NUMBER 18

A Grand Democratic Rally!

GOV. J. C. W. BECKHAM, HON. O. M. JAMES and WM. P. THORNE will address the people on the Political Issues of the day at the Court House, MARION, KY. at 1 o'clock,

FRIDAY, OCTOBER 16th, 1903.

Everybody invited to come and hear the living issues ably discussed.

FLUOR SPAR PRODUCTION LARGELY INCREASED.

Incorporation of the Henderson Company—Carbonate at Sheridan—Fire Clay Near the Depot at Marion—Our Deepest Shaft Three Hundred Feet.

NOTES FROM OVER THE DISTRICT!

The production of fluor spar in the United States from reports derived direct from the producers, to the United States Geological Bureau in 1902 was 27,129 short tons as compared with 19,586 short tons in 1901. Its value as given in "The Mineral Industry" was \$113,803 in 1901 and \$143,520 in 1902.

The average of prices for the year were as follows:

First grade lump,	\$14 40
Second grade lump,	13 90
Gravel, first grade,	13 40
" second grade,	12 49
Ground, firsts,	17 90
Seconds,	16 50

The average value at the mines was, lump \$5; gravel \$4. Foreign fluorspar sold during the year, lump \$8 to \$12, ground \$11 to \$14.

The Henderson company, operating what is known as the "Lady Farmer" carbonate of zinc mine near the Old Jim, was incorporated last week with a capitalization of \$70,000. David Clark was elected President and Chas. E. Dallen Treasurer.

The gasoline engine, pump, log washers, etc., are already on the ground and a very large, handsome pile of ore is ready to ship from their ore dressing platforms.

Mr. Clark has found on the Deboe purchase, in addition to what was already in evidence when that land was purchased by his company, a very strong body of carbonate in place between walls. The certainty of a mammoth body is practically assured.

In the break on the 23 acres belonging to the Reed Mining company near this city a depth of 25 feet has been sunk into a high grade fire clay deposit, which chemist Wareing pronounces absolutely first class. How much deeper this clay extends is not yet known, but there seems to be ample to supply a very large fire brick plant for many years to come.

The Rosi Claire mine has now attained a depth of 300 feet in the main shaft and has four levels. The levels have been driven in 700 feet on each side of the shaft. At the 300 foot level the vein of fluor spar, with galena to quite a large percentage, is 20 feet wide. The capacity of this property is 100 tons of fluor spar daily, besides the lead ore.

A mining company is being organized at Morganfield to work property purchased of Harry Watkins, of Marion.

The fluorspar mined in Arizona is being shipped to California, where it is being used in the manufacture of Portland cement.

Fluor spar is being mined near Rome, Smith county, Tennessee, by the Tennessee Fluorspar company, and shipped to Nashville.

There are 12 to 15 car loads of carbonate of zinc and sulphides on the ore dressing platforms of the Old Jim mine ready to move to the Mineral Point, Wis. zinc works.

The State of Kentucky production of brick and clay building material in 1901 amounted to \$1,514,541; the total production of the United States of this material was \$87,747,729.

The production of zinc and spelter in the United States during 1902 was the largest annual output yet recorded, says the Mineral Review. It also adds that Kentucky contributed important quantities from the mines near Marion.

It is understood that the Lead Hill mine, near Cave-in-Rock, Ill. which produced fluor spar in 1802, has for the present, at least, suspended operations.

Sheridan, just west of Marion is assuming considerable importance as a center of a new carbonate country. Many favorable openings are being made in that vicinity.

The Western Tube company, of Kewanee, Ill., have in stock at their works sufficient of our high grade fire clay to last them until next May. They have discontinued shipping from Marion for the present.

The Glendale Mineral and Mining company was formed here the other day by the following named Morganfield gentlemen:

Messrs Steve Anderson, John Crowe, Henry Walker, Martin Clements, Carl Briscoe, T. M. Dyer and others. The company has bought 60 acres of land and will begin work on a shaft as soon as practicable.

At a meeting of the stockholders T. M. Dyer was elected president, Henry Walker manager and Lucien Drury secretary and treasurer.

This is the second company formed in Morganfield to mine zinc and lead in Crittenden county.

It was really a sort of personal bereavement to all of us when the afternoon train passed Monday, taking away nearly every one of those big-hearted Methodist preachers that have made the week of conference a delightful affair in every way.

One felt as though he had just discovered a big body of carbonate every time he clasped hands with Bishop Hendrix or any one of his clergy. The greeting was so cordial, the feeling of pleasure so pronouncedly manifest that we shall all deeply miss the cordial good mornings from the hundreds of black coated gentlemen that have thronged our streets for a week.

We can only suggest one innovation in the conference rules. Make it a month instead of a week—in Marion.

SPECIAL CALL MEETING.

The Populists of Crittenden county, are called to meet in Marion, next Monday, Oct. 12, (county court day.) All of the old guard should be on hand. We invite as many from Livingston county as can conveniently attend to meet with us.

W. H. Brown, Chmn.
A. H. Cardin, Sec'y.

SALEM.

Remember Dr. Gray will be in Salem Tuesday, Oct. 13th, and remain one week at the Mrs. Roney Hotel.

HATS! HATS! They say I have the nicest and cheapest ladies hats in town, W. H. Towery, Shady Grove.

METHODIST CONFERENCE

The Fifty Eighth Annual Session Adjourned in This City Monday Morning.

REV. T. V. JOINER RETAINED HERE!

The Louisville Conference of the Methodist Episcopal Church, South, adjourned Monday morning at 10:30 o'clock.

Much good was accomplished at this meeting, both for the members of the conference and the citizens of Marion, and judging from the resolutions adopted by the conference, thanking the people of Marion for their entertainment, there was nothing left undone on the part of our citizens.

Sunday morning probably 3,000 people attended services at the various churches. Bishop Hendrix preached at the Cumberland Presbyterian church. He took as his text the thirteenth verse of the third chapter of St. John: "He must increase but I must decrease."

REV. T. V. JOINER.

The sermon was a great one. Wonderful exhortation; services were held in the other churches in the morning, afternoon, and evening.

Monday morning the church was crowded with the ministers and people, anxious to hear the appointments read.

The return of Rev. T. V. Joiner to Marion for another year met with universal approbation. Rev. Joiner has served the church faithfully for three years, and is greatly beloved by the people of the city, and all were anxious for his return. Rev. Elgin remains as Presiding Elder of the Princeton district. He is popular and has made an excellent presiding elder.

THE OLD RELIABLE

Absolutely Pure.
THERE IS NO SUBSTITUTE

Alice of Old Vincennes

... BY ...
Maurice Thompson

READERS of fiction have pronounced this story to be one of the best ever put forth by an American writer. It is a story of the early times in the West when the hardy settlers had to contend with the country's native population. The heroine is a remarkably attractive character and her experiences are unusual, often times exciting and always interesting.

We have purchased the serial rights and our readers are to have the privilege of perusing this masterpiece in these columns.

IT WILL BEGIN SHORTLY.
Be Sure to Read the First Chapters.

You Know What You are Taking

When you take Grove's Tasteless Chilli Tonic because the formula is plain printed on every bottle showing that it is simply Iron and Quinine in a tasteless form. No Cure, No Pay. 50c.

The Value of Mustard.

Mustard draws the blood from the seat of pain to the surface and so alleviates the trouble while nature is otherwise aided to right the local wrong.

If the prepared mustard plasters (which come by the dozen in little tin boxes) are not on hand, a home made plaster in which the white of an egg is stirred is just as efficacious, although more liable to mishap, for mustard stains are impossible to remove.

Gained 40 Pounds in 30 Days.

For several months our younger brother had been troubled with indigestion. He tried several remedies but got no benefit from them. We purchased some of Chamberlain's Stomach and Liver Tablets and he commenced taking them. Inside of thirty days he had gained forty pounds in flesh. He is now fully recovered. We have a good one on the tablets.—Holly Bros., Merchants, Long Branch, Mo. For sale by Woods & Orme.

BOTH MISTAKEN.

An Irish merchant who had more money in his pocket than his appearance denoted took a seat in a first-class carriage. A dandy fellow passenger was much annoyed at Pat's presence, and missing his handkerchief taxed him with having stolen it. After having recovered the handkerchief, which he had put in his hat, he made a lame apology, but Pat stopped him with the remark:

"Make yourself easy, darling; don't bother about the matter; you took me for a thafe, I took you for a gentleman. We are both mistaken. That's all, me honey."

HICKS FOR OCTOBER.

Month Opens Warm and Will Maintain Even Temperature.

Hick's forecast for October predicts a fine autumn month, with the exception of a flurry or two at the north. About the 2d there will be a change to warmer, followed by threatening weather between the 4th and 6th. In the north, bordering on the lake region northwesterly storms will help to hold up the temperature in the central and southern sections. About the 12 there will be a general storm with sleet to the north and frosts in the central section. Warmer weather will follow about the 14th, with rain on the two following days. Another slight cool wave will get in on or about the 17th, which will be immediately crowded out by a warm wave and more rain up to the 23d when cold, frosty nights may be expected in the central section. About the 25th to 27th the barometer will fall, with warmer temperature, followed by rain in the south and snow in the north, cool, frosty nights will follow these visitations to the end of the month.

Robbed the Grave.

A startling incident is narrated by John Oliver of Philadelphia, as follows: "I was in an awful condition. My skin was almost yellow, eyes sunken, tongue coated, pain continually in back and sides, no appetite, growing weaker day by day. Three physicians had given me up. Then I was advised to use Electric Bitters; to my great joy, the first bottle made a decided improvement. I continued their use for three weeks, and am now a well man. I know they robbed the grave of another victim." No one should fail to try them. Only 50 cents, guaranteed at Woods & Orme drugstore.

ONLY HIS WATCH MISSING.

"There is an old negro living in Carrollton," says the Bosworth Star-Sentinel, "who became ill a few days ago and called in a physician of his race to prescribe for him. But the old man did not seem to get any better, and finally a white physician was called in. Soon after arriving the white doctor felt the negro's pulse for a moment and then examined his tongue. 'Did your doctor take your temperature?' he asked. 'I don't know, sah,' he answered feebly. 'I ain't missed anything but my watch yit, boss.'"

The Salve That Heals

without leaving a scar is DeWitt's. The name Witch Hazel is applied to many salves, but DeWitt's Witch Salve is the only Witch Hazel Salve made that contains the pure unadulterated witch hazel. If any other Witch Hazel Salve is offered you it is a counterfeit. E. C. DeWitt invented Witch Hazel Salve and DeWitt's Witch Hazel is the best salve in the world for cuts, burns, bruises, tetters or blind, bleeding, itching or protruding piles. Sold by all druggists.

ANOTHER NEW METAL.

Selium, recently discovered by Mr. E. C. Mollard of Leeds, England, may, if its claims prove well founded, be of importance to the manufacturing industries. It is nearly as light as aluminum, can be tempered, soldered, brazed or rolled, and is easily worked. Although it can be cut as iron or brass, its capacity of resistance is of a capacity between iron and steel. In addition to these advantages, its cheapness renders it of practical utility, it being made from a substance not hitherto considered applicable to such a purpose.

Mules Wanted.

I will be at Pierce's livery stable, Monday, Oct. 12, County Court day, to buy mules and horses. Highest market price paid in cash.

A. L. PATRICK.

DIVORCE EVIL.

Whitelaw Reid has made an appeal to the college women to check the tide of divorce now sweeping over the country. In his commencement address at Vassar college he said: "Outside, the immediate and estimable effect upon the family, the conservative power of educated women will naturally show its influence on social life. They will surely help to check its degradation. When higher ideals do return, the powerful influence of educated women will surely array the best of their sex in compact, resistless phalanx against a social evil alarming, degrading, and demoralizing, which has suddenly become almost too common to provoke surprise—the transference of marriage from a sacrament of God into a thoughtless and headlong business or social arrangement to be dissolved almost at pleasure."

A Great Sensation.

There was a big sensation in Leesville, Ind., when W. H. Brown of that place, who was expected to die, had his life saved by Dr. King's New Discovery for Consumption. He writes: "I endured insufferable agonies from Asthma but your New Discovery gave me immediate relief and soon thereafter effected a complete cure. Similar cures of Consumption, Pneumonia, Bronchitis and Grip are numerous. It's the peerless remedy for all throat and lung troubles. Price 50c and \$1.00. Guaranteed by Woods & Orme druggists. Trial bottles free."

THE SACREDNESS OF LOVE.

In the great White Kingdom of the Czar, kissing in public is prohibited.

But Cupid is no respecter of law, as the many cases brought up before the magistrates prove.

Notwithstanding the fact that there is a three dollar fine extracted, the arrests for this offense are many, for love laughs at prudence as gaily as he does at locksmiths.

We have frequent demonstrations that this osculatory law is not enforced in this country. A summer stroll in any public resort will bring to light any number of amorous couples who are delighting themselves and an interested public by exhibitions of their mutual regard.

If there is any harm the payment of a fine will not make it right. One is inclined to believe that the wily Russian authorities quite aware of the fact that they can not conquer love, have passed this law more from a mercenary than a reformatory viewpoint.

While there may be no great harm in this public parade of affection, good taste tells us that the real love is too sacred a thing to be thus displayed before a jeering public. Very often the public is more disgusted than amused by these demonstrations, and any girl who allows such liberties places herself in a bad light.

Love is too beautiful and wonderful a thing to be treated in this cavalier and undignified manner.—Beatrice Fairfax.

Dieting Invites Disease

To cure Dyspepsia or indigestion it is no longer necessary to live on milk and toast. Starvation produces such weakness that the whole system becomes an easy prey to disease. Kodol Dyspepsia Cure enables the stomach and digestive organs to digest and assimilate all of the wholesome food that one cares to eat, and is a never failing cure for indigestion, dyspepsia and all stomach troubles. Kodol digests what you eat—makes the stomach sweet. Sold by all druggists.

Real "Velvet" in Prospect.

Crisp bank notes are to disappear. The Government is going to use velvet paper that does not shrink. This will enable accurate maps to be printed. As all paper now shrinks more or less, an accurate map can not be made. As the new paper will be more enduring, it is the intention to use it for notes, postage stamps and so on. The loss in the crispness in the notes will not be felt by the public in general, as it is only something they hear about.

SUGGESTS A WISE LAW.

TITUSVILLE, Fla., Sep. 26, 1903.—Mr. S. M. Jenkins, Publisher Crittenden Press, Marion Ky.—Dear Sir: Enclosed please find cash one dollar, for my subscription due and up to Aug. 1st, 1904.

I thank you for calling my attention to the oversight. I never like to owe any one one cent any longer than it is due. If I owe one cent to any one I do not know it, and hope to be so fortunate as to live the same way the rest of my life. I think it ought to be made a law and published that it would go into effect in one year, that no debt after that time contracted could be collected by law. It certainly would be the best law that possibly could be made for the poor, honest man.

I am well pleased with your paper and anxiously look for it every week, as it gives me the news from my old home and friends. I hope you will meet with all the success you are deserving.

I am, respectfully yours,
J. Marion Dixon.

Mr. Dixon is a Marion boy who is now winning fame and fortune in the "land of fruits and flowers."

SUN SETS TWICE A DAY.

There is one place in the world where the sun sets twice daily, and that is in Leed, in Staffordshire. The reason of this is that a jagged mountain is situated to the west of the town, and in the evening the sun sets behind it and darkness comes on. This is the first sunset, the gas lamps are lit and apparently night has set in. But it has not, for in the space of an hour or so the sun reappears again through the opening in the side of the mountain and the daylight again appears. Artificial lights are extinguished and daylight again prevails until the sun descends below the opening and the sunset follows and night comes to stay.—Ex.

World Wide Reputation.

White's Cream Vermifuge has achieved a world wide reputation as being the best of all worm destroyers, and for its tonic influence on weak and unthrifty children, as it neutralizes the acidity or sourness of the stomach, improves their digestion; and assimilation of food, strengthens their nervous system, and restores them to the health, vigor, and elasticity of spirits natural to childhood; 25c at Woods & Co's.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature on each box. 25c.

CULTIVATE COURTESY.

"I know of no investment certain to pay larger dividends than courtesy," said a successful business man the other day, and he spoke the truth. In the nerve-racking, endless rush of affairs, there is nothing that leaves a stronger impression than a pleasant word or a civil act, especially if it be something most men forget. Business courtesy is largely a matter of habit, and it is one of the habits that we can afford to cultivate.

PROSPERITY IN SOUTH.

President Fish, of the Illinois Central, Says Crops Are Enormous.

"The Southern States are about to experience the greatest agricultural prosperity in their history," said President Fish a few days ago. "The corn and cotton crops are the best in years and the prices are up. In consequence the growers will reap large profits. The railway development of the South is very great. I have had occasion to notice every part of the Southern country and am free to say that I regard it as the most prosperous portion of our country from an agricultural point of view. All over the country there is a satisfactory development, but it is especially noticeable among the Southern States. I am not a believer in the idea that a panic is approaching. Wall street conditions do not furnish a reason for accepting such a theory. Business is good and the fact that stocks are down springs from a different source altogether."

Mr. Fish's railroad, the Yazoo and Mississippi Valley, has finished paying for a new capitol for the State of Mississippi. Over \$1,300,000 which the State collected as back taxes after long litigation, was used in the erection of a suitable capitol. Mr. Fish attended the dedication ceremonies and assisted in laying the corner stone.

"I take great interest in the progress of Mississippi," said Mr. Fish, "and I was glad to attend the dedication ceremonies. We are interested extensively in the State and of course any advancement is to our interest. Kentucky is a good State."

Mr. Fish has a surprising knowledge of Kentucky. He knows something about nearly every county and has an unusual amount of information about agricultural conditions. He is particularly impressed, he says, not only with Kentucky's general prosperity but the South's.

THE WHOLE WORLD AKIN.

The writer does not believe that death is sent upon those we love in order to reform us. The justice of human law and the mercy of Divine law both oppose it. But that good things spring from sickness and sorrow, is demonstrated each day. In the pursuit of fame or wealth or power we grow like Cain to feel we are not our brother's keeper, and the envy, greed, and malice of our weak human nature assert themselves, but the blight of diseases and the touch of Death make the whole world kin, and revengeful thoughts flee away as we enter the chamber of affliction, while love and kindness cast their spell over and around us. Such assertions of our higher nature verily the poets claim that

"There is no lack of kindness,
In this world of ours,
Only in our blindness."

We gather thorns for flowers.

Run a Nail Through His Hand.

While opening a box J. C. Mount, of Three Mile Bay, N. Y., ran a ten penny nail through the fleshy part of his hand "I thought at once of all the pain and soreness this would cause me," he says "and immediately applied Chamberlain's Pain Balm and occasionally afterwards. To my surprise it removed all pain and soreness and the injured parts were soon healed." For sale by Woods & Orme.

Little Folks' Corner.

For Children Under 12.

Talmage once said, "Between the ages of six and sixteen years, the masculine nature is a mixture of mischief and sensitiveness, spunk, fun, pugnacity, cruelty and kindness which the chemistry of the world has failed to analyze."

Nobody seems to understand him, and the little fellow doesn't seem to fit in anywhere, comfortably, and is often a source of trouble, trial and torment, even to his mother. Indoors or out, he is the same riotous, restless noisy little whirlwind, continually upsetting everybody's calculations, and bringing no end of censure, unjustly, upon himself and others, by his super-abundant vitality, which must find an outlet in some direction, which it generally does, to the no small discomfort of everybody connected with him.

Do not whip the little fellow. The world will punish him severely enough, heaven knows, and he will have need of all the self-respect and confidence in his own manhood that you can train into him. Point out to him the path of rectitude and honor, and show him that he cannot afford to do a mean, or cruel action. Many an Ishmael dates his ostracism from the confidence and esteem of his kind from the hasty flogging which administered in anger, drove him out into the world, crushed by a sense of wrong and humiliation which he never intended to deserve. There will come a time very soon, when these little, riotous boys, seemingly now so careless of love and tenderness, will grow into great strapping fellows, and the voice of the world will woo them away from the harbor of home. Let them take out into the world the remembrance of a love that never failed them; let them carry with them into its fret and strife the memories of a happy childhood.—Commoner.

A HEROIC BOY.

Near Harrodsburg, Ky., Arthur White 12 years old, proved himself a hero by saving the lives of his mother, three-year-old sister and grand mother, at Clifton Ferry, on Kentucky River. The lad had ferried them across the river, and after navigating the boat the horse backed the surly in which they were seated over the cliff. The current carried them 30 yards from the shore. Arthur plunged in the water and first rescued his little sister. He next saved his mother. On entering the water the third time his grandmother had sunk from view, but he dived where he saw her disappear, caught her and brought her safely to shore. The horse was drowned.

COMPLETING THE TOILET.

Little Archie had been watching the gardener mow the lawn, and after it was finished he said to his mamma: "Oh, mamma, come out! Ben has cut all the yard's hair and now he's smoothing it down with the comb."

A FUNNY TEACHER.

A mother asked a little boy on his return from his first day at school how he liked the teacher. He said: "Mamma, she is the funniest teacher I ever saw. She didn't ask me a thing except what I didn't know."

A TRUE STORY.

"Hear the story about the fly paper?"
"No."
"Well, you'll be stuck on it."

The answer to last week's puzzle was "THE CRITTENDEN PRESS." It is printed on white paper, printed with black ink and read "all over" the world from Maine to Philippine Islands.

No correct answer was drawn. Good answers were from the following:

Owen Roberts, Mattoon, "Newspaper."
Dense Beard, Tolu, "
Charlie Bettis, Marion, "
Rodney Stevenson, Sheridan, "
Iva McDowell, Shady Grove, "
Stella Dean, Iron Hill, "
Wilbur Boston, Marion, "
Enoch Fritts, "
Mary Joiner, "
Lucile Pope, "
Jessye Croft, "
Gwendolene Haynes, "
Edna Schoolcraft, "
Mildred Trisler, "
Margaret Joiner, "
Dixie Trisler, "
Nowlin Wheeler, Tribune, "
Ruby Dean, Iron Hill, "

As all of the answers above named were good we concluded to draw a name and that of Miss Ruby Dean, of Iron Hill, was the winner of the prize.

Next week's puzzle is, "If a fast young man should say to you, 'I think I had better marry and settle down,' what would you advise him to do, instead?"

Answer now in sealed envelope, and will be opened Monday morning at 8 o'clock, when the prize will be awarded and names published in Press of Oct. 15.

THE CAMPAIGN.

Mr T. Everett Butler is in Crittenden this week, in the interest of his candidacy for Representative. He is meeting with much encouragement and finds Democratic prospects bright. Butler is a young man, but sound and safe, and Democrats must see to it that he is not defeated.—Smithland Banner

W. C. OWENS.

"Majah" Bill Owens, smarting under the invited exhortation given him by Gov Beckham, attempts to hide from its effects by calling out "you're another." This might work if it were not known over the State that the things the Governor said of Bill were true, while Bill's charges against the Governor are without the semblance of foundation.—LaRue Herald.

WOULDN'T MEET THEM.

Belknap's visit here more than confirmed all the Journal had previously said about him. When it was proposed at the Fair to take him around and introduce the people to him he emphatically declined to meet them, thus administering a snub to the people who will not readily forget or forgive. His well known aversion of the "common people" was fully exemplified on this occasion.—Somerset Journal.

"NICEST CROWD EVER THERE."

The Greensburg Record, a Republican paper, winds up its account of the Beckham and James speaking at Greensburg with the statement: "There are two facts that no one will deny—it was one of the largest crowds that Greensburg has seen in ten years, and it was the best behaved and nicest that has ever assembled in any town."

A Remarkable Exhibit For Fair.

When Columbus discovered America there stood in a remote mountain gorge in Cherokee county, North Carolina, a tulip popular tree that was then 400 years old. For four more centuries it grew and flourished, and was recently felled for exhibition at the St. Louis World's Fair. The tree was 13 feet in diameter at the base when it was cut. The gorge in which it grew was so inaccessible, being forty miles from a railroad that it was impracticable to obtain a section near the base. Forty feet up, where the tree was a little more than 6 feet in diameter, a disk was cut. This has been polished, and will occupy a place in front of the hunters lodge. On the polished disk have been engraved the important historical events of the old North State from the time that Sir Walter Raleigh took possession of the land in his sovereign's name on July 4, 1584, through the colonial days, during the revolution, and up to the present time. Another section of the tree will stand like a monument in the forestry exhibit. It is ten feet high. A portion has been dressed, polished and varnished while the lower portion is covered with its bark.—Harper's Weekly.

A Thoughtful Man.

M. M. Austin, of Winchester, Ind., knew what to do in the hour of need. His wife had such an unusual case of stomach and liver trouble, physicians could not help her. He thought of and tried Dr. King's New Life Pills and she got relief at once and was finally cured. Only 25c at Woods & Orme.

BARNETT CASE DECIDED.

The last case tried at the term just closed, and one of the most important on the docket was that of David Adams, administrator, vs. Wm. Barnett and others, involving about \$20,000 of the estate of Miss Lacy Barnett, who lost her life two years ago in the steamer City of Goldconda disaster. The case was won by the Barnett heirs, who were given judgment for everything in question except \$900 awarded Mr. Adams for board of deceased.—Livingston Banner.

The friends of Wm. Barnett, of Tolu, will congratulate him on the decision. The estate in question was that of Col. Thomas Barnett, whose wife was a daughter of the late J. L. Hibbs, of Birdsville.

THE CANDIDATES.

VIEW, Ky., Sept. 30, 1903.—Mr. Butler and Mr. Conger, who are candidates for a seat in the next Legislature from this district are requested to please accept or reject the following pledge, by the 15th of Oct. next, through the Crittenden Press and Marion Republican. We ask you to say you will or you will not sign the following pledge, just as it reads, should you not answer by the 17th of October, it will be "considered that the candidate failing to answer is opposed to the principles set forth. A. H. CARDIN, Ch'n District Committee.

PLEDGE TO BE SIGNED.

"If elected to the legislative office to which I aspire, I agree on my honor as a man and a citizen of the Commonwealth of Kentucky, to vote against any proposed election law which is not absolutely fair to all political parties, and does not guarantee to every citizen the full enjoyment of his constitutional rights. I also agree to vote to submit to the people at the next general election a proposed amendment to the Constitution of Kentucky, providing for the initiative and referendum, by which not over five per cent of the voters of the State or any legal subdivision thereof, may demand the submission of a proposed law to a vote of the people before it becomes operative, or may propose a law and that the people may likewise propose and secure further amendments to the State Constitution."

Resolved, That we call upon labor and all other organizations favoring this principle to join with us in demanding pledges from all candidates.

Resolved, That this pledge be submitted to all candidates and where all sign it that no organized action be taken in favor of or against any candidate, but should only one candidate sign it and others refuse, that reform and labor voters be requested to support the candidate willing to so pledge himself. Where no candidate will sign this agreement an independent candidate should be placed in the field and a vigorous campaign waged on these lines, or that reformers refrain from voting at all.

Resolved, That the support given to any candidate signing this pledge be given solely on the ground of principles involved and that no division of offices or other reward be asked for or accepted.

Resolved, That in counties where there are no reform candidates for legislative offices, the labor forces organize to secure practical results, and agree to vote for no man for representative or senator who will not sign the following pledge:

TENNESSEE CENTRAL.

The First Spike Driven at Hopkinsville Tuesday, Sept. 29.

The first spike was driven in the Hopkinsville end of the Tennessee Central railroad Tuesday afternoon, says the Kentuckian. The work of laying track has begun, with a force of about twenty men, and by Wednesday night the track was put down to the Phelps field. The Canton pike will be reached as rapidly as possible towards Clarksville.

At the Clarksville end an increased force of men has been put on, and track laying has been pushed on Spring street, where operations have so long been delayed by injunction suits. The rails are now being put down in five different places.

Work is still in progress on the line beyond Ashland City. Another crew is building from Clarksville towards Ashland City, and the end of these two pieces of track are within less than nine miles of each other. The other crews are at work at Oak Grove, one building towards Clarksville and the other towards this city. This makes six crews now putting down track as rapidly as it can be laid, including the one at this end.

Between Nashville and Clarksville the Tennessee Central, including the Belt line will be 55 1-2 miles long. All of this but nine miles has been laid, and the right of way is graded for that 9 miles except a few places where the amount of work to be done is immaterial. This means that it will be but a few days until the line is complete from here to Clarksville, with the exception of the bridge across the Cumberland river. That will easily be ready by the time the remainder of the road from Clarksville to Hopkinsville is ready to be put in operation.

General Manager Geo A. Clark, who has charge of the work, adheres to his statement that the road will be ready for through cars by Nov. 1, if not by Oct. 15.

The road bed is already graded from Hopkinsville seven miles south. By the time a force of men builds that seven miles of track the grading will be in condition on this way for the force to move on towards Clarksville without serious interruption. There is some grading to be done but none of it will be difficult or slow, as there is no rock to be gotten out of the way. The track laying will continue on towards Clarksville and the crew for Oak Grove will then meet the Hopkinsville gang half way.

This will leave only the gap between Oak Grove and Clarksville. In that section there is to be a deep rock cut. This is the only difficult piece of work on this entire road that remains to be done. There are some slight fills to be made and a few places where the ground has to be lowered. But at all of these places, without exception, no rock will be encountered. The dirt and clay can, of course, be cut very rapidly.

Day and night shifts are at work on the rock cut. This will be the last place on the road to be completed, and would delay the opening of the road but for the vigorous steps that have been taken by General Manager Clarke.

Paducah is a vigorous place,
strong and healthy in a financial
and business way. She has had
some severe experiences, but al-
ways comes out on top, although
sometimes slightly disfigured. But
now the "carnival" is to invade her
streets, and then Sam Jones and
Carrie Nation. Will she survive?
The last straw, etc., etc.

The Press office has just put in
a new horizontal 3-horse power
Fairbanks & Morse gasoline en-
gine to run our cylinder and job
presses, and have all the work it
can do. We appreciate the large
amount of business we are receiv-
ing and we will endeavor to give
you fair treatment, good work and
reasonable prices.

The Crittenden Press printing
office has realized for several weeks
the importance of getting a new
engine to pull its cylinder and job
presses. Last Monday we saw we
were face to face with a proposi-
tion of how to run off this week's
issue. We had little time to med-
itate but decided quickly to tele-
graph the old reliable Fairbanks,
Morse & Co. to ship us an engine.
The engine was here and a special
man to set it up Tuesday morning,
within 24 hours after the telegram
was sent, and Wednesday morn-
ing we run off the mining and
country correspondence pages at
the rate of 1600 per hour. The

special representative of Fairbanks
Morse & Co., Mr. J. F. Snaren-
berger, was here and superintend-
ed the placing of the machinery,
which is highly satisfactory to
him and to us. The engine is a
daisy and certainly pulls the im-
mense presses with greatest ease.

October is a good month to clean
out the cistern. This important
item should not be overlooked in
any household. The time is op-
portune. The water now is low or
entirely out, and soon the cold fall
rains will set in, and after the roof
is thoroughly cleaned of dirt and
dust, water can be turned into the
cistern which has been cleaned,
renovated and repaired.

Many a spell of fever or illness
dates back to impure water from a
neglected well or cistern.

One who has never attended to
it would be appalled at the amount
of filth in a family cistern which
is left to itself without any atten-
tion for a year or so.

No water should be let in until
the roof is clean, and none after
cold weather is gone in the spring.
Warm rains will produce wiggle-
tails if allowed to run into a cis-
tern.

The necessity of a modern sys-
tem of water works in Marion is
readily recognized, and the mod-
ern engineering methods have so
simplified and lowered the cost of
construction that hardly any com-
munity exists but can afford to es-
tablish a system. Marion suffers
peculiarly every summer for want
of water. The lawns dry up, the
streets are clouds of dust, the
laundry women quit business al-
most, stock suffers, and any num-
ber of inconveniences are caused
on account of shortage of water.

Sewerage and drainage are also
two important advantages that
come with a thorough system of
water works, and such agencies
promote the health and the clean-
liness of any place so fortunate as
to have a good, modern system of
water works. As a rule, towns in
the south need water works, and
many have awakened to the advan-
tages, and in fact urgent neces-
sity of acquiring them. Comfort,
health, cleanliness, economy, and
an added charm of beauty travel
in the wake of water plugs, stand
pipes, and all the paraphernalia
necessary to a good system of wa-
ter works. Fountains and rain-
bow sprays are seen on every side.
The Press advocates this im-
provement for Marion, and will
stand its share of the burdens of
taxation should any be necessary.
It's "up to" the city council now.
Will they grasp the situation? We
believe they will.

Crazy Man in White House.

Peter Elliott, of Minneapolis,
Minn., a crazy anarchist, was cap-
tured and overpowered in the
White House corridor Monday.
He insisted on seeing the Presi-
dent and said he came to occupy
the capital. He was taken to an
asylum.

ED. PHILLIPS DEAD.

Ed. L. Phillips of the Baker
neighborhood, died on Thursday
night of last week after a brief
illness. He was a brother of Esq.
L. B. Phillips and one of the best
and most popular farmers in Belle
Mines. Take him all in all, there
were few better men in this world
than Ed. Phillips. Peace to his
ashes.

MARION TO NASHVILLE.

While secrecy is preserved by
the heads of the Illinois Central
railroad regarding that line's in-
terest in the Tennessee Central,
the new road between Hopkins-
ville, Ky., and Nashville, Tenn.,
it is practically certain that the
Fish group of railway capitalists
control it, and that upon the com-
pletion of the northern end of the
Tennessee line I. C. trains will be
run through from Paducah and
Evansville to Nashville.

What lends an air of probabili-
ty to this belief is the fact that a
track has been laid at Hopkins-
ville between the I. C. and T. C.
lines.

Through trains will run from
Paducah by way of Princeton and
Hopkinsville to the Tennessee cap-
ital, and the same connection from
Evansville will be made at Hop-
kinsville, passing through Marion.
This will give to Paducah and
Evansville another direct southern out-
let, and may be the beginning of a
strong competition with regard to
southern traffic which has not
been felt heretofore.

The possibilities of a through
freight traffic and passenger traffic
from Chicago to Nashville by way
of Paducah are pointed out by
the fact that four I. C. divisions
center here, and that connection
may be made by the new Cairo
branch.

Local officials of the Illinois
Central know nothing of contem-
plated through service on their
line from this city to Nashville, or
if they do they are not giving out
any information.—News-Demo-
crat.

The Press is glad to see the
above notice. The next orders
given out will be, we candidly be-
lieve, to move on to Cave-in-Rock,
via Marion and Crittenden springs,
and then look out for the shops.
They'll come too.

JOY.

A splendid rain and every one
feeling much better.

Co's store is now in business in
Marion. Mr. and Mrs. Flanary
are among our most popular peo-
ple and we regret having to give
them up. We give them a hearty
recommendation to the good peo-
ple of Marion.

C. B. Hina has given up his resi-
dence to Foster Threlkeld and
moved into L. A. Weldon's house.
Mr. Threlkeld will build in the
near future.

Mrs. W. L. Funkhouser returned
Saturday from Shady Grove where
she attended the funeral of her
brother.

Henry Paris and Wesley Dock-
ery, of Shady Grove, are visiting
here.

Miss Grace Patton, of Elizabeth
town, is on an extended visit with
Miss Mattie McFarlin.

Our school was suspended from
Tuesday until Monday that the
teachers, Misses Carrie Moore and
Lelia Carter, might attend confer-
ence.

Charley Lear says please put
my name in print, I want to see
how it looks.

J. J. Thomas and family made a
trip to Marion Sunday.

When in Tolu call at the Wel-
don House and have hunger ap-
peased and your horses well fed.
See sign opposite Cottage hotel.

J. W. Guess has cut up his large
corn crop and will begin the work
of shredding at once.

Mrs. Wm. Barnett and daugh-
ters, and Mrs. P. B. Croft returned
from Evansville Saturday.

John L. James and wife visited
the family of W. L. James Sat-
urday and Sunday.

Foster Threlkeld has rented his
farm to a Mr. Hughes near Mar-
ion.

C. B. Hina and Charley Weldon
will run the L. A. Weldon farm
next year.

Washington Cruce will leave
old Crittenden soon and make his
future home at Murphysboro, Ill.

Carries Goods in His Own Boat.

J. L. Lowrey, a merchant of
Cave-in-Rock, Ill., has the advan-
tage of other merchants of his
town, who are often inconveni-
enced by not being able to get their
goods because of low water. Mr.
Lowrey is the owner of the gaso-
line steamer Arthur, and came
here Friday in his little craft to
get a supply of goods.

The little boat has a barge in
tow, and this is being loaded with
freight. Early this morning the
Arthur will set sail for Cave-in-
Rock. Mr. Lowrey is one of the
best known merchants of that
town.—Evansville Courier.

A CARD OF THANKS.

Mr. Editor:—Please allow us space in
your valuable paper to extend our heart-
felt thanks to our neighbors and friends
who so kindly helped us nurse our dear
son, James, in his last and fatal illness.
May God's richest blessings attend them
is our prayer.

G. D. SUMMERVILLE,
BELLE SUMMERVILLE.

YOUR EYES ?

Dr. C. L. GRAY,
Ophthalmologist.

Am in Marion, Kentucky, at the New Marion Hotel, from
Tuesday, Sept. 29, 1903,
And remain twelve days. Examination and Testing Free

He corrects all errors of refraction of the eyes for the improvement
of vision and relief of nerve strain—often the cause of headaches
and other nervous troubles, which soon disappear after removing the
cause by the use of his accurately ground and perfectly fitted lenses
in properly adjusted frames. Do not fail to call on the Doctor while
you have the opportunity of having your eyes scientifically tested
and correctly fitted by a regular graduate in Optics and an expert
of years of experience in his profession.

Practitioner of the Scientific Manipula-
tive and Suggestive Art of curing Diseases
and Deformities is now permanently lo-
cated at Mrs. Howerton's residence for the
practice of his profession.

His treatments are veritably a common
sense method of curing diseased and de-
formed conditions of the body, either struc-
tural or functional by strictly scientific
Manipulation and Suggestion. Being purely
Mechanical and Suggestive their card-
inal principles may be classified as follows:

Free Circulation of Blood, Glandular Activity, Skeletal Adjustment and Co-
ordination of Nerve Force, having no fellowship with Faith Cure or Christian
Science, but standing squarely upon their own merits in the Manipulative and
Suggestive Art. Intelligent thinking people the world over Demand these treat-
ments for they cure when medicine or other methods fail Absolutely Fail. He
will treat patients at reduced rates for a limited time. Consultation and Exam-
ination Free.

Dixie Satterfield and his wife, of Princeton, were here attending conference last Friday. Mr. Satterfield owns the famous Harpending place, which was built by the Diamond King Berry Harpending on Eddy Creek. It was one of the palaces when built, and Mr. Satterfield, we learn is keeping it up in fine shape.

Kilroy and Britton's new play which will be at the Marion Opera House next Tuesday evening, Oct. 13th, styled "An Aristocratic Tramp," is from the pen of Lem B. Parker, author of "For Home and Honor," "A Quaker Wedding," "The Sinking City" and a dozen other popular successes. "An Aristocratic Tramp" is far above the average tramp show in every respect and contains more features in one single act than all the other so-called tramp shows have in four. The scenic effects are gorgeously correct while the cast is made up of the very best dramatic talent. New York affords. There are seven big speciality features in addition to the regular company, making the entire production second to nothing of this class traveling and their reception here should be a hearty one to say the least.

Senator Deboe is on the streets again after two months close confinement with rheumatism. He looks considerably thinner and his appearance shows that he has suffered greatly. His friends are glad to see him out.

Corn, hay and bran in stock, prices right, prompt service. Give us a trial. We'll please you.—Yeakey & Travis.

"An Aristocratic Tramp" with Kilroy and Britton heading a big company of the very best eastern talent, will be the attraction at the Opera House next Tuesday evening for one performance only. "An Aristocratic Tramp," is unlike any other play with a so-called tramp title in that it appeals to and pleases the mother, father, son and daughter alike. It yields a beautiful story and makes an evening's entertainment worthy careful attention.

Yeakey & Travis have opened a new feed store, corner Bank and College Street, opposite Marion Graded School. Phone 198.

W. M. Bowman and wife of Eddyville, attended conference here Sunday. They drove over with friends to "hear the Bishop." They reported a pleasant 20 mile drive, and were amply repaid for their trip in hearing the discourse and in the generous hospitality and kindly welcome extended to them. Mr. Bowman and his estimable wife have for many years been the mainstay of the church in their town, and such people are always welcome visitors in Marion.

Our feed stuff is fresh and clean. Quick delivery. Phone 198. Yeakey & Travis.

A camping party composed of W. H. Clark, J. R. Marvel, Tom E. Hearin, Chas. McNeely and Harry Harpending will leave today for the hunting grounds in the Ozark mountains. They will go via Golconda, and cross the State of Illinois to East Cape Girardeau, where they will cross the Mississippi into Missouri and thence into Arkansas and the Ozark mountain country, where big game, bear, deer and the like are found. They will carry a tent, do their own cooking and have a royal old-fashioned camp hunt.

Persons wanting first-class photographs will do well to come in at once and have them made, as my time is limited, and I will be here but a short time. C. C. Cook.

JAMES SUMMERVILLE DEAD.

Last Saturday just after the sun passed the meridian the spirit of James Summerville passed from earth to eternity. He was surrounded by loving ones—mother, that dearest of all names—father and brothers, and many other relatives and friends, and to them he expressed in unmistakable terms his satisfaction and peace with his Savior. He died in the hope of salvation and was happy when he bade them all good-bye and said, "I am going home." James Summerville was born Sept. 24th, 1877, and died Oct. 3rd, 1903, having just passed his 26th birthday ten days ago. He enlisted in the U. S. army July 1st, 1891, and was sent to Fort Riley, Kansas, where he remained until his health failed, and after being examined by the government physicians it was decided that New Mexico climate would suit his case, and on May 24, 1902, he was sent to Fort Bayard, New Mexico.

However, that dread disease, consumption, had fastened its fangs upon him and he was discharged from service Sept. 11th and sent home, where it was hoped that a mother's solicitude care and attention, administered with the hand of love would restore him to his wanted health and strength. He reached home Sept. 30th, 1902, and was given every care that could be thought of and was sent to different climates; among other places the mountains of Tennessee and North Carolina, where he remained awhile and traveled considerably hoping to find relief somewhere. He gradually lost strength however, until the end came at his old home last Saturday. The interment was at the new cemetery here Sunday afternoon at 3 o'clock, and a large concourse of friends from the country and town attended.

Rev. Price was to have conducted a song and prayer service at the grave but rain prevented.

The Press extends sympathy to the family in the death of this young man who had just reached a promising age in his career.

DR. GRAY HERE.

As announced in our last issue, Dr. C. L. Gray, the ophthalmologist, arrived last Tuesday and is stopping at the New Marion Hotel, where all those whose eyes need attention are invited to call and consult him free of charge. Dr. Gray is no stranger here, having made many visits here before, and most of our people are his acquaintances. He is known as a reputable high-toned gentleman and thoroughly skilled in his profession. Whatever he says or does may be depended upon implicitly. We bespeak for him a fine patronage.

Pay Your City Tax.

The six per cent penalty, will be added to all unpaid city tax on Nov. 1, 1903. Pay now and save cost. The city needs the money and you must settle by Nov. 1st. A. S. CANNAN, Collector.

HERE.

Dr. C. L. Gray, ophthalmologist, who is now located at the New Marion Hotel will remain until Tuesday Oct. 13th, when he goes to Salem for one week only, this trip—13th to 19th. He will scientifically test and correctly fit your eyes with the proper lenses for the improvement of vision and relief of nerve strain, often the cause of headaches and other nervous troubles. Satisfaction guaranteed in every case and no charge for examination and testing.

FALL COSTUMES.

Three-quarter length coats will be "the thing" next winter, and they will be elaborately stitched and trimmed. The same rule of coat length applies to suits. The short coat, blouse or Eton will not be seen nearly as much, even on short women, for it is a mistake to think a three-quarter length coat shortens a woman who is not tall. It does nothing of the kind if properly proportioned.

How much more sensible is this fashion of ample coats than the foolish ab-

breviated outer wraps with which we have sought to keep warm during freezing weather.

Lace is applied on many of the more expensive costumes, but it must be very handsome, heavy lace enriched with embroidery and figures made of velvet a shade darker than the material.

The hat to be smart in the winter must match the costume, and even fur should harmonize. The well dressed woman will be she who is in one tone from head to foot.

The picture shows a blouse of stitched fawn colored flannel, with tiny braid and velvet figures.

NEW FALL HATS.

French Sailors Ever Popular.

Crowns becoming higher. The French sailor of rough white felt is the favorite head gear with the tailor made suit. This has a sharply curved brim and is most simply trimmed with a couple of wings or even a band of ribbon twisted into a bow in front. The veil of chiffon, with a hem an inch and a half wide, is the chief ornament of such a hat, and it varies in color to match the costume with which it is worn.

The crowns of all hats are becoming much higher, and the brims are even

more sharply curved than they have been this summer.

The Spanish turban is being revived in a modified form with a fitted in back and a drooping plume touching the hair. This is especially smart when carried out in white with a white plume made of cock's feathers.

Purple hats are still the rage. They are made of braided chenille trimmed with shaded flowers or feathers.

Brown hats unrelieved by any color will be worn with tan costumes and brown furs.

The cut shows a green felt French sailor trimmed with quills and rosettes, with bands of green glass ribbon.

JUDIC CHOLLET.

Where He Located.

Stuffer (at the end of Simpkins' ball)—Do you know, I can't find my overcoat anywhere.

Simpkins—Have you looked in the refreshment room?

Stuffer—Why, no! How could it be in there?

Simpkins—You haven't been anywhere else during the evening, have you?

Fate's Injustice.

Nocash (disconsolately)—The rich are getting richer and the poor poorer.

Friend—What's wrong now?

Nocash—Miss Fullpore has refused me and is going to marry Mr. Coupon.

FALLING FROM ALOFT.

Peculiar Exemption of Sailor Men From Accidents of This Kind.

"One of the wonders of seafaring life," writes Charles Protheroe in "Life in the Mercantile Marine," is the singularly small proportion of sailors who meet with death or accident by falling from aloft. Whether or no the cherub who is supposed to sit aloft and watch over poor Jack is responsible for it I am not prepared to say, but the fact remains.

"Having to tumble up aloft at all hours and in all weathers to perform acrobatic feats that would almost puzzle a monkey, the saying among sailors about 'hanging on by the eyebrows' becomes almost a truism.

"One would think the situation was highly speeded enough by danger without needlessly increasing it. Yet it is not altogether an uncommon thing to see a man, if he happens to be barefooted, run out along the yard in preference to using the footrope placed under it for the purpose, to reach what is a post of honor, the weather ear-ring.

"In spite of all this, although not knowing the actual percentage, I make bold to say that not more than one sailor man in hundreds is killed or injured by falling from aloft. If I use my own experience as a base, the proportion would be less, for in over twenty years of sea life I was never caused the pain of witnessing such a catastrophe."

Parents as Teachers.

Of all the teaching in the world ninety-nine one-hundredths at least is done by fathers and mothers. Every child learns more in the way of actual facts from the day of its birth until the end of its seventh year than it can possibly learn in all the rest of its life put together. During these first hours and years of life the child learns to walk, to talk, and, what is far more important, it learns the beginnings of self control. During the first years the child puts itself in touch with the world into which it is born, and in these early years the parents, and the mother especially, are the teachers. They start the operations of the mind, giving it its first bent. And however able the teachers of the future may be, however conscientious and learned, in the great majority of cases the child's future, its success or failure, depends upon the first teaching influences of the mother and father.—New York American.

A Live Oak Too.

The bride was fair and slight and the bridegroom was dark and stalwart. They made a most interesting pair, and the people on the long distance train who had watched them more or less openly from San Francisco were cheered by the sight of a shower of rice which fell out of the bride's parasol two days later.

The bridegroom saw the smiles, and, putting his arm round his blushing wife, he faced the careful of friendly strangers.

"I reckon there's no need for me to say we haven't been married long," he announced in full chest tones, "but I can tell you one thing. You don't want to smile any more than 's polite, for she's my violet and I'm her sheltering oak, and I weigh 204 pounds."

A Quaint Examination.

Silence, it appears, is an unknown quantity at a divinity examination in Mandalay. The commencement is signaled by the clashing of cymbals and the beating of drums. While the candidates are writing their answers they are surrounded by a jabbering crowd, who pass audible remarks about what is being done. The test lasts ten days, and the people make the examination the occasion for gaining merit by feeding the candidates, and cart loads of provisions of all sorts find their way to the pagoda precincts, and Burmese from every quarter go round collecting money to provide the competitors with the necessities of life and luxuries as well.—Rangoon Times.

The Death of Mark Antony.

Mark Antony gave the world for a woman's love, but found himself so poorly compensated by the exchange that in desperation at the approach of Octavius and being informed that Cleopatra was endeavoring to make terms for herself by surrendering him he stabbed himself with his dagger. Being revived, he received the message sent him. He was carried to her place of refuge. Cleopatra and her maids raised him by ropes to the window of the tower where the fallen queen found her last home. He was lifted in and died in her arms.

Peculiarities of Fish.

There are two popular delusions about fish—one that they cannot live out of water and the other that they can live in any pure water, the food supply taking care of itself. As a matter of fact, there are fish in Africa which, having to exist in absolutely dry rivers for a portion of the year, have developed lungs, while in many an amateur's aquarium fish cannot live in the water provided owing to lack of food.—London Field.

Reasonably Certain.

"I understand old Skinfint has got religion."

"It's possible."

"Do you really think so?"

"Well, if Skinfint and religion have come together at all I think it is safe to say that he has got religion. There certainly is nothing to indicate that religion has got him."—Chicago Post.

EVARTS' QUAIN HUMOR.

How He Passed a Post and a Statesman into the Senate.

During the last days of Oliver Wendell Holmes' life he visited Washington in company with Robert C. Winthrop, and both of the venerable men visited the senate chamber on the occasion of some ceremonies which crowded the galleries with people, so that they were unable to obtain seats. They sent their cards to Mr. Evarts, hoping that he might arrange a place for them, and when he met them in the marble room he explained the difficulty.

"The galleries are crowded, as you know," he said, "and the rules of the senate admit to the floor of the chamber only members of the two houses of congress, members of the cabinet, justices of the supreme court, ex-senators, persons who have received the thanks of congress and private secretaries to senators. I cannot get you admission in any other capacity, but if you will accept highly respectable and remunerative employment as my private secretaries I will find you seats on the floor." Both the poet and the statesman accepted, and Mr. Evarts dressed the doorkeeper as follows:

"My dear sir, these two young men are my private secretaries. You will observe that they are both very green and ignorant, but I am trying to have patience with them and overlook their deficiencies. I wish you would take a good look at them so that when they come here again to see me you will know them." And with that he pushed open the swinging doors and motioned Dr. Holmes and Mr. Winthrop to pass in, while the doorkeeper in a bewildered sort of way remarked in an undertone:

"Well, I'll be blanked!"—Chicago Record-Herald.

Growth of the Papal Crown.

Originally the headpiece of the popes was only a cap, but Clovis, king of the Franks, to show his respect to the church of Rome, sent to the palace of St. John in Lateran a royal crown of gold, which Anastasius, emperor of Constantinople, had presented to him. The Pope Hormisdas placed upon the tiara this crown, which was at that time nothing more than a circle of gold surmounted by leaf work, being much such a coronet as is nowadays borne by marquises in France. The successor of Pope Hormisdas continued to wear the tiara with one crown only up to the time of Boniface VIII., but this pope, having claimed authority over things temporal as well as spiritual, wished to mark this double dominion on the pontifical tiara, on which he placed two crowns instead of one. Ultimately Pope John XXII. added a third crown.—St. James' Gazette.

Mark Twain's Joke on the Bishop.

Bishop Doane of Albany was at one time the rector of an Episcopal church in Hartford, and the services at this church Mark Twain would occasionally attend. Twain one Sunday played a joke upon the rector.

"Dr. Doane," he said at the end of the service, "I enjoyed your sermon this morning. I welcomed it like an old friend. I have, you know, a book at home containing every word of it."

"You have not," said Dr. Doane. "I have so," said the humorist.

"Well, send that book to me. I'd like to see it."

"I'll send it," Twain replied.

And he sent the next morning an unabridged dictionary to the rector.—Boston Post.

Fish Need Air.

Fishes, like all other animals, need air. If they could not get it they would be suffocated just as you would if you were locked in an air tight trunk. When the sea is frozen for miles, as in the Arctic ocean, the fishes find it very hard to come to the top, and must then "breathe" the air which is dissolved in the water. You have often seen the tiny bubbles which collect on the inside of a glass which has been standing full of water overnight. Well, that is the air which has been dissolved in the water, and after the glass has been tapped, so that all these bubbles come to the top, fishes could not live in that water. In other words, they would drown.

Fasting For Health.

Thousands of years before it was practiced as a religious rite fasting was practiced as a health measure in Egypt, India and China. Contemporary to Cleopatra was Asclepiades, a Greek physician, who strongly advocated this idea, and 1,500 years after his day Ibn Sina, philosopher and medical sage, argued the virtues of temporary abstinence on the ground that it came easier than constant moderation.

Trimming Sails.

"Charley, dear," said young Mrs. Torking, "how do they trim the sails of a yacht?"

"Why—er—they just trim 'em, that's all."

"I know. But what kind of trimming do they use?"—Washington Star.

Your Health.

You young people, don't forget that health is greatly prized in old age. Young people can stand abuses to their health in youth, but terrible interest is collected later on.—Atchison Globe.

Still Harder.

"Oh, I don't know. It's worse to have a lot that you simply have to pay."—Philadelphia Ledger.

FALL COSTUMES.

Three Quarter Length Coats Are Becoming to Most Women.

Three-quarter length coats will be "the thing" next winter, and they will be elaborately stitched and trimmed.

The same rule of coat length applies to suits. The short coat, blouse or Eton will not be seen nearly as much, even on short women, for it is a mistake to think a three-quarter length coat shortens a woman who is not tall. It does nothing of the kind if properly proportioned.

How much more sensible is this fashion of ample coats than the foolish ab-

FLANNEL BLOUSE.

Breviated outer wraps with which we have sought to keep warm during freezing weather.

Lace is applied on many of the more expensive costumes, but it must be very handsome, heavy lace enriched with embroidery and figures made of velvet a shade darker than the material.

The hat to be smart in the winter must match the costume, and even fur should harmonize. The well dressed woman will be she who is in one tone from head to foot.

The picture shows a blouse of stitched fawn colored flannel, with tiny braid and velvet figures.

French Sailors Ever Popular.

Crowns Becoming Higher.

The French sailor of rough white felt is the favorite head gear with the tailor made suit. This has a sharply curved brim and is most simply trimmed with a couple of wings or even a band of ribbon twisted into a bow in front. The veil of chiffon, with a hem an inch and a half wide, is the chief ornament of such a hat, and it varies in color to match the costume with which it is worn.

The crowns of all hats are becoming much higher, and the brims are even

more sharply curved than they have been this summer.

The Spanish turban is being revived in a modified form with a fitted in back and a drooping plume touching the hair. This is especially smart when carried out in white with a white plume made of cock's feathers.

Purple hats are still the rage. They are made of braided chenille trimmed with shaded flowers or feathers.

Brown hats unrelieved by any color will be worn with tan costumes and brown furs.

The cut shows a green felt French sailor trimmed with quills and rosettes, with bands of green glaze ribbon.

FALLING FROM ALOFT.

Peculiar Exemption of Sailor Men From Accidents of This Kind.

"One of the wonders of seafaring life," writes Charles Protheroe in "Life in the Mercantile Marine," is the singularly small proportion of sailors who meet with death or accident by falling from aloft. Whether or no the cherub who is supposed to sit aloft and watch over poor Jack is responsible for it I am not prepared to say, but the fact remains.

"Having to tumble up aloft at all hours and in all weathers to perform acrobatic feats that would almost puzzle a monkey, the saying among sailors about 'hanging on by the eyebrows' becomes almost a truism.

"One would think the situation was highly spiced enough by danger without needlessly increasing it. Yet it is not altogether an uncommon thing to see a man, if he happens to be barefooted, run out along the yard in preference to using the footrope placed under it for the purpose, to reach what is a post of honor, the weather ear-ring.

"In spite of all this, although not knowing the actual percentage, I make bold to say that not more than one sailor man in hundreds is killed or injured by falling from aloft. If I use my own experience as a base, the proportion would be less, for in over twenty years of sea life I was never caused the pain of witnessing such a catastrophe."

Parents as Teachers.

Of all the teaching in the world ninety-nine one-hundredths at least is done by fathers and mothers. Every child learns more in the way of actual facts from the day of its birth until the end of its seventh year than it can possibly learn in all the rest of its life put together. During these first hours and years of life the child learns to walk, to talk, and what is far more important, it learns the beginnings of self control. During the first years the child puts itself in touch with the world into which it is born, and in these early years the parents, and the mother especially, are the teachers. They start the operations of the mind, giving it its first bent. And however able the teachers of the future may be, however conscientious and learned, in the great majority of cases the child's future, its success or failure, depends upon the first teaching influences of the mother and father.—New York American.

A Live Oak Too.

The bride was fair and slight and the bridegroom was dark and stalwart. They made a most interesting pair, and the people on the long distance train who had watched them more or less openly from San Francisco were cheered by the sight of a shower of rice which fell out of the bride's parasol two days later.

The bridegroom saw the smiles, and, putting his arm round his blushing wife, he faced the careful of friendly strangers.

"I reckon there's no need for me to say we haven't been married long," he announced in full chest tones, "but I can tell you one thing. You don't want to smile any more than 's polite, for she's my violet and I'm her sheltering oak, and I weigh 204 pounds."

A Quaint Examination.

Silence, it appears, is an unknown quantity at a divinity examination in Mandalay. The commencement is signaled by the clashing of cymbals and the beating of drums. While the candidates are writing their answers they are surrounded by a jabbering crowd, who pass audible remarks about what is being done. The test lasts ten days, and the people make the examination the occasion for gaining merit by feeding the candidates, and cart loads of provisions of all sorts find their way to the pagoda precincts, and Burmans from every quarter go round collecting money to provide the competitors with the necessities of life and luxuries as well.—Rangoon Times.

TREATMENT OF SHOES.

Shoes should be kept carefully in a shoe-bag or ventilated shoe box. Grease walking shoes of tan with vaseline, rubbing off all the grease the leather does not absorb. Put the vaseline on with a firm cotton cloth. Use blacking sparingly and only after greasing the shoes. Do not wear rubbers over fine shoes, but keep a heavy, solid pair of calfskin shoes for rainy weather.

Try to make them waterproof by frequently greasing them with mutton tallow. Rub them afterward with ink and sweet oil. This is better than blacking them. Only "slip" rubbers that merely cover the toe are necessary when these shoes are worn.

PATIENCE.

I hear you complaining dearest,
You have ever too much to do;
Your temper is worn with trying
To make old things look like new;
You sew for the little children,
You mend for the rollicking boys,
You were never a shirk, and you fret and
work,
Till your life is shown of joys,
If the days were longer, dearest!
If you never need go to bed!
But the time goes racing by you,
Till the hurrying week has sped,
And your basket's overflowing,
And your tasks are never done—
Poor, weary friend, will they never end
Till the sleep of death is won?
It's time you are needing, dearest,
Ah, yes; but there's time to spare,
If you'd let your Father carry
One end of your load of care,
If you'd tell Him all the trouble,
And ask from His tender hand
The gift of His peace, your pain would
cease;
His way you would understand.
There is time for loving, dearest;
If we take the time there is,
And fill that up with sweetness,
Whatever beyond we miss,
Let the little frocks be plainer,
Let the dust alone for awhile;
Let the good old man see how
blithe it
can be,
His home, in your tender smile.
Get out in the sunshine, dearest;
There is time for that, be sure—
If you'll only let the flowers
And the birds your steps allude,
Go out in the sunshine, dearest—
And bring it back with you;
Don't sit in the gloom, when His
bloom,
And His bending skies are blue.

PRINCETON.

E. H. Daniel was allowed \$100 by the city council for the use of his water works in the big fire Sunday night, which was much more disastrous than was at first reported. There was a loss to the owner of \$7,000 with no insurance. Mr. Ratliff is preparing to rebuild in an up-to-date style.
Hugh Mayes and wife, of Evansville, visited friends here a couple of days this week.
Mr. and Mrs. Frank Cobb, of Leavenworth, Kansas, who have been visiting the family of Jas. Hawthorne and other relatives here the past week, started to their western home yesterday.
Charles Wilson and wife, of Wilson's Crossing, were in town yesterday.

THE HARVEST OF GUM.

Over 15,000 pounds of spruce gum have been harvested this year in Maine. The gum hunter wears steel climbing spurs on his boots and in his belt he carries a light hatchet, while strapped to his waist is a bag with a wide mouth for the reception of the gum. Climbing the tree the hunter proceeds from limb to limb, clipping off the lumps of gum as he finds them, until he reaches the top. Most of the gum is caught in the wide open bag as it falls from the tree, while all that goes to the ground stands out in such relief upon the snow that it is easily gathered up. Having secured all the gum on the tree the hunter cuts and scars the bark so the tree may produce another crop.—Louisville Times.

Do Good—it Pays.

A Chicago man has observed that "Good deeds are better than real estate deeds—some of the latter are worthless. Act kindly and gently, show sympathy and lend a helping hand. You cannot possibly lose by it." Most men appreciate a kind word and encouragement more than substantial help. There are persons in this community who might truthfully say: "My good friend cheer up. A few doses of Chamberlain's Cough Remedy will rid you of your cold, and there is no danger whatever from pneumonia when you use that medicine. It always cures. I know it for it has helped me out many a time." Sold by Woods & Orme.

Correction of Children.

"Spare the rod and spoil the child" was the old English maxim. Today corporal punishment is forbidden in public schools, and to strike a child is considered a confession of weakness even on the part of a parent.

We are far from denying that in exceptional cases corporal punishment is beneficial. With average children, however, a firm and tender hand from the beginning will obviate any such painful necessity.

The foundation on which all successful character building is reared is justice! An absolute and impartial sense of justice more than anything else will win the love and veneration of a child.

Weak parents are often afraid to punish a child for fear of alienating its affections. Nothing could be a greater mistake.

If parents could judge their own children as they judge other people's, there would be few disagreeable men and women in the world.

Warts on her fingers, corns on her toes she will be miserable wherever she goes, unless she uses Dr. Mendenhall's Corn Cure. 15 cents at druggists, or sent by mail on receipt of price by J. C. Mendenhall, Evansville, Ind.

WASHINGTON LETTER.

On September 22, at midnight, the Panama canal treaty expired limitation. Any further negotiations looking to the construction of an isthmian canal by the Panama route will have to be begun de novo. The most authentic information from Bogota is to the effect that the several candidates who will stand for election to the presidency in December, killed the treaty through a sort of "dog in the manger" policy. The aspiring candidates fear that, were the treaty to be ratified and the proposed \$10,000,000 paid to Columbia during the Marroquin administration, Marroquin would utilize the fund to perpetuate his tenure of office. Each of the other candidates is afraid to see the treaty ratified until he is certain of his own election and, therefore, all worked against the convention. It is predicted by Dr. Herran, the Columbian in charge of affairs in Washington, however, that negotiations will be renewed later, probably as soon as a president is elected.

Under the circumstances the question is being asked, why does not the President immediately turn to Nicaragua and Costa Rica and negotiate a treaty whereby a canal may be built through their territory? To those who know, the reason is simple. Neither the President nor any of his advisers believes that the Nicaraguan route is at all practicable. It is true that the Isthmian Canal Commission first reported in favor of that route but that was a bluff. The representative of the Panama Canal company refused to set a definite price on his company's property and instead submitted an inventory showing that the property had cost at least \$109,000,000. Admiral Walker and the other members of the commission countered with a report favoring the Nicaraguan route and incidentally stating that the Panama Company's property was not worth over \$40,000,000. That brought the Frenchmen to time and they promptly offered their property for \$40,000,000. Then Admiral Walker revised his report and declared in favor of the Panama route. All this is appreciated by Columbia which country also appreciates that it has a monopoly and is therefore independent. The Spooner bill provided that in case the Panama route could not be obtained the canal was to be built by the Nicaraguan route but Mr. Spooner was simply carrying out the previous bluff. He knows, as does every other member of the Senate, save Senator Morgan, that it will be impossible ever to construct a canal there.

"Let it Pass—Let it Pass."

Oh, my dear friends, you who are having miserable misunderstandings, run on from year to year, you who are keeping wretched quarrels alive because you can not quite be convinced that now is the day to sacrifice your pride; you who are passing men sullenly upon the street, not noticing them out of some silly spite, and yet feeling that it would fill you with shame and remorse if you heard that one of those men were dead tomorrow morning; you who are letting your neighbor starve until you hear that he is dying, or letting your friend's heart ache for a word of appreciation or sympathy, which you mean to give—if you could know, and see, and feel all of a sudden that "the time is short," how it would break the spell! How you would go instantly and do the thing which you might never have another chance to do.—Phillips Brooks.

"The books were not completed tonight and we do not know how we stand. I do not know why the fair was a failure. A REMARKABLE SIGHT.

Sunday September 27th was one of those bright, crisp delightful days for which September is famous, and a more opportune time could not have been selected for the baptizing at Crooked Creek, where Revs. Blackburn and Conway immersed 24 young people in the presence of an audience of 600 people who had gathered on both banks of the creek and crowded every inch of space on the bluff overlooking the pool.

The candidates were led into the water in strings of six by the officiating ministers, each tier of six being placed behind the last one led in. When all were in the water and ready, the firm of Stewart & Ringo, who were on the ground for the purpose, photographed the group. It was indeed a sight to be long remembered. The baptizing then proceeded and all passed off pleasantly. The exercises were very interesting. Those baptised were Mr. and Mrs. Henry Gass, Allie Hughes, Bayles Paris, Fred Guess, Herbert McMeican, Mesdames Lizzie Pope, Della Ford, Josie Gass, Laura Gass, and Misses Pearl Morrill, Eva Driver, Conie Ford, Bessie Hurst, Lillie Guess, Allie Woodall, Ellen Gass, Lucy Gass, Minnie Gass, Kittie Howerton, Duke Howerton, Ida Butler, Berrie Fort.

There are nine more to be baptised next fourth Sunday at nine o'clock. About 28 of the number were converted during the series of meetings recently held by Revs. Hopewell, Blackburn and Davis.

COL. WEISSENGER'S SPEECH.

In a speech for the Democratic state ticket at Bowling Green, Col. Harry Weissenger advanced the following unique but potent argument:

"Col. Belpap is an honest man, but he has no sympathy for the people. He has no sympathy for the people of the South. He is a Northerner, bred and born. I do not believe he ever took a drink of Kentucky whisky, but he can sip champagne. I do not believe he ever took a chew of Kentucky's chief product, but he can chew gum. We want to be governed by a Kentuckian, one who is one of us. If you want to be governed by a Kentuckian you will re-elect J. C. W. Beckham."

NEWS NOTES.

At Williamstown, Ky. Mrs. Rita DeJarnette was admitted to the legal bar.

At Jasper, Ind., on her death bed, Mrs. Nellie Andrews confessed to murdering Stanford Freeman 18 years ago, which has remained a mystery until now. She was in love with him and he married another.

At Charlotte, N. C. a Southern passenger train jumped off a trestle 75 feet high, killing 9 people and dangerously wounding 7.

Blackmailers at Helena, Mont., demanded \$50,000 of the railroad company and threatened to dynamite bridges if not paid. The demand was met with deputy sheriffs and bloodhounds.

Mrs. Louis Hape, of Henderson died after two doctors administered an anesthetic preparatory to performing a surgical operation. Heart failure.

Curtis Jett, the condemned murderer, has been removed to Louisville for safe keeping.

The U. S. army maneuvers at West Point, Ky., are in full blast. Many thousands are there.

At Coney Island, N. Y., a lion escaped and sprang on the elephant in a menagerie. The elephant very promptly seized the lion with his trunk and hurled it into a lagoon almost drowning it, and thus enabling the trainer to capture the lion.

At Boston, Ellery H. Clark, a millionaire, is to marry Miss Lizzie Maddalena, daughter of an Italian emigrant.

A Good Story to be Published.

The Press realizes how people gather around the family hearthstone as the fall and winter comes on and the evenings lengthen out, and in order to furnish literature, of a high grade, will publish as a serial story some standard book of fiction, probably "Alice of Old Vincennes," one chapter each week. We trust it will be read and enjoyed this winter by all of our patrons.

There are nine more to be baptised next fourth Sunday at nine o'clock. About 28 of the number were converted during the series of meeting recently held by Revs. Hopewell, Blackburn and Davis.

COL. WEISSENGER'S SPEECH.

In a speech for the Democratic state ticket at Bowling Green, Col. Harry Weissenger advanced the following unique but potent argument:

"Col. Balnap is an honest man, but he has no sympathy for the people. He has no sympathy for the people of the South. He is a Northerner, bred and born. I do not believe he ever took a drink of Kentucky whisky, but he can sip champagne. I do not believe he ever took a chew of Kentucky's chief product, but he can chew gum. We want to be governed by a Kentuckian, one who is one of us. If you want to be governed by a Kentuckian you will re-elect J. C. W. Beckham."

A Cure For Dyspepsia.

I had dyspepsia in its worst form and felt miserable most all the time. Did not enjoy eating until after I used Kodol Dyspepsia Cure which completely cured me.—Mrs. W. W. Saylor, Hilliard, Pa. No appetite, loss of strength, nervousness, headache, constipation, bad breath, sour risings, indigestion, dyspepsia and all stomach troubles are quickly cured by the use of Kodol. Kodol represents the natural juices of digestion combined with the greatest known tonic and reconstructive properties. It cleanses, purifies and sweetens the stomach. Sold by all druggists.

NEWS NOTES.

The U. S. army maneuvers at West Point, Ky., are in full blast. Many thousands are there.

At Coney Island, N. Y., a lion escaped and sprang on the elephant in a menagerie. The elephant very promptly seized the lion with his trunk and hurled it into a lagoon almost drowning it, and thus enabling the trainer to capture the lion.

At Boston, Ellery H. Clark, a millionaire, is to marry Miss Lizzie Maddalena, daughter of an Italian emigrant.

A Good Story to be Published.

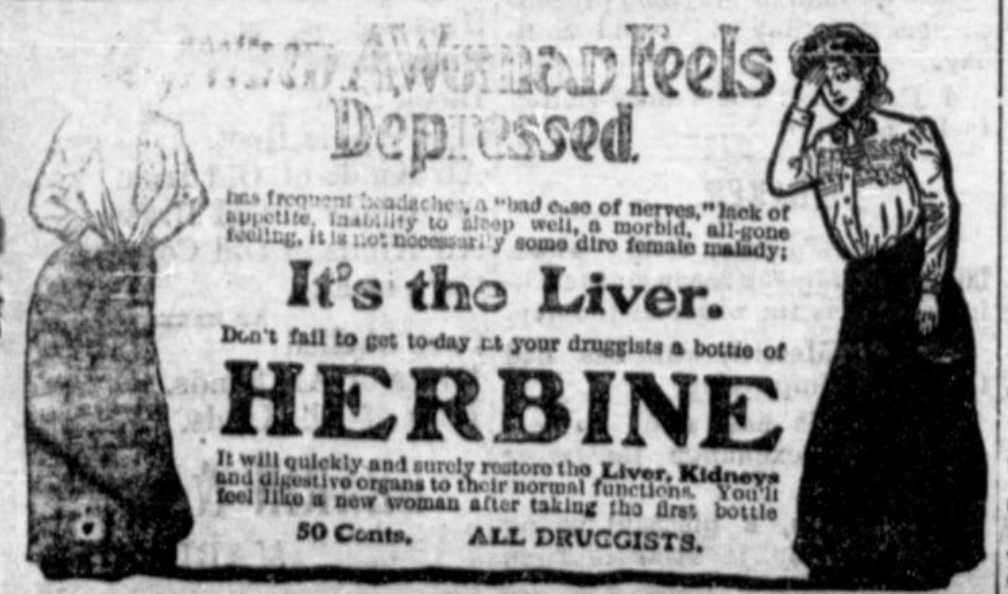

The Press realizes how people gather around the family hearthstone as the fall and winter comes on and the evenings lengthen out, and in order to furnish literature, of a high grade, will publish as a serial story some standard book of fiction, probably "Alice of Old Vincennes," one chapter each week. We trust it will be read and enjoyed this winter by all of our patrons.

Old man Lapey Armstrong, who died on Sept 27th was buried at Chapel Hill Sept 28th.

The severe drouth that we have passed through is to be a serious question with the farmers. They are beginning to realize that greater effort will have to be made for water; ponds and springs which used to afford water have gone dry and even cisterns have gone dry, and the farmers will have to dig more ponds and cisterns.

Gardens are about dried up, apples have fallen off badly and will be a light crop.

As beef cattle goes down beef still keeps high as ever; another mystery about supply and demand. What do you say about that?

We have had a nice rain and everybody is fixing wheat land. It is predicted now there will be a fair average crop sown in this vicinity, but not as much as generally is sown in this precinct.

Tobacco is all in the house and cured up and is a fine color, and by the way it is pretty fine.

W E Golladay and his hands are to be commended for the very splendid condition in which they put some of their rocky road.

Rosebud gets Bro. Rowland again this year. It is thought by some that a protracted meeting will begin there Sunday.

From time immemorial there have been characters that were loved by all who came in contact with them. The same can be said of the deceased, Ed. Phillips, a man who never failed to win the confidence of all who saw him. He was an affectionate husband to his wife, a loving father to his children and a true friend to his neighbor. He was a hero among heroes, because he fought silently the battles of life bravely; a man among men for he lived a manly life. Let us weep not for him, but try to imitate his life and meet him where there is no parting.
