## Will Vote at Sea.

Topeka, Kan. Oct. 28.—The members of the first battalion of the 22d Kansas regiment, which sailed from San Francisco today for Manila, carry ballots and will vote on Kansas officers about midway between Honolulu and Manila. These 600 men live in Western Kansas, where members of the Legislature are usually elected by less than 25 majority. Both State committees admit that fully twenty-five members of the House will be chosen or defeated by this midocean vote.

What worries them is the possibility of a delay in receiving the returns here till February 1, one month after the Legislature meets. With a close vote on State officers predicted, great complications may arise.

The Spanish peace commissioners have agreed to say nothing more about that Cuban debt to Uncle Sam Spain died hard but she will be none the less dead when we get through showing up our intentions.

## Evolution of The Republic.

Since the matter of territorial expansion is now uppermost in the public mind we may revert to some interest to the gradual progress of development which has taken place in our national affairs within the past one hundred and fifteen years. This comparatively short period of time covers the entire range of American history from Yorktown to Santiago.

When the revolutionary struggle closed with the success of the revolutionary arms under Washington, in 1783, the government which emerged triumphantly from the smoke and turmoil of that protracted conflict included the States of Massachusetts, Rhode Island, Connecticut, New Hampshire, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia. These thirteen original states were strung like beads upon the Appalachian chain of mountains extending along the Atlantic seaboard. They embraced only 827,844 square miles of territory, or barely one fourth of the present area of the country. Under the terms of the original charter, the territory of these thirteen original states extended properly to the Pacific ocean, but on account of complications and embarrassments of one kind and another which sprang up in the course of events, including French and Spanish claims, to the Mississippi valley lands, the extreme western confines of the young republic were fixed upon the banks of the Mississippi river. But years elapsed before the forces of civilization began to drift from the shadows of the mountains in which they first sprang into life. We can satisfy ourselves on this point by consulting some of the early maps which reveal the elongated but exceedingly narrow dimensions of the country during the first twenty years which succeeded the revolutionary struggle.

Our first annexation of territory dates back to 1803, when Jefferson purchased Louisiana from Napoleon. This immense strip of land included not less than 1,171,931 square miles. Louisiana had been ceded from France to Spain in 1763, but subsequently Spain had restored the tract to France. Both powers thought at different times to restrict the growth of the young republic and to prevent emigrants from crossing the Mississippi river. We have good reason to believe that Napoleon contemplated giving the young republic some trouble over Louisiana, but apprehending trouble with England and being in need of ready money he decided in sheer desperation rather than in shrewd diplomacy, to part with Louisiana for the sum of \$15,000,000. Of this amount \$3,750,000 consisted in the assumption by the United States of the claims of Americans against France for goods despoiled upon the seas. There was some opposition to the Louisiana purchase at the time, but in view of the vast extent of territory gained at comparatively little cost, and in view of the constant menace to our progress over come by the acquisition of this strip, we could not have acted with greater wisdom of statesmanship than we did and today the Louisiana purchase is reckoned among the brightest of our national glories. Included within the bounds of the Louisiana purchase are most of the states and territories occupying the great western area of the Mississippi valley, and the vast tracts of the extreme northwest.

We next increased our national domain by the annexation of Florida in 1819. We ought to have secured Florida under the terms of the Louisiana purchase. We labored under the impression that Spain had ceded Florida to France, and that France had

ceded that peninsula to us, but we found on trying to settle Florida that such was not Spain's idea. Diplomats in negotiations threatened to precipitate international difficulties, but eventually the affair was peaceably adjusted by Spain's agreement to relinquish Florida for \$5,000,000. This sum was paid by the United States in the assumption of claims of that amount preferred by American citizens against Spain. With the annexation of Florida 36,288 square miles were added to our national domain.

Our next extension of territory came from the acquisition of Texas, in 1845. In 1836 Texas achieved her independence of Mexico in one of the bravest struggles of modern times, and in 1837 applied for admission into the American Union. Eight years of protracted discussion in Congress followed, with the result that Texas was admitted in 1845, thus adding 376,183 square miles to the territory of the country. With the annexation of Texas in 1845, trouble arose between Mexico and the United States, over the disputed boundary line, and what is known as the Mexican war ensued. This struggle was eventually terminated by the treaty of Guadalupe Hidalgo, in which Mexico agreed to abandon the fight and to cede to the United States 545,783 square miles of land on the payment of \$15,000,000, and the assumption of claims amounting to \$3,250,000. In 1853 the United States acquired from Mexico what is known as the Gadsden purchase, covering 45,535 square miles of land. This gave to the United States the unbroken possession of the entire continent from ocean to ocean and from the lakes to the gulf.

In 1867 we acquired Alaska from Russia at a cost of \$7,200,000. Russia claims that her ceded possession was worth vastly more than the sum stipulated, and that nothing could have induced her to part with it at that sum but her friendship for the United States. With the annexation of Alaska we acquired 577,390 square miles of territory. When the American flag was raised over Hawaii several months ago, in response to the treaty of that archipelago, we acquired 2,000 square miles of territory; and again, when Porto Rico was recently annexed, in consequence of the late war with Spain, we added 3,000 square miles to our national domain. Before we have fully gathered the harvest which is now ready for the sickle we may be in possession of Cuba and the Philippines, but enough until that time comes.

Recapitulating we find that we have made the following acquisition since achieving our independence. The Louisiana purchase 1,171,931 square miles in 1803; the Florida purchase 59,268 square miles in 1819; the annexation of Texas, 376,183 square miles, in 1845; the Mexican cession 545,783 square miles, in 1848; the Gadsden purchase 45,535 square miles in 1853; the Alaska purchase 577,390 square miles in 1867; the Hawaiian annexation, 2,000 square miles in 1898, and the Porto Rican annexation, 3,000 square miles in 1898. The aggregate our acquisition of territory since 1783 foot up 2,891,540 square miles, which, added to the original area of the national domain—827,844 square miles—makes the present area 3,719,384 square miles. We have not included in this table of acquisitions such islands as Guam and others, as they add but little to the area of the country, although important in other respects.

## WEDS HIS MOTHER IN LAW.

Shelby Man Says He is Going to Keep in the Family.

Emirence, Ky., Oct. 27.—News has just reached here to the effect that John Tracey of Peytona, Shelby county, who some years ago married Miss Annie Findee, who died, leaving him two children, has embarked upon another matrimonial venture. Recently he married Mrs. Frances Findee, his mother in law, aged 60 years. The groom is 38 years old, and now has a stepson aged 40 years who is also his brother in law. Up on being questioned as to why he married his mother in law and not one of his sisters in law, he responded: "I like the family, and should I outlive my present wife I will then marry my oldest sister in law, and should she die I will then marry the next one, as I do not intend that another man shall get into the family if I can help it."

## ANOTHER SPAR MILL.

The St. Louis Spar Company To Erect One at Crayneville.

Mr. Waggoner, Superintendent for the St. Louis Spar Company, tells us that his company is preparing to erect a spar mill at Crayneville. This company now has about six men on its pay roll, and is getting out spar at the Tabb mines and at Hodge. About five cars per month of the Tabb spar is shipped to New York where it is used solely for the manufacture of nitric acid. It is also being shipped weekly to St. Louis and Chicago. The product of this mine is 98 per cent. pure, and in this respect is the equal of any spar mined in the country. Most of this company's shipments are now made from Crayneville, but a 1000 tons will be placed near the railroad at Annora for winter shipment when the roads are too muddy for hauling.

"Is the spar of this county as good commercially as that of Rosi Clare, Ill?" is a question Mr. Waggoner answered as follows: It is equally as good in every way, and then mining in Crittenden county is more profitable than at the Rosi Clare mines, here we can ship on the railroad all the year 'round, and can ship in bulk without going to the expense of barreling, while the river shipments must all be barreled, and then navigation is too uncertain.

"How is the Hodge mines holding out?"

"We have gone down eighty feet and the vein is just as large and the spar just as good as at the surface."

At the Tabb mines we are working in the shaft sunk by Capt. Brown. This shaft is, perhaps three-fourths full of water, at the water line we began drifting and are getting out fine spar, and our prospects there could scarcely be better."

The two spar companies have pretty fair pay rolls already, but the interest and enthusiasm manifested by the two companies leads one to conjecture that spar mining in the county is just in its infancy, and that it will grow rapidly and develop, within the next few years, to an extent that will bring a vast amount of money in the county.

## A Road Grader.

Mr. J. G. Rochester has made arrangements for a road grader to do some work near town Nov. 10. The street leading from the old creamery site north and then the public road to Mrs. Rochester's farm will be graded. Mr. Rochester would be glad to have the magistrates of the county present that day to see the grader work.

## Want Tobacco.

Messrs. Blue & Woods, the well known tobacco firm of this place, will buy extensively this year. They have employed Mr. J. C. Elder, Jr., an experienced tobacco man, to assist in buying and handling. Mr. Elder came home from Carmi, Ill., last week and began work for the firm at once. This firm is one of the best on the market. All of them are tobacco men and their dealings with the people have always been satisfactory. Their buyer will be to see you if you have the weed for sale, and will pay the best price the market justifies.

## Chandler—Allen.

Wednesday, Oct. 26, at the residence of C. W. Allen, in the presence of a host of friends, Mr. Jeff. Chandler and Miss Minnie M. Allen were united in the holy bonds of matrimony. Rev. Both have friends by the score to wish them a long and prosperous life.

## A Friend.

Stewart—Dean. Surprise weddings seem to be the fashion in Marion this year. Last Thursday evening Mr. J. S. Stewart the photographer, and Mrs. Cora Dean gave their friends a pleasant surprise by a quiet, unexpected wedding. The ceremony was performed by Rev. James F. Price at his home. The bride was a beautiful young widow, whose home was in the Iron Hill neighborhood, and she is a daughter of Mr. E. P. Hill, one of the best farmers of that section, and a leading citizen of the county. She is noted for her beauty and charming manners and amiable disposition. The groom has been in the photograph business in Marion for a number of years, and has many friends throughout the county, who join with the Press in congratulating him and his bonnie bride.

## RACE WAR.

The Election in North Carolina Assumes a Serious Shape.

Washington, Oct. 31.—The result of the election in North Carolina will be looked for with more interest than perhaps any other state this fall. The issue is not upon any of the ordinary political lines. It is a fight for supremacy between two races—the whites and the blacks.

The situation there does not grow less grave in spite of the fact that President McKinley has used his influence to allay bitter feeling there.

The trouble in North Carolina is the direct result of the recent fusions between the Populist and Republicans by which the control of the State and most of the counties was wrested from the Democrats. Forty eight per cent. of the officers—Federal, State, county and municipal, are now filled by negroes and if the fusions carry the coming elections this percentage will be increased. Gov. Russell who has built himself up politically by appointing negroes to office, is particularly offensive to the whites.

President McKinley comes in for a good deal of criticism under the same head for recognizing the colored Republicans impartially with the whites.

The city of Wilmington which is the storm center of the present campaign, suffers the indignity of ten negro policemen, forty six negro magistrates and twelve negro letter carriers which is four or five times the number of the whites. White offenders are liable to arrest by negro police men and be tried by negro magistrates, a thing insufferable to the white man of any class.

While Wilmington is the storm center, the other sections of the State have become infected with the fear of negro domination, and in the East as well as the West the cry is heard every night on the street corners, "Down with the negro," "No negro domination." Senator Pritchard, who has done more than any other Republican in the State to bring about this condition of affairs, has become stammered and wants federal troops sent into the State. This will be sure to bring about bloodshed, and Gov. Russell, who is a man of naturally low instincts, has at least the hardihood to resist this plea, and up to the present time has declined to ask for troops. He says he will not do so, for that would be a guarantee of a race war, and bring about a clash between the State and federal authorities.

The Republican managers here say the fight in North Carolina is having its effect in States in the West. The negro has become more repulsive to the Northwest than he can ever be in the South. The people of the latter section want them but will control them. The people of Illinois, for instance, neither want them nor will they have them. The action of Governor Tanner in Illinois has prevented the negro from being a party issue in this election, save in a local way. His threat to meet imported negroes with Gatling guns, and burning the bodies of the victims, has outstripped anything done or threatened in the South. When the State of Abraham Lincoln takes the stand, what can be said against North Carolina?

## Col. Bryan's Illness

Savannah, Ga., Oct. 28.—Col. William Jennings Bryan continues quite ill in his room at the De Soto hotel. His regiment, the Third Nebraska, has been here for two days, but he has not been able to see any of his officers or discuss its affairs.

## A Family Affair.

Some of our preschoolers might profit by this: A preacher in a near by town is said to have announced that he would discuss a family scandal from his pulpit, and as a result every seat in his church was filled long before the time for church service, many standing up in the aisle and a look of satisfaction on the face of the entire congregation. The shrewd master of the flock then discoursed on Adam and Eve and the serpent—Full Tilt Guard.

Admiral Dewey informs the Government that Spain has been shipping munitions of war to the Philippines since the signing of the protocol. This information justifies the sending of the Oregon and Iowa to Manila.

Major Gen. Joseph C. Breckinridge is said to be greatly humiliated at the action of the President in ordering him mustered out of the volunteer service. When Gen. Breckinridge reached Washington he called upon the President but was not received. Gen. Breckinridge's loss of favor is due to his honesty in making a truthful report of mismanagement of the camps and campaign.—Courier Journal.

Perry, O. T., Oct. 30.—The white citizens of the Indian Territory are devising some means of preventing a wholesale influx of negroes to their territory. They fear a clash between the Indians and negroes. A. G. Wisdom, in his report recently sent to Washington, says: "I have received information that there is liable to be an influx of negroes into this territory, which may assume alarming proportions and provoke a racial issue to be deprecated by every lover of law and order."

"History of the Spanish-American War," By Henry Watterson.

The above is the title of a superbly illustrated, richly bound volume, issued by The Werner Company, Akron, Ohio. It is the only authentic history of the Spanish-American war that has to far come to our notice. All the others have, in the main, been merely revamped histories of the Cuban War, with some illustrations and a few chapters about the Spanish American War. Of course anything written by Henry Watterson would be readable. He, above all other men in America, is fitted by training and experience to write a history of this war, which has brought world wide glory and renown to our arms. Every line of the book breathes an enthusiastic spirit of patriotism that is exhilarating and inspiring.

The work contains 650 pages, a large number of full page half tones together with many double page illustrations in ten colors. It is sold by subscription and will undoubtedly prove a money maker to every intelligent salesman.

Tabler's Buckeye Pile Ointment relieves the intense itching. It soothes it, it cures chronic cases when surgeons fail. It is a scientific certainty, its sales increase through its cures, it is no experiment. Every bottle guaranteed. 50c; tubes 75 cents, at Orme's drug store.

ONE YEAR - ONE DOLLAR

A race war seems to be on every where.

Fusion has not worked well in North Carolina.

It seems that we are to buy the Philippines after all.

The managers of both parties are vigorously claiming a majority in next Congress.

Remember that next Tuesday is the election. Let Bryan men go out and vote for a Bryan man.

Evacuation day has not been agreed upon by the Cuban commission yet, but outside authority names January 1.

Should the Democrats elect a majority of the members of Congress to be chosen next Tuesday, there will be some investigating of war management worth mentioning.

In the customary style, President McKinley has named Thursday, November 24, as Thanksgiving. Gov. Bradley, as is customary, also issued a proclamation, but instead of the usual form the Governor briefly says: "Thursday, the 24th day of November next, is hereby set apart as a day of thanksgiving and prayer."

With Hon. Olhe. James on the stump, loyally advocating the election of his friend, Congressman Wheeler, and the Crittenden Press, one of the best Democratic papers in the district, and the staunch supporter of its fellow townsmen, and a faithful representative of his closest friends, giving Mr. Wheeler its full support, the Register might as well quit insulting the James constituency by classing them in the list of the few disgruntled has-beens with itself. Paducah News.

## Suffered 20 Years.

Mrs. MARY LEWIS, wife of a prominent farmer, and well known by all old residents near Belmont, N. Y. writes: "For twenty-seven years I had been a constant sufferer from nervous prostration, and paid large sums of money for doctors and advertised remedies without benefit. Three years ago my condition was alarming; the least noise would startle and unnerve me. I was unable to sleep, had a number of sinking spells and slowly grew weaker. I began using Dr. Miller's Restorative Nervine and Nerve and Liver Pills. At first the medicine seemed to have no effect, but after taking a few bottles I began to notice a change; I rested better at night, my appetite began to improve and I rapidly grew better, until now I am as nearly restored to health as one of my age may expect. God bless Dr. Miller's Nervine."

Dr. Miller's Restorative Nervine and Nerve and Liver Pills are sold by all drug stores under a positive guarantee, first bottle benefits or money refunded. Book on diseases of the heart and nerves free. Address: DR. MILLER MEDICAL CO., Elkhart, Ind.

The Paducah Register need do no worrying about Olhe. James and his friends. If it would follow his advice and that of his friends it would support the Democratic ticket.

Mr. W. B. Haldeman, general manager of the Courier-Journal, has given to an anxious public a letter explaining why he supports Oscar Turner, a free silver man, for Congress. To sum up his reasons for supporting Turner against a gold-standard Republican, Mr. Haldeman says Walter Evans has never shown the slightest disposition to recognize the vote of the sound-money Democrats. So it is "recognition," after all that the "sound-money" Courier-Journal wants. It has been generally understood that the Courier-Journal was fighting against any compromise with "dishonor, sab," but here we have in from the general manager that no sound-money Democrat has been recognized by the gold standard congressman, and therefore the high cockalorum of the paper turns his back upon the representative of his principles and propose to compromise with "dishonor, sab." What next?

Here it is, red hot from Mr. Haldeman: "As between Mr. McKinley and Mr. Bryan, I do not believe that even you, Mr. Bonnie, would hesitate for a moment, after a year and a half of Mr. McKinley, to turn to Mr. Bryan, with the vagaries which he himself will turn from. If Mr. McKinley and Mr. Bryan are the nominees of their respective parties in 1900, I shall certainly vote for Mr. Bryan, as I believe him to be an honest, upright man."

Our esteemed friend of the Smithland Banner declares that he does not hold a commission in the army. We are surprised at this, because somebody is holding back information that the investigating committee ought to have had; somebody refused to apply the pruning knife or insert the lance at the proper time, that the body politic might be healthier, and the necessity for unnecessary fighting obviated, and we thought it was Bill. But then Bill says he has been "at the front all the while." If Bill had exercised a little prudence and forethought in the organization of the army, and had kept the call for volunteers in statue quo, the gallant leader would have had a better organized army, and the demand for "rough riders" at the front would have been less. This thing of getting up a war in order to bring about standing on the firing line is considered unwise by prudent people. An ounce of preventive has saved many pounds of life.

Experiments conducted under the auspices of the Department of Agriculture for a couple of years are said to indicate that hog cholera, or swine plague, can be treated with success and with comparatively little expense. According to Dr. Salmon, of the Bureau of Animal Industry, 80 per cent. of the hogs treated in droves have been saved, while in the droves affected with cholera, but not given the serum treatment employed by the Department, 80 per cent. were lost. Last year the experiments resulted in a loss of 22 per cent. and this year the loss amounted to only 19 per cent. In the view of Dr. Salmon there is no question of the effectiveness of serum treatment, which now takes rank as a proved success. This is a matter of very great interest to the farmers of the country who raise live stock, for according to one estimate, the hog raisers of the United States lost \$15,000,000 in the year 1896 through the ravages of hog cholera, an amount the bulk of which might seemingly have been saved through the application of the serum treatment.

Rev. Archibald, the new pastor of the M. E. church, preached here Sunday.

Six severe cases of typhoid fever in town, with but little improvement.

Mrs. M. J. Wyatt died Monday at 7 a. m. of pneumonia after a week's suffering.

Mrs. Dobson died last week. She was quite old and had been in bad health for some time past.

A. S. Threlkeld and wife have been with their son in Indiana, for several weeks, who is sick and with no hope of his recovery.

Messieurs Bugg and Deboe have employed an expert hat trimmer, who can please the most fastidious. Give them a call and be convinced.

### FRANCES.

Mrs. Ida Dalton is very ill with typhoid.

The wheat sowing is crippling the schools.

Bro. Eaton is engaged in a meeting at Caseyville.

Bro. Holloway, of Lamasco, is holding a meeting here.

Bob Gibbs has been quite ill for several days but is better.

G. L. Whitt will have over 800 bushels of sweet potatoes this year.

John Matthews and family attended the Paris reunion last Friday, returning Monday.

Mr. Gregston, of Dulaney, will teach a large class in vocal music at Caldwell Springs.

S. H. Lee attended the Grand Lodge of Masons at Louisville this year, from Liberty Lodge.

Tom Rawhoof, aged 13 years, was brown from a horse Sunday and sustained injuries on the head that will doubtless prove fatal.

Mr. Tom Brown and Miss Lida Sanderland were married last Sunday evening. May they always sail o'er flowery seas.

Mr. Will McMill will not visit the banks of Livingston for Ivy any more, alas! Will, you are to be a bachelor.

The time has arrived for 'possums "punkin' pies," candy pullings, and protracted meetings, and we have our quota already.

The divorce mill is being patronized by our ladies to the extent that after the November court there will be several of the "old boys" turned out into the cold wintry blast alone.

The Emmaus scribe made a thrust at the Frances good people in last week's Press. I will say by way of explanation, that our people know nothing against Bro. Kingsolving any worse than being caught in the company of the Emmaus quill driver, the previous second Sunday; and a good sized crowd turned out at the last appointment, at their regular hour for worship, and the preacher was gone. Our people meant no disrespect to the brother and we deplore the attempt of Richard Harding Davis to stir up discord among our "rural folk." If you will keep your matrimonial boom alive, you will do well, Mr. Scribbler.

## ALL DEMANDED THE PHILIPPINES.

Demand By This Country, and the Spaniards Must Give Them Up

Paris, Oct. 31.—The American Commissioners presented a written expression of the purpose of the United States to take the entire group of Philippine Islands, and to assume such proportion of the Philippine debt as has been spent for the benefit of the islands or their inhabitants, in public works, improvement and permanent betterments.

It was also set forth that the United States would not assume any part of the Philippine debt which had been incurred by Spain for the furtherance of military or naval operations to quell insurrections of the natives.

The session was adjourned until Friday, in order to give the Spaniards time to prepare a reply.

## UNCLE SAM AS A LAND OWNER.

Multi-Millionaire in City Property and Billions in Country Lands.

Washington, Oct. 27.—So much has recently been said and written about Uncle Sam as a world power, and his marvelous industrial, commercial, financial, military and naval prestige, that one is apt to overlook his eminent rank as a real estate owner. He not only owns real property in every one of the fifty states and territories, but in 281 of the principal cities. He is a multi-millionaire in city property, and a billionsire in country lands. His holdings of both classes amount to over \$1,700,000,000 in value. He rules over two domains—the national, which he simply supervises, and the public which he owns and controls and which is subject to his disposition.

For instance, the acquisition of Texas made that state a part of the national domain, but it lands never became a part of the public domain or property of the United States, for the reason that by treaty Texas retained their ownership and control.

The city property of the United States consists of custom houses, post-offices, courthouses, marine hospitals and other public buildings and reservations.

The record of Uncle Sam's municipal investments in nine principal cities up to the close of the last fiscal year were as follows:

Building.	Sites.
Chicago	\$1,129,000 \$1,340,000
New York	13,716,000 2,883,000
Philadelphia	5,786,000 2,439,000
Boston	6,366,000 1,459,000
St. Louis	6,739,000 405,000
Cincinnati	5,215,000 758,000
San Francisco	4,200,000 1,580,000
New Orleans	5,586,000 35,000

In this list, Chicago is a tail-ender, but it is even worse off when compared with the city of Washington. Here at the capital, Uncle Sam has real property holdings, aggregating the enormous sum of \$294,764,628.

This is double his real estate holdings in the other 280 municipalities, where his combined investments are estimated at \$113,000,000.

## A Brave Deed.

Scientific American.

Few of our readers are aware that our war ships carry boiler makers who are often called upon to perform perilous feats in repairs, and in cases of emergency, these men go inside the boiler or furnace, which but a few minutes before had been filled with boiling water or red hot coal. There is no task too dangerous for these men to do. One of them undoubtedly saved the Castine from destruction in the harbor of San Juan. The Castine went into action under full speed, the furnaces were heated to the highest degree, forced draught being used. Without warning a fierce hissing noise was heard inside one of the furnaces. A socket bolt in a back connection at the farthest interior extremity of the furnace had become loose, springing a leak. The steam was pouring in upon the fire, threatening in a few minutes to put it out and stop the progress of the vessel, if it did not cause a terrific explosion. All in the boiler room knew that, unless this hole was stopped disaster was at hand. One of the boiler makers named Huntley, ordered the forced draught turned off and the fires banked. Taking a plank he threw it into the furnace on the top of the wet black coal with which the fire had been banked, and then climbed far back to the place where the steam was rushing through the loosened socket. For three minutes he remained inside the furnace. His friends drew him out of the door; the forced draught was turned on, and in a few minutes the ship was proceeding on her way as if nothing had happened.

In view of such deeds as this there is little wonder that the engineering corps in our navy is receiving the highest praise on every side.

## HALLOW'E'N PARTY.

An Enjoyable Social Event in Observance of the Anniversary.

Last Monday was All Soul's day, and Monday evening was "Holler eve" or more properly "Hallow'e'n." It is the night before All Saints day, and is the one night in the year when the young lads and lasses vow to have their unrestricted fun.

Marion has not been behind this year in a proper observance of the anniversary, which was celebrated at the handsome residence of Mr. John W. Wilson in a style rarely witnessed in our town, and which reflected infinite credit upon the young ladies who engineered it to so successful a termination.

The house and rooms were beautifully decorated with flowers, evergreens and mistletoe, while the entrance to this bower of beauty was guarded by two grinning death heads but without the flaming sword.

The "glass of fashion and the mould of form," in the shape of some thirty or more of Marion's beautiful girls and handsome young gentlemen were assembled to grace the occasion, and the evening passed joyously with appropriate games and the assistance of a genuine gypsy fortune teller, as impersonated by Miss Alice Browning. Miss Alice scattered fortunes, both good and bad, with strict impartiality and so perfect was her "got up" that but few penetrated the incognito.

About 10 o'clock an elegant supper was served, and as handsomely enjoyed.

Below are the names of the fortunate revelers:

Maudie Roney	Sam Gugenheim
Kittie Woods	W. H. Clark
Lucy Walker	E. H. Doss
Dell Barnes	Tom Clifton
Ruby James	Jesse Crawford
Ray Woods	E. D. Gray
Pearl Cook	Dean Woods

Alice Browning	Ferry Maxwell
Miss Barnes	Mr. and Mrs. Johnson

**SUCCESSFUL OPERATION.**

Performed Upon a Young Lady Blind Fourteen Years.

Dr. A. H. Edwards performed a wonderful operation today which brought sight to the eyes of Miss Edna Stone, of Tolu, Crittenden county. Miss Stone is now 19 years old. When she was five years old a spell of sickness left her blind, the pupils of both eyes being closed. Dr. Edwards created an artificial pupil and Miss Stone is now able to see objects several feet away.

Dr. Edwards said that while she probably never be able to see well enough to read, that her eyesight will enable her to go out without assistance and to transact the ordinary household duties.—Paducah News.

Miss Stone is the daughter of Mr. C. W. Stone, a well known contractor and builder. Miss Stone attended the school for the blind at Louisville several terms, and she and her friends had abandoned all hope of a restoration of the eyesight. The Press, as well as Mr. Stone's other friends rejoice to hear of this good fortune.

**Ollie and Ben.**

The debate last Monday afternoon probably ended the political career of Uncle Ben Keys. When Ollie James delivered his funeral oration over Uncle Ben's political corpse it was whispered in awed tones that there would be no attempt at resurrection.—Murray Ledger.

Anybody that knows Ollie can imagine how Uncle Ben suffered in the death from the thrusts of the giant from Crittenden.—Murray Times.

**Three Doctors in Consultation.**

From Benjamin Franklin.

"When you are sick what you like best is to be chosen for a medicine in the first place; what experience tells you is best, to be chosen in the second place; what reason, i. e. Theory, says is best is to be chosen in the last place. But if you can get Dr. Inclination, Dr. Experience and Dr. Reason to hold a consultation together, they will give you the best advice that can be taken."

When you have a bad cold Dr. Inclination would recommend Chamberlain's Cough Remedy because it is safe and pleasant to take. Dr. Experience would recommend him because it never fails to effect a speedy and permanent cure. Dr. Reason would recommend it because it is prepared on scientific principles, and acts on nature's plan in relieving the lungs, opening the secretions and restoring the system to a natural and healthy condition. ## BIG TOBACCO DEAL.

A. C. Tompkins Buys 225 Hogheads From the Massies.

A big tobacco deal was recently closed in Owensboro, whereby Mr. A. C. Tompkins purchased from Massie Bros., 225 hogheads of leaf tobacco stored in one of the Louisville tobacco warehouses. The total sum paid for the tobacco was about \$24,000. Averaging the hogheads at 1200 pounds each, the usual weight of a leaf tobacco hoghead, the price paid is a little over seven cents per pound.

The entire purchase was prior leaf, picked and in fine condition. It had been carefully picked and all faulty leaves removed. It was all stripped, and in just the proper condition for the export trade.—Messenger.

**Ed Threlkeld Dead.**

Mr. Ed. Threlkeld died at the home of his father, Mr. A. S. Threlkeld, in Fredonia Tuesday, and will be buried with Masonic honors at Caldwell Springs today.

Mr. Threlkeld was born and partially raised in Marion, and has many friends throughout this section, who will regret his death. For a number of years he has been stationed as depot agent at New Salisbury, Ind. He was a splendid business man, as well as an excellent citizen every way.

**THE WASHINGTON TRIAL.**

Wednesday court convened with Judge Rochester on the bench for the purpose of making an examination into the killing of Scott by Marshal Washington of Dycusburg. Both sides announced ready. Under order of the court all the witnesses except the one under examination were excluded from the court room.

As we go to press the trial is still in progress, and will probably not be finished until today.

**Board—Smith.**

Married at Deer Creek church, on the 26th October Mr. John O. Beard and Miss Nannie Smith, in the presence of a host of friends and well-wishers. They and their attendants were beautifully arrayed and presented a charming appearance. The pastor officiated.

**The Companion's First Subscribers.**

The Youth's Companion is probably the only periodical in the world seventy two years of age, whose first subscriber is still living and still a constant reader of the paper. The subscriber who enjoys this unique distinction is Mrs. Hannah M. Parsons, of Brooklyn, New York, now in the 85th year. She was the little sister of a friend of Nathaniel Willis, father of N. P. Willis the poet, and founder of the Youth's Companion. When Mr. Willis had resolved upon publishing a new paper for young people his friend had him put down his sister's name as his first subscriber. The Companion's first issue was dated April 16, 1827, and for more than 70 years this first subscriber has continued to read and enjoy it. The volume for 1899 will be the best The Companion has ever published. The most popular of living writers will give the best work of their best hours to the entertainment of the hundreds of thousands of the households in which The Youth's Companion is every week a welcome guest.

New subscribers will receive all the remaining issues of 1898 free from the time of subscription, and the beautiful Companion Calendar for 1899—the most beautiful one ever given to Companion readers—in addition to The Companion for 52 weeks, a full year, to January 1900.

**THE ROMANCE OF THE SEACOAST.** A series of thrilling articles of little-known phases of life along the Atlantic coast.

**—The Lights Along the Shore.** Will describe the wonderful changes in lighting, and of the perfect system by which our Government takes charge of the thousand and more light-houses of the nation.

**II—When the Fisher Fleet Goes Out to Sea.** The thrilling dangers of a class seldom heard of—the Nova Scotia fishermen in their daily lives, their hardships and sufferings.

**III—With the Life-Savers Along the Coast.** Will tell of the everyday lives of those brave men who care death and darkness in their angriest forms—showing the workings of a system that saves thousands of lives yearly.

**IV—The Men Who Wreck Ships.** It is popularly supposed that wreckers no longer exist; this article will tell of well-organized bands of wreckers who lure on to rocks, by means of false signals, rich vessels for the sake of their treasures.

**V—Perils of the Smuggler's Life.** The risks that are taken nightly against the Customs officials—a business that is much larger to-day than it is supposed to be.

The illustrations in this series will be the most striking that have ever appeared in the Post.

**MEN, WOMEN OF THE HOUR.** Clove-Range Studies of Contemporaries. The title of a weekly page that displays at a glance the panorama of people prominently before the public—portraits and paragraphs that tell the week's history among the notables.

**POPULAR BIOGRAPHIES.** The Post will give, in the course of the year, thousands of brief biographies, and sketches of its writers and authors, illustrated wherever possible with photographic portraits of the nation.

**THE BEST POEMS IN THE WORLD.** The poems in this series will be admirably illustrated, and, whenever possible, there will be given a sketch of the life of the poet, with a portrait, and the story of how each poem came to be written. The poems will be selected, not from the standpoint of the ultra-literary man or woman, but for their appeal to lovers of sentiment. They will be poems of the emotions—those that appeal to the heart; poems that tell a story—those that are filled with human interest. They belong to what may be called the "pocketbook school of poetry"—those poems that one cuts from a newspaper and carries in the pocketbook till they are worn through at the creases.

**THE SATURDAY EVENING POST WILL BE MAILED TO ANY ADDRESS FROM NOW TO JANUARY 1, 1899, ON RECEIPT OF ONLY TEN CENTS.**

THE REGULAR SUBSCRIPTION PRICE IS \$2.50 PER YEAR.

**How to Prevent Croup.**

We have two children who are subject to attacks of croup. Whenever an attack is coming on my wife gives them Chamberlain's Cough Remedy, and it always prevents the attack. It is a household necessity in this country, and no matter what else we run out of it would not do to be without Chamberlain's Cough Remedy. More of it is sold here than of all other cough medicines combined.—J. M. Nickle, at Nickle Bros. merchants, Nickleville, Penn. For sale by J. H. Orme.

**New Pension Claimants.**

Up to Tuesday 2,000 claims for pensions have been filed by soldiers and sailors and their dependents on account of the war with Spain. Of this number seventy were for victims of the Maine.

The Spanish war pension claims will very soon be placed in a division of their own in the bureau," said Colonel Dalton, chief of the old war and navy division, "but at present they have been assigned to this end of the department by the commission. At the present rate there will be ten thousand claims turned in for the nation's latest struggle within a very few months. Twenty thousand claims for even more may be predicted. The claims so far presented are of all kinds, from the soldier who was injured to the dependent father, mother, sister and brother of the men who fell before Spanish bullets or succumbed to the no less deadly fever of Cuba."

**POOR HOUSE TO LET.**

We will until 2 p. m. Nov. 14, 1898, receive sealed bids for the keeping of the county paupers and rent of the poor house farm.

**NOTICE**

To The Tax Payers of Crittenden County.

In my first notice to you in the Press I stated to you that I would have appointments for the purpose of collecting your tax as the law directs, and if not paid at those appointments I would put a man in each precinct to collect or levy for all tax due me (or the year 1898). So when circuit court is over you may look out for the man to come if not settled.

## Scrofula is Snake-Like

In its subtlety. It lies hidden for years in the ambush of the blood, and when it strikes it voids its venom alike on strength and beauty, disfiguring the one and undermining the other.

## Ayer's Sarsaparilla

is a specific for scrofula in its worst and most malignant forms. Scrofula is a blood disease. Ayer's Sarsaparilla is a blood purifying medicine. Mineral medicines only drive scrofula below the surface. Dr. J. C. Ayer's Sarsaparilla is a vegetable remedy and it eradicates the disease. There is no remedy for scrofula equal to Ayer's Sarsaparilla.

"I was cured of a long-standing case of scrofula by Dr. J. C. Ayer's Sarsaparilla. The disease first manifested itself when I was a child, by breaking out in red blotches all over my body. I was not free from the trouble until I took several bottles of Ayer's Sarsaparilla. That effected a permanent cure."—Miss L. E. Stevens, Leighton, Pa.

## BEST DIAMOND IN THE WORLD.

A Million Dollar Gift to Pope Leo From Oom Paul.

Oom Paul Kruger, President of the Transvaal, recently purchased the big gem diamond in the world, worth at least \$1,000,000, and sent it to Pope Leo XIII.

The Pope has, on several conspicuous occasions during the last 20 years, made a bold stand for peace in the face of opposing nations, and though his advice has not always been heeded, his policy has been universally commended.

To show how thoroughly nations and particularly the rulers of nations, approve of the efforts of the most powerful church father in the world to secure a condition of brotherly love all over the world, it is only necessary to mention a few of the magnificent gifts which have been sent to the Pope. In twenty years the Pope has received \$10,000,000 in diamonds. The diamond from President Kruger would bring a million any day, and probably if placed on sale would bring from more ambitious multi-millionaires even more than that. The ruby and diamond ring given to the Pope by the Sultan of Turkey, himself a Mohammedan, cost \$100,000, and the jeweled toilet service from the Shah cost \$700,000. Besides these are many other famous gifts.

On one occasion Queen Victoria, being especially grateful to his holiness for a favor, sent him a pectoral cross with a single large diamond in the center valued at \$200,000.

Another time the Catholics of the United States made up a purse and sent a diamond worth \$200,000. It must not be supposed that Pope Leo has even requested any of these gifts or even signified his desire for jewels. He is the plainest man in the world, perhaps the only one who does not wear any ornaments, except those that decorate his church garments, which for high services are always embroidered with the most costly gems, but papal cap and robes have descended to him from centuries, and no additions have been added.

It was to show their appreciation of him that the rulers sent these precious jewels. Knowing that they could not present the Pope with anything that would be of personal interest to him they selected jewels which they knew would be of intrinsic value and would be of great service to the gratification and best wishes for his long life.

The Emperor of Austria once sent a gold casket, largely traced in precious enamel. The casket was valued at \$100,000, yet in contained nothing. The Pope used the casket for his diamond crosses. Three magnificent pieces reposed in the casket. One of these was the United States cross and another was the Victoria cross, and another was a cross sent him from one of the richest women in the United States, who spent \$150,000 for a plain gold cross with diamonds at the points.

The Queen Regent of Spain, wishing to remember his holiness, purchased with money out of the royal coffers, a chalice costing \$200,000, and

Our little boy was afflicted with rheumatism in his knee, and at times unable to put his foot to the floor. We tried in vain everything that we could hear of that we thought would help him, and almost gave up in despair when some one advised us to try Chamberlain's Pain Balm. We did so and the first bottle gave so much relief that we got a second one, and to our surprise it cured him sound and well.—J. T. Bay, pastor of Christian church, Neodesha, Kan. For sale at Orme's.

in the chalice little Alfonso laid the largest diamond he owned. The Spanish cabinet allowed him to present it to the Pope and his own baby fingers selected it.

Besides these beautiful presents the Pope has received many contributions in solid gold. One of these, during the Queen's jubilee, amounted to \$3,000, and on his birthday, a year ago, he received \$200,000 in gold pieces. None of this money has been spent by the Pope and it is thought that he has some project for disposing of it at his death.

In legacies during the last twenty years, the Pope has received from wealthy Catholics a gift of \$22,000,000, and in money gifts from individuals he has received \$4,000,000.

In the Vatican there is a souvenir room which is one of the Pope's sitting rooms and here there are gifts from the Presidents of the United States, from Central and South American republics, from Indian princes, and from native chiefs of Oceania. They have sent him pieces of rare wood and trophies of various kind, one of these being an alleged autograph of Columbus.

If Pope Leo had selected a method by which he could popularize himself with the rulers of the world, Mohammedans, Brahmins, Hebrews and Christians alike, he could not have decided upon a more successful policy than that of peace. All the world loves a peaceful disposition, and when that disposition is in a high place the world rewards it by substantial gifts and trophies.

The diamond presented by President Kruger to the Pope has an interesting history. It was originally owned by Chaka, King of the Zulus, and had been in his family for generations. At Chaka's death it passed in to the possession of Memela, a head man or chief of the blacks. In 1848 when the English and Boers were fighting for control of Central Africa Memela had become a slave of the Boers. They treated him harshly and Kruger, who was then a young man of unimportant station, took the old chief's part and assisted him to escape. In return for this kindness the Zulu gave the big diamond to young Kruger, and it has been held by the latter ever since.

### How to Dehorn Cattle.

Chas. E. Barker, a prosperous young farmer of Christian county, Kentucky, writes as follows on the subject of dehorning cattle: "About five years ago my father, who has a herd of nice Devon cattle, asked me to go into an adjoining country and see how they dehorned, and do some for him. I found the place where the operation was performed by the small 100 yards from it, and on closer inspection, appearance of a slaughter house. The walls, ceiling and joists were covered with blood that had spurted out when horns were taken off. I saw the cattle standing with heads hanging down, with appearance of indifference as to whether the next operation should be the block or not. I told my father he must get some one else to dehorn for him if he had it done, as I would not practice so cruel a treatment. That season when I marked some calves two for four months old, I cut out the little button of horn with my pocket knife, just as I would cut a rotten spot out of an apple. It did not hurt them much and bled very little, and since then I have cut out all the little knobs as soon as they made appearance. I have never had to repeat the operation, and I never saw nicer, smoother polled cattle than I can show you in pure Devon-shorthorn and pure Shorthorn. Paring out the knobs at two to four months old makes as nice polled cattle as any polled breed."—Breeder and Horseman.

### He'll Get On.

"Gimme six pounds of sugar," demanded a small boy, rushing into grocery store in breathless haste. "Four cents a pound, that will be twenty four cents," said the man behind the counter as he tied up his package.

### Always Delicate

Child Was Nervous and Irritable and Had No Appetite

Hood's Sarsaparilla Has Changed All This—Scrofula Cured.

"Hood's Sarsaparilla has had a wonderful effect on my little daughter. She is five years old and has been very delicate all her life. She was nervous and irritable and had no appetite. A large lump would appear on her neck every few weeks and then would disappear, leaving her very weak. We concluded to give her Hood's Sarsaparilla. At that time there was a lump on her neck. When she had taken one bottle it had disappeared altogether and she seemed like a different child. Instead of being cross and fretful she goes about laughing and singing as merrily as any child. We are very grateful for Hood's Sarsaparilla."—Mrs. J. M. GAMBER, Bardonia, Kentucky.

"Hold on, I want ten pounds of rice—what's that a pound?" "Six cents," answered the man, sixty cents. What else did your mother send for?" "I want eight quarts of beans—what'll they be?" "Beans are fifteen cents—a dollar twenty."

"Now let me have seven pounds of codfish, two pounds and a half of tea, two quarts of vinegar, six dozen eggs and three pecks of potatoes," called out the boy, reading from a memorandum in his hand, and give me a bill of it all please."

When the packages were all done up and the bill ready the grocer handed it over with, "Did your mother send the money, or does she want me to charge them sonny?"

"Mother didn't send for nothing," was the boy's answer as he made for the door. "That's my arithmetic lesson and I had to have the answer or else get licked."—Christian Endeavor World.
