest on these bonds and had taken up about \$70,000 worth of bonds and it did not intend to do any more. The county could not pay a larger sum than offered, and if the bondholders did not accept the terms offered, the county would do nothing more.

A DISTRESS CALL.

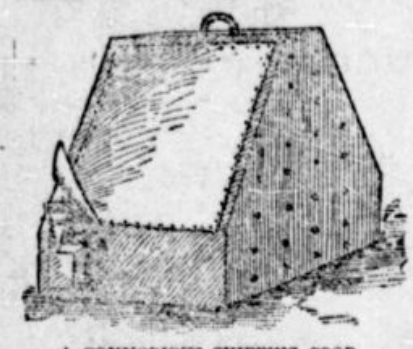

M. L. Hays is in distress. He says it takes money to buy groceries and also to pay off bills that are falling due daily and he hasn't it. Now will you come in and pay off that account of yours, though it may be very small, it will help. Now every body come at once—don't one wait for another. If you don't come I must close, which shall I be, you all come with your mite or me close.

FARM & GARDEN

SHIPPING COOPS.

Two designs for neat, light coops in which to ship poultry.

A cheap manner of shipping poultry will materially curtail the profits of any poultryman. The value of the stock is likely to be depreciated by it, and, besides, cumbersome coops will unnecessarily increase express charges. Farmers as well as breeders of fine stock are always interested in designs for light shipping crates, and we therefore reproduce from a number of those described and illustrated by The Southern Farmer the following: "The shipping coop made in accordance with the plan shown at Fig. 1 has the end of the coop of solid wood, with a handle, a handle full of holes for ventilation. The front and back of coop has a 7-inch board at the bottom, also board full of holes for ventilation. The sides are sloping to correspond with ends. Inside, a handle is tacked on running from the top of the 7-inch board to the top. The top board is 12 inches wide and 22 inches long, the coop when finished being 22 inches square and 22 inches high. A can is nailed in the corner for water. A small funnel runs into the water can. Over this funnel is pasted the following notice, 'Please pour water in this funnel for the fowls.' An opening is cut in the top board as long and wide as it will allow for ventilation. A small feed trough can be tacked on inside, but I do not use one, as fowls eat very little in transit.

A COMMODIOUS SHIPPING COOP.

"For very long distances the feed trough might be an advantage, with a large mouthed funnel through which to pour the feed. This coop is strong, has plenty of ventilation and the fowls are sure of water if well attended to in transit. Besides, it is very light, a single man being heavy enough for bottom and all. The coop here described will hold four fowls, large size."

In the second cut is illustrated a cheese box coop. It is the invention of a correspondent of The Poultry World, who wrote as follows concerning it: "The cheese box coop has met with such universal favor that I wish others to have the benefit of this simple, light and altogether desirable arrangement. Plenty of empty cheese boxes can be found at our retail grocery stores, at from five to eight cents each, also coarse sacking that will cut as to cover four boxes for ten cents. Two strong lines cut into four 18-inch lengths, a few nails, one fourth paper 4-ounce tacks, and fifteen minutes' time with a hammer and clinching iron and the thing is before you. The weight is about eight and a half pounds."

A CHEESE BOX COOP.

"In it the chicks are not easily frightened and it does not injure their combs or break their feathers. I sent a pair of white Leghorns to a show in Pennsylvania in one of these boxes, and the officers were so well pleased with the idea that they had it placed on exhibition. The chicks, after being awarded first premium and silver cup, were returned to me without a feather being soiled or ruffled. In warm weather I use six posts, placing two on opposite sides, one and a half inches apart, inside of which are fastened cups for food and water. In cold weather I put the food in the bottom of the box, and water is not necessary."

Black diphtheria at Marshalltown, Ia. Secretary Rusk says France will soon admit our pork.

The Chilean Liberals have an overwhelming majority in the electoral college.

May White, of Mendocino, Mich., has been asleep 150 days. Her case puzzles the physicians.

The world's fair officials take no stock in the reports that France will take no part in the Columbian exposition.

Secretary Blaine in Boston, en route to Washington said: "The past summer has been one of the most pleasant epochs of my life, and the results have been most happy personally. It will be hard to make some of the newspapers believe that I am a well man, but that is a fact, nevertheless."

A SUCCESSFUL BEEHIVE.

An Indian's Plan for a House in which to keep bees.

The beehive is 10 feet by 12 feet high in the clear. It is lined, and the 4-inch space between the inner and outer walls is filled with dry sawdust. There is a 4-inch ventilator through the roof. It will hold twenty-four ten frame Langstroth hives, each super containing thirty-two one pound sections. The hives are placed two inches from the wall, and the openings of the chutes are covered with wire cloth.

A BEEHIVE.

The apiarist who thus describes in American Bee Journal his plan for a beehive such as is shown in the cut here reproduced says in regard to its management:

In winter the chutes are closed on the outside, and the bees get air from the inside of the house. In summer time, when it is hot, I use nothing but burlap on top of the hives, and I have no hanging out—they stay in the hives.

I can go into my beehive at any time of the year without starting robbing, and by opening the winter door and closing the screen door I have all the light necessary from the door to take off honey or examine any hive.

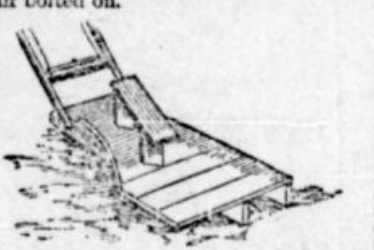

I never lose any bees in my beehive, as they can have a flight at any time during the winter, when it is warm enough, or I can close them up at any time. From the bees kept in the house I get more honey than from those that I keep out of doors, and I am so well pleased with my beehive that I have built another one, and shall keep all of my bees in the house.

There are so many advantages in managing bees during swarming time in a house like mine that I shall not attempt to enumerate them.

A Kansas Corn-crafter.

The cut shown here represents a corn-crafter used to be in use in some parts of Kansas. The runners of the device are made of hard wood and are 6 inches and 6 feet long. The floor is of thin boards and the seat of 2 by 4 inch stuff bolted on.

The cutting knife is a strong set, three feet long, set slanting and bolted securely to the shaft. The shaft is driven by shafts which prevent the horse from turning around upon the shafts. A man can handle the corn if not too heavy. He grabs the corn with both hands and lets it lie across his knee until he has a lap full and then casts it off, says The Farm Journal, from which our cut is reproduced.

A CONVENIENT CORN-CRAFTER.

Points in Onion Culture.

Many amateurs do not know at what time to sow onion seed to raise sets, when they are gathered and how taken care of. Country Gentlemen thus makes the matter plain: "The sets are required of small growth, and therefore a poor soil is better than a rich one; this soil is thoroughly pulverized and made smooth, the seed sown by a line quite thickly, and as large ones are set to run up to seed, the line should be less than the size of grapes. They are taken up in August, dried, balled in cask four inches deep and covered with several inches of hay for protection through winter. Early in spring they are set out in extra rich land, thoroughly mellowed, three inches apart in the rows, the earth pressed compactly about them. They are to be kept perfectly clear of weeds till the middle of June, when they are first taken up for market. The Sprouting Yellow Danvers are found best for this treatment. The Wethershead red more productive, but less adapted to sets."

Crop Statistics.

The average for potatoes in the government report is 94.8; for tobacco, 87.4. It has been officially reported that the wheat crop of North Dakota is about 50,000,000 bushels.

State averages for the corn crop are generally high, especially for the southern states. The lowest state averages are those of Michigan and Wisconsin.

In Statisticians Dodge's report a small advance is noted in all the cereal crops except buckwheat. The general average is as follows: Corn, 91.1; wheat, 90.3; rye, 93.1; oats, 90.7; barley, 91.3; buckwheat, 90.6.

Plow the oat ground and, unless too steep, let Jack Frost do the only harrowing, seed of the rocks and stumps and return for a second harrowing. Next spring harrow without plowing, sow the oats and grass and harrow smooth. A good crop of grain and sure catch of grass may be depended on, says The Farm Journal.

According to the department of agriculture at Washington, the condition of wheat is unusually high. The figures for the principal wheat growing states are as follows: Ohio, 98; Michigan, 95; Indiana, 100; Illinois, 100; Wisconsin, 99; Minnesota, 100; Iowa, 99; Missouri, 94; Kansas, 89; Nebraska, 93; North Dakota, 94; South Dakota, 90; California, 90; Oregon, 97; Washington, 93. East of the mountains, New York, 99; Pennsylvania, 99; Maryland, 97; Virginia, 95; in the southwest, Texas, 91.

How the Kangaroo Fights.

The kangaroo fights with great address and intelligence, and if he can find a stream or water hole in which to await his foe will station himself waist deep in it, and pushing the dogs under one by one as they swim out to attack him either drowns them outright or compels them to retire for want of breath. Against human enemies, armed only with clubs or stirrup irons, the kangaroo often shows himself a clever boxer, warding off blows very dexterously with his forepaws, and now and then making forward bounds, with rapid play of his dangerous hind feet, which are difficult to avoid.—Boston Journal.

More Advantages.

"My husband hasn't treated me very well lately, but I'll get even with him," said Maudie.

"I wouldn't if I were you," returned Estelle. "I'd get ahead of him."—New York Epoch.
