NUMBER 33

LEAD AND ZINC DECLINING

Lead Falls to \$69.50 per Ton at Joplin.

Lead Shows a \$1 Drop---Condition Weather Favorable to Mining Interests.

Fluorspar is an article by F. Julius Caesar, assistant geologist, Kentucky Geological Survey.

presence of fluorspar in the States was reported as early as but it was not until 1870 that any shipments were made. Shipments made that year from the Royal mine in Western Kentucky. Southern mines followed suit two years and since 1880, production from has been continuous. The annual output up to 1898 had not exceeded tons. Western Kentucky mines exceeded in shipments those of other American district since 1901, also those of any foreign country Germany. The Castle Dome district of Arizona and the central Tennessee district have been shipping since.

Their sales have thus far been small, but central Tennessee reports increase for 1905. A small amount has been produced in the last two years in central Kentucky, but as yet no shipments are reported. Fluorspar secured as a by-product of lead and in Albemarle county, Virginia; at Cripple Creek mines with gold veins; and at a number of other points to a less extent, none of which is being used at present.

Production in 1905. — Arizona, Illinois, Kentucky and Tennessee continued as

Corner of block on Main and Bank street, showing a good view of the new Marion Bank building.

Central Tennessee dist.	1	1
Less companies shipping from two states		2
total	18	9

Besides these producing companies, there were numerous others, developing properties and some of them producing fluorspar, which, however, did not ship or sell fluorspar during the year, whose production is not included in the above estimates.

Fluorspar Mining.—Practically all the mines at work in 1904 were operating in 1905 with a number of new ones. A number of new orebodies were encountered in the exploitation of old mines, and in this respect the year showed a marked advance.

Central Kentucky District.—The

1500 lb. in a limey clay. In sinking the shaft, 25 ft. of limestone was encountered, immediately below which is an 8-ft. vein of fluorspar dipping 10° to 20° degrees west and striking northwest. Crystallized calcite, very similar in appearance to the fluorspar, lines the foot-wall which consists of a gray limestone sand or clay resulting from the disintegration of the limestone. The fluorspar is said to average 98 per cent calcium fluoride. This may be a blanket vein originally replacing limestone. Similar to those in the Western Kentucky and Southern Illinois districts, occurring in close proximity to a vertical vein.

The Alcorn property about 2 miles east of Nashville on the Tennessee Central, was also being developed. Heavy yellow crystallized fluorspar occurs in

been previously opened, a 12 ft. vein carrying fluorspar and galena was encountered, placing it on the list of producers for 1905. Some shipments were made from the Lee mine. Here there is an exceptionally wide vein of gravel fluorspar.

Western Kentucky District.—The widest vein operated in this district during 1905 was 36 ft. of gravel fluorspar, at the 145 ft. level of the Pogue mine. The widest lump vein was 16 ft. at the John mine. At the Mary Belle mine, two new veins were encountered and one of the shafts showed 15 ft. of fluorspar with galena associated, while another shaft at the same mine showed nearly 3 ft. of solid galena. At the John mine a 12 ft. vein of fluorspar was secured at a fault on the 247 ft. level, while within 50 ft. an 8 ft. sheeted zone running well in lead and zinc sulphides was secured. Among the new producers was the Kentucky mine, which has a 12 to 20 ft. vein of gravel fluorspar in the upper levels and 10 ft. of lump in the lower one; this mine together with the Matthews with which it is connected, produced a good tonnage during the year. The new Memphis slope gave up to 12 ft. of No. 1 lump at a depth of 75 ft. The Keystone mine with a good vein carrying some galena, the Wheatoft and a new shaft on the Tabb land may be mentioned among the others as having large veins producing in 1905 while veins of 6 ft. or less were numerous. Among the new deposits may be mentioned those opened on the Ben Belt, Brown, Cox, Senator and Parish properties. The last named is a large flat deposit replacing limestone near a fault.

The shafts for the most part continue shallow, the majority of the deposits being worked within 100 ft. of the surface. But a few shafts exceed 200 ft. and only the John mine has reached 250 ft.

Detail surveys were made by the Kentucky Geological Survey during the

STRIKING APPEARANCE OF NEW MARION TODAY

As Compared With the Desolate Appearance on Morning After the Destructive Fire of Last March

In Less than a Year a Modern City Springs into Existence to Take the Place of the Old Town.

Truly it can be said that from the charred and blackened ruins of the old Marion has come forth the new and modern Marion.

We can hardly believe, as we compare the two sets of illustrations, that it is one and the same place, that where once were chaos and destruction, now loom lofty edifices—edifices of which any city should be proud.

We can hardly believe that from the charred and blackened ruins of March 28, 1905, another March has ushered in an up to date little city which will continue to march and improve and look many other Marches proudly in the face.

The citizens and business men of Marion are not made of the stuff that breathes of failure. In the words of Tennyson, they believe "that men may rise of stepping stones of their dead selves to higher things," and, after our failures of today is our success tomorrow.

The three cuts here shown will give

the reader a fair illustration of our town as it is today, and now, turn to the last page and see what it was less than one year ago.

The breast of every loyal inhabitant should swell with pride, every citizen should be inspired with new zeal, new determination and new courage to push the work so nobly begun.

The time is ripe for untold improvement. Ready action and steady work will make of Marion what cannot be said of another town of its size in Kentucky.

Now that the work has been so ably begun, will the citizens go to sleep and let their little town sink into obscurity? Why not have a live little city? Marion needs water works, factories, and many, many things.

By steady and earnest co-operation great feats may be accomplished. Let us hope that with the coming of spring will come a new era that will bring in its wake higher ideals and a vast improvement.

shipped direct to the consumer. The year has seen the largest tonnage of ground fluorspar produced and shipped, ever known. That shipped from one mill in Western Kentucky exceeded the total output of the State for the previous year.

In Southern Illinois the Fairview mill was remodeled in the early part of the year, and the capacity increased. Cooley jigs and a Wilfley table were installed to replace jigs of the Hartz pattern. The lead concentrate of the plant is considerably cleaner than that made previously, but the fluorspar product is not improved, a No. 2 product being turned out and crushed in two sizes. At the time of the writer's visit, the daily capacity of the mill for concentration of fluorspar and galena was about 40 tons, while the grinding division handled about 100 bbl. per day. The capacity, however, is being increased.

No changes are to be noted for the Kentucky or the Rosiclare mill. The Nancy Hanks mill erected by the Albany Mining and Investment Company has just been completed. It is at their Nancy Hanks mine near Salem, Ky. This mill, like most of the others

(Continued on Eighth Page)

Showing block, corner of Main and Bank street as they appear today. Hayward, Orme, and Stegar buildings on Main street, James' office and Hotel Crittenden on Bank street.

the fluorspar producing states. The production for the year was not far short of 50,000 short tons. Of this, Western Kentucky may be credited with 30,000, Southern Illinois 19,000, Central Tennessee 600 and Arizona 400 or more tons. This production is practically twice that of 1904. Shipments of ground fluorspar from Kentucky alone exceeded 5,000 tons, while the total of all kinds from Kentucky may be estimated at 26,500 tons compared with 12,910 tons for 1904. Tennessee shipped 520 tons in 1905, compared with a total shipment of 600 tons for all previous years. Of the 1905 production about 12,000 tons were ground No. 1 fluorspar, being more than double the amount ground in 1904. It will thus be seen that shipments kept step with increased production.

The following table shows the number of companies that produced and prepared fluorspar for the market and the number of companies shipping to consumers in 1905. One of the shipping companies was not itself a producer.

Companies Producing	Companies Shipping
Castle Dome dist., Ariz.	1
Southern Illinois dist.	4
Western Kentucky dist.	12

Monitor (formerly Chinn) Mineral Co. continues development work in Mercer county at the Twin Chimney mine, some work also being done at the Fan tail mine. At the former, the shaft is being deepened; at the latter, a cross-cut is being driven, the vein consisting principally of fluorite. At the Twin Chimney the vein averages about 4 ft. It is banded, for the most part symmetrically, fluorite, barite and calcite occurring in separate bands, varying from an inch to a foot in width. While barite forms only a very small part of the vein at this mine, there are other veins in the district that consist largely of barite, some of which will be operated the coming year. The shaft at the Twin Chimney has been sunk to 225 ft. (80 ft. below the adit), and the vein in the bottom is 5 ft. wide, largely fluorite with but little barite, with walls of Camp Nelson (Chazy) limestone. The veins of this section have been briefly noted in a recent report.

Central Tennessee District.—Two properties were operated in the latter part of the year. The Foley mine is situated about eight miles west of Carthage in Smith county. Here, near the surface, massive crystalline fluorspar occurs in boulders weighing from 16 to

ering the ground within a foot or two of the surface. Some 30 tons have been mined from surface picking. Sinking has failed to locate the veins, though fluorspar is found to fill limestone crevices 8 to 10 feet. Similar fluorite is reported from the vicinity of Nashville.

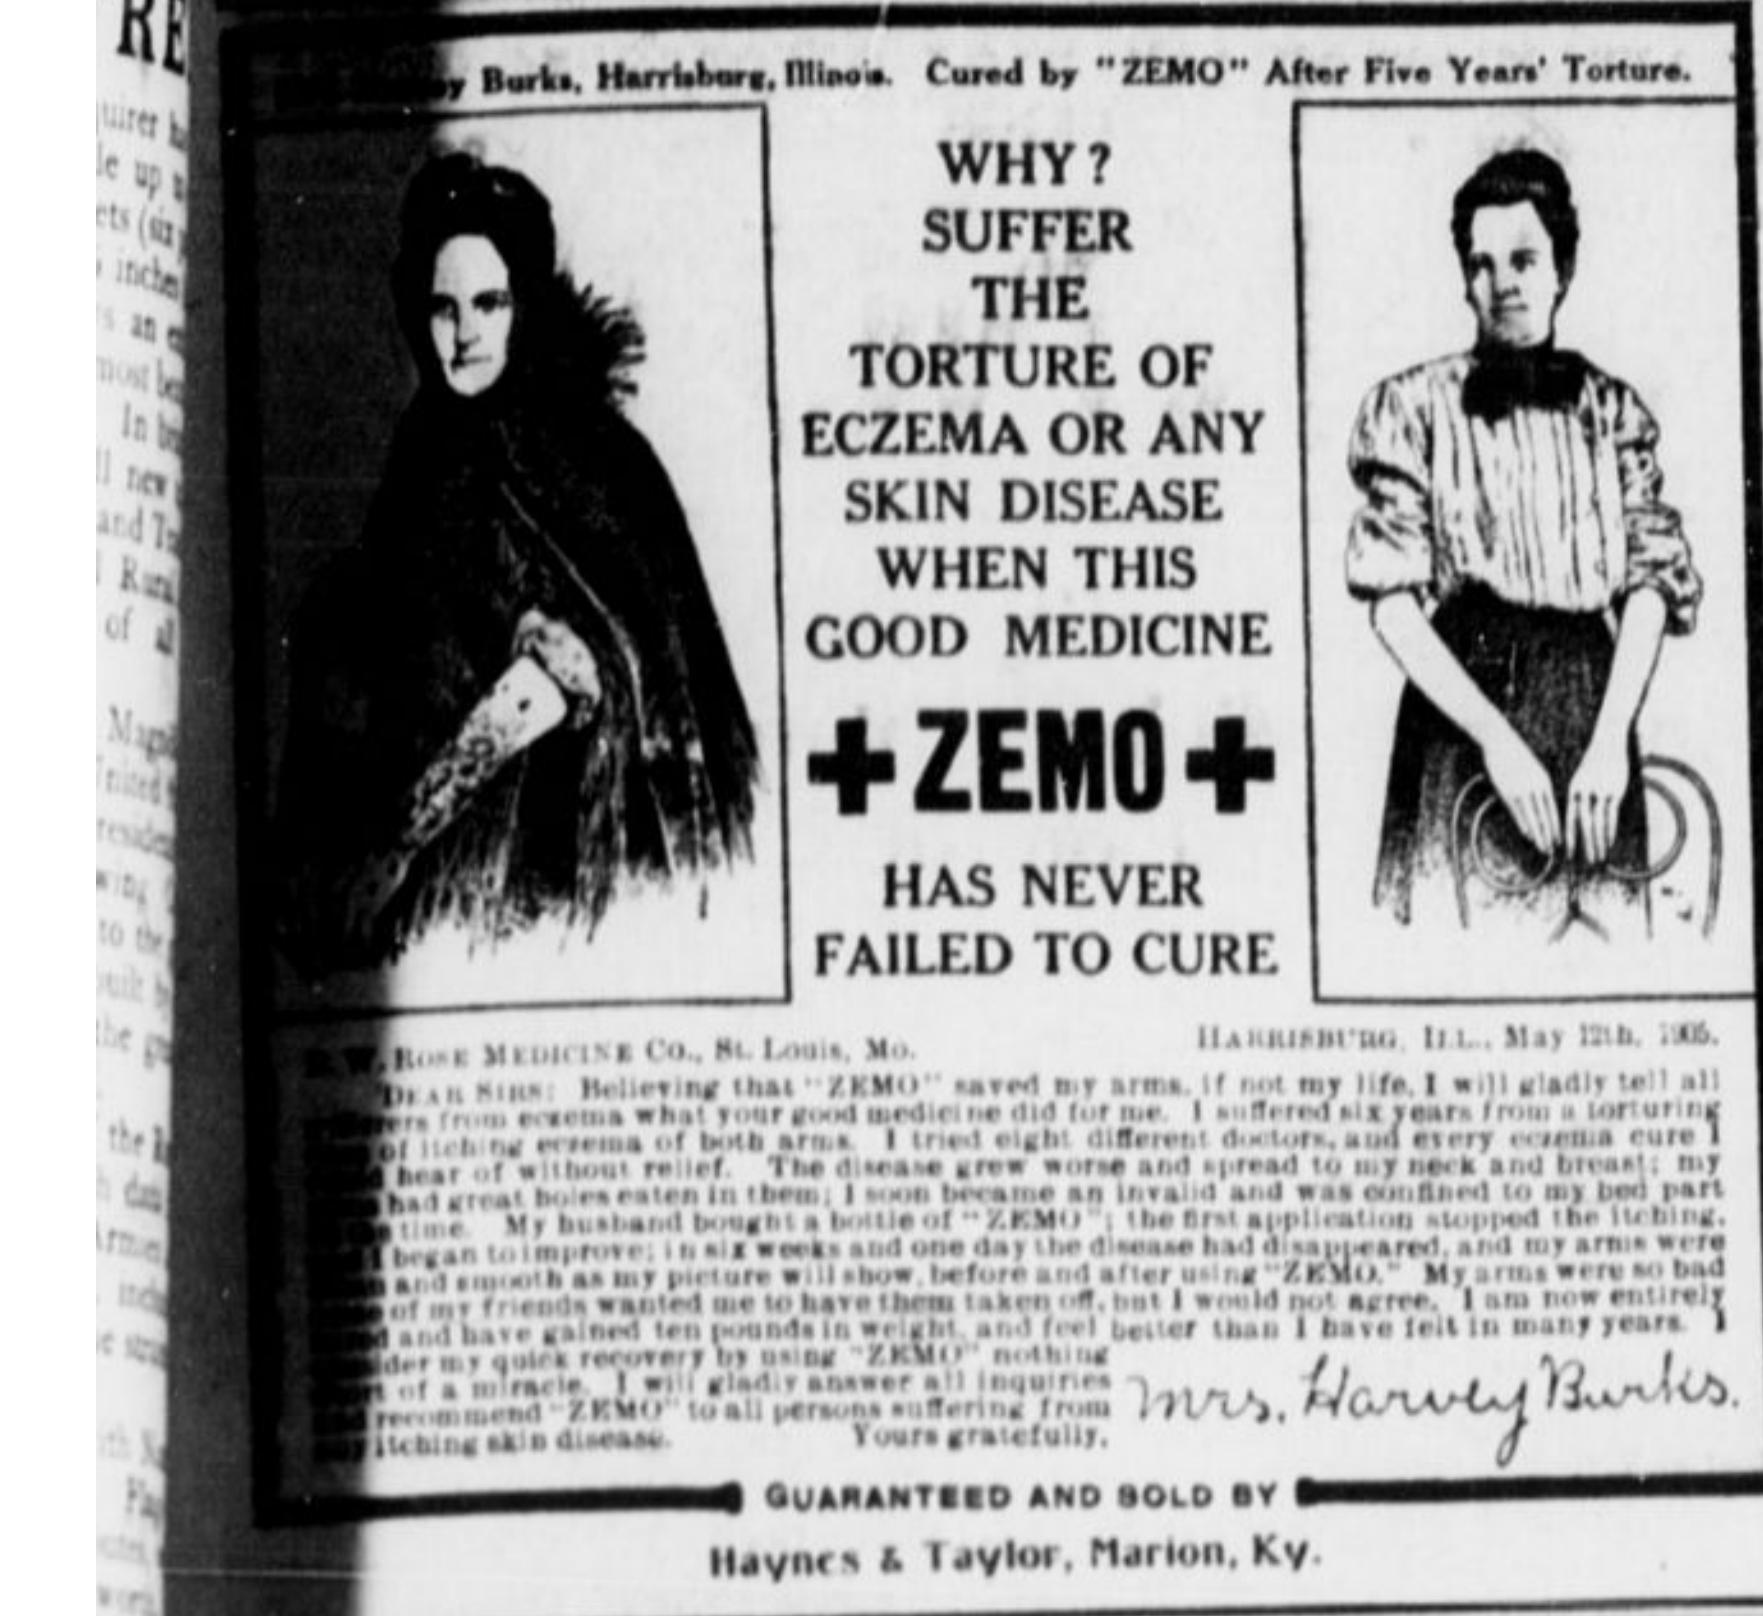

Southern Illinois District. The Fairview mine was sufficiently developed by the early part of 1905, to make it capable of turning out 50 tons daily, from its 211 and 270 ft. levels, giving it the record for daily production. This mine is capable of producing large amounts of fluorspar, since it has maintained a width of 6 to 30 ft. for over 500 ft. without showing any evidence of decrease. The product shows no change in the lower level. A sufficient amount of galena is secured with the fluorspar to pay more than the running expenses of the mine and of the mill.

The Rosiclare output was about 25 tons daily while running, secured from the 300 ft. level, where the vein shows no change in character beyond the usual pinches and swells.

At the Black mine near Bay City,

Looking South down Main street from Masonic Temple on corner of Main and Belleville today.

How They Differ.
London, Feb. 3.—"Woman is not inferior to man. She is only dissimilar. A sensible woman has no desire to be like man, for the more she resembles him in her physical and mental organ-

ization, the less is her charm for man and her power over him."

Such was the keynote of the interesting lecture on "Woman, Her Brain, Mental Capacity and Character," delivered by Dr. Bernard Hollander, the brain and nerve specialist, before the neurological society this week.

Dr. Hollander contended that although the brain of a woman weighed about five ounces less than that of a man, there was no reason to expect a marked inferiority of intellectual power in the female sex.

"It is now shown," he said, "this difference in brain weight is insufficient to explain whether the deficiency lies in intellect, in strength of sentiment or force of brute propensity.

"In woman the sympathetic or ganglionic nervous system is more developed than in man, and it is due to this more elaborate sympathetic system that women feel more keenly the emotional side of life. Their affections are deeper, they are more subject to fear, more readily roused to joy and sorrow, and their grief is more intense."

Therefore, Dr. Hollander contended, if judged by her brain and nervous organization together, woman is mentally not inferior to man.

So far the ladies present at the lecture were obviously pleased, but when Dr. Hollander spoke of love and marriage there were audible "sniffs."

"Love does not fill a man's nature as it does a woman's. It is only in his leisure hours that he needs to devote himself to the girl or woman of his choice. She, on the other hand, thinks of his love all day."

"The married man, when he reaches home after work, seeks relaxation and quiet. The woman, her work completed, desires excitement, stimulation and exaltation."

The bitter pill was reserved for the end of the lecture.

"The woman movement is not produced because there are more women than men, but because there are fewer men inclined to marry. Every woman still wants a husband, but every man does not want a wife nowadays. Marriage and domesticity," added the lecturer, "will always be to the majority of women their chief hope and aim."

"It is their very nature, and to those whose natures it is not men seem little attracted, so that, in any case, they are left out. Such woman say they do not want to marry, but I fear a good many have not been asked."

The plainest features become handsome unaware when associated only with kind feeling and the loveliest face disagreeable when linked with ill humor or caprice. People should remember this when they are selecting a face which they are to see every morning across the breakfast table for the remainder of their lives.

The Yellow Fever Germ

Has recently been discovered. It bears a close resemblance to the malaria germ. To free the system from disease germs, the most effective remedy is Dr. King's New Life Pill. Guaranteed to cure all diseases due to malaria poison and constipation at Haynes & Taylor. The enterprising druggists of Marion.

The Good Old Way.

A severe cold or attack of la grippe is like a fire, the sooner you combat it the better your chances are to overpower it. But few mothers in this age are willing to do the necessary work required to give a good, old fashioned, reliable treatment such as would be administered by their grandmothers, backed by Boschee's German Syrup, which was always liberally used in connection with the home treatment of colds and is still in greater household favor than any known remedy. But even without the application of the old fashioned aids, German Syrup will cure a severe cold in quick time. It will cure colds in children or grown people. It relieves the congested organs, allays the irritation and effectively stops the cough. Any child will take it. It is invaluable in a household of children. Trial size bottle, 25c; regular size, 75c. For sale by Woods & Orme.

LIFELESS RIDERS.

Thrilling Incidents Called From the Horrors of War.

A veteran of the British army in India once saw a strange sight on a battlefield. As he tells the story a squadron of cavalry had been held in reserve under cover of a field battery and an infantry regiment. The artillery duel had ended. The assault of the enemy in overwhelming numbers had been repulsed by the steadiness of the infantry. While a cloud of smoke hung over the field the cavalry received an order to charge with drawn sabers.

The troopers started in close order for the enemy's line. Midway they met a destructive fire from earthworks in front of them and from the woods on their flank. A young cavalryman, with his saber drawn, was shot in the heart while leading in the first file. The horse halted, swerved to the right and turned back, but the rider kept his seat without flinching. The other troopers went on, carried the earthwork by storm, rode at full gallop after the retreating force and converted defeat into rout.

The dead trooper meanwhile was returning with white face and with the blood streaming from his wound. Under his nerveless hand the horse received neither check nor leading and made its own way toward the infantry, which was now advancing rapidly. As the smoke lifted the soldiers saw the solitary rider coming, with one hand in a death grip upon the saddle, while the other still held the sword rigidly clasped.

It was a sight never to be forgotten—the galloping horse, with the dead cavalryman still mounted and looking grim and fierce. It was not until the rider had gone fifty yards from the spot where he had been killed that he rolled off the horse.

A similar story is told of Captain Nolan, who delivered the fatal blundering order for the charge of the famous Light Brigade. He was seen on the field of Balaklava, riding from the hills where the staff officers were drawn up to the quarter where the brigade was stationed. The charge began, and what was left of the brigade returned in broken groups.

At last Captain Nolan was seen galloping rapidly toward the center of the field. He was firmly seated, straight as an arrow and riding well. Suddenly the horse swerved and the rider toppled over.

The officers who were nearest rushed forward, but when they lifted him from the ground they found him lifeless. Like the Indian saberman, he had been shot and instantly killed, but his horse had carried him safely across the field out of the reach of the pursuing Cossacks.

The Minister's Tartan.

Every clan of Scottish highlanders had its own tartan, or striped colored cloth, of which the kilt and plaid were made. It is not so well known, however, that the clergy of the highlanders down to a recent date used a tartan for their weekday dress. The tartan of the clergy, as it was called, was a sober cloth of white, black and gray stripes. Ministers who did not care to don the kilt almost always wore the plaid or mantle of this material. In the eighteenth century when the highlanders seldom went unarmed it was the custom of some clergymen to wear swords even at church and to be accompanied by a gillie, or servant, carrying a bow and sheath of arrows. Nothing could better illustrate the disturbed state of those times than this practice on the part of the men who were pre-eminently preachers of peace and universal good will.—Scotsman.

Old English Pence.

Halfpence and farthings were not coined in England before the time of Edward I, and until they were the penny, which was then made of silver, was issued deeply indented with a cross in order that it might be broken into two pieces for halfpennies or into four things, or farthings. The silver penny was the first coin of the Anglo-Saxons struck in England. In 1672 an authorized coinage of copper pennies, halfpennies and farthings was established. Silver farthings ceased to be coined under Edward VI and silver halfpennies under the commonwealth.

A Mother's Retort.

Dr. Breckinridge, a well known American clergyman, and his two brothers, also of the same profession, one day paid a visit to their mother. "Do you not think, mother," said he, "that you ruled us with too rigid a rod in our boyhood? It would have been better, I think, had you used gentler methods."

The old lady straightened up and said, "Well, William, when you have raised up three as good preachers as I have, then you can talk!"

Horseless Carriages in 1645.

In one of the letters of Grimaldi, written in 1645, the learned bibliophile says: "It is true that there is here an Englishman, the son of a Frenchman, who proposes to make carriages that will roll from Paris to Fontainebleau without horses in a day. The new machine is preparing in the Temple. If it should succeed there will be a great saving of hay and oats, which are at present extremely costly."

Not So Terrible.

Physician—You lie awake in bed three or four hours every night? That is bad. I shall have to treat you for chronic insomnia. Caller (whose salary is \$14 a week)—Er—no, doctor. I don't think it's as bad as that. I simply can't sleep.

Every Action Counts.

There is no action so slight nor so mean but it may be done to a great purpose and enabled therefore, not to any purpose so great but that slight actions may help it.—Woman's Life.

THE PAPER THAT MERITS YOUR CONFIDENCE.

Luckiest Man in Arkansas.

"I'm the luckiest man in Arkansas," writes H. L. Stanley, of Bruno, "since the restoration of my wife's health after five years of continuous coughing and bleeding from the lungs; and I owe my good fortune to the world's greatest medicine, Dr. King's New Discovery for Consumption, which I know from experience will cure consumption if it is taken in time. My wife improved with a first bottle and twelve bottles completed the cure." Cures the worst coughs and colds or money refunded. At HAYNES & TAYLOR'S, 50c and \$1. Trial bottle free.

Judgment Paid.

In the case of the Greenleaf's administrator against the Paducah Traction Company, the defendant was paid a compromise judgment for \$5,000. Mrs. Greenleaf sued for damages for the death of her son, a conductor employed by the company.—Paducah Sun.

Lame Back.

WOULD YOU LIKE TO KNOW

A place where you can get the best bargains at the lowest price? A place where quality and quantity are considered before profit? If you do you should call at the Cavender Dry Goods and Millinery Store on the corner of Main and Salem streets, in the Carnahan building. We handle only the best and prettiest in every line, and you have but to call and examine our goods and you will see for yourself.

Look What We Have to Sell:

Embroideries

Eyelet, all over and flouncing, as pretty patterns as you ever cast your eye upon.

Laces

Our Valenciennes, linen torchon, round thread balls and baby Irish laces combine beauty and daintiness. Look at our laces if you are planning a pretty spring waist.

Neckwear

A woman's toilet is not complete unless she has a neat looking neck. We carry a complete line of turnovers, collars, ribbons, etc. You will be pleased with our goods and our prices.

Fancy Work

Are you interested in fancy work? Then you should not fail to see our line of stamped linen for Batenburg, Montmeliack and embroidery. We handle everything in the fancy work line.

Gingham

Our spring gingham are straight from the city market and are the newest and prettiest prints. If you want a nobby spring waist call and see the ginghams.

Hats

I am preparing to go right on with my stock of millinery. As I have endeavored to please you in the

past so shall I try to do in the future. My spring stock is now on the way and is full of nobby spring styles and ready-to-wear spring styles.

Skirts

We are sure that we can please you in one of our ready-made skirts; all kinds and sizes, and we can fit the hard to fit.

Woolen Dress Goods

Nothing more suitable for spring than our beautiful line of mohairs and etamines. Come and look at our stock whether you want to purchase or not.

Belts

Belts and collars are the finishing touches of a pretty toilette and much depends upon them. Our gold belts are chick and stylish. The finishing touch to a spring costume. We also have a pretty line of girdles, ribbons and leather belts.

Combs

We have beyond a doubt the prettiest line of combs in the city. They have just arrived and are on display at our store beautiful side and back combs in beautiful shades.

Table Linens and Towels

Don't fail to ask to see our linen and damask for table cloths, nap-

kins, towels, etc. Our stock of goods will stand the test of the most critical eye.

Shoes

Our shoes combine beauty, comfort and durability. We can fit you and give you the best bargain in town. If you don't believe come and see for yourself.

Men's Shirts and Collars

We handle the Tiger brand shirts and collars. If you have never worn this brand of shirts you have missed a rare treat as well as a bargain. Don't delay; come and purchase today.

Men's and Boy's Odd Pants.

We have on hand a lot of men's and boy's odd pants which are going at a sacrifice. We do this to make room for our spring stock. Come at once and get the best bargains.

Rugs

Do you intend to spring clean this year? Of course you do. Then you want new rugs. Nothing adds so much to a room. Our line is beautiful and we can please you.

Bed Comforts and Blankets

Don't neglect your beds. If you want bed comforts or blankets we can save you 25 per cent. Don't take our word for it but see for yourself.

Marion, Ky.

Corner

The Crittenden Record.

ISSUED WEEKLY.

JAS. E. CHITTENDEN,
Editor and Publisher.

SUBSCRIPTION ONE DOLLAR PER YEAR.

Entered as second-class matter July 15, 1904, at the postoffice at Marion, Ky., under Act of Congress of March 3, 1879.

FRIDAY, FEB. 23, 1906.

Jno. B. Stetson, the millionaire hat man, died in Florida Sunday at his winter home.

Jno. A. McCall, the late president of the New York Life Insurance Company died Monday of a broken heart, as a result of the recent insurance investigations. On his death bed he said that no woman or child could say that he had wronged them and it may be found that his words were true.

In the senate the bill to require proprietary medicines to have the formula printed on the label of the bottle was reported unfavorably and defeated. A similar bill in the house is, therefore, of course, dead. The county unit local option bill was also killed in the senate. It was reported "several days ago without expression from the committee.

Court at Shady Grove.

County Attorney Carl Henderson has lately been making frequent calls to Shady Grove to attend Esquire Hodges court. Several days ago Press Baker was tried there for breach of the peace and fined one dollar and the cost. Jim Gobin was tried for drunkenness and fined one dollar and the cost.

Last Monday Fred Lemon was tried for selling liquor to a minor and fined fifty dollars and the cost and he will be tried here next Monday before the county judge in two cases for selling liquor without license.

Rev. T. A. Conway Resigns.

Rev. T. A. Conway, who has been pastor of the Baptist church here for several years, has resigned and accepted a call to take charge of the Baptist church at Smithland.

Rev. Conway is an earnest Christian worker and well worthy of the highest and best success that may come to him.

He will be missed not only by the members of the church, but by the public, in general, who feel that they have lost, in the departure of Rev. Conway, a faithful pastor and true citizen.

He will remove with his family and take charge of the church at Smithland in the near future.

Quarterly Meeting.

Methodist quarterly meeting will be held at Rosebud Saturday and Sunday, Feb. 24 and 25. REV. VIRGIL ELGIN,

Presiding Elder.

Everything may not be for the best, but we should try to make the best of everything.

EGYPTIAN CIVILIZATION

Its Origin One of the Unsolved M mysteries of the World

The origin of Egyptian civilization has been the enigma of the world for the past twenty-five centuries. Setting no historic or even mythical record, it appears before us once as a highly civilized and advanced community centuries before the birth of a boy. Upon this subject legend and history take its place in the records of its matchless magnificence, either and without mother and father, apart from all evolution, it has dropped from the unknown. Would not an explanation be found in the hypothesis received its civilization long since no longer existing? The first historic figure in its legend, the outlines of which are still dimly known, was a king who, though not grandly impressive against the mythic background of prehistoric at least 4500 B. C., conducted executed enterprises extorting the admiration from the best of the twentieth century. In after the course of the Nile embankments to gain situations other than in shifting his sacred city of Memphis to construct the artificial lake of Memphis in circumference and deep, as a reservoir for the Nile?

Look, too, at the monuments of his successors in architecture, engineering, astronomy, political, medical, social and science, to say nothing of art and theology. Witness the Labyrinth recorded by Herodotus, which had 3,000 chambers, half above ground and half below, combination of courts, chamber, nades, statues and pyramids, the wonders of the magnificence of Karnak, which still awakens admiration, a temple as large as wherein the Cathedral of St. Peter in Paris could be set inside its walls and yet not touch the vastness of the sublime pyramids built in honor of the sun god for use as astronomical observatories. The splendors of Memphis, Thebes, Heliopolis, of the sphinx and pyramids, the statuary and the temples with the ruins of which land is still filled. Exchange

CATCHING TURTLES

Methods Used by the Fishermen in the Tropics

Turtles are always captured and usually on moonlight nights is the time they go on the shore to lay their eggs. They select a sandy beach, dig holes in the sand, deposit their eggs there and cover them to be hatched by the heat of the sun. When the turtles are on shore, purpose hunters come upon them, they are easily overtaken, for they are slow movers. The hunting is not a very strenuous undertaking that is necessary to do is to lay the turtles on their backs and remove them until the next day, when removed.

Another more curious way of catching turtles is by fishing by the fish found in the tropical waters. The popular name of this fish and by which the children of the tribes call them is the smoking fish. Its name is given to them on account of the smoke on their heads, by which they attach themselves to any smooth face, like the side of a shark or the shell of a turtle. This is like the soft leather "suckers" popular with schoolboys. The fish has once attached himself to you can pull him to pieces than force him to release his hold.

Turtle hunters go in boats and several of these remain in full view as they see a turtle and get near, a sucker is sent after him. He is by the ring on his tail which is attached by a stout cord. The fish is securely fastened to the tail of the turtle, and turtle and fish are hauled into the boat together, and the air the remora leaves his body is dropped back into the water until another turtle is sighted. — Washington Star.

Govern Yourself

Men and women often say they govern themselves. That is admitting they have defects of which are their masters. They to make effort and see if they are mistaken. The worst effects of self control are on the health, bows every kind of bad habit, gain possession of the person, result is a weak instead of a strong character. — Home Notes

Red in Battle

Red has always been a favorite color. Its employment dates the time of Lycus, the Spartan general, who commanded his army to be armed red tunics in order that they might not be dismayed at the sight of the blood. Its first use in the British dates from 1526, when the red guard were dressed in red.

Resemblances

Fogg—I told Bass what you said that he reminded you of a general because he held his head so high. Bass—And what did he say? Fogg—He said you reminded him of an old person—Because why? Fogg—Because you are one, he said.

She Could Tell

Wife—John, you've been ill. Husband—Well, do it, mind. Let's keep it secret. — Philadelphia Ledger

We know the truth, not only season, but by the heart. — Pascal

On account of the new mills going up here and in the district there will be a great demand here for building lots in the spring. Every house in the city is now occupied and the new influx will demand more houses. Therefore a real estate investment in Marion is well worth your consideration. A \$100 now for a short time will get a lot that will be worth \$200 in a short time. For a short time only your choice of 12 of these most desirable lots may be had for \$100. Don't delay. OUR FASHION LETTER.

Parisian Day Hats Are of Satin and Black Taffeta.

SMART DEMISEASON CHAPEAU.

Toques of Gold Galloon—Spring Sleeves Will Be of Moderate Size. Petticoat Flounce—Blue and Buff in Combination.

The latest hats from Paris for day wear are of black taffeta and satin. The satin is stretched plain over the shapes, but the taffeta models are shirred, plaited and fancifully treated. Some of the sauciest little shapes are made up in these materials, but the satin ones are just a trifle more dressy than the silk hats.

Smart evening hats are made of fine gold tulle, to be worn with costumes in which gold trimmings play a prominent part, or they may be donned with equally good effect with a gown innocent of these adornments.

Possibly the prettiest demiseason hats being displayed just now are in a harmony of two shades in one color, or two well contrasted colors are used.

Toques entirely of gold galloon, with heavy gold embroidery around the up-

CLOTH COSTUME

turned brim, are favorites for evening. White ostrich plumes continue to be much worn on hats, while gold braid rolled around a small crown and tied in a little bow and ends suffices for the top trimming of many hats.

The costume pictured is of beige cloth trimmed with stitched bands of the same. Straps of the material fastened with cloth buttons ornament the jacket and the front skirt panel. The hat is of tan straw trimmed with quillings of brown silk.

SARTORIAL FRIBBLES.

It is not considered smart for the top fullness of the sleeve to incline toward the front or toward the back. It should be so tucked to the sleeve lining that it falls directly down the center of the arm.

The spring sleeves will be of moderate size, and radical changes in shape and style are not looked for.

Petticoat flounces are to be procured of silk, lace, chiffon or lawn, all ready for adjusting to any plain foundation. These are supplied with buttons so that they may be easily varied at will. One silk foundation can by this means be induced to serve many ends.

From an economical point of view it pays to get a dress of voile or similar fabric to tide over the intermediate season. It will be found useful, too, for early spring street wear.

Coat and skirt suits in pastel shades of cloth such as crushed raspberry,

PEAU DE CYGNE WAIST.

marie, Parma violet, lettuce green and Chinese blue are to be high in favor. These suits are severely tailored and usually made with a short semifitting jacket trimmed with braff military fashion and rows of small bullet buttons. The skirts are circular, with a seam down the front and the fulness at the waist put into tiny tucks. The long skirt is either plain or trimmed with a circular ruffle eight inches deep above a wide hem.

The waist pictured is of peau de

cygne silk. A yoke trimming is formed of Irish lace headed top and bottom with bias bands of the silk. This yoke is crossed in front and adorned with buttons. The sleeves have similar bands.

COLORS AND FABRICS.

Black gowns are coming in again for street wear, and some most attractive ones are being made up at the present moment. They are all in lightweight and brightened by a color in the trimming. No well dressed Frenchwoman considers her wardrobe complete without at least one frock of all black, and with the lingerie blouse the black costume is certainly very charming.

Chinese blue liberty broadcloth trimmed with continental buff—which is

BLACK CHIP HAT.

really a chamois color—is the smart combination for spring. Worn with a chamois toned Continental hat adorned with a bow of blue velvet in front, slipped through a long gold buckle and further supplemented with a bunch of blue tips at one side, the costume is stunning.

Millinery becomes less eccentric as the season advances. Conspicuous shapes and trimmings are much modified in the latest models. Large hats will not be so prominent, the becoming small toque in a number of instances replacing picture effects. Feathers are to be used galore.

New lingerie shirt waists show frills and ruffles with bolero jacket effect. In one advanced model two wide embroidered ruffles go from the waist over the shoulders, giving a broad effect—most desirable for a thin person. Another model that is particularly pretty has an Elton jacket, the line being defined just above the belt line by a frill of lace two inches wide that is carried up the fronts to the shoulders.

TASTEFUL GARMENTS.

A jaunty little coat has arrived for spring wear—the pony jacket. This smart affair is of the sack type and reaches a little below the waist line. It has a short waisted effect that makes it a cross between the empire and box coat.

The pony coat is to be carried out next summer in linen and when perfectly cut is stunning. The best model

FRENCH NIGHTDRESS.

is the navy or army man's coat. Make a study of the peculiar short waisted effect in the back of this hero's jacket, and you will be in the "know."

Henrietta cloth is to be extensively used for costumes in which draped effects are in evidence. This cloth may be obtained in a variety of charming shades, and attractive afternoon and evening gowns are worked up with the aid of lace and ribbon.

Directly in contrast with the short waisted styles are the long coats fitting close, as a rule, and revealing severe lines.

Individuality is the slogan of the well dressed woman, and in this effort for personal belongings she never goes to extremes.

The nightdress in the cut is a model of the newest French idea. It is carried out in the finest naussook. The bolero jacket is a pretty mass of applique work, the center ornamentation being a bowknot in lace stitch. The long, flowing sleeves are trimmed with lace, and the bowknot is repeated at the longest point. JUDIC CHOLLET.

"My Old Kentucky Home."

To the school children of Kentucky:

Stephen Collins Foster was the author of "My Old Kentucky Home,"

the cradle song of your native state.

It is sung and played in every state in the union and every country in the world.

He was forgotten by past generations and it is proposed that the school children of Kentucky pay tribute to his memory by the erection of a statue to be unveiled in Louisville on June 14, 1906, and ultimately to be placed in the new Capitol at Frankfort.

The inscription on the pedestal of this statue will read as follows:

Erected to the memory of

STEPHEN COLLINS FOSTER

author of

"MY OLD KENTUCKY HOME"

by the school children of

the State

We suppose that some one in the

county, if indeed it has not already

been done, will be designated to receive

these contributions. It is a work in

which all should take interest and

every school child give at least a

penny.

\$100 Reward \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface or the system thereby destroying the foundation of the disease, and giving patient strength by pulling up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by all Durgists, 75 cents.

Kentucky Patents.

Granted this week. Reported by C. A. Snow & Co., patent attorneys, Washington, D. C.

Austin E. Colegrove and S. Reed, Cynthiana, chimney cap.

Isham G. Forster, Versailles, reinholder.

Charles L. Kelly Grant, washing machine.

William H. Klauk and J. P. Lowry, Winchester, hemp-breaking machine.

Henry L. Koehler, Deer Park, adjustable curved type and cylinder.

For copy of any of above patents

send ten cents in postage stamps with date of this paper to C. A. Snow & Co. at Washington, D. C.

A Habit to be Encouraged.

The mother who has acquired the habit of keeping on hand a bottle of Chamberlain's Cough Remedy, saves herself a great amount of uneasiness and anxiety. Conghs, colds and croup, to which children are susceptible, are quickly cured by its use. It counteracts any tendency of a cold to result in pneumonia, and if given as soon as the first symptoms of croup appear, it will prevent the attack. The remedy contains nothing injurious and mothers give it to little ones with a feeling of security. Sold by Haynes & Taylor, the enterprising Druggists of Marion.

Directly in contrast with the short

waisted styles are the long coats fitting close, as a rule, and revealing severe lines.

Individuality is the slogan of the well

dressed woman, and in this effort for

personal belongings she never goes to extremes.

The nightdress in the cut is a model

of the newest French idea. It is car-

ried out in the finest naussook. The

bolero jacket is a pretty mass of

applique work, the center ornamenta-

tion being a bowknot in lace stitch.

The long, flowing sleeves are trimmed with

lace, and the bowknot is repeated at the

longest point. JUDIC CHOLLET.

Morning after the fire, looking East down Bank street, the center of the greatest destruction.

MAD DOG ATTACKS ALL IN ITS PATH

Mes Little Twelve Year Old Son of John Marvel and Does Much Damage Before Killed.

Last Sunday morning about six o'clock at Iron Hill, a mad dog entered J. M. Walker's yard and at once proceeded to run a mock through his flock of poultry. It then bit the pet goat, three or four hogs and several chickens before it was killed. About six hours later John Marvel, who resides near the Caroline Hughes bridge on Crooked Creek, rode up to the gate accompanied by his little son and Irvin Travis and asked to see the dog. On examination, the son of Mr. Marvel, a bright boy of twelve years of age, said, "Yes, this is Friscoe!" Mr. Marvel then stated that the dog had bitten the boy, most of his stock and then had run away.

Mr. Marvel said he and the boy had tracked it to Mattoon, then to Nunn's Switch and on to Irvin Travis'. The dog bit all of the stock it came to along the line. Mr. Irvin's cow was bitten and the dog proceeded on its way; turning in at Frank Clark's it bit all of his stock and on to Willie Deboe's, Mat Dean's and J. M. Walker's where it was killed.

The dog seemed to have every thing its way and it is supposed that every dog and every thing that came in its way was bitten.

About the first of March will be the time for the poison to take effect, therefore, precaution should be taken and a good supply of ammunition ready that when a dog is seen with its tail tucked and its head down, you may ask no questions, but, "let him have it."

Second District Loveliness.

A banquet of beauty at the congressional reception at the White House were the six young girls from the second district of Kentucky, that Hon. and Mrs. A. O. Stanley, had as their guests, after a merry dinner at the Riggs' Mr. and Mrs. Stanley and their pretty school-girl constituents—the latter at a White House reception for the first time, were the most interesting feature of the affair. The sextette, all charming array in white, were Miss Brodie, Miss Mitchell and Miss Woodson of Owensboro; Miss Hart of Henderson; Miss Ora Baker, of Dixon; Miss Hardwick, of Hopkinsville.—Telegram.

In the Lap of Idleness.

BY W. HUGH WATSON.

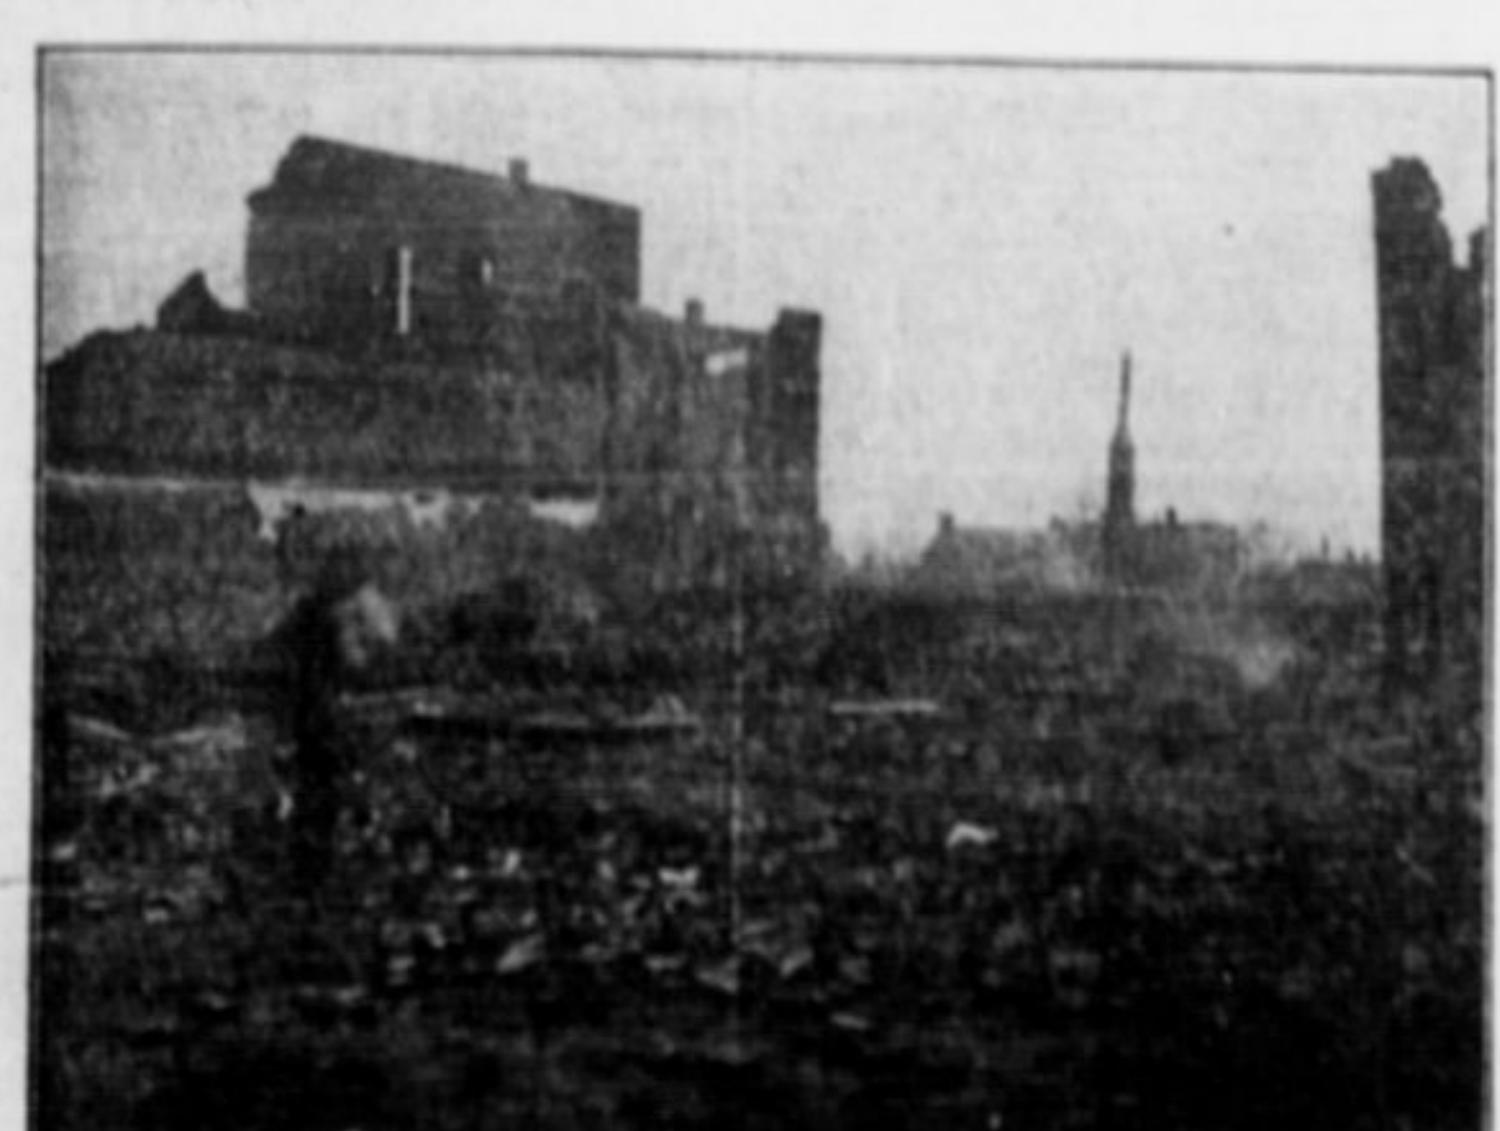

The rigors of the climate in Kentucky seemed detrimental to my health which, at its best, is not very good, so I left snow and snowstorm for the sunshine of the southwest. To make it more terse, I am now in the western part of Texas trying with the weapon of pure air to battle against that insidious enemy, lung trouble.

For one week, wife, Hugh Ivan and I were in the country home of Richard L. Sherrill, formerly of Crittenden county. He once owned the farm

Policy No. 187012, issued by the Penn Mutual Life Insurance Company, on the life of Willis E. McNeely. The finder will please return to the undersigned. Application has been made for the issuing of a duplicate.

LEAD AND ZINC. DECLINING. DONNELLY & HATFIELD MAGNIFICENT MINSTRELS

(Continued From First Page)

of the district, follows somewhat the Joplin pattern, but differs in the installation of a rather complete sizing system using a new type of shaker screen and a separate four-cell jig for each size. The problem is to concentrate the fluorspar and galena. A new grinding mill is being erected by the Keystone Lead and Zinc Company at their John mine about eight miles from Salem, Ky.

The new Eagle mill [near] Salem was practically completed this year and the building of the Sanders mill is about ready for the installation of machinery. The aim of these mills is the separation of the sphalerite (blende) from the fluorspar so as to produce a commercial zinc ore, and at the same time save the associated galena. The former is a dry concentrating plant using Hooper pneumatic tables and a very complete sizing system. The character of the Sanders plant has not been learned.

The Central Kentucky district is to have new mill, to be used for the separation and grinding of fluorspar, barite and calcite. The Monitor Mineral Co. has let a contract for the mill, the work to begin on it in February. Its equipment is to consist of a picking table, two crushers of the Blake type, three sets of Cornish rolls, two four-cell differential jigs, sizing screens, accessory elevators and conveyors, a Ford concentrating table, one rotary dryer, one Griffin mill (with provision for two) to grind the fluorspar, and eight buhr mills of Virginia buhr-stone for grinding the calcite and barite. An additional section of the plant is to be constructed to manufacture barium salts. Later, the calcite in part is to be utilized in the manufacture of hydrated lime and sand-lime brick at the mine.

Uses.—Among the more recent applications—

"While Old Glory Waves," one of the many features of this show, may be seen, and is one of the most patriotic and magnificent spectacles ever produced on the American stage. It consists of a military review of this country from the time of the minute man to the Spanish-American war, and is illustrated by a series of brilliant tableaux accompanied by drills of rough riders, patriotic songs and a final review of all the American volunteer in appropriate uniform and equipment from the time of the revolutionary war

until the present time.

There will be cake walks done by dancers decked out in accessories typical of the appendages worn by the old stately dancers of the minuet.

The nocturnal expeditions of the negro, his superstitions and his native imagery, as well as his whole good heartiness are shown in a most characteristic manner in one of the scenes, which, when revealed, shows the moon stealing over a long range of hills, trying to grope its way through a cloud.

The cloud passes and the moon shows a floating boat crowded with joyous boys and girls.

One by one the carolines gather in from the shadow of the woodland for their songs under the boughs of the magnolia trees. They sing a pretty melody and the white folks sing a reply.

The carolines sing a good night to the white folks and then comes a quick change and by a clever manipulation of mechanical effects one is brought to the manor house of the plantation.

A crash of music is followed by a flood of sunlight and the darkness coming in from the cotton fields

gather in front of the house to do their characteristic dancing. This is one of the most typical southern scenes ever put on the stage.

Low Rates to California

Via Chicago, Milwaukee & St. Paul railway, \$31 to San Francisco, Los Angeles and other California points every day from February 15 to April 7. Tickets good in tourist sleepers. Berth rate \$7. Tourist sleepers from Union station, Chicago, daily at 10:25 p. m. Personally conducted tourist car parties at 10:25 p. m. Tuesdays and Thursdays.
