

The Crittenden Record.

ME 2.

MARION, CRITTENDEN COUNTY, KY., JULY 6, 1906.

NUMBER 52

MAKES REST

Press that Has Made History.

Will Welcome the Change
a Bance at Out of
Door Life.

Marion, July 2.—Congress and the President are taking leave of each other in a much better frame of mind than has been expected from the past year. There has been no conflict of strong personalities. The President has won his points in a degree while the public has been the gainer. The President has managed to force through legislation that he believed was right and that there was serious opposition to. Congress would stand. He has won the postmaster's position from a man of federal patronage and more than other presidents he has been able to do to antagonize the members who looked on him as the last remnant of the old administration with which the currency with which the country was forced through the rate bill, there may be some features that could be improved. It is in advance of no legislation that was what was looked for before congress met. The Alcohol Bill has gone through, and to help the farmers of the country and to help the public against one form of fuel extortion. The Statehood Bill has been passed but has brought satisfaction to two commonwealths and has brought it to four but has brought unreasonable opposition to the rest in Congress. The Pure Food Law and meat inspection has been passed where it was sorely needed and where the public did not even suspect that the need existed.

Another it has been a most notable campaign and one that will necessarily go down in history as a monument to the successful personality of the executive side from the personal triumph of the Peace Conference and numerous other smaller matters, any one of which would have been enough to make an administration notable.

While one is looking over the retrospect, it is as well to take note of the remarkable series of national scandals and exposures, all of which, the exposures at least, were more or less due to the fearless initiative of the President. It was the most deplorable series of scandals that a nation has ever known, but it was infinitely better that the evils should come out than that they should eat at the national life in secret.

There was first of all the postal scandal. They were more than half suspected by those "in the know" before the attention was ever called to them. But when they were once brought to the attention of the President, the word was passed that they were to be ferreted out without fear or favor and this was done, resulting in more than a score of prosecutions and as many jail sentences while the end of the legal proceedings is not yet reached. But the Department itself is chastened and chastened as a department seldom has been before.

The crop report exposures followed with remarkable swiftness resulting in the reorganization of that branch of the Department of Agriculture. The awakening of the public conscience was helped by the insurance exposures in New York which while not directly under federal supervision, were along the line of the same work. Then there were the inquiries into the Beef Commission by the Bureau of Corporations, ending in the famous "immunity" farce and then the swifter and more remarkable exposures of the Reynolds report. Side by side with these were the investigations of the Bureau of Corporations and the State Commerce Commission into the operations of the coal and oil carriers and these like the others will be followed by a series of prosecutions have already been outlined and promise to be very effective in execution. It may be stated that good results coming from these investigations and prosecutions are indirect than direct. The mere pledge that the law was on its side was enough to force the dissolu-

tion of the Paper Trust. The coal roads have already begun an internal overhauling on their own account now they find the public knows how rotten were some of their conditions.

The suit against the Tobacco Trust has already resulted in some good to the industry at large and it may be taken for granted that no corporation managers are going to venture very far inside the penitentiary when they know that there is a watchful eye and a ready hand to shut the door on them if they trespass over the line.

—(9)—
The rumor on Friday that there was a possibility of Congress adjourning on Friday night, brought a crowd of visitors to the White House to say good bye to the President before the Cabinet meeting, and a special train was held in readiness at the Depot to take him to Oyster Bay if it were late at night before Congress finished up the session.

The President has earned a good vacation if ever an executive has and while there is not the urgent need of it that there would be in the case of a man who was not about as delicate and fragile as a grizzly bear, Mr. Roosevelt himself will welcome the change and the chance to get once more to the life of door life and to work off some of the fitch that has accumulated during the winter in Washington in spite of his constant tennis playing, walking and horseback riding. There will be an effort to keep just as much work from him as possible while he is at Sagamore Hill. But there is a certain amount of routine and special work that the President has to do even in summer, and the modest little executive office at Oyster Bay has been all fixed up in readiness for his coming and will in all probability see a considerable amount both of personal and public work done before the summer is over.

MADISONVILLE AND HARTFORD RAILROAD

Construction Work Begun and Being Pushed Rapidly to Completion.

Since the letting of the contract for the construction of the Madisonville, Hartford & Eastern railroad, considerable curiosity has been aroused as to the exact route of the new road. The following from the Hartford Herald of Wednesday gives the desired information:
Starting at Madisonville the road will pass near Anton, in Hopkins county. It will pass between Sacramento and Breun in Muhlenberg county, coming within about a mile of the latter place. It will cross the O. & N. railroad at Hendricks and Green river at Smallhouse. From Centertown it will come to Hartford. The Hartford depot will be located, it is said, at the southeast end of liberty street and near what is known as the residence. It will be a handsome edifice.

Going east the road will cross the Beaver Dam road near G. W. Bunker's, coming within a few feet of a corner of his shop. It will take a northeastern direction at Hartford passing to the right of the old water mill. The first stop after leaving Hartford will be Sudydale. From there it will go to Dundee where it will cross rough river. Leaving Dundee it will go on to Mitchell's where it will join the L. H. & St. L. commonly known as the "Texas" road. The entire distance of the road will be fifty-five and a half miles. Nice passenger stations will be erected at the different stopping places and the best work will be required in its construction. It will be of a great benefit to the section of country which it passes, and to Hartford whose people have wanted a railroad so long.

The Fairies.

The Cantata given by the children under the direction of Mrs. Sayre and Miss Haase was certainly a success from every point of view. The little ones certainly did well and gave evidence of having been under careful direction.

The solos and choruses were well rendered and showed what excellent talent Marion had to be developed. The dance given by Linda Jenkins and Rebecca was fine, and last but not least were the Sprites. Their dance certainly made a hit.

We hope it will not be long ere the little Fairies will again appear in Marion.

The Louisville Daily Herald and THE RECORD both one year for \$2.00.

THE RECORD'S

MINING NEWS

The Week's Doings Throughout the District Told in Paragraph.

NEW DEVELOPMENTS CONTINUE IN THE TERRITORY

MEXICO DISTRICT.

Capt. Haase reports that he is delighted with the output and the product now being attained at the Asbridge and the Tabor mines, respectively. Here they are concentrating their efforts to "make" as much lump spar as possible. Three shafts are operated. In one, there has been encountered a splendid "run" of lead ore, and of that piled separate and which was examined it may be safely stated that it will average at least 15 per cent. galena.

—(9)—
The Wheatcroft Mining Co. has run a short cross-cut in the old shaft located near the Wheeler property, and encountered their vein in a large run of spar, which is carrying about 5 per cent. galena and blend. When visited, the total length of both North and South levels measured forty feet, and throughout this distance the spar will average five feet in width; hard, lying between rock walls, and having a fairly good color.

—(9)—
The Marion Mineral Co. is making ready to increase its boiler power, at the Pogue Mine, and a large new horizontal boiler which is on the way will soon be installed.

—(9)—
At the Parish Mine, operated by Ogden & Curry, adjoining the Sam Mathews and the Yandell properties, has been struck a fine run of zinc ore blend. Samples collected will analyse 20 per cent. zinc.

—(9)—
The Eagle Flourspar Co. is sinking a new shaft on their Sam Mathews property; and a cross cut in same, at a depth of about sixty feet is now being made in the hopes of catching the vein.

—(9)—
At the Kentucky Mine, on the Yandell farm, the shaft has now been sunk to a depth of about 160 feet, and they are engaged at present in cutting back to the vein.

—(9)—
Will Milligan has taken a contract to sink a shaft on the Kentucky vein on the Yandell property. He located back of the horse lot, and at a depth of about eighteen feet struck the vein in a handsome deposit of white hard lump spar. He expects to put down the shaft 100 feet.

—(9)—
The Kentucky Flourspar Company is sinking the main old Yandell shaft, at the Yandell Mines. Mr. John Yandell, Jr., Mine Superintendent.

—(9)—
The Albany Mining & Investment Co., is doing some prospecting on the farm of Sam Perkins, whose property they have leased. A shaft is being sunk in a location expected to catch a vein supposed to have a Northeast and

Mr. and Mrs. Jno. W. Wilson Entertained.

On last Friday evening at their home on South Main St., Mr. and Mrs. John Wilson gave a most delightful entertainment.

The beautiful lawn was lighted by electric lights and Japanese lanterns.

Dancing and euchre were enjoyed, but the lawn seemed too inviting to spend the hours within doors, so every one enjoyed the cool breeze, the swings and hammocks that made lawn so inviting. Punch was served during the evening.

Refreshments, consisting of ices cakes, and salted peanuts were served. Those present were Mr. and Mrs. John Wilson, Mr. and Mrs. John L. Gray, Mr. and Mrs. Ollie Tucker, Mr. and Mrs. Sam Gugenheim, Mrs. Emma Hayward, Misses Ruby James, Kitty and Fannie Gray, Julia Rudy of Henderson, Lillian Graves of Dycusburg, Della Barnes, Leaffa Wilborn, Ida Hill, Messrs L. B. Reeves, of Louisville, Rob Cook, Will McElroy, Bruce Babb, Ira Pierce and W. D. Baird.

Southwest trend, and lying between the Hodge and the Yandell faults. So Mr. Perkins states, who is doing the prospecting.

CRAYNEVILLE DISTRICT.

The sinking at the Hodge Mine, of the air shaft which is to become the main working shaft, is progressing nicely, under the management of Mr. Fred Clement.

—(9)—
More than one contractor is at work on the Hodge property, getting out flourspar; and they are making a very nice tonnage. At one place gravel is the product, while at another a white, hard, leady lump spar is being mined.

—(9)—
Also there are some contractors mining at the William Redd property, and it is reported that a good quality of gravel spar is wrought.

—(9)—
The Riley Mine, property of the Marion Zinc Company, has resumed active operation, after a short spell of inactivity.

IN ILLINOIS.

Geo. R. Wood, of Cave-in-Rock, Ill., visited Marion last week. He reports much activity in mining operations and development in the Illinois district.

—(9)—
There are three large mining properties in operation now back of Cave-in-Rock, in the Lead Hill district. The operators are, respectively, Cave-in-Rock Mining Company, Edward Hess, Superintendent, G. W. Robinson Lead and Spar Company, G. W. Robinson, Superintendent, Harrisburg, Illinois, Evansville Lead and Spar Mining Company, Miller, Superintendent. At each of these properties has been constructed a Joplin type of mill, with jigs, tables, etc. The largest mill put up by the Cave-in-Rock Mining Company has a capacity of treating one hundred tons of ore daily. Mills of smaller capacity have been erected at the other properties named. The mill product as developed so far is spar and lead at the mines of the operators named. However, the Evansville Lead and Spar Company has opened up on their property in one locality, a merchantable body of carbonate of zinc, and have made one shipment of such ore lately.

—(9)—
Shipments from Fairview and Rosiclar are reported at this time, to be something like a car of lead monthly and about seventy-five tons of spar daily, from the former, and say twenty barrels of lead monthly and from thirty to fifty tons of spar daily from the latter.

—(9)—
It is reported that Mr. Jas. Wagner, of Elizabethtown, and associates have developed a most promising property in their Hamp mine.

Will remove to Birmingham.

New Orleans, La., June 22.—Bishop H. C. Morrison of the M. E. church south, has announced that he will leave New Orleans to take up his permanent abode in Birmingham. Since his election as Bishop of his conference, two years and a half ago, Dr. Morrison has engaged in several controversies, and on a recent visit to the general conference in Birmingham, he made arrangements for his removal to that city.

A Delightful Banquet.

High were the spirits of the participants in the splendid banquet that was held in the commodious dining room of the Hotel Crittenden on Monday evening, June 18th. The banquet was composed of several boys formerly of Prof. Chas. Evans' High School, who designed themselves as the "bloody two," "canines," "lone star" and the "wrathful pair." In all there were seven, but owing to circumstances one member was not present; namely, Potter, which marred the as-

pect of the feature, as it left a vacant chair about the board.

At 9:30 the club repaired to the dining room, there to spend the remainder of the evening. Thanks were offered to God for the occasion and the bountiful table, and amid the raindrops stories and jokes were retold of our school days.

The supper was an ideal one. The table abounding with the most delicious dishes, that the market afforded and under the skillful hand of H. D. Pollard, the great chef, the occasion was a complete success.

Those that were present were S. S. Price, V. Y. Moore, A. U. Davidson, A. J. Watkins, Trice Bennett and W. V. Haynes.

The Great Engine.

When passing by Hina & Cox's hardware store just stop and take a look at the great railroad engine inside the front show window.

This immense engine was constructed by Virgil Cox, son of F. G. Cox, the new member of this firm, and will vie with any of the big engines that go by here on the I. C. R. R. tracks.

The parts that go to make up this great engine are all found in the company's store and are as follows:
Boiler—milk cooler.
Cab—bread pan, rule, 22 Winchester smokeless.

Cowcatcher—copper wire, rabbit metal, lead rule and hinges.
The drivers—bucket tops.
Pipe—shoe tacks and gun caps.
Head light—gun tubes.
Steam dome—pepper box.
Whistle—32 steel ball cartridges with wire handle attached.
Sand box—door prop.
Coal car—carpet sweeper and bread pans.
Bell—thimble.
The track on which the big four, "the great mogul," ran was made of solder and cross ties were of hinges.

BIG CANIVAL AT PADUCAH

Begins on Labor Day and Continues Throughout the Week.

Paducah, Ky., July 1.—Preparations for labor union carnival which will begin on Labor Day, September, 3, and last throughout the week, are being made, and the committees are alive and working hard to make the Carnival a success.

Two speakers of national fame have been invited to speak on Labor Day but replies not been received. They are Samuel Gompers, of Washington, D. C., president of the American Federation of Labor, John Mitchell, president of the United Mine Workers of America. The committee hopes to offer inducements sufficient to bring the two speakers here.

A brass band worth \$100 and a parlor set have been displayed in the Rhodes-Burford window. They are being raffled off by the committee to secure funds for the carnival. The winner takes his choice between the two, each being of the same value.

A Fourth of July Party.

Wednesday from 5 to 8 o'clock in honor of Mary Lambert and Rebecca Cromwell, Anna Cox entertained a number of her friends at the home of her parents, Mr. and Mrs. F. G. Cox. Every thing was patriotic, the invitation being in form of fire crackers. Fire crackers were placed standing and each one rolled and knocked them down, the one knocking the greatest number won the prize which was a rubber ball and won by Ruth Flanary the consolation prize was won by Lemme James. Souvenirs of red, white and blue were drawn from a basket.

Refreshments, consisting of Punch, ice cream and cake were served. Those present were Anna Cox, Mary Lambert, and Rebecca Cromwell, Ruth Dodds, Helen Sayre, Ruth Haynes, Ruth Croft, Ruth Flanary, Linda Jenkins, Lemme James, Irene Stone, Jimmie Bennett, Elizabeth Cook, Mattie Wilborn, Geneva Daniel, Martha Louise Lowery, Lolita Frazier, Susie Boston, Louise Clement, Dovie Carter, Lucile Pollard, and Margaret Woods.

Painful Accident.

About noon yesterday James Carlos, son Mrs. W. T. Carlos, was the victim of a painful, though not serious accident. James is an industrious lad and has for sometime been delivery boy for Givens meat market. Yesterday the horse ran away, throwing the boy from the wagon and bruising him up considerably. Besides receiving a severe cut on the head he had several of his front teeth knocked out. He was carried to Dr. Driskill's office where he received medical attention.

COBALT ORE

Edison's Discovery of New Use for Cobalt

Ponderous Electric Motor Cars Are Reduced in Weight About One-Half.

Marion has reason to be grateful to Edison, the Mendo Park Wizard.

He has pointed out the way for Marion miners to increase their bank accounts by jumps, and long jumps at that.

The dream of Ross Givens, the prophesies of Professor Waring, of Missouri, the hopes of Captain Haase, and incidentally the wish of a score of miners are about to be realized.

For Cobalt is about to be enthroned as our king of minerals.

And we seem to have the ore in quantity in many sections of this mining district.

Cobalt or its oxide is ordinarily found in a manganese ore. But manganese is a black dull, earthy looking mineral usually carrying from two per cent of cobalt (40 pounds to the ton) to five or even at times ten per cent. (200 pounds to the ton.)

Up to the present time cobalt has been used as a pigment producing a very handsome blue color and especially in the staining of glass. Smalt which is crushed glass colored by cobalt is used in the various allied arts of glass decoration and coloring.

Mr. Edison is nothing if not progressive. His laboratory in East Orange, New Jersey, is a marvel of completeness. This great building is entirely devoted to researches of the action of not only the mineral's nature but of all of nature's productions vegetable, animal and mineral.

Here it was that cobalt was found to be the media by which electricity could be stored for future use much as water is stored in a tank. The great future for this ore lies in the established fact that one pound of cobalt will store twice as much electric force as the same weight of zinc or lead, the metal with which storage batteries have heretofore been constructed.

This makes it possible for the great touring cars to be constructed with less than one half their present weight; it makes possible motors for hauling over our wonderfully and fearfully constructed roads. Flourspar, zinc, lead and cobalt from the Hodge, the Yandell, the Memphis, the Miller, the scores of others that are producers of this and adjoining counties.

Cobalt in the market is rated at a large sum per pound. It is an extremely valuable ore.
Mr. Edison will purchase this bog manganese technically called "Wad" by the car or train load provided it carries a suitable percentage of cobalt, which the Crittenden county product absolutely does.

The representative of the East Orange laboratory, Mr. Morris, is a gentleman of large experience in this line of research. He has been with us at the New Marion Hotel for some days, where Messrs. Drescher and Givens have showed him all of those attentions that are so dear to the hearts of mining men; that is splendid examples of cobaltiferous ores and the matrix from which they were taken. He expresses himself as delighted with the outlook.

Incidentally the editor of THE RECORD learned that Col. D. C. Roberts was one of Professor Edison's old time associates away back in 1866, the closing year of the "fuss" between the South and the North.

Asked if this was correct Cal Roberts, who is nothing if not handsome said.

In the year 1866 I was night manager of the telegraph office in Boston. Tom Edison blew in this office one evening from somewhere out Michigan way. He was dressed in a pair of tow pants a little short for his length of leg and a coat of the same cloth, that was a little long at the neck and fell off as it tried to meet the trousers, and so far as I know this coat and pants never did meet, at least they did not meet that summer. Mr. Edison was a cracker jack of a telegraph operator, in fact without throwing bouquets at any special man we all were first-class lightning jerkers, we had to be, to draw our salaries twice a month which

(Continued to 5th Page.)

A PROUD MOTHER.

Mrs. John D. Rockefeller, Jr. and Her Son, the Richest of Babies.

There was great delight in the Rockefeller family when a son was born to Mr. and Mrs. John D. Rockefeller, Jr., to bear the name and inherit the millions of the Standard Oil money king. The senior Rockefeller has several grandchildren, but the infant born in New York city a few days ago is the only grandson who has inherited the Rockefeller surname. John D. Rockefeller, Jr., is the only son of the famous millionaire. He married in 1901 Miss Abbie Green Aldrich, daughter of Senator Nelson W. Aldrich of Rhode Island, and the new baby therefore has for one grandfather a United States senator and for another the richest man in the world. He is pre-

MRS. JOHN D. ROCKEFELLER, JR.

spectively the richest infant in the world and has been termed "the billionaire baby."

It has been figured out that by the time John D. Rockefeller 3d reaches his majority the Rockefeller fortune, now estimated at \$1,000,000,000, will have increased to something like \$2,000,000,000. The baby if he lives will be heir to probably the greater part of this fortune. He has a little sister, Abbie Rockefeller, who was born three and a half years ago. Mrs. John D. Rockefeller, Jr., was noted for her beauty and accomplishments when she was a Providence belle. She met young Mr. Rockefeller when the latter was a student of Brown university.

Mrs. Rockefeller is tall and graceful and about thirty-one years of age. Some time ago she acted as waitress at a men's clubhouse that the elder Rockefeller built when an entertainment for men was given. A man offered her a tip, and she promptly pocketed it and said she would put it in the contribution plate Sunday, telling the men not to be shy about giving more tips. She got a lot of them.

HADLEY AND HIS FIGHT.

Missouri Attorney General Who Won Victory From Oil Trust.

Herbert S. Hadley, attorney general of Missouri, who has forced the magnates of Standard Oil to disclose some of the secrets of that powerful institution, declares that all around honesty is the only cure for social ills which are now attracting so much attention. It is not often that a man starts out to fight the big oil trust and wins a victory, but that is what Mr. Hadley has done, and his name is now familiar to millions of people who had never heard of him a year ago. The object of the suits brought by him against the Standard in the state of Missouri is to establish charges of violation of the laws against trusts. At first the oil corporation's spokesmen refused the information Mr. Hadley wanted, but he obtained a decision from the su-

HERBERT S. HADLEY.

preme court of Missouri, which compelled them to answer questions, and now he says he has the knowledge he desired. Mr. Hadley is thirty-four years old and was public prosecutor of Kansas City at the same time that Joseph W. Folk held a similar position in St. Louis. He was nominated for attorney general on the Republican ticket in 1904. All the candidates on the Republican state ticket won in that year except the nominee for governor, who was defeated by Mr. Folk. Though of opposite political faiths, Governor Folk and Attorney General Hadley agree in many of their ideas.

MAJOR GENERAL WOOD.

His Rapid Rise in the Army and Brave Record.

Major General Leonard Wood, who has been criticised on account of the attack upon the Moros in the battle of Mount Dajo, has had a remarkable career, and his rapid promotion in the army has made for him many enemies. His advancement to the rank of brigadier general in the regular army by President McKinley aroused much criticism, and when President Roosevelt advanced him to the major general's rank the hostile comments broke out afresh. General Wood is not a graduate of West Point and was a surgeon in the army at the beginning of the

MAJOR GENERAL LEONARD WOOD.

Spanish war, when he organized and assumed command of the famous regiment of rough riders in which President Roosevelt was lieutenant colonel. General Wood holds a congressional medal of honor which was awarded him for bravery in a campaign against Apaches. His career is a notable illustration of the pranks of fortune. An old friend of General Wood once said: "Some time in the fall of 1897-I don't recall the exact date-I received a letter from General Wood. He wound up by saying that he was thinking strongly of making a trip into the Klondike country, which was then the sensation of the hour. The exact wording escapes me, but the inference was that the future looked rather blank-in short, that he would have to do something then, if ever, and the Klondike seemed to offer a chance. In less than four months after getting this despondent letter the Maine was destroyed, and the circumstances were in motion that were destined to put a general's stars on the doc's shoulder straps, and surfeit him with glory. If he had made the necessary arrangements in 1897 I dare say he would be sitting today in a miner's cabin."

OFFICER AND HEIRESS.

Romance of Lieutenant Scharrar and His Young Bride.

Love, bravery and beer formed a most unusual combination in the case of the beautiful Miss Wilhelmina Busch and the gallant Lieutenant Eduard F. Scharrar. The lieutenant is an officer of the German army. The girl with whom he fell in love is the daughter of the millionaire brewer, Adolphus Busch of St. Louis. He was an ardent wooer and it is said had proposed several times previous to the memorable day on which he took the brewer's daughter on a ride to Belleville, a suburb of St. Louis. She had not said "yes" before, but on this day he was particularly ardent and suggested marriage on the spot. They went to a hotel, and the would be bridegroom wrote on the register "Mr. and Mrs. Eduard Scharrar." How-

MRS. EDUARD F. SCHARRAR.

ever, no marriage took place at that time. While he was trying to arrange for one the young lady in the case called up her father by telephone, and he put in a protest, as the result of which they both returned to St. Louis without being married. Then the daughter was packed off in haste to the California home of the family at Pasadena. There followed a race across half the continent between the lieutenant and the more or less perturbed parent. Papa Busch took a special train, but the young officer got there first and persuaded the fair Wilhelmina to permit a second attempt at matrimony to be made. The marriage was duly solemnized.

Watson's Magazine

The leading exponent of Jeffersonian Democracy, edited by Hon. Thos. E. Watson, of Georgia, the Father of Rural Free delivery; author of "The Story of France," "Life of Napoleon," "Life and Times of Thomas Jefferson," "Betheny" and other books. Mr. Watson was the People's Party nominee for Vice-President in 1896, and for President in 1904. He is today heading a middle-class reform movement which is bound to sweep the country in a short time.

Watson's Magazine is not a Socialist publication. It does not stand for collective ownership for all the means of production. Mr. Watson believes in public or government ownership of railroad, telegraphs and telephones; in municipal ownership of street railways, gas, electric lights, water works, etc.; and he believes in private ownership of all industries not natural monopolies.

The middle class-the home owners, farmers, small business men and property owners-won Jefferson's victory in 1800; won Jackson's victory over Nick Biddle's money power in 1832; won Lincoln's victory in 1860. But each time after the flush of victory had died away, they became careless of their rights and went to sleep. They have slept a good portion of the time since 1865, but-

Watson's Magazine is waking them up. Another great victory is in the air. Keep in touch with the movement.

Fifteen cents a copy at news stands; \$1.50 a year by mail. Sample copy for 1 two-cent stamps and four names of reading friends. Address,

TOM WATSON'S MAGAZINE,
121 West 42d Street,
New York City.

SPECIAL CLUBBING RATE.

Watson's magazine and Crittenden Record a year for only \$1.75. Why not save the 75 cents? Leave orders at this office.

GIVEN FREE.

The Cincinnati Enquirer has just issued a New Valuable up to date Wall Chart of three sheets (six pages) each 28 inches wide, 36 inches long.

The first page shows an entirely New Map of Ohio; the most beautiful and exact ever printed. In bringing this Map up to date, all new towns are located, all Electric and Traction Railroads are shown, all Rural Mail Routes, and portraits of all the Governors.

On other pages of this Magnificent Chart are Maps of the United States with portraits of all the Presidents.

Map of Panama showing Canal zone, with data relative to the great Ship Canal, now being built by the United States, one of the greatest enterprises ever attempted.

A topographical Map of the Russia Japanese War district with data and details of the two great Armies and Navies, battle fields, etc., including the last Naval battle in the straits of Korea.

A map of the World, with Names of Rulers. Coats of Arms. Flags of all Nations. Steamship Routes, with data and Statistics of great worth. Other maps are the Philippine Islands, Hawaii, Alaska and Porto Rico, in all nine distinct maps.

An index will locate any point desired and is so simple a child can understand it. The Chart is new, correct and up to date, making it an invaluable educator, indispensable for the Home, School, Library, or College.

The selling price is \$2.50, yet its worth is many times greater. The Enquirer Company is giving this chart Free to subscribers of the weekly Enquirer who remit one dollar for a year's subscription or for a renewal of old subscription. Agents can reap a rich harvest soliciting orders for this grand offer. Address,

THE PAPER THAT MERITS YOUR CONFIDENCE

The Crittenden Record

Built up from the ground in eight months to an unusual prestige and standing, then unfortunately burned out absolutely, but it never missed an issue and today greets you brighter and better than ever. In fact it's the up-to-date Western Kentucky Newspaper.

That's the Record's record, the paper that asks for your patronage.

It contains all the best General News and all the Local News in Crittenden County, and remembers adjoining counties. It is read in the home everywhere. If you are not a subscriber send in a dollar and become one now, only \$1.00

CLUBBING RATES.

We have made arrangements whereby we can furnish you any of the following Daily Papers and THE CRITTENDEN RECORD at the price named:

St. Louis Republic, daily except Sunday	\$4.00
" " " " " " " "	6.50
Louisville Evening Post and chart	3.50
" " " " " " " "	3.00
Courier Journal daily except Sunday	6.40
" " " " " " " "	8.20
Inter Ocean daily except Sunday	4.20
" " " " " " " "	6.00
Louisville Times	5.00

You can get the daily paper of your choice and THE RECORD at almost the price of the daily alone. We can also furnish you any paper not named above at clubbing rates.

THE RECORD with any of the following Weekly Papers:

The Courier Journal, weekly	\$1.50
Louisville Herald	1.25
Nashville American	1.50

Sam and Powder Trust

is talk at Washington blowing up the powder trust. At any rate, the bill is under consideration in the Senate. It has been introduced into law. It has been on the floor of the house for some time. The government has the power of a trust, so the supply of powder is not cut off. The campaign, as the plants are not getting enough powder, would not be able to. It has been argued that the government should have a powder plant, and this is contained in the bill. The secretary Taft of the war department notified congress, however, that he would not counsel the government in the manufacture of such an extension of business the plants have character now engaged in making.

struction commonly called the trust is the company known as Du Pont de Nemours & Co. The plant is in Delaware, but there are other plants in various parts of the country. The history of the company dates back to the beginning of the nineteenth century, and the family has had a prominent part in the defense of the nation. The company have borne themselves gallantly in the fighting, and they have been a great help to the government in the war.

T. COLEMAN DU PONT.

They landed at Newport in 1800, during the reign of terror the youngest son, Eleuthere Irene, was in retirement in France, where the government powder works were located, and there he became a student under the great chemist Berthollet and examined the process by which powder was produced. His knowledge served him in good stead when arriving in this country. His father was called to the bad character of the powder in use by the American government, and he determined to establish a plant for manufacture of the much needed article. Thomas Jefferson invited him to locate in Virginia, and on account of the existence of slavery in that state and also in Maryland he chose Delaware instead and in 1802 brought models and machinery to France and set up the original plant at Brandywine. A short time afterward the elder Du Pont, who had returned to France, assisted in the negotiations which resulted in the transfer of Louisiana territory to the United States. He remained in France until 1817, but died in 1817 at the family home near Wilmington. The great powder-making industry founded by E. I. Du Pont has remained for a hundred years in the hands of the Du Pont family. When E. I. Du Pont died in 1817 he was succeeded as head of the business by his son, Alfred Du Pont, who in turn was succeeded on his death in 1850 by his brother, General George A. Du Pont. His son, General John A. Du Pont, is perhaps the most distinguished living member of the family. He was a Union soldier in the war, was brevetted four times for distinguished services and gallantry, and won a congressional medal of honor. He claimed election to the United States senate from Delaware in 1885, but was not seated owing to a famous factional contest which several years has prevented Delaware from having more than one representative in the upper branch of congress. He is one of the most powerful members of the powder trust. The head of the powder firm is T. Coleman Du Pont. The late Rear Admiral Samuel Francis Du Pont, son of the late George A. Du Pont, and grandson of Pierre Samuel du Pont de Nemours, was one of the most conspicuous of the naval officers on the Union side in the civil war, and the Du Ponts, Lamont, rendered the Union cause great service.

Revelation.

In the midst of his passionate declaration she yawned slightly. Though with her white and jeweled hand she attempted to conceal the movement, it did not escape him. His torrent of burning words ceased. The light died in his eyes.

"But why," he said, hoarsely, "why speak to you of love? You are heartless—heartless. Your yawn showed it."

"Oh, Clarence," she whispered, horror-stricken, "did I open my mouth as wide as that?"

What Lunar Athletes Could Do.

The "man in the moon" must surely regard with amused contempt our much-vaunted athletic records. A good terrestrial athlete could cover about 120 feet on the moon in a running broad jump, while leaping over a barn would be a very commonplace feat. He would find no difficulty in carrying six times as much and running six times as fast as he could on earth, all because the moon attracts bodies with only one-sixth of the force of the earth.—Springfield (Mass) Republican.

Carried Bullet Long.

J. D. McFall, of Wichita, Kan., has had half of a grape shot removed from his right leg. The ball entered his leg at the battle of Shiloh, on April 6, 1862, 44 years ago. The ball was split in two at the time it entered his leg and it weighed nearly a pound. After carrying this shot around all these years it began to hurt him for the first time recently.

High Happiness.

"If you could only break de moon up into gold dollars en have de stars fer small change, maybe you'd be happy; but dat sorter happiness would come too high fer you, so you better try en git along wid dis ol' worl' en thank de Lawd you in it!"—Atlanta Constitution.

Rich Plowing.

Farmers down in Richmond county, on Dry creek, North Carolina, are plowing up coins. On the south side of the creek copper pieces bearing the name of George Washington are being found, and on the north side, the coins unearthed bear the names of Kings of England.

Armored Dog.

A German shepherd, living at Lempke, finding that his dog was frequently attacked by the dogs of a certain place he had to pass, made for his pet an armor of leather, abundantly spiked and covering his whole body. The dog's enemies then carefully avoided him.

Lightning Kills Fish.

A peculiar result of lightning was noticed in France, after a severe thunderstorm. A bolt struck a small pond just outside the city, and it was discovered that the electric shock had killed all the fish in the water, about 1,000 in number.

Social Relations.

Visitor—So you are going to visit your cousins in the country this summer, eh?

Little Elsie—Yes; mamma says they are not stylish enough to visit us.—Chicago Daily News.

Barmalms in Burmah.

After a struggle lasting several years, the respectable portion of the English community in Burmah has succeeded in securing the passage of a law forbidding the employment of women as barmalms.

His Evening In.

Mr. Jymes was a member of six secret societies. A friend tried to persuade him to join another one.

"No," he said. "I want to spend my Sunday evenings at home."—Cleveland Leader.

Been Cheated.

Dr. Bigbills—I'm sorry to tell you that you have consumption in its worst form.

Mrs. Newrox—That's strange—we have plenty of money to get the best of everything.—Cleveland Leader.

Nation Without Colonies.

Austria is the only empire in the world which has never had colonies, or even transmarine possessions, in any quarter of the earth. Her ambition has hitherto been continental.

Multimillionaire Senators.

Three United States senators are worth more than \$10,000,000. They are William A. Clark, of Montana; Stephen B. Elkins, of West Virginia, and Nelson A. Aldrich, of Rhode Island.

Deaf Mute Nun.

The first deaf mute in this country to become a nun is Miss Etta Mae Holman, who was recently received into the Dominican order at Hunts Point, N. Y.

Willie's Measurement.

"How tall your little Willie is."

"Isa't he. He can almost reach the jam on the top pantry shelf."—Cleveland Plain Dealer.

Speak Up.

Honesty may be the best policy—who knows?

Hang Style!

Only a millionaire can afford to wear a misfit suit.

CONSTIPATION

difficulty in detecting it. Many a child has died from constipation, or illness arising from it, when it might have been saved by the timely use of

Dr. Caldwell's Syrup Pepsin

This is the greatest remedy known for correcting constipated conditions. Don't wait until your child is affected, but administer a dose of the medicine occasionally.

You will notice a perceptible change for the better, a healthy color and a livelier disposition.

Dr. Caldwell's Syrup Pepsin is a good thing to have in the house, because it is good for the whole family.

Dr. Caldwell's Syrup Pepsin can be obtained in both dollar and half-dollar sizes from all druggists.

Your money will be refunded if it does not benefit you.

Your postal card request will bring by return mail our new booklet, "DR. CALDWELL'S BOOK OF WONDERS" and free sample to those who have never tried this wonderful remedy. Mothers write today.

PEPSIN SYRUP CO.

Monticello, Illinois

Sold by Haynes & Taylor.

Hard to Cure.

"I'm glad to hear that Flatman has inherited a fortune and bought a good farm with it. How does he like living in the country?"

"Splendidly. But when the first day of last May came he forgot himself and went around absent-mindedly looking for a new farm, under the impression that he had got to move."—Chicago Tribune.

Explosive Dust in Mines.

Recent explosions in coal mines have shown that the fine dust which settles on the timber and sides of roadways is an element of serious danger. The risk is kept at the minimum when and where the dust is removed as much as possible and the currents of air forced into the mine through ventilating shafts are made as dry as practicable.

Submarine Monotony.

As a rule with few exceptions, the surface of the earth under the oceans is devoid of striking and abrupt contrasts. It would be monotonous if it were brought to view. The action of the water and the depositing of organic and other matter settling down through the sea have smoothed down the greater part of the subaqueous earth and left it far from picturesque.

Never Lived There.

"Where did you learn the Lord's Prayer?" asked an Atchison Sunday school teacher of a little girl.

"I used to live in Topeka," said the little girl, "and I learned it there."

"Now let me hear you say it," said the teacher to the next little girl.

"I don't know it," said the next little girl; "I never lived in Topeka."—Kansas City Journal.

Labor Unions in Holland.

Every department of labor is united in Holland and all other departments. So the other night the spectacle was seen at the Amsterdam opera house of a crowd of bootmakers and cobblers wrecking the performance of an opera for which nonunion choristers had been enlisted.

Use for Boys.

The ever burning questions: "What shall we do with our boys?" seems to be satisfactorily answered in the following advertisement, which appears in the window of a Farmington road butcher's shop: "Wanted, a respectable boy for beef sausages."—London Tribune.

Feminine Financier.

Disappointed at not winning a prize at school, a girl of Grimaby, England, went to a shop and obtained three pairs of boots "on approval." She pawned the boots, and with the proceeds bought some books, which she triumphantly exhibited at home as school prizes.

Expansion of Opals.

The reason why opals are often lost from their settings is that they expand with heat more than other precious stones, and, consequently, force open the gold which holds them in place, with the result that they ultimately fall out.

She Must Know How.

Under a new law, says Health, of New York, in Norway every would-be bride must exhibit a certificate that she knows how to cook. In Norway a dyspeptic is regarded as a natural curiosity.

"Bad Man" Gone.

In the new Nevada the "bad man" is a missing figure, and the contrast between these present-day camps of Tonopah, Goldfield and Bullfrog, and their predecessors of the Comstock, is wide and impressive.—Outing.

Kidnaped the Wrong Person

"Well," resumed the man from Missouri, thus encouraged, "according to the way they tell it up at Sitka, there were two Eskimo villages somewhere above the circle, but not very far apart, and for some reason or other that doesn't figure in the tale, these two villages were not on speaking terms with each other. In fact, there was a sort of an east Kentucky feud on between them, and whenever a man from one village met a man from the other there was some kind of trouble between them. I don't know whether it was a battle with snowballs or a blubber-eating contest, but anyhow it nearly always ended fatally for somebody, maybe an innocent bystander. Well, in one of these villages there was a beautiful maiden. Now, gentlemen, you understand I am simply repeating what they told me up there, and they didn't crack a smile when they said it. There was a beautiful maiden in one, and in the other there was a young man who could outrun, outswim or lick any other man in that section of the ice box, according to claims of his fellow-citizens, and, of course, they set great store by him. This here mighty man of valor was scootin' around one day, when he happened to meet the beautiful maiden aforesaid, who had inadvertently strayed from her parents' Christmas castle. The result was the same as usual. The Eskimo man was slain sore and the Eskimo maid was clean gone on him before the aurora borealis could give warning. Well, this young fellow made all kinds of overtures to the girl's pa; offered him walrus tusks and husky dogs, and the Lord only knows what else, for the young woman, but the old man laughed him to scorn. Then the youngster played what he thought was a winning card—rolled in a barrel of Standard oil, enough to feed the family all winter, and offered to swap even. This staggered the stern parent and he came pretty near makin' a deal, but the neighbors butted in about that time and the whole party chased the lover out of the city limits. He went back home, swearin', by jiggers, he'd have that maiden if he got his feet wet in the attempt, and that, they say, is a terrible oath for an Eskimo.

"Well, after considerable fingerin' and nosin' around he decided the only way to get her was to sneak in at night, or when they was all asleep, and carry her off by force. Now, according to what they told me up there, these Eskimos don't sleep in feather beds like civilized people, but they crawl into bags, pull the draw string tight over their heads and snooze until the alarm clock rings. Young Lochnivar he puts out from town along about ten o'clock in the evening, accordin' to our reckonin', and after trampin' miles over the ice, climbin' a mountain, slidin' down a glacier and crossin' a great chasm on a log, he reaches the land of the foe and the home of the girl. He bribes the night watchman with a bottle of half oil and then slips into the snow palace of the obdurate sire. Of course, the whole family was sleepin' in the reception hall. That's a way the Eskimos have, they told me up there. They say it's warmer and more sociable. But when they're all sleepin' in sacks and the 'lumination is poor the difficulties of making a selection. But Lochnivar didn't hesitate. Could his heart be mistaken about which sack contained his beloved? Gosh! No. He picked up the likeliest bundle, threw it over his shoulder and hiked for the suburbs. It was a pretty hefty package and there was evidently some objections from the inside of it, but our hero toiled steadily homeward. It was a risky job to skin across that chasm on a slippery log with such a load, but he did it, and he climbed the glacier and he scaled the mountains. 'Long about gettin' up time he staggered into his own village and up to his own hut, tired out, but safe and victorious. Now, by jiggers, the beautiful maiden was in his possession. Now he would feast his eyes upon her shining countenance. Now for one long, fond embrace. Trembling with impatience, he tore open the sack.

"Gentlemen," said the Missourian, as he paused to relight his cigar, "if what they told me up there is true, the shock must have been terrible."

"Well, don't keep us in suspense," exclaimed the red-headed man, "what was in the sack?"

The Missourian blew three smoke rings and then calmly replied: "His heart was mistaken. It was the old man he had carried off."—Cincinnati Enquirer.

The Thrifty French Peasant.

Nothing else has so impressed John D. Rockefeller during his stay in France as the thrift and industry of the people. "There is no waste," he says with admiration, "in farm or field; there is no waste in the kitchen." Mr. Rockefeller put his finger at once upon a source of France's strength. Kings have gone and come, empires crashed in the dust, fashions in republics changed, but the French peasant has gone on steadfastly tilling the soil with a passionate love of production. The revolution made him a land owner and no shift of governments or change of industrial conditions has weaned him away from the land.

Arms and the Man.

Ethel—Charlie doesn't say much, but I think he has something up his sleeve.

Maud—Think! He must be a pretty poor lover if he hasn't made you fully aware of the fact.—Boston Transcript.

Earth Growing Warmer.

That the earth is growing temporarily warmer is shown by the mountain glaciers. These are made by varying temperature and moisture to increase and diminish in size during periods of years that may be found to be more or less regular cycles, and a period of quite general decrease began about 45 years ago.

Too Romantic.

The following doubtful compliment is a fragment from a love letter: "How I wish, my darling Adelaide, my engagements would permit me to leave town and come and see you! It would be like visiting some old ruin, hallowed by time and fraught with a thousand recollections."

On Love.

"When a feller loves a gal," said the Paint Rock philosopher, chewing a violet, "he thinks that every other man he knows is his rival for the gal's affections. And when he finds out that this ain't actually the case, why then," chuckled the philosopher, "he's no longer in love."

She Understood.

"Yes," said the man who was beginning to sour on the national sport, "it's interesting sometimes, but baseball nowadays is becoming very dirty."

"Oh," exclaimed his fair companion, "I understand now why all those players are wearing gloves."—Philadelphia Press.

Washington Foretold It.

A bill recently introduced in congress provides for the drainage of the great Dismal swamp, of Virginia, thus fulfilling the prophecy made 100 years ago by Gen. Washington that some day the swamp would be converted into farm lands.—Farming.

Parliamentary Measles.

A British health officer received the following note from one of the residents of his district: "Dear Sir: I beg to tell you that my child, aged eight months, is suffering of measles as required by act of parliament."

American Books in Canada.

American literature is found in every Canadian home, writes Consul Seyfert from Stratford. The village and city libraries are filled with American books and American periodicals predominate.

Perfectly Willing.

E. Bangs Izzair—May I—aw—have the next valise?

Letta Sloan—I haven't the slightest objection. That's the one I don't—aw—dawnce.—Chicago Tribune.

Honeymoon Over.

When a man will eat spring onions at a free lunch before going home in the evening it is a sure sign that the honeymoon is a thing of the past.—Detroit Free Press.

Mammoth Mirror.

A record-breaking plate-glass mirror, in the dining-room of the Savoy hotel, London, is 158 inches square and half an inch thick.

White Gloved Executioner.

The public executioner of Austria wears a pair of new white gloves every time he carries out a capital sentence.

He and She.

When a man decides to go anywhere he begins packing his suit case. When a woman decides to go she begins making a shirt waist.

The Beginning.

Kaicker—Primitive men plowed the earth with a sharpened stick.

Bocker—You don't mean to say golf dated that far back?—N. Y. Sun.

Wrong Thing.

At a wedding do not say, "May the best man win."

Has Fewest Doctors.

Rumela has the fewest doctors of any civilized country.

Bowel Complaint in Children

During the summer months children are subject to disorders of the bowels which should receive careful attention as soon as the first unnatural looseness of the bowels appears. The best medicine in use for bowel complaint is Chamberlain's Colic, Cholera and Diarrhoea Remedy as it promptly controls any unnatural looseness of the bowels, whether it be in a child or an adult. For sale by Aaynes & Taylor, the enterprising druggists of Marion.

CHEAPER FARM LANDS

Southwest Offers Best Opportunities For Securing Homes.

Many farmers in the Northern and Eastern states are selling their high priced lands and locating in the Southwest. Many who have been unable to own their homes in the older country are buying land in the new country.

Unusual opportunities exist along the lines of the Missouri Pacific-Iron Mountain Route. The rich, alluvial, delta lands and river bottom lands of Southeast Missouri, Eastern Arkansas, Louisiana and Texas, capable of producing 60 bushels of corn, a bale of cotton, 4 to 6 tons of alfalfa, 150 bushels of potatoes, and other grains, vegetables and hay crops, can be bought for \$7.50 to \$15.00 per acre. When cleared and slightly improved will rent for \$4.00 to \$6.00 per acre cash.

Uplands more rolling, lighter soil, adapted to fruit growing—peaches, pears, plums, grapes, berries, also melons, tomatoes and other vegetables, can be bought for \$5 to \$10 per acre in unimproved state. Many places with small clearings and some improvements can be bought very cheap.

This is a fine stock country. No long winter feeding. Free range, pure water, mild climate. A healthy growing country, with a great future.

Write for map and descriptive literature on Missouri, Arkansas, Louisiana, Texas, Kansas and Indian Territory. Very cheap rates on first and third Tuesdays of each month.

Address, R. T. G. MATTHEWS, T. P. A., Louisville, Ky. or H. C. TOWNSEND, G. P. & T. A., St. Louis, Mo.

The Crittenden Record.
ISSUED WEEKLY.

GEO. M. CRIDER, Editor and Publisher.

SUBSCRIPTION ONE DOLLAR PER YEAR.

Entered as second-class matter July 15, 1904, at the postoffice at Marion, Ky., under Act of Congress of March 3, 1879.

FRIDAY, JULY 6, 1906.

MINING SHARPS AND FLATS.

The Golconda Fluor-Spar Company have just installed a magnificent mining and separating plant on their Kentucky lands nearly opposite Golconda. This powerful organization of Louisville capitalists are determined to have a proper proportion of the valuable fluor-spar trade of the United States and will spare no pains or expense in producing the cleanest, highest grade product mined near the Ohio river. Naturally the difference in freight rates between the Illinois Central's two parallel tracks will in itself make a splendid profit.

The Illinois Central's freight agents seem to think that three hundred miles haul on the Illinois side of the river is not worth within a dollar per ton as much as three hundred miles on the Kentucky side. This railroad owns both lines to Chicago. The freight on fluor-spar to that city from Golconda, Illinois, nearly opposite Marion, Ky., is \$1.60 per ton, from Marion, \$2.60 per ton, the distance being the same from both points to Chicago.

Several hundred tons of zinc blend in fluor-spar is being delivered to the Sanders Separating Works this week. The percentage of zinc will average some two hundred pounds to the ton or 10 per cent.

A car of bog manganese will leave Hickman county, Tennessee, this week for Edison's laboratory at East Orange, New Jersey. The percentage of cobalt in this ore is about two per cent. and is extracted in the laboratory separating plant for use in automobiles.

The Lady Farmer Mine, of the Henderson associates, is proving itself very strong in zinc sulphide or blend. The recent work on this property under the direction of Mineral Point Wis., a man of some eighty-five years experience in the zinc fields, shows what pertinacity and good judgment will do.

Out on preacher Bigham's land near Dudley Wallingford's mineral ware house, a narrow streak of fluor-spar has been uncovered at a depth of thirty feet. This property lies perilously near the coal measures, and possibly is the extreme northern limit of the ore faults.

BITS OF BY-PLAY.

It is rumored that several of our old standbys in the political, religious, financial and social circles are ready to sell out and migrate to the Indian Territory. The names as given are Senator Maxwell, John Blue, C. S. Nunn, Judge James and Henry Haynes. We hope they will reconsider this move as they are well known in Kentucky and can do most anything in this section without being arrested. It's different, we are told, in the Indian Territory.

Politics or George Crider, we are not sure which, has made several changes in our postoffice force. It may be all right but we miss the general good-natured countenance of Calvin Elder as well as the more attractive face of Miss Wilborn—one of them we miss more than the other.

Naturally, Dudley Wallingford has cobalt on his farm near the city limits. This farm ought to be given to some museum on account of the variety of things it produces. It wouldn't be at all surprising if the long missing Charley Ross couldn't be located on this farm. Everything else has.

Mr. George Roberts, of the Imperial Fluxing Company, has a product which he says is revolutionizing iron and steel smelting. It is composed of some gall and considerable fluorspar.

We call it unkind of any preacher during this hot weather to deliver a sermon from the text "Out of the Fryer Pan into the Fire."

The New Marion Hotel has never been more popular during the hundred and fifty years of Billy Baird's life than it is just now.

The quiet, aggressive methods of the Kentucky Fluorspar Company, as at present conducted, will certainly win in both rates and business.

The loss to Golconda by fire the other day should be considered a distinct by that enterprising community. Places were wiped out of existence that should have been dynamited years ago in behalf of health, cleanliness and decency.

AMONG THE CHURCHES.

Rev. James F. Price preached Sunday morning at the C. P. Church on the theme, "The Faithful Servant and his Reward." Text: Mt. 25: 23.

He first spoke of the characteristics of a true servant.

1. He must abandon the service of sin and of Satan. He must give up the ambitions and follies and pleasures of the world.

2. There must be submission to Christ's authority and obedience to his commands and teachings.

In the second place he spoke of the essentials of good servitude: diligence, constancy, cheerfulness and perseverance.

Lastly he spoke of the Reward of the Faithful Servant. It consists of dignity, riches and felicity. There are four ways by which we can increase our reward:

- By purity of life.
- By usefulness.
- By faithfulness.
- By suffering.

Rev. J. F. Price will preach at Lisman next Saturday and Sunday.

Rev Ben Andres filled his regular appointment at the Presbyterian church Sunday morning and preached from the following text: Psalm 116-12. "What Shall I Render unto the Lord for all His Benefits Toward me?"

A psalm of thanksgiving. Every day should be thanksgiving day for the christian. The psalmist acknowledges the benefits of the Lord. The Lord saved his soul from death and blessed him with many bountiful blessings. In gratitude for this he asks what he shall render to God for all his benefits. He shows his appreciation in three ways. 1st, by taking the cup of salvation. 2nd, by paying his vows to God in the presence of all His people. 3rd, by offering a sacrifice of thanksgiving. The sacrifice of thanksgiving was the offering of a choice bullock to the Lord. Thus we shall show our gratitude by giving of our money and energy to God for all His benefits to us.

Rev. J. H. Butler filled the pulpit at the Baptist church Sunday morning and preached on "The Lord's Supper," his text being found in 1st Cor., eleventh chapter. The Lord's supper was observed. In the evening Rev. Butler filled the pulpit at the Cumberland church. He preached from the text found in Exodus 12-13. Subject: The Passover Blood.

Elder J. S. Rowe preached in the Christian church here Sunday morning. His subject being "God's nearness to us," and his text is found in seventeenth chapter of Acts, Paul's sermon to the Athenian philosophers, and reads "For He is not far from each one of us." Bro. Rowe prefaced his remarks by saying that these are three essentials for a great sermon; a great man, a great theme and great occasion and that these essentials were not lacking at the time referred to in the great city of philosophy, wealth and culture. He said that this sermon of Paul's was peculiar in that for the first time Paul preached the A B C's of revelation to these heathen philosophers and revealed to them the only true and living God in whom we live and move and have being. In his application of text he said there are even today erroneous conceptions of God's distance. He said the preachers and Sunday school teachers are the iconoclasts who break down the ideals—wealth, fashion, intemperance, etc.—and thus clear our spiritual vision in order that we may realize "God's nearness to us." He quoted the scripture: "God is a spirit," and "Lo! I am with you always," and said like a tender shepherd He leads us, like a loving father He pities us and like a devoted mother He watches us.

Sunday morning Rev. McAfee, of the Methodist church, preached from Romans 8:16. He said in this scripture we have four legal facts for consideration. First there must be a competent witness. Second, there must be the facts about which he is to testify. Third, there must be the testimony, or witnessing itself. Fourth, there must be a court of inquiry, or a judge to hear and decide on this testimony. The second fact for consideration is that a Religion, or a Christianity of assurance is the religion that makes glad the sons of God. Scripture proof: Romans 5:1, 2; 8:15, 16; Gal. 4:6; John 9:25; 1st John 2:8; 3:15 and 24; 5:10. The First Epistle of John is said to be a book of assurance.

His subject for next Sunday will be "Parental Devotion in the Home Life and its Effect on the Family."

Entertain.

Monday evening Mr. and Mrs. W. O. Tucker entertained a few friends. Fruit Punch, cream and cake were served. Those present were Mr. and Mrs. Tucker Mrs. R. F. Maynes, Misses Ruby James, Julia Rudy, Kitty and Fanny Gray, Della Barnes and Leaffa Wilborn, Messrs W. H. McElroy, J. D. Caird, Price Bennett, Bob Cook Bruce Rabb.

Free Railroad Fares

EVERY DAY IN THE YEAR TO

EVANSVILLE AND RETURN

By the Evansville Merchants' Rebate Association
THE PLAN

- On and after March 15th, 1906, one round-trip railroad fare from any town within a radius of forty miles from Evansville, Ind., will be refunded to each individual purchaser of \$25 or more from any or all the members of the Merchants' Rebate Association. In case the purchases are less than \$25 the Merchants' Rebate Association will refund the round-trip fare of one mile for each \$1 purchase, buy no refund will be made for less than \$5 purchases.
- Persons living at a greater distance than forty miles may have their fares rebated. To illustrate: If you live 40 miles away, you pay only twenty miles, and the Association pays for forty miles both ways.
- No member shall refund fares or parts of fares direct.
- When a rebate book is applied for, before it is issued, the customer must show his or her return trip tickets or a receipt from the ticket agent.
- The total amount of each purchase must be entered on the books.
- No rebate will be allowed unless application for the same is made at time of purchase.
- The purchaser of the required amount of goods shall apply to the Merchants' Rebate Association, 226 Main street

FARES WILL BE REFUNDED BY THE FOLLOWING MEMBERS OF THE MERCHANTS' REBATE ASSOCIATION ONLY

Hennessy-Robinson Co., 320 Main St. Dry Goods, Notions, Cloaks, Millinery.
Lahr-Bacon Co., 529 Main St., Dry Goods, Notions Cloaks, Millinery, etc.

The Jourdon-Loesch Furniture Co., 317 Main St., Furniture, Stoves, Go-Carts, Baby Carriages, etc.
H. F. Miller & Co., 323 Main St., Dry Goods, Notions, Cloaks, etc.
Geaupel Bros., 413 Main St., Books, Art Goods and Wall Paper.
Louis Gumbert, 223 Main St., Jewelry, Watches, Diamonds, etc.

COBALT ORE.

(Continued from 1th page)

was absolutely necessary in these days of high prices for both liquid and solid refreshments. I was sent to New York by the old American Telegraph Company to obtain and bring back to Boston a transmitter and receiver for a rapid telegraph system similar to the old Bain telegraph which used prepared chemical paper for receiving the dots and dashes, paper being perforated for transmission. While in New York I saw the first one of the machines now used universally for grain and stock quotations and termed "tickers." I made arrangements for rental of these machines for Boston's use and brought with me to Boston a transmitter and receiver of these tickers.

Here is where Mr. Edison makes his first bow to the public as an inventor and this is where the tow clothed grub began preparations to become a butterfly, which I need not say he has succeeded in doing. In the meantime we had patented his first invention. I had somewhat better credit than Edison at that time and I could borrow money enough to pay for the model which a kind government has since dispensed with, but which at that date cost me some \$300, and other patent office expenses were also pretty strong so that when the patent was granted one half being assigned to me by Mr. Edison, (see patent office reports 1866 for corroboration) the exchequer on all sides was about as low financially as Puma, California is barometrically.

His patent was for preventing delay in voting in legislative bodies. By the turning of a little brass switch the members could record their votes electrically printed on sheets of paper at the clerk's desk and two dials gave the totals at the speaker's desk. It was a dainty contrivance and was really worth the cost money just to look about but the legislators whom we saw in Albany, New York and told about the machine saving time and consequently money to the state, stopping filibustering, etc. told us that the main object in life of the average legislator was to do those things which they ought not to do and to leave undone those things which they ought to do and then was no health in them or words to that effect, this sounds something like an extract from the prayer book, but as it was the New York assembly I believe I am safe in assuming that prayer books were not used in that body at that time or since.

Mr. Edison has never made any money out of this electrical vote recording instrument, but he is rather proud of it as being his first born in the patent office.

The improvement of the mechanism of the gold and stock quotation machine was Edison's next move followed by various electric devices for telegraphy and his removal to New York City, where a better field existed. His later labors at Mendo Park and East Orange, New Jersey are of course known to the world.

RANDOM SHOTS.

(BY MR. A. SHOOTER.)

Love is a hallucination which makes some men believe if they can only get married they can set up housekeeping with a gas stove, parrot and poodle dog and live serenely happy.

The more sisters a mans wife has, the more he wonders why he ever married her.

Some men do not like children; these same men forget they were once children themselves, and were loved by a kind father and mother, who expected better things of them.

Bachelors should be taxed; but we have some in our city that should be exempt. It is not their fault.

Race suicide is not a question, it is a condition, twins at Geo. Kings.

A gentleman with three fifty avordupois sat down on the fiscal court in a neighboring county.

Advice is like nauseous medicine, it is easy to give but hard to take.

More babies are killed by soothing syrups than die from disease.

A certain Chicago gentleman, once a Kentucky Colonel, now of Tennessee, formerly of Golconda, promoter of the Reed edition and other good things, some times mistaken for "Dr. Kilmer," has been a guest at the New Marion for several days.

Pure leaf lard can be made of most any old thing. Chicago has splendid filters.

A certain young man of this city has only two troubles; firstly, he cannot get enough sleep. Secondly, he wears out the soles of his shoes in two weeks. Upon the suggestion of a friend he had sheet iron soles put on his shoes and now if he would spend a week in Smithland where all is quiet, I think he could catch up with his sleep and be happy.

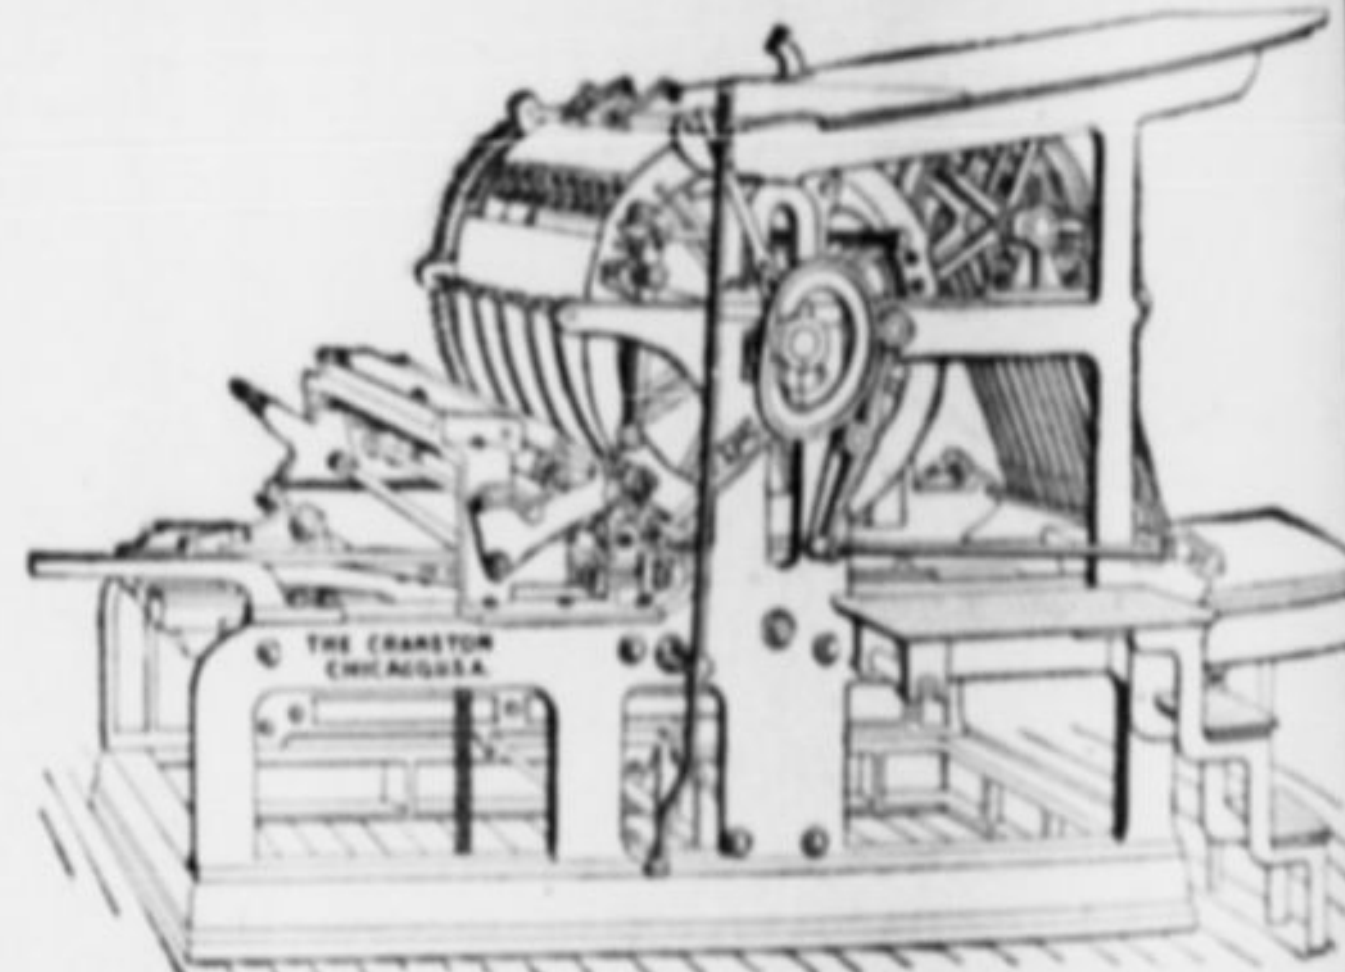

A physician was called to see a robust young man, whose temperature was soaring high, and after making a careful examination asked the young man if he had been taking any thing. The patient replied that he had taken nothing except the wet rag on his head, but had been taking it all day.

A certain young man who had been married but a few days, was heard repeating to himself in a deep sonorous tone, "Mrs. W. F. M., Mrs. W. F. M., that sounds pretty good to me."

A certain bachelor whose headquarters are at the court house would like to embark on the dark and stormy sea of matrimony. Della is alright. Who will be first?

Chamberlain's Cough Remedy

IS UNEQUALLED FOR
Coughs, Colds and Croup.

THE BIG CRANSTON PRESS THAT PRINTS THE RECORD.

THE
Evansville Chautauqua

Which gave its initial entertainment on the Fourth of July has centered in Evansville, at the present time, the Literary and Cultured Elements of the Tri-State district. Realizing that it was "up to us" to materially aid the worthy Enterprise in more ways than one, we placed on a place of Rest or converse. The use of this tent or our store accommodations to visitors in no way entails an obligation, to us, on the part of the recipient. At the same time we extend to all visitors in the city, during the Chautauqua Course to an inspection of our Mid-Summer wearables for Men, Boy or Child, particularly to our special departmental or Bargain Sales. We are makers of High Art Summer wear, the best known or made, and we retail same at factory prices. We can satisfactorily outfit you in cool clothing, cool furnishing, cool hats or shoes at the same time meet part of your expenses on purchases of \$25.00 or more by paying your railway fare

IT PAYS TO TRADE HERE.

Misses Ina Price and Madeline Jenkins presided at the punch bowl. Mrs. D. E. Woods and Mrs. J. W. Wilson assisted Mrs. Jenkins in serving the refreshments which consisted of almond cream, pine apple and cake. Those present were Mrs. S. M. Jenkins, Mrs. J. W. Wilson, Mrs. D. E. Woods, Mrs. A. F. Crider, Misses Julia Rudy, Sallie Woods, Carrie Moore, Ruby James, Anelyza and Elizabeth Johnson, Blanche Haase, Kattie and Fannie Gray, Mollie Chambers, of Morganfield, Bessie and Fanny Woods, Mable Guess, Bess Trisler, Nellie Love, Susie Gilbert, and Leaffa Wilborn.

Tornado Tips

No Locality is Exempt.
Tornadoes Fear or Favor None.
The number of destructive Wind Storms increases each year.

"We aint a'go in to have no Tornado."
That's what the other fellow said.
Now He's living in a Tent.

Don't Delay Today and Wish Tomorrow.

The Wise Man Insures.
The Foolish Man Does Not.
ARE YOU WISE?

Secure reliable indemnity and peace of mind by insuring your property against loss by WIND in the agency of

Geo. M. Crider & Co.

Telephone 15. MARION, KY.

Mules Wanted!

Mr. Charlie Lane Will be in Marion next Monday, July 9th, and in Hampton, Ky., Tuesday, 10th, to buy mules. He wants them from 5 to 8 years old and 15 to 16 hands high.

He Will Be at
Ordway & Guess' Stable
MARION, KY.

Norwegian Moss.
Prof. Hansteen, of the agricultural school at Aas, Norway, finds that a greenish-white moss common in that country can be converted into delicious and nutritious food by being subjected to a chemical process, compressed and cooked. He says that nine ounces of moss, costing two cents, will make a good dinner for six persons—which is evidence that his seal outruns his discretion, inasmuch as an ounce and a half of food is not enough to make a substantial meal for a normal man or woman.

Locusts in Algeria.
Locusts are devastating southern Algeria. The swarms are so great as almost to defy imagination. It is not easy to conceive of an almost solid phalanx of insects 125 miles long by six miles wide. Unfortunately, the devastation which such myriads of voracious insects must create in vegetation is not so difficult to appreciate. Wherever the host has passed nothing green remains. Even the houses are becoming uninhabitable. The Oran province seems doomed for this year.

Oyster Culture.
The Maryland shellfish commission is studying oyster culture in the proper way by learning in Connecticut just how the thing is done. Oyster culture has long been practiced in France and Japan, to say nothing of Virginia. Many years ago Dr. Brooks' book on the subject laid down the principles that underlie the successful prosecution of the industry.

Oldest Negro Lawyer.
Thomas P. Johnson, 94 years old, the oldest negro lawyer in Arkansas died recently after 26 years' active practice of law. He was licensed as an attorney by Associate Justice Bowen, of the Arkansas supreme court, in July, 1870. He was a slave, and he belonged to a planter in Desha county in Arkansas.

Good Army.
The governor of Herat has presented the following report to the ameer of Afghanistan: "The behavior of the army is satisfactory, and there have been no cases of serious crime. The Herat army now says its prayers five times a day, and the men are becoming pukka (very good) Mussulmans."

No Admiration for Actresses.
Dr. Light is in Wichita to-day attending to professional business and expects to take in the Bernhard performance to-night just for instance, although our Dutch blood doesn't care two whoops in a rain barrel for these crazy French actresses.—Kingman (Kan.) Journal.

Metal Getting Scarce.
Aluminum has suddenly come into use for so many purposes where copper and brass were formerly employed that the supply is everywhere far short of the demand. The automobile manufacture is largely responsible for the shortage.

Great Sewer System.
If the sewers of New York city were placed end to end in a straight line they would reach from there to Pike's Peak, 1,710 miles, and the paved streets of the city would make a road along one side of them all the way.

No Happy Medium.
"Yes, I'd be willing to get married if I could only get a wife who was economical and—"
"My dear boy, no woman is ever economical. She's either extravagant or stingy."—Philadelphia Press.

Greatest Street Car City.
New York beats the cities of the world in the length of its street railway tracks. If in one single track its surface, elevated and subway system would extend in a straight line for 1,018 miles.

See Few American Vessels.
Only two American vessels have entered the harbor of Bordeaux in ten years, and those were private yachts which sought refuge during the Spanish-American war.

Neckties on Reels.
Haberdashers now keep plain ribbon ties on reels, the way tape is sold; but instead of having to take the whole roll a length of tie is snipped off for each customer. The advantage of the reel is that a tie will fit the size collar worn by the buyer. Formerly different lengths had to be kept in stock, but now thin necks or fat ones, small or large, may each be fitted accurately by cutting a piece off the reel.

Practical Response.
New Minister—"I'm glad to see my sermon on charity met with so practical a response. Members of the congregation were dropping money into the box all through the sermon." Sidesman—"Oh, no, sir. You see ours is a penny-in-the-slot meter, and we should have been in darkness if we hadn't attended to it."—London Tatler.

Forbidden by Parcel Post.
In Holland potatoes are not received in the parcel post, Denmark will not receive almanacs, and Egypt will not permit sausages to be posted. Germany refuses anything of American origin, and has some clauses directed against Japan; while air-guns, maps, wax matches, rosaries, relics and jewelry are the miscellaneous lot barred by Spain.

Country Mail Delivery.
Rural free delivery was established under President McKinley in 1897. During the fiscal year ended 1903 there were 15,119 routes in operation, with 11,700 petitions pending.

Too Intricate.
Perhaps men are as deceitful as women in some things, but they never attempt to transform a yawn into a smile.

Mexican President a Nimrod.
President Diaz returned the other day from a hunting trip with three mountain cats and 17 deer. Mexico's president is only 74.

Horses Came High.
A good carriage horse in Australia costs \$200 or four times as much as the cost 15 years ago.

Poor Management.
The Athens correspondent of the London Mail says the management of the Olympian games was "chaos."

Busy Bodies.
Too many people look for their duty next door.

Bread Vendors in Asia.
Bread is sold from boxes strapped to donkeys in the Orient.

The New Version.
New York Editor—See here! don't you know executions by electricity are the law now?

New Man—Certainly.
"Then, sir, what do you mean by using this old-time chestnutty, moldy quotation: 'Give a rogue rope enough, and he will hang himself'?" What do you mean, sir? We are not living in the middle ages."
"What substitute would you suggest?"
"Say: 'Let a rogue go on shocking society, and he will get shocked himself.'"—N. Y. Weekly.

Somebody Got It.
Yeast—Were you up to the oyster supper at the church, last night?
Crimsonbeak—Yes; it was a very enjoyable affair.
"You're joking."
"No, I'm not. Every one that found an oyster had to sing a song."
"Must have got tire some."
"Not at all. We only had one song the whole evening."—Yonkers Statesman.

Fighting Happy.
Mrs. Mulligan—An' what did his 'onner say to you this morning?
Mrs. Mulcahy—Can't you and your husband live together without fighting?
Mrs. Mulligan—An' what did yer say?
Mrs. Mulcahy—No, yer 'onner, not happily.—Tit-Bits.

Helping Him Out.
"I know I'll never be able to say that toast gracefully at the dinner to-night," said the out-of-town guest.
"Oh, that'll be all right," said his friend. "I'll fix it up with the host to call on you late in the evening. You can get off any old thing then and nobody'll care!"—Detroit Free Press.

Little Willie's Surprise.
Mr. and Mrs. Blank recently moved from the city to the suburbs. The first night in their new home their five-year-old son climbed into bed as soon as he was undressed.
"Willie," said his mother, "haven't you forgotten to say your prayers?"
"Why, mamma," he replied, "is God 'way out here, too?'—Judge.

The Discouraging Man.
"What do you want with an automobile?" asked the discouraging man.
"I want to get out in the country and hear the songs of birds and smell the perfume of the flowers."
"Oh, that's it! Well, what you'll hear is the honk of the chauffeur's horn and what you'll smell is gasoline."—Washington Star.

Nothin' Doin'.
The hobo approached the pompous citizen and asked for alms.
"Go to the ant, thou sluggard," quoted the p. c.
"Taint no use, mister," answered the hobo. "Me aunt's list as tight-fisted as me uncle, an' all de rest uv me relashuns."—Chicago Daily News.

Won by Waiting.
Her—For nearly 46 years Miss Oldm had looked under the bed every night for the proverbial man and at last she discovered one.

His—What did she do—call for a policeman?
Her—No; she telephoned for a minister.—Chicago Daily News.

Not Writing Kind.
"You say he made his money by his pen?"
"Yes. He used to deal in hogs."—Milwaukee Sentinel.

THE USUAL WAY.

"The doctors have finally agreed upon the cause of Jink's illness."
"Did they hold another 'consultation'?"
"No—a post-mortem."—Cincinnati Enquirer.

The Real Germ.
De scientists dey all declare Dat laziness is but a germ. But Ah gets lazy every time. Ah comes across a fishing worm.—Milwaukee Sentinel.

In Regular Order.
Maud—So you and Jack have kissed and made up?
Maybelle—Y-yes, but not just that way. We made up first.—Chicago Tribune.

Fitting.
Mrs. Shopper—I wish to buy a present for a servant girl. Can you suggest something appropriate?
Salesman—Certainly. Give her a traveling-bag.—Judge.

Misinterpreted.
Naggsby—I couldn't love a woman with money.
Waggaby—Why not? Isn't it one of the very best and most acceptable ways to love her with?—Judge.

The Philippine Constabulary

THE Philippine constabulary has recently been doing work which has occasioned praise from American officers in the Philippine archipelago. Constabulary participated in the recent fighting in Samar and in that on the island of Jolo. Governor Curry in reporting the fight with the Pulajanes at Magtalon, in Samar, said: "Captain Jones of the constabulary lost half of his command, gaining a magnificent victory in the face of overwhelming odds. The constabulary did splendidly, though their inferior arms, which were minus bayonets, placed them at a disadvantage." In the encounter with the Pulajanes the constabulary lost sixteen in killed, wounded and missing.

A force of forty-four constabulary participated in the battle of Mount Dajo, in Jolo. It acquitted itself well, and the loss was three men killed and one officer and thirteen enlisted men wounded. In these two battles the constabulary has come prominently into notice, but for some time it has been employed in very important work in establishing and preserving order. The Philippine government is of the belief that the main dependence for the preservation of order must be the native troops and the constabulary. The regular Filipino troops comprise a force of about 5,000 men, and they are in the main natives who were formerly employed by the Americans as scouts. They are commanded mostly by non-commissioned officers of the regular army and after about two years of drill and instruction form an excellent body of native soldiery.

The native troops and the constabulary co-operate, but they are distinct forces. The duty of a member of the constabulary is something between that of a soldier and a police officer. At present he is pretty actively employed in ridding the islands of the bands of outlaws, which, under various names, prey upon the natives who are peaceably disposed. The constabulary force is somewhat larger than that of the regular native troops. For purposes of administration the islands are divided into five districts, each with its commanding officer, all divisions being under the command of General Henry T. Allen, U. S. A.

The constabulary was organized in 1901. Since that time there has been a large decrease in the number of American troops in the Philippines, and the work of keeping order has fallen more and more upon the natives. In the Sulu group there are two companies of constabulary, and the American troops are garrisoned at Jolo. They are not scattered throughout the remote districts. In many places the natives see white soldiers only at long intervals. The former are managed through the sultan and his dattos, with the co-operation of the constabulary, and when the regular American troops are employed in action it is for the purpose of running down troublesome bands which cannot be taken without them.

There are still many sections of the Philippine Islands which are infected by ladrones, for brigandage is an institution that has existed in the islands for centuries and cannot speedily be wiped out. The ladrones hide in mountain fastnesses and swoop down upon outlying villages or waylay the traveler. The way to fight them is to follow them to their retreats and play the game according to their code. This the constabulary has done successfully. It has rounded up some thousands of outlaws, and it is estimated that the difference between the cost of supporting the members of the constabulary and an equal number of American troops represents a saving to the government of from \$10,000,000 to \$12,000,000. There are Tagalogs, Ilocanos, Visayans and Moros in the force, and they make brave fighters, especially the Moros. They love to swagger and show their weapons, and the main difficulty consists in restraining them in an encounter and preventing them from perpetrating cruelties.

Safest Place to Spend Your Money!

SAM HOWERTON'S, Kelsey, Ky.

WE do not ask you to come to our store to get favors of any kind, but to get correct goods at Cash Price, backed up by our word which is our bond. All our \$10.00 and \$12.50 Men's Suits are now \$7.50 and \$9.50. All our Prints are 5c. A full line of Wash and Wool Dress Goods right up to the minute, all the shades. Fine Laces, Band Trimmings, Embroideries, etc. Staple Goods of all kinds at very low prices. A big Stock of the newest and best brands of Footwear. If you come here you must go away satisfied; we will not allow it any other way. We thank you for the many thousands bought from us, and ask for millions more. We claim our share of all the prosperity.

Yours truly,

Kelsey, Ky.

SAM HOWERTON.

PIONEER SETTLERS OF CRITTENDEN COUNTY

Brief Sketch of the Early Church Building and Their Influence in After Years.

DEAR BROTHER RECORD:

Thinking some one might appreciate a little sketch of some of the pioneer settlers of this Crittenden county, in 1850, Obediah Paris and family consisting of J. W. Paris, the miller, Eld. W. F. Paris and the late L. H. Paris and six daughters, Bartley James (father of Uncle Berry James, of Salem, and the late Smith and Alex James) and family, David Clark (father of Eld. J. R. and Leonard Clark) and family; John Hunt, known as "Uncle Jack," and his wife and three children, Wyatt, the youngest, being an infant two months old, all loaded what they owned of their goods into eight wagons and three mules and started from Crittenden, Tenn. They all settled within a radius of five miles of Marion. Today only two that were heads of families in that colony are living. These two are Aunt Polly James, widow of Uncle Smith James, now in her 82nd year, and the writer's grandmother, widow of Grandfather Jack Paris, who is in her 82nd year. Two of the children that were in that colony are living today, yet their descendants consist of a great portion of the population of this county and are scattered into several States, even into the State of Washington. O. E. Paris, son of Eld. W. F. Paris, moved to Washington two years ago. The most interesting feature of this colony is their devotion to God, the author of all good. When they settled here this county was thinly populated and churches were few, but the faith they had in the Lord stimulated them to action. They would meet at their homes and talk of the goodness and mercy of God and relate their travels and prayers to grace. The following year, 1851, Eld. P. L. Walker arrived from Tennessee and settled here. They soon decided they needed a house of worship, so they went to work, hauled logs and soon had a log cabin on a hill two miles east of Marion, which they named Pleasant Hill. It was a pleasant place to them. Before the second Sunday of the year, they met and organized a church and dedicated it to God, to be used only as a house of worship. The following names were enrolled: P. L. Walker, Lemuel Conger, Bartley S. James, Leonard James, Obediah Paris, Alexander Paris, Sarah Conger, Martha James, Mary Hunt, Sarah Archie Allison. They met regularly once every

month and pray for the prosperity of Zion and men everywhere.

In 1867 they decided to build a larger and better house and in a short time had completed another building about thirty yards from the old one, still praying all the time for the guidance of the Holy Spirit.

In a short while the population had so increased and their congregation grown so large as to demand a larger church, so the third building was erected on the same spot. So on Tuesday, June 12th, it having been formerly announced, the brethren met to engage in praise, prayer and thanksgiving, before removing the old house preparatory to the new, and asking the blessing of the Holy Spirit in the erection of their new building. Pastor Eld. J. R. Clark was requested to lay the first step toward removing the old house, which was to remove the Bible from the pulpit, then the other three preachers, Elders W. F. Paris, J. L. Paris and J. A. Hunt removed the seats from the pulpit, and before the sun set the brethren had removed the whole house.

A noticeable feature of the way was the presence of sisters Mar Hunt and Polly James the only two charter members of the church living.

Mary Hunt, the writers grandmother, told me last Sunday that until her health failed two years ago, she had never missed more than three services meetings at one time, and never let anything except sickness or something of a providential nature keep her away from church.

There are but two male members living today that were living at the time of erection of the second church in 1867, they are J. W. Paris and John Mathews.

This brings to our minds the thought that we are swift passengers from time to eternity and if we are going to do any good in this life we will have to do it quick.

We want to say that we are glad that we have been reared under the influence and teachings of these noble christian people and feel sure if we follow their admonition that we will not dread the end when it comes, let it be soon or late. Yours in hope,

J. FRANK CONGER

Cured a Comrade of Cholera Morbus and Saved His Life.

"While returning from the Grand Army Encampment at Washington City, a comrade from Elgin, Ill., was taken with cholera morbus and was in a critical condition," says Mr. J. E. Houghland, of Eldon, Iowa. "I gave him Chamberlain's Colic, Cholera and Diarrhoea Remedy and believe saved his life. I have been engaged for ten years in immigration work and conducted many parties to the south and west. I always carry this remedy and have used it successfully on many occasions. No person traveling or at home should be without this remedy. For sale by Haynes & Taylor, the enterprising druggists of Marion.

AVERAGE MAN FEASTS DAILY ON DEADLY POISON

Expert Tells of Dangers Lurking in Many Articles of Food in Daily Use.

Kansas City, Mo., June 10.—"By studying a bill of fare in a restaurant not long ago I found that the average man takes forty-two doses of poison at every meal he eats," said Harry B. Walsley champion of the pure food in the last legislature, to-day. "The butter is covered with coal tar dyes," he continued. "The meat was more or less embalming fluid. The lard in which his potatoes were fried probably contains portions of hogs that have died natural deaths and not been slaughtered under sanitary conditions possible the animal died of some disease. The cat-soup is colored with coal dyes and has salicylic acid in it.

"The bread is full of alum. The tea and coffee contain copper. The vegetables have different varieties of coal tar dyes. You can't get any purer pepper. It is full of cocanut shells, sawdust and clay. You buy a nice red apple on the stand. It is rosey because, nine times out of ten, it is painted with coal tar dyes. Even the cherished illusion of new potatoes is not always ours. Old potatoes are freshened up in alum water after being scraped.

"Fifty per cent. of the deaths that occur in this country are the direct result of impure and dishonest foods. The packers are not alone to blame. It is practically impossible to get any pure food in this country.

Modest Claims Often Carry the Most Conviction.

When Maxim, the famous gun inventor, placed his gun before a committee of judges, he stated its carrying power to be much below what he felt sure the gun would accomplish. The result of the trial was therefore a great surprise, instead of disappointment. It is the same with the manufacturers of Chamberlain's Colic, Cholera and Diarrhoea Remedy. They do not publicly boast of all this remedy will accomplish, but prefer to let the users make the statements. What they do claim, is that it will positively cure diarrhoea, dysentery, pains in the stomach and bowels and has never been known to fail. For sale by Haynes & Taylor, the enterprising druggists of Marion.

Notice.

To the officers of the November election 1905, that have not returned the keys and seals to the ballot boxes, please do so at once. Respt., C. E. WELDON, CLK.

Things We Would Like to See.

A city park.
A hitching lot.
The face of the town clock painted.
Our Mayor sitting on the lid.
The ordinance enforced making it a fine to spit on the sidewalks.
The ordinance directing new walks before some residences on North Main enforced.
The effects of a visit from the health officer in some parts of town.
A respectable waiting room at the depot.
A new stable on Dudley's vacant lot.
The little iron shanty at rear of Masonic building torn away.
The old awnings torn from the upper windows of the Carnahan block.
The grass and weeds cut from the vacant lot in the cemetery.
The old shop at the corner of Bank and College streets torn away.
The front windows of the groceries kept clean.

Men stop making a loafing place on the steps of the Marion Bank.

The old brick annex taken from the Court square.

Some patriotism manifested by our citizens on the 4th of July.

Jim Freeman with only Klondike to the water wagon.

The vacant lot at corner of North Main and Bellville streets cleared of the rubbish, shrubs and billboards.

Somebody sell W. B. Yandell a mining "prospect."

Somebody taking the riches from the Nine Acre Mines.

Some of D. C. Robert's dreams of the Reed Mining Company realized.

A town with more marriageable spinsters than Marion.

More men attend the prayer meetings.

The church going people not so afraid of showers and dampness on Sunday.

As large an attendance at the Sunday night union services as was at the Cantata on the night of the 28th.

Dr. Frazer and Quint Conyer run a foot race.

Anybody more enthusiastic over raising fowls than Levi Cook and John Moore.

Tom Cochran and Robert Drescher administering the catnip to their sons.

A Tragic Finish.

A watchman's neglect permitted a leak in the great North Sea dyke, which a child's finger could have stopped, to become a ruinous break, devastating an entire province of Holland. In like manner Kenneth Melver, of Vanceboro, Me., permitted a little cold to go unnoticed until a tragic finish was only averted by Dr. King's New Discovery. He writes: "Three doctors gave me up to die of lung inflammation, caused by a neglected cold; but Dr. King's New Discovery saved my life." Guaranteed best cough and cold cure, at Haynes & Taylor's drug store. 50c and \$1.00. Trial bottle free.
