THE HEMLOCKS AT OVERLOOK.

The winds of heaven round us range, nd immemorial sagas tell; While we defy each season's change, Majestic and immutable,

The hours go by in measured march, Each in its drooping druid shroud, While o'er us through the ethereal arch Sail the white argosies of cloud.

We taste the sweetness of the rain: We breast the swirl and lash of snow; God's white sunlight are we fain; The friendship of His stars we know.

Phough we are anchored firm in earth-Deeply our roots in darkness urned— Yet from the moment of our birth Have we intensely upward yearned.

As elemental as the dust, Atoms of the eternal plan, We stand in mute, unwavering trust,

A silent sermon unto man.

The younger was bright, yant, self-satisfied, in love with himself and the world. The elder had a newspaper in his hand, and he ceaselessly rolled and unrolled it, with an intentness that might have been given to the calculation of eclipses or to the evolving of new systems of philosophy. The younger leaned lazily back in his chair with his hands clasped behind his head.

"It was good of you, Howard, to hunt me up as soon as you came back to the city," the elder said for the third time. "I have missed you-I have needed the old companionship-I-somehow, I have seemed to be

In the first place, I was tall, and she liked tall men. Then, I could talk to her about books, and that enabled her to talk about them, too without being at the trouble of reading them herself. Then, I was so deliciously serious, and that refreshed her-and above all, she knew she was perfectly safe with me, for no one would ever be insane enough to dream of our marrying. She laughed a great deal, yet she was vexed that I had spoken and spoiled it all. She had broken her doll, and finding nothing but heart's blood inside it, she threw it away. But men were all alike, she said; they all took themselves so seriously. And then I laughed also, and went out into the night. "Though one-tenth of the available space in the Arlington national cemetery will probably never be occupied by grave sites," explained one of the officials of the cemetery to a Washington Star reporter, "it is surprising how many have been buried there in late years outside of those who came in in consequence of the Spanish-American war. Turk Who Married the Sultan's Sister and

Is Now an Exile. Mahmud Pasha, the sultan's prother-in-law, who has been tried at Constantinople and sentenced to death by default, has been leading a very fugitive and hunted life since the beginning of 1899, when he fled from his native country. On June 15, 1900, says the London Chronicle, we pubished a long and interesting interview with the pasha, who was then living in great luxury at the Hotel Cecil. 'The sultan," he then said, "has been rving to get me arrested and extradited on the trumped-up and utterly baseless charge that I had plotted an attempt on his life, stolen the jewels of my own wife, the sultana, his sister, and inveigled away two of my sonsof whom I have six-in spite of them being minors, which they are not." The immediate cause of his leaving Turkey, said the pasha, was connected with the demand of an Anglo-German syndicate for a concession to prolong the Asia Minor railway from Angora to Bagdad. Mahmud bitterly inveighed against the corruption in high places prevailing at Stamboul, and he mentioned incidentally that the German emperor carried away home with him presents from the sultan to the 'scandalous" amount of a quarter of a million sterling. He is a typical Turk in appearance-of middle size, inclined to corpulence, rather bald, broad of jaw, black-eyed, strong-featured, intelligent, eloquent, subtletrue son of the race of Osman.

Paper Cannon.

Krupp, the great German manufacturer of cannon, has lately completed on my wedding tour. I thought you a number of paper field pieces for the use of the German infantry. Their caliber is little less than two inches held out in both motionless hands, and the pieces are so light that one soldier can easily carry one; but the "Married!" he whispered. On Cheniere Caminada

LL day the red-sailed luggers had lain at anchor in the bay, while the busy fishermen had mended nets. The light-hearted Andre himself, the gayest among them, had warned them not to venture from shore. "There will be a storm, I am afraid," was his laconic warning, given every now and then between the mirth and gibes of his fellow-fishermen. So, as they were to celebrate the betrothal of Andre and of Marie Bizan that night, they remained at shore, in anticipation of the feast that was to

Strange that few noted those clouds portending a storm, for the fisherfolk were usual- wife, with her babe, up the stair, the ly on the alert for such signs. Then dusk came over the island.

When some of the guests were still on their way to Bizan's, a light rain began to fall. "Strange," muttered Glode, as he hurried his family to the friendly lights that gleamed from the windows of the Bizans. But he gasped Glode, "Save yourself with hid his fear, and made merry with the rest. The fiddlers merrily tuned strong. away, the light feet of the dancers | Quick!" He grasped Andre by the never faltered and spirits ran high.

At ten came supper. Old Bizan arose to give the toast. "Friends," said he, "this is truly a happy occasion. And I announce to you the betrothal of Marie and of Andre. You have known her from childhood, all of you. You have seen her grow into the dear, good daughter she is. You have known Andre, and you know him to have proved himself worthy of my Marie. Friends, offer congratulations."

There were shouts of "We do, we do." Then came a call for Andre. "A speech, a speech," some one

Suddenly a tottering figure appeared at the door. It was old Manuel, the fisherman, who had refused to come to the feast. He pointed a wavering finger at Andre. "Yes, Andre, lad, speak, for this is thy last

For a moment indignation ran high. But for the age of the fisherman he would have been unceremoniously elected from the hall. But the aged have ever been respected among the simple folk of Cheniere, and he was tolerated as he had been earlier in the day when he dampened their ardor by discouraging the holding of the feast.

"Oh, stop croaking, Manuel," cried Alcce. "Come, give him some wine, Gaspard, give him some wine. It will warm up his old blood. Then he will sing, instead of croaking." Higher and higher the music rose, and louder and gayer became the guests. Outside the wind blew a gale and the rain came in sheets. And still the mirth went on.

"Let Manuel give us a toast," cried Gaspard, who had proffered the old fisherman the wine at Alcee's sugges-

"Aye, aye," said the hoary Manuel, "a toast it shall be. And not to your fair girl. For never will she be a bride. Never will the wedding feast be known. The bells shall not ring save it be for a corpse that has been taken from the water. For it is written, my brothers, these two shall not wed." The cracked voice became high and clear, the tones were even resonant, so earnest was the speaker.

"Unhappy Manuel," sighed the wife of Bizan. "He has suddenly lost his wits. But why should he come here? For shame, to frighten my little above them. Marie." For Marie had grown white and trembled. Andre, though, sat with clenched fists and grinding teeth. He would settle with old Man- may never change the awful, dreadful

while others quaked with fear. "For I say these two shall not wed," old Manuel's voice went on. "I must die."

Then men jumped to their feet. Old Mme. Bizan screamed.

The guests had risen from the in frightened groups. The wind roared higher and louder than the gave faith to what they termed his angry surf. The rain fell in torrents.

THE CRITTENDEN PRESS The men laughed, uneasily, but with a show of braggadocio. The women must not be frightened, anyway. Marie sat rigid, her hand in Audre's. "Courage, courage, Marie, love!" he whispered. "I knew, too, the storm would come. I said it all day. But it will pass away. Don't mind the gibbering old fool, Manuel. To-morrow it will be over, the sun will shine, the birds will sing and I shall come for you in the evening and we will take the lugger and cross to Grand Isle. We will take Glode and the wife, for only this evening she said she was longing to visit the Petries." And so he cheered her, and she smiled and comforted Glode's wife, and smiled and cooed to the frightened babe lying in its mother's

> Then a fearful thing happened, for a beam shot by the window, on which rode a human figure-a stark, chastly figure. Gaspard, who had been watching at the window, saw it and Marie saw it too, and so did Andre.

> "Heavenly Mother," wailed the girl, as she sank to her knee. "Oh, pity us, pity us, and protect us this deadful night."

Old Manuel had seen it too, revealed in a blinding flash of lightning. "See," he cried, with skeleton finger pointing. "The sea is all about us. We are being swept away. I tell you was the water, and it came in faster and faster, through the cracks of the doors and the fireplace.

"To the attic, the women first," crie Bizan, pushing his wife to the star "To the attic," he thundered. "It the only chance." He drove Glode others following. Marie had flown to Andre's side, and slipped her beads over his wrists.

"If we die, we die together," she

Out on the water, Marie and Andre saw sights that office, quartz miners and mining cormust have turned them gray. Bodies flew past them in the seething black the air. Wild echoes flew over the boat. Every flash of lightning revealed horrors afresh.

Morning dawned, clear and beautiful. The sun, a fiery disk, sent long. glinting lines across the water, and the iridescence was a mockery of some of the hideous objects floating on the waves. A strange stillness hovered over all. Life seemed strangely, suddenly, interrupted. Only the occasional cry of a cat bird was heard. No sound of lowing cattle, no early matin by the noisy swallows.

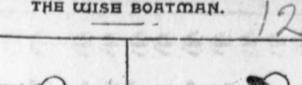

See, there lie two bodies, side by side, with faces upturned to the sunlight. Serene in their last sleep, the unhappy and luckless lovers lie, cast on the beach by the receding waves. Old Manuel was right. "For it is writ, these two shall not wed. Tonight they shall die."

And there, in the graveyard of Cheniere, are among the many new graves two side by side, with a single cross

[To Be Continued.] INDIAN SMOKE SIGNALS.

How the Warriors Communicated with Each Other by Day and by Night.

The traveler on the plains in the early days soon learned the significance of the spires of smoke that he sometimes saw rising from a distant ridge or hill, and that in turn he might see answered from a different direction. It was the signal talk of the Indians across miles of intervening ground, a signal used in rallying the warriors for an attack, or warning them for a retreat if that seemed advisable. The Star Monthly describes some of the signals and their meaning:

The Indian had a way of sending up the smoke in rings or puffs, knowing spent hours in the rain and came in Ohio. that such a smoke column would at once be noticed and understood as a signal, and not taken for the smoke of some camp-fire. He made the rings by covering the little fire with his blanket for a moment and allowing the smoke to ascend, when he instantly covered the fire again. The column of ascending smoke rings said to every Indian within 30 miles: "Look out! There is an enemy near!" Three smokes built close together meant danger. One smoke merely meant attention. Two smokes meant: "Camp at this place." Trave! the plains, and the usefulness of this long-distance telephone will at once pecome apparent.

Sometimes at night the settler or the traveler saw fiery lines crossing the sky, shooting up and falling, perhaps taking a direction diagonal to the lines of vision. He might guess that these were the signals of the Indians, but unless he were an oldtimer he might not be able to interpret the signals. The old-timer and the squaw man knew that one firearrow, an arrow prepared by treating the head of the shaft with gunpowder and fine bark, meant the same as the columns of smoke puffs-"An enemy is near." Two arrows meant: ing his rod to the man he set off in "Danger." Three arrows said imperatively: "This danger is great." Sevproached it, of a disreputable figure too many for us." Thus the untutored savage could telephone fairly well at night as well as in the day-

Rossetti in Self-Defense.

Toward the latter part of Rosetti's life he rarely left his house and garden. He depended upon a close circle of friends for society, and in his own way was a sociable man, but he preferred to see his friends and acquaintances by appointment, and woe betide the too intrusive stranger.

One day an enterprising man called who was duly armed with a letter of introduction, and the servant was nearly yielding to the impulsive stranger, whereupon the painter of "Dante's Dream" leaned over the banister and said in a firm, mellifluous voice: "Tell the gentleman that I am not at home." -Lippincott's Magazine.

[To Be Continued.] INDIAN SMOKE SIGNALS.

How the Warriors Communicated with Each Other by Day and by Night.

The traveler on the plains in the early days soon learned the significance of the spires of smoke that he sometimes saw rising from a distant ridge or hill, and that in turn he might see answered from a different direction. It was the signal talk of the Indians across miles of intervening ground, a signal used in rallying the warriors for an attack, or warning them for a retreat if that seemed advisable. The Star Monthly describes some of the signals and their meaning:

The Indian had a way of sending up the smoke in rings or puffs, knowing spent hours in the rain and came in Ohio. that such a smoke column would at once be noticed and understood as a signal, and not taken for the smoke of some camp-fire. He made the rings by covering the little fire with his blanket for a moment and allowing the smoke to ascend, when he instantly covered the fire again. The column of ascending smoke rings said to every Indian within 30 miles: "Look out! There is an enemy near!" Three smokes built close together meant danger. One smoke merely meant attention. Two smokes meant: "Camp at this place." Trave! the plains, and the usefulness of this long-distance telephone will at once pecome apparent.

Sometimes at night the settler or the traveler saw fiery lines crossing the sky, shooting up and falling, perhaps taking a direction diagonal to the lines of vision. He might guess that these were the signals of the Indians, but unless he were an oldtimer he might not be able to interpret the signals. The old-timer and the squaw man knew that one firearrow, an arrow prepared by treating the head of the shaft with gunpowder and fine bark, meant the same as the columns of smoke puffs-"An enemy is near." Two arrows meant: tively: "This danger is great." Sevtored savage could telephone fairly well at night as well as in the day-

Rossetti in Self-Defense.

Toward the latter part of Rosetti's life he rarely left his house and garden. He depended upon a close circle of friends for society, and in his own way was a sociable man, but he preferred to see his friends and acquaintances by appointment, and woe betide the too intrusive stranger.

One day an enterprising man called who was duly armed with a letter of introduction, and the servant was nearly yielding to the impulsive stranger, whereupon the painter of "Dante's Dream" leaned over the banister and said in a firm, mellifluous voice: "Tell the gentleman that I am not at home." -Lippincott's Magazine.
