GRAND OPENING OF THE NEW SPRING LINES!

The Girl With a Pretty Foot,

As a rule she is proud of it, and well should she be, and the girl with a pretty foot should wear GYPSY HOSIERY because it enhances the beauty of any foot. In Gypsy Hosiery you will find the rarest and nobbiest in Fancy Styles for Spring and Summer wear. Gypsy Hosiery is for Men, Women, Boys and Girls, and it wears longer and looks better than any Hosiery on the market. Try it, on our say so.

In the spring a young man's fancy lightly turns to thoughts of Love, but on the contrary a young woman's mind begins to revolve around the question of New Dresses, New Hats, New Shoes and all the articles that go to make up the spring outfit. Perhaps this may suggest the reason for the young man's fancy lightly turning to thoughts of love. It is with considerable pleasure that we announce that the New Spring Goods are all in and ready for your inspection. We want you to come and look whether you buy now or not, you will find this "a pleasant place to linger" and we want you to feel perfectly at home here.

Spring Styles in Mens' Furnishings.

Now comes the time for discarding the old ties, shaking the winter Shirts, getting out of heavy underwear, when the man blossoms forth like the rose in a new spring rigging. We have watched the markets for all that is new and best, and the boys will find our Ties and Shirts look real springy; take a little time and look for yourself.

We can Please You.

SPRING STYLES IN SHOES!

What a relief it is to get rid. of the heavy old winter shoes; good old friends they were too, but spring means a change, a coming out in new things. For the ladies we are showing the most exquisitly feminine line of shoes that have been in vogue for many years. Men shoes are built of very sensible lines this season. The styles are all here and we want you to come in and try on, we are confident you will buy.

WHAT THE LADIES ARE LOOKING FOR.

We wish we could paint a word picture that would bring before you, that would describe, the beautiful effects in the New Dress Goods for spring and summer wear. We have never shown more beautiful patterns and we predict a royal reception for these new goods from the ladies of Marion. Other things for the home, table linen, table cloths, napkins, etc., for house furnishings, the new Curtains and Carpets, Clever Patterns of Oilcloth. This will be an interesting store for you to visit.

THE WELL DRESSED MEN!

Will be pleased with the New Spring Clothes that we are showing. There is nothing freakish about the styles this year, there is considerable ginger in young men clothes. The time was when a man had to go to a merchant tailor and pay \$35 or \$50 for such clothing as we offer in our Ready-to-Wear Department from \$10 to \$15. These suits have extended shoulders, hand-made button-holes, the very best of lining, and there is fit and style in every suit.

Some People Like First Choice. Do you? Come Early.

CHAPTER XIX.

THE ATTACK.

has already been mentioned that Indians arriving singly or in squads to report at Hamilton's headquarters were in the habit of firing their guns before entering the town or the fort, not only as a signal of their approach, but in order to d their weapons of their charges preiminary to cleaning them before setting out upon another scalp hunting expedition. A shot, therefore, or even Tolley, heard on the outskirts of the Mage was not a noticeable incident the daily and nightly experience of he garrison. Still, for some reason, Opvernor Hamilton started violently when just after nightfall five or six rifles cracked sharply a short distance from the stockade.

He andfileim, withstwo other officers, were in the midst of agame of cards, while a kettle, swinging on a crane in e ample, fireplace, sang a shrill promof bot applejack toddy.

By Jove!" exchanged (Farnsworth, tho, although not in the game, was musing himself with looking on, "you mp like a fine fady! I almost fancled heard a bullethit you."

"You may all jump while you can," marked Helm. "That's Clark, and ur time's short. ! He'll have this fort mbling on your heads before daytht of tomorrow morning comes."

As he spoke het arose from his seat the card table and went to look after se toddy which as an expert, he had nder supervision.

Hamilton, frowned. The mention of Bark was disturbing. Ever since the range disappearance of Lieutenant arlow he had nursed the fear that ssibly Clark's scouts had captured n and that the American forces tht be muchinearer than Kaskaskia. sides, his nerves were unruly, as ey had been ever since the encounter ith Father Beret, and his vision persted in turning back upon the acsing cold face of Alice, lying in the mornlight. One little detail of that he almost maddened him at times. It was a sheeny, crinkled wisp of warm looking hair clooped across the k in which bethad often seen a ncy dimple dancel when Alice spoke smiled. He was bad enough, but not wholly bad, and the thought of having darkened those merry eyes and stilled those sweet dimples tore brough him with a cold and rasping

Just as sooneas this toddy is properly mixed and tempered," said Helm ith a magnetic jocosity beaming from his genial face, "I'm going to propose a toast to the banner of Alice Rousillon, which at whole garrison of Britdeh bravesthas been unable to take!"

"If you do I'll blow a hole through typu," said Hamilton in a voice fairly shaken to a busky quaver with rage. You may do a great many insulting things, but notathat."

Helm was in a half stooping attitude with a ladle in one hand, a cup in the other. He had met Hamilton's glowering look with a peculiarly innocent smile, as if to say: "What in the world is the matter now? I never felt in a better humor in all my life. Can't you take a joke, I wonder?" He did not speak, however, for a rattling vol-ley of musket and rifle shots hit the top of the clay daubed chimney, senddown into the toddy asshower of soot

and dirt. In a wink every mans was on his feet and staring.

"Gentlemen," said Helm, with an impressive outh, "that is Clark's soldiers, and they will take your fort, but they ought not to have spoiled this apple

"Oh, the devil" said Hamilton, forcibly resuming a/colm-countenance. "It as only a squad of drunken Indians coming in. We'll forego excitement. There's no battle-on hand, gentlemen." M'm glad you think so, Governor

Hamilton," Helm! responded, "but I should imagine that I ought to know the crack of a Mentucky rifle. I've heard one occasionally in my life. Bemides, I got a whiff of freedom just

"Captain Helmi is right," observed Barnsworth. "That is an attack."

Another volley, this time nearer and ton that he was indeed at the opening of a fight. Even (while the was giving some hurried orders to his officers a man was wounder at one of the portholes. Then came a series of yells, answered by a tripple of sympathetic French shouting that ran throughout the town. The patrol guards came straggling in, breathless with excitement. They swore to having seen a thousand men marching across the

water covered imendows. Hamilton was beave. The approach of danger stirred him like a trumpet etrain. His fighting blood rose to full tide, and he gave his orders with the teadiness and/communiting force of a orn soldier. The sofficers, hastened to their respective positions. On all sides ounds indicative of rapid preparations for the fight mingled into a confused strain of military energy. Men marchto their places, cannon-were wheeled into position, and soon senough the fir-ing began in good earnest.

Late in the afternoon a rumor of Clark's approach had gone abroad

through the village, but not a French lip breathed it to a friend of the British. The creoles were loyal to the cause of freedom; moreover, they cordially hated Hamilton, and their hearts beat high at the prospect of a change in masters at the fort. Every cabin had its hidden gun and supply of ammunition despite the order to disarm issued by Hamilton. There was a hustling to bring these forth, which was accompanied with a guarded yet irrepressible chattering, delightfully French and infinitely volatile.

"Tiens, je vals frotter mon fusil! J'ai vu un singe!" said Jacques Bourcier to the river to stand still. Oncle Jazon that terrible man. Ouf, but I should his daughter, the pretty Adrienne, who knew every man whose outlines he not like to be Colonel Hamilton and was coming out of the room in which

sinewy Frenchmen gliding in the dusk Vincennes, drew the creole militiamen of evening from cottage to cottage, to him, and soon Beverley's company passing the word that the Americans had doubled its numbers, while at the had arrived, saying airy things and same time its enthusiasm and ability pinching one another as they met and to make a noise had increased in a far hurried on, you would have thought greater proportion. In accordance with something very amusing and wholly joeund was in preparation for the people of Vincennes.

There was a current belief in the town that Gaspard Roussillon never missed a good thing and always somehow got the lion's share. He went out with the ebb to return on the flood. Nobody was surprised, therefore, when he suddenly appeared in the midst of his friends, armed to the teeth and during their long watery march. By emotionally warlike to suit the occasion. Of course he took charge of everybody and everything. You could have heard him whisper a bow shot

"Taisons!" he hissed whenever he met an acquaintance. "We will surprise the fort and scalp the whole garrison. Aux armes! Les Americains viennent d'arriver!"

At his own house he knocked and called in vain. He shook the door violently, for he was thinking of the stores under the floor, of the grimy bottles, of the fragrant bordeaux. Ah, his throat, how it throbbed! But where was Mme. Roussillon? Where was Alice? "Jean! Jean!" he cried, forgetting all precaution. "Come here, you scamp, and let me in this minute!"

A profoundly impressive silence gave him to understand that his home was deserted.

"Chiff! Frightened and gone to stay with Mme. Godere, I suppose, and I so thirsty! Bah! Hum, hum! Apres le vin la bataille. Ziff!"

He kicked in the door and groped his way to the liquors. While he hastily swigged and smacked be heard the firing begin with a crackling, desultory volley. He laughed jovially there in the dark, between drafts and deep sighs of enjoyment.

The firing sounded as if it were between the fort and the river, but presently when one of Hamilton's cannon spoke M. Roussillon saw the yellow spike of flame from its muzzle leap directly toward the church, and he thought it best to make a wide detour to avoid going between the firing lines. Once or twice he heard the whine of a stray bullet high overhead. Before he had gone very far he met a man hurrying toward the fort. It was Captain Francis Maisonville, one of out on a reconnoissance and, cut off from his party by some of Clark's forces, was trying to make his way to the main gate of the stockade.

M. Roussillon knew Maisonville as a somewhat desperate character, a leader of Indian forays and a trader in human scalps. Surely the fellow was legitimate prey.

"Ziff! Diable de gredin!" he snarled, and leaping upon him choked him to the ground. "Je vais vous scalper im-

Lieutenant Bailey. with fourteen regulars, made a show of attack on the east, while Major Bowman led a company through the town, on a line near where Main street in Vincennes is now located, to a point north of the stockade. Charleville, a brave creole, who was at the head of some daring fellows, by a brilliant dash got position under cover of a natural terrace at the edge of the prairie opposite the fort's southwestern angle. Lieutenant Beverley, in whom the commander placed highest confidence, was sent to look for a supply of ammunition and to gather up all the Frenchmen in the town who wished to join in the attack. "What's the use of waiting till morning?" Beverley demanded with impatience. "We can tear that stockade to pieces with our hands in half an hour." "I don't think so, lieutenant. It is better to play for the sure thing. Keep up the racket, and be ready for 'em if they rush out. We must not fail to capture the hair buyer general."

Beverley submitted to Clark's plan with what patience he could, and ail night long fired shot for shot with the best riflemen in his squad. It was a fatiguing performance, with apparently little result beyond forcing the garrison now and again to close the embrasures, thus periodically silencing invested. Nor can we deny, much as the cannon. Toward the close of the we would like to, the strong desire for night a relaxation showed itself in the shouting and firing all round the line. we are ready to charge." The shock had brought him back to his duty as a leader of his little company, and with the funeral bell of all his life's happiness tolling in his agonized heart he turned afresh to direct ing the fire upon the blockhouse.

About this time a runner came from Clark with an order to cease firing and let a returning party of British scouts under Captain Lamothe re-enter the fort unharmed. A strange order it seemed to both officers and men, but it was implicitly obeyed. Clark's genius here made another fine strategic flash. He knew that unless he let the scouts go back into the stockade they would escape by running away, and might possibly organize an army of Indians with which to succor Hamilton. But if they were permitted to go inside they could be captured with the rest of the garrison. Hence his order.

A few minutes passed in dead silence. Then Captain Lamothe and his party marched close by where Beverley's squad was lying concealed. It was a difficult task to restrain the creoles, for some of them hated Lamothe. Oncle Jazon squirmed like a snake while they filed past all unaware that an enemy lurked so near. When they reached the fort, ladders were put down for them and they began to clamber over the wall, crowding and pushing one another in wild haste. Oncle Jazon could hold in no longer. "Ya! Ya! Ya!" he yelled. "Look

out! The ladder is a-fallin' wi' ye!" Then all the lurking crowd shouted as one man, and, sure enough, down came a ladder-men and all in a crashing heap.

"Silence! Silence!" Beverley com manded, but he could not check the wild jeering and laughing, while the bruised and frightened scouts hastily erected their ladder again, fairly tumbling over one another in their haste to ascend, and so cleared the wall, falling into the stockade to join the gar-

"Ventrebleu!" shrieked Oncle Jazon. 'They've gone to bed, but we'll wake 'em up at the crack o' day an' give 'em a breakfas' o' hot lead!"

Now the fighting was resumed with redoubled spirit and noise, and when morning came, affording sufficient light to bring out the bead sights on the Kentucky rifles, the matchless marksmen in Clark's band forced the British to close the embrasures and entirely cease trying to use their cannon, but the fight with small arms went merrily on until the middle of the forenoon.

Historians have wondered why Hamilton became so excited and acted so strangely after receiving the note. The phrase "justly due to a murderer" is the key to the mystery. Cold drops of sweat broke out on his forehead and a shiver freedom rang out a prophecy of triwent through his body.

During the truce Clark's weary yet still enthusiastic besiegers enjoyed a good breakfast prepared for them by the loyal dames of Vincennes. Little Adrienne Bourcier was one of the

And yet Adrienne's heart was uneasy glass, "He's there, to a certainty, sir," rumbling tone terrible to hear. And and full of longing to hear something with his words out came his hunting of Rene de Ronville. Surely some one

of her friends must know something about him. Ah, there was Oncle Jazon! Doubtless he could tell her all that she wanted to know. She lingered after the food was distributed and

shyly inquired. "Hain't seed the scamp," said Oncle Jazon, only he used the patois most familiar to the girl's ear. "Killed an' scelped long ago, I reckon."

His mouth was so full that he spoke mumblingly and with utmost difficulty. Nor did he glance at Adrienne, whose face took on as great pallor as her brown complexion could show.

Beverley ate but little of the food. He sat apart on a piece of timber that projected from the rough breastwork and gave himself over to infinite misery of spirit, which was trebled when he took Alice's locket from his bosom only to discover that the bullet which struck him had almost entirely destroyed the face of the miniature.

He gripped the dented and twisted case and gazed at it with the stare of a blind man. His heart almost censed to beat and his breath had the rustling sound we hear when a strong man dies of a sudden wound. Somehow the defacement of the portrait was taken by his soul as the final touch of fate, signifying that Alice was forever and completely obliterated from his life. He felt a blur pass over his mind. He tried in vain to recall the face and form so dear to him; be tried to imagine her voice; but the whole universe was a vast hollow silence. For a long while he was cold, staring, rigid. Then the inevitable collapse came, and he wept as only a strong man can who

The British muskeeters returned the fire as best they could, with a courage and a stubborn coolness which Helm openly admired, although he could not hide his satisfaction whenever one of them

was disabled. "Lamothe and his men are refusing to obey orders," said Parnsworth a little later, hastily approaching Hamilton, his face flushed and a gleam of hot anger in his eyes. "They're in a nasty mood. I can do nothing with them. They have not fired a shot."

"Mutiny?" 'Hamilton demanded. "Not just that. They say they do not wish to fire on their kinsmen and friends. They are all French, you know, and they see their cousins, brothers, uncles and old acquaintances out there in Clark's rabble. I can do nothing with them."

This ink can be prepared in severa ways, one of the best being as follows Obtain two bottles, each of which will contain about an ounce. Label these 1 and 2 respectively, so that there can be no mistake. No. 1 contains a solu tion of fron sulphate, and No. 2 is a solution of gallic acid. Now, No. 1 is the ink and No. 2 the developer. Take a clean pen, preferably a quill, and dip It into the bottle labeled No. 1 and write or draw on a piece of white paper, allowing this to dry. The writing or drawing will be quite invisible, but as soon as it is sponged over with the solution in the bottle labeled No. 2 the writing or drawing will appear in deep black character or outline, as the case may be.

Another form of invisible ink, which requires a different treatment for de veloping, is a solution of very dilute sulphuric acid. Heat is necessary in this case to render the writing visible, and consequently it is more difficult to introduce it into a conjuring trick.

Birds That Fish For Men.

The Chinese of Amoy have a queer way of capturing fish. They tame a sea bird similar to the pelican, then fasten a string about his neck, making it impossible for him to swallow.

The bird is then set loose, and, fol lowing his natural instinct, he goes fishing, filling his pouch. But as he cannot swallow his catch he is obliged to return to his Chinese master, who takes his fish from him, removes the string and gives him two or three of

"I saw Beverley an hour ago," said Helm. "I knew all the time that he'd be on hand."

It was a white lie. Captain Helm was as much surprised as his captors at what he heard, but he could not resist the temptation to be annoying.

Hamilton looked as Farnsworth directed, and, sure enough, there was the young Virginian lieutenant standing on a barricade, his hat off, cheering his men with a superb show of zeal. Not a hair of his head was missing, so far as the glass could be relied upon to show.

Oncle Jazon's quick old eyes saw the gleam of the telescope tube in the loop-

"I never could shoot much," he mutstered, and then a little bullet sped with absolute accuracy from his disreputable looking rifle and shattered the object lens just as Hamilton moved to withdraw the glass, uttering an ejaculation of intense excitement.

"Such devils of marksmen!" said he, and his face was haggard. "That in-Ternal Indian lied."

"I could have told you all the time that the scalp Long Hair brought to you was not Beverley's," said Helm indifferently: "I recognized Lieutenant Barlow's hair as soon as I saw it."

This was another piece of offhand romance. Helm did not dream that he was accidentally sketching a horrible truth.

"Barlow's!" exclaimed Farnsworth. "Yes, Barlow's, no mistake"-

Two more men reeled from a porthole, the blood spinning far out of their wounds. Indeed, through every and bloody vengeance on every man aperture in the walls the bullets were now humming like mad hornets.

"Close that porthole!" stormed Hamilton. Then turning to Farnsworth he added: "We cannot endure this long. Shut up every place large enough for | tiers require the blood of the Indian a bullet to get through. Go all around, give strict orders to all. Alice's lover he must quickly throw himself upon the mercy of Clark. It dian agent, now, with some difficulty was his only hope. He chafed in clearing his throat, spoke up. wardly, but bore himself with stern coolness. He presently sought Farnsworth, pulled him aside and suggested that something must be done to prevest an assault and a massacre. Why not ask for a few days of truce? It could do no harm and if agreed to might be was doubled by a wild scene enacted glo-Saxon civilization which was to foltheir salvation. Hamilton jumped at the thought and forthwith drew up a note which he sent out with a white career had he been so comforted by a sudden cessation of fighting. His soul cold face now had Beverley's beside it | tured on the outskirts of the town by in his field of inner vision-a double assurance of impending doom, it seemed to him.

There was short delay in the arrival of Colonel Clark's reply, hastily scrawled on a bit of soiled paper. The request for a truce was flatly refused, but the

note closed thus: "If Mr. Hamilton is Desirous of a Conferance with Col. Clark, he will meet him at the Church with Captn.

The spelling was not very good, and there was a redundancy of capital letters, yet Hamilton understood it all, and it was very difficult for him to conceal his haste to attend the proposed conference. But he was afraid to go to the church—the thought chilled him. He could not face Father Beret, who would probably be there. And what if there should be evidences of the funeral? What if?— He shuddered and tried to break away from the

vision in his tortured brain. He sent a proposition to Clark to meet him on the esplanade before the main gate of the fort, but Clark declined, insisting upon the church, And thither he at last consented to go. It was an immense brace to his spirit to have Helm beside him during that friends because his disease sours his walk, which, although but eighty yards disposition as well as his stomach. in extent, seemed to him a matter of leagues. On the way he had to pass near the new position taken up by Beverley and his men. It was a fine test of nerve when the lieutenant's eyes met those of the governor. Neither man permitted the slightest change of countenance to betray his feelings. In fact, Beverley's face was as rigid as

marble; he could not have changed it. Father Beret was indeed present at the church, as Hamilton had dreaded, and the two duelists gave each other a rapier-like eye thrust. Neither spoke, sult. Sold by all druggists

however, and Clark immediately demanded a settlement of the matter in hand. He was brusque and imperious to a degree, apparently rather anxious to repel every peaceful advance.

It was a laconic interview, crisp as autumn ice and bitter as gall berries. Colonel Clark had no respect whatever for Hamilton, to whom he had applied the imperishable adjective "hair buyer general." On the other hand, Governor Hamilton, who felt keenly the disgrace of having to equalize himself officially and discuss terms of surrender with a rough backwoodsman, could not conceal his contempt of Clark.

The five men of history, Hamilton, Helm, Hay, Clark and Bowman, were not distinguished diplomats. They went at their work rather after the hammer and tongs fashion. Clark bluntly demanded unconditional surrender. Hamilton refused. They argued the matter. Helm put in his oar, trying to soften the situation, as was his custom on all occasions, and received from Clark a stinging reprimand, with the reminder that he was nothing but a prisoner on parole and had no voice at all in settling the terms of surrender.

"I release him, sir," said Hamflton. "He is no longer a prisoner. I am quite willing to have Captain Helm join freely in our conference."

"And I refuse to permit his acceptance of your favor," responded Clark. "Captain Helm, you will return with Mr. Hamilton to the fort and remain his captive until I free you by force. Meantime hold your tongue."

Father Beret, suave looking and quiet, occupied himself at the little altar, apparently altogether indifferent to what was being said, but he lost not a word of the talk.

"Qui habet aures audiendi, audiat," he inwardly repeated, smiling blandly. "Gaudete in illa die, et exultate!" Hamilton rose to go; deep lines of

worry creased his face. But when the party had passed outside he suddenly turned upon Clark and said: "Why do you demand impossible

terms of me?" "I will tell you, sir," was the stern answer in a tone in which there was no mercy or compromise. "I would rather have you refuse. YOUR KIDNEYS ARE THEY WELL?

Unless they are, good health is impossible.

Every drop of blood in the body passes through and is filtered by healthy kidneys every three minutes. Sound kidneys strain out the impurities from the blood, diseased kidneys do not, hence you are sick. FOLEY'S KIDNEY CURE makes the kidneys well so they will eliminate the poisons from the blood. It removes the cause of the many diseases resulting from disordered kidneys which have allowed your whole system to become poisoned.

Rheumatism, Bad Blood, Gout, Gravel, Dropsy, Inflammation of the Bladder, Diabetes and Bright's Disease, and many others, are all due to disordered Kidneys. A simple test for Kidney disease is to set aside your urine in a bottle or glass for twenty-four hours. If there is a sediment or a cloudy appearance, it indicates that your kidneys are diseased, and unless something is done they become more and more affected until Bright's Disease or Diabetes develops.

FOLEY'S KIDNEY CURE is the only preparation which will positively cure all forms of Kidney and Bladder troubles, and cure you permanently. It is a safe remedy and certain in results.

If You are a sufferer, take FOLEY'S KIDNEY CURE at once. It will make you well.

In the libel suit of Secretary of State McChesney vs. The Herald, Young E. Allison and others, which was tried at Smithland Tuesday, the jury after being out 15 minutes returned a verdict in favor of McChesney and awarded him damages in the sum of \$1500, This judgment was gratifying to friends of the distinguished plaintiff, but was expected and in tact a foregone conclusion. Assistant Secretary of State, Wm. F. Grayott, Rid Reed, and other State officials accompanied Secretary of State McChesney to Smithland, and carried with them the records to show the absolute falsity of the charges made by the Herald, and |pot at Craynevtlle, on East public road it did not take the jury long to settle the case. The tolerably fast to match for waitresses are the last ings badly needed painting and repairing, and our citizens were very careless in regard to the appearance of their yards and residences.

> "One spring," continued the Ohioan, "this merchant I spoke of inserted a notice in the local paper calling attention to the way things were being neglected and offering a prize of a ten dollar gold piece to the boy or girl who should show the prettiest front yard during the summer. This started the work with a rush, and every child in the town set out to win that coin or die in the attempt.; Of course it caused a lot of talk, and it wasn't long before S. Le Quinn, of Cavendish. Vt., was we all got the 'village beautiful' ferobbed of his customary health by in- f ver. Seeds were purchased and planted, unsightly fences were taken down,

> lawns were cut and trimmed, houses his house, his trouble was arrested and repaired and painted, and there folnow he's entirely cured. They're guar- lowed a general cleaning up from one end of the community to the other. There was a great deal of rivalry in the matter, too, and no one would let his neighbor get the better of him in the work of improvement.

"The results were marvelous. In a short time you wouldn't have known the place. A village improvement soclety was organized that summer, and it did and is doing splendid work, Our streets have been repaved, public buildings improved 100 per cent, and the town has waked up to the fact that it pays to be alive. Our next census will, I think, show a large increase in population, as a number of families have moved in during the past two years, and new ones are coming in ail the time.

"Our local papers also deserve a lot of praise in this matter. They took up the work from the start and have given the boom their closest attention. The names of those making improvements have been published, and this has done much to keep the boom alive. When John Jones reads that Joe Brown has had enterprise enough to fix up his premises so that they are a credit to the town, Jones is going to do

"Yes," concluded the Ohioan, "a ten dollar gold piece started the boom, and none of us regrets the money he has spent in following it up. It has raised the price of real estate considerably, proved healthful and instructive to the children and has been a good thing all around. Having begun to realize the benefits of such a boom, we propose to keep it up, and next summer will see more improvements going on in our town than ever before." A. B. LEWIS.

What the Telephone Reveals.

The telephone reveals one's disposition. It expresses amiability or the opposite traits in a way that leaves no chance to recover the lost reputation.

Persons who suddenly try to make their voices soft with amiaking, never deceive the hearer at

One reason for this attitude of mind on the part of the person called is the interruption of the other work. It often happens that he or she may be absorbed in something else. The first tendenthe person who does intrude at such a juncture, and it requires a certain amount of breeding to compose one's self in order to answer amiably.

Only persons who take the trouble to think of others will make an effort to be polite when they feel in quite another mood. Thus is the telephone in the outset a test of manners.

It reveals also the natural disposition. Persons who are always amiable and in gentle mood do not old appraised by me at six dollars. show that they are very much up- 4t set even if they feel it, by the sud den ringing of a bell that means they are required.

The telephone voice may also express one's physical condition, as that is indicated by the nerves. Only a few months ago a man who had been for years extremely occupied by his affairs and devoted only to them suddenly broke down turned out to be a physical wreck and had to retire from all that remained to him of life. Most of his friends were astonished at the sudden collapse.

"I knew that he was in a serious condition long before he ever con sulted me," his physician said, "and I discovered his condition

the phone.

"No man who answered in that irritated, peevish manner, could possibly have been in good health. That voice showed exhausted nerves and physique. So I am not surprised to hear that he has succumbed entirely."

Thus the telephone is a measbility when they learn who is spea ure of disposition, manners and health. Its greatest value lies in the other end of the line. It is the fact that it takes a person off the final answer that reveals the guard. The rush to answer the phone generally allows little time to prepare one's self; so the real mood shows itself in the first

Largest Farm in Illinois,

One of the most remarkable enterprises in the west is the Sibley estate in Ford county, Ill. The late Michael Sullivant commenced the improvement of the tract about 1866, and developed what was known as the largest corn farm in the world, having in 1872 18,000 acres planted. In 1876 he disposed of the entire tract to the late Hiram Sibley, the great seeds man of Rochester, New York. By subsequent purchase Mr Sibley formation for almost every depart became the owner of 21,720 acres, mostly in Ford county, a small portion being in Livingston. The Delineator for May.

In addition to an elaborate porrayal of current fashions, and ther matters of special interest to women, The Delineator for May contains literary and artistic features of the highest excellence. In fiction there are two short stories; His Fancy, by Virginia Woodward Cloud, a delightful tale of a girl and her adviceful cousin and awesome mother in law, and The Battle of the Strong, by Jno. H. Whitson, a College story; also a dramatic chapter of the Evolution of a Club Woman, by Agnes Surbridge. The story of Catherine Sevier, conspicuous in the early history of Tennessee, is the first of a series on Great Women of Pionee: Times. Among the present day's great, Mme Sembrich the fameus sorrano, is the subject of of an interesting article by Gustav Kobbe, the illustrations of which are of special value. In Around the World in Eighty Pictures the reader is taken into a field of great interest-Japan and Corea. Lillie Hamilton French's remarks on Mothers and Marriage able Sons will be greatly enjoyed, and Dr Murray's instructions in regard to the care of the mouth, and teeth will be found healthful to every one. In addition there are engaging stories and pastimes for the little ones and timely inment of the home.

UR Loom End Sale closed last Saturday and it was from start to finish the greatest sale we ever held. Thousand of people visited our store during these two weeks of the greatest bargain giving ever known in Marion, and the only people that were disappointed were those who failed to get in our store or failed to get waited upon. Those that attended our first Loom End Sale were the first at our second sale, and the first at this sale, which shows that we not only have the ear but the confidence of the people. Experience has proven to them that when we advertise bargains --- and we are always advertising them ---- that we have bargains, and right here we wish to express to our friends and patrons our high appreciation for this confidence, and our sincere thanks for this very liberal patronage. It stimulates us to still greater efforts to serve them, and serve them acceptably. Of course we understand, that you know that we are in business solely for the money there is in it, but we believe that it is money to us to give the people bargains.

We know that the Smallest Possible Fact is Worth a ton of Argument.

that nobody "goes to a goats house for wool" and that it is almost as foolish to expect bargains where bargains were never found. So it is not what we or others tell you, but what we or they sell you that convinces you. Bearing this in mind we want to ask you to come to see us. Our new spring stock is now complete, and dollar for dollar, we do not believe there is a better one anywhere.

Laces, Ribbons, Embroideries, Hosiery, Gloves, White Goods.

You'll not find us far from the lead. We have all of the new weaves in Wash Goods and the stylish trimmings for same. Our Shoe Stock is right up-to-date. All of our Mens, Women and Childrens fine shoes we have made especially to order, and have the only line of Men and Women's high-class made-to-order foot wear sold in Marion. We have never before shown as large or as pretty arrays of patterns in Mens Suits and Fine Pants. Our Clothing is made by the largest clothing firm in the world. They are handled by the leading firms in every large city in the U.S. And this fact alone is proof that they are right in style and right in price.
