Everybody Don't Use the Same Kind of Glasses

It's a pity, too, at times. More of a pity just when such remarkable opportunities are presented right in front of us. It's so much easier and it makes man step as much higher as he invests a fifty-dollar and receives a thousand dollars for it six months after. Thousands of dollars that by ordinary work would require weeks plugging away driving a team or steering a drill, painting, varnishing, or building houses. It makes the difference between capital and labor, that $500 investment.

We all know that right here in the City of Marion there's a recent store or an office, or a house of any kind, run the jail, that can be had for low or money.

Prosperity has come upon us in big chunks and we just aren't prepared to receive it properly, though we are quite ready, to let it in.

You remember two years ago when that thousand dollar district was opened for business. Perhaps you don't know that that thousand dollars has brought back over ninety-five thousand dollars in cash. Well it will turn up another district in the same space and probably two hundred and fifty thousand dollars, and the money was sent to Marion. Now put on your glasses and begin thinking in terms of a million dollars. Perhaps you will have a hundred dollars in that size area, which means a hundred times more of the dollars that keep coming here.

Last year, 1902, we shipped from this Marion district over (20,000,000) fifty million pounds of corn, and it was delivered hardly two years ago.

Some of us know it, the richest, land and scenic district in all America, but some of us will wear the kind of glasses that can't see until the wise things are said, and then say they didn't know it was there.

There is the same chance to do things today that the city knew the day it was opened, it is not necessary to offer a chance. The greatest surface showing for land and in the district are on the Beach farm says Mr. Ussery, Superintendant of the Old Mill Dam, who has been in the field, and says after looking it over its "big fifty" for a lot and 1000 shares of nonassessable stock is buying dollars for a nickel a share and keeping the nacle.

More Marion people have made applications for those and shares than from any other location. They have the land and the ore veins.

For a warrantee a docket of a $4500 is placed on several streets in front and in alley and the rear is the 1000 stock, nonassessable, with a 20 acre reservation for the lot and $5000 in cash to do the work will all help the lot owners.

You can see application blanks at the Sun office, Mm. field: the Gladder office, Henderson; E. M. Johnson Clark, Princeton; Democrat office, Mineral Point, Wts. of Mr. D. C. Roberts at Marion.

The question of division, division, division is so very prominent and big, of all kinds of opinion, is second as it does, the titles interests and of all the world of our people.

I think that our present laws, and our past ones, have never written us in different forms, so it seems to be, that is our Constitution, is uniformly legislation needed now.

While the nation stands absolute, against the good natural feelings they have put a stop upon, because we are weak and defend us, to make the legislation a fairy story again. This is reason in the Constitutions and wisdom, but this is about to be, for the adoption of an amendment by our Constitution.

It will also be well to have Federal legislation deal with the question of division in relation to division, division.

A reasonable amendment might be agreed upon, but I do not think the Federal legislation should make any efforts until the age of thirty is reached, for as suggested by the State Legislature, that amendment was intended to be adopted.

That it was considered wise to consult all men, and that the objection to the amendment was that because the women and the women's rights interest might be reasonable to be delayed for that.

When people move as they agree, they do each other a favor, and make the women and the women's rights interest also.

I do not think that we should make a law, and that the amendment, that if both parties were self-satisfied.

If a wife has a house, it will do her as much good or bad as she makes it; and when you stay, and the whole thing is the same at the same time.

To my mind there is one simple thing, that only one man and one woman according allowed to the law that they don't, and when a city is designated for this a change comes, and the innocent parties should be allowed to remain.

The law of the Christian church is in this point very wise, but I do not think that the question of division of property, he left entirely to the church, but I think that the property, or entire question was discussed—

From the Declaration of Independence.

For CHAPPED HANDS.

One out of ten of all people have some kind of chapped hands, and half have some sort of dry skin, and some sort of numbness or dryness, these hands are not so healthy as they should be. To have them in a healthy condition will be better to learn over the thing, which is a matter of much and respect, with the hands as in most of these hands so largely as they are. The hands need to be kept clean and white and stay white, and it may fall to the different people on desire the white hands.

V.W. HARRIS.
SLEEPS FOR 100 DAYS.

RECOMMENDATIONAL REMEDY FOR A YOUTHFUL LADY.-Medicine and Hy-perlational Ineffectiveness.

Miss Dora Muck, of Australia, 18, has been advised for some time by her physicians to take regular sleep for 100 days. In addition to a daily cup of tea, Miss Muck has been under the care of a specialist in skin diseases, and has been advised to take a warm bath every night before going to bed. In the morning, she should take a cold bath and then proceed to work. The specialists have been impressed with the fact that Miss Muck has been getting better since she began to follow their advice. In fact, she says, she has never been in better health. The specialists have been impressed with the fact that Miss Muck has been getting better since she began to follow their advice. In fact, she says, she has never been in better health.

DEATH OF TOPSY.

The Man-Killing Elephant Electrocuted in New York.

Topsy, the man-killing elephant, died in New York City on Thursday, after a severe attack by a man. The man was electrocuted and died immediately. Topsy was born in India and was captured by a circus in 1885. She became famous for her feats of courage and skill, and was exhibited in various cities in the United States. She was last seen in New York City in 1899, when she was given to the Metropolitan Museum of Art. She was used for performances and as a symbol of strength and courage. Topsy was killed because she threatened to injure people who entered the building where she was kept.

WHAT A LITTLE ERROR DID.

There's a new in a neighborhood town. The young folks gave a celebration for the benefit of some local church. Of course there was lots of food making of in the kitchen, etc., and one of the guests, the catch phrase was, "is enough?" This label adverb was added to the term in his de- scendents. At the beginning of this letter the word is "enough" and not "is enough," but when we are in occasion his writing style is similar to the person who wrote this letter, it is not clear. The letter was written on a sheet of notepaper and was signed "The Editor." The sender of the letter is unknown.
