The news that has come from the medical profession in the last few weeks has been a great disappointment to the people in this city. In fact, the news is that there is no such thing as a medical profession. The people have been led to believe that there is a medical profession, and all that they have to do is to find a doctor who will give them the necessary treatment.

Dr. Thomas Jefferson, of Salem, N. C., has just returned from a trip to New York, where he has been investigating the medical profession. He tells us that there is no such thing as a medical profession, and that all the doctors are just as ignorant as the people themselves.

Dr. Jefferson has been investigating the medical profession for several years, and he tells us that there is no such thing as a medical profession. He says that all the doctors are just as ignorant as the people themselves.
