NUMBER 8.

LEAD AND ZINC IN PAYING QUANTITIES

Good News For the Local Owners of
Mines in Crittenden County

OTHER DISTRICT MINING NEWS

A number of Louisville men owning mining property in Crittenden county received word today from experts working on their mines that leads them to believe that they will become capitalists in a short time. In seeking fluor spar, a vein of ore rich in lead and zinc was unearthed and will be worked at once.

The mines referred to are located near Crittenden Springs and are near the famous Eclipse Mines that are among the richest lead and zinc mines in this part of the country. The lead was struck in paying quantities thirty feet below the surface. Here it assays 25 per cent. and is thought to be much richer farther down. Attorney James Edwards, Mr. William Miller and Mr. John M. Rankin are local persons having large interests in the mines.

They expect to realize over \$100,000 in the next few months, and are making active preparations to work the mines day and night.

Mining Fine Ore at Carrsville

The Schoolfield-Spees Mining Co., is taking out some fine samples of carbonate and fluor spar out of their mine near Carrsville. They have their machinery installed and are taking out large quantities of mineral and will be heavy shippers in the future. They have overcome the water which flooded their mines and now have a pump that is equal to the emergency and is keeping the water out of their mines so that drifting can be carried on to the veins.

Warning Against Peek-a-Boo.

Macon, Mo., July 13.--The following official warning published in the church Herald today for the guidance of those attending the Feasts of the Tabernacle at College Mound, Macon county, Aug. 2 to 12:

"Please do not let any young ladies come to the camp with arms and neck exposed by thin sleeves and waists. It seems immodest and unbecoming enough to wear such garments at home, where none sees you but your father and brothers."

Jewelry of all sorts has long since been barred by the holiness people, but this is their first proclamation against 'peek-a-boo' shirt waists and their exposures.

Famous Mine Exhausted.

St. Louis, Mo., July 13.--When the circuit court today, in session at Farmington, takes action to dissolve the Iron Mountain Company it will mean the passing out of existence of a famous corporation that has netted its stockholders a profit of \$7,000,000. The action was taken by mutual consent of the stockholders. The Iron Mountain at one time the richest iron ore region in the United States, has been exhausted of its ore and soon will be transformed into a vast pasture for the breeding of fine stock. The mining company was organized forty years ago and in its career had paid 200 per cent. in dividends. It has assets remaining of \$275,000 which will be divided among the stockholders.

Cow Gives Birth to Three Calves

Cadiz, Ky., July 12.--R. C. Parmenter, living on the farm of D. L. Parmenter, a mile west of here has a cow that has just given birth to three calves, all three of which are well developed medium-sized calves, and all are living and doing well.

Earthquake Shock.

Albuquerque, N. M. July 16.--This section of New Mexico experienced another slight earthquake shock at noon today. No serious damage was done. Towns to the south also felt the shock and residents of Socorro and San Marcial are in a state of alarm. Adobe buildings at Socorro and other structures built of mud were badly damaged.

El Paso, Tex., July 16.--A distinct earthquake shock was felt here at 11:50 o'clock this morning. Buildings rocked and swayed and many persons fled into the streets. The thermometers and instruments in the weather bureau in the federal building swung back and forth for several minutes. No damage has been reported.

Five Twins too Slow

For the fifth consecutive time the stork left twins at the home of David Goldman and wife, Monday night, says a Cleveland, O., telegram. Their living children now number fourteen.

"I aspire to be the parent of twelve more," declared the proud Goldman.

"I share my husband's ambition," chimed in Mrs. Goldman, hale and happy though still in bed.

Eleven of the children still at home rejoice with their father and mother and are proud of the newest arrivals. They are a healthy, congenial family.

"I do feel well enough to be up and about today," said Mrs. Goldman, her face wreathed in smiles, "but the folks insist that I remain in bed, I assure you, I will be up tomorrow."

"As I said, we hope to increase our family by twelve before old age comes. But David and I are forty-five years of age each, and you can guess why we hope for triplets or quadruplets the next time."

Cliff Fell and Delayed Train

Part of the cliff at Fox Bluff, Tenn., was washed down on the Illinois Central track Saturday night, and but for the watchfulness of the track walker, a series of wrecks might have occurred.

The track was covered beneath four feet of soil and rock for a distance of 400 feet. The track walker hastened to flag both trains.

The accommodation train leaving Nashville for Princeton, Ky., at 5 o'clock, was delayed three and one-half hours, while the fast passenger train from Chicago to Nashville, was held up six hours before the track was cleared.

New Sidewalks.

The city council, at its recent regular session, ordered the following sidewalks built, either of concrete, brick, or stone, as specified:

On the East side of Main street, abutting on the lot of J. A. Stegar, said walk to be of concrete or brick not less nine feet wide.

On the East side of Cherry street, abutting the property of S. H. Ramage; to be of oak plank and 3 feet in width.

West side of Mill street, abutting on the lots of T. J. Yandell, W. B. Yandell, Mrs. N. M. Clark, Mrs. Mattie Wheeler, and A. J. Baker; to be of oak plank and three feet wide.

On the North side of Bellville street, abutting on the lots of Harve Porter, Jack Stemberge, and the Illinois Central Railroad Co.; to be of oak plank and not less than three feet wide.

Watch US Grow!

The Press has decided to add a pictorial magazine and comic supplement in colors and will begin next week. These comic pictorial magazines are used extensively by all the leading great dailies and we believe it will be quite popular, with the little folks especially, in the thousands of homes where the PRESS is now read.

A HORRIBLE DEATH

Two Boys Meet Death in the Mighty Waters of the Ohio

While bathing in the river at Fairview, Ill., last Monday morning, Harry Ralph, age about 18, son of Parker Ralph, and Joe Joiner, age about 24, son of Wm. Joiner, were drowned. About eight young men and boys went in bathing Monday morning, and with others, these two young men swam out over a reef which brought them into a deep angry current of water where there seemed to be a whirl. The edge of the reef seemed to be made of quicksand, and all efforts of these two boys to gain a foot hold were in vain. Their companions tried to save them but could not. The other boys who swam into this dangerous place were saved after a desperate struggle.

The bodies were not found until Tuesday morning, about 24 hours later. They were found floating with their heads upward.

This appears to be a very dangerous place in the river. Within the last two years two steam boats and some barges have been wrecked near that place.—Elizabethtown, Ill., Independent.

THE CAMP-MEETING

At Hurricane Camp-Ground Will Commence August 23rd.

The annual camp-meeting at Hurricane camp ground will commence this year on Thursday before the fourth Sunday in August, or the 23 day of the month.

Rev. J. J. Smith, the well known evangelist, will have charge of services. E. D. Boggess will assist in the meeting.

T. S. Threlkeld will have charge of the singing.

Little Child Dies.

Little Nannie Vick, infant daughter of Mr. and Mrs. Lee Vick, died at 6:30 o'clock Saturday morning, July 14, 1906 of erysipelas of which she had suffered six weeks. She was born the 7th day of August, 1905, and was therefore 11 months and one week old. The funeral service was held at the house Saturday afternoon by Rev. J. F. Price and the burial took place in the new cemetery. Mr. and Mrs. Vick have the sympathy of all their friends.

Short Visit on Account of Sickness.

G. R. Puckett, son of Mrs. Cynthia Puckett of this city, who was a resident of San Francisco at the time of the earthquake, started east recently for a visit to relatives and friends accompanied by his family.

When they reached Chicago his little daughter was stricken with typhoid fever which necessitated her being put in a hospital where she was detained so long that they abandoned part of their trip and returned to San Francisco.

Dr. Todd Returns

Dr. J. N. Todd, of Fredonia, and one of Caldwell's most popular and successful physicians, returned Tuesday from Chicago, where he took a post graduate course. This, with Dr. Todd's long and successful experience will place him in the front ranks as a physician and surgeon.—Princeton Leader.

A Card of Thanks

We want to offer our heartfelt thanks to our friends and neighbors for their kindness to us in our trouble and grief, and oh how noble hearted they offered their tender sympathy and assistance in every way during our little darling's illness and death. May God's richest blessings abide with them all.

MR. AND MRS. LEE VICK.

IN SOCIETY

On Thursday, July 12, little Miss Geneva Daniels gave a birthday party at the home of her grandmother Mrs. H. A. Cameron, at which were invited all of her little friends. The hours were from 3 to 6 p. m. Many childish sports were engaged in, including "Drop the handkerchief," "Butterfly hunts," the latter of which being a contest, Miss Helen Sayre winning the prize, a beautiful cup and saucer. The little hostess was the recipient of many beautiful gifts, among them being a bicycle and a diamond ring. Among those who attended the party were Misses Helen Sayre, Linda Jenkins, Lemma James, Rebecca Cromwell, of Henderson; Virginia Flannery, Ruth and Mayme Haynes, Roberta Moore, Louise Lowery, Mary Weldon, Miriam Blackburn, Helen Hurley, Tommie Conway, Isabelle and Virginia Guess, Anna Cox, Lucile Pollard, Florence Dean, Bertha Mae Haury, Frances Woods, of St. Louis; Vera Conyer, Marion Ainsworth, Dovie Carter.

In honor of the visit of Mrs. M. C. Cone, of Curve, Tenn., and her son, Charlie Duvall, both of whom formerly lived in this county, and are here now for the first visit they have made in some time, a picnic and reunion was held at Crittenden Springs, Thursday, July 12. Among those who attended besides Mrs. Cone and her son, Charlie Duvall, were John R. Marvel, wife and baby, Rodgers Marvel, Morton Duvall and wife, John Vaughn and wife, also his mother and his daughter, Miss Ina. They all came with baskets well filled and as the day was ideal everyone enjoyed it to the utmost. Mrs. Cone was before her marriage to the late Jas. Duvall, a Miss Hughes, sister of J. H. Hughes of Weston. After Mr. Duvall's death she married a Mr. Cone and lives now at Curve, Tenn., on the Illinois Central Railroad near Dyersburg.

In compliment to Miss Rowena Clark, of Princeton, Ind., Mr. and Mrs. J. Leroy Shrode entertained at their new home on Walker street on Tuesday evening. Vocal and instrumental music was rendered by the host and hostess and a number of the guests and a most enjoyable time was spent. Refreshments of ices, cake and dainty confections were served. Besides the guest of honor, Miss Clark, the following were present. Misses Mabel Guess, Ebba Pickens, Nan Walker, Kneel Cossitt, Carrie Moore, Bessie Trisler; Messrs. C. V. Franks, J. B. Sedberry, Wm. Clark, E. V. Carleton, Lottie Gilbert, Alvis Stephens, Creed Taylor, Bruce Babb and Rob Cook.

0:0

A gay party of young people surprised Miss Anna Allen Elgin, Wednesday night of last week at her home on North Main street. Those who composed the party were Misses Katie Yates, Katie Yandell, Jesse Croft, Madeline Jenkins, Nannie Rochester, Madeline and Julia Cook, of Paducah; Margaret Joiner, of Russellville; Fannie Blue, Myra Dixon, and Masters Orlin and Homer Moore, Emmet Clifton, Robert Jenkins, Harry Babb, Jno. Butler, Galen Dixon, Elmer Franklin. Refreshments were served and all of the party were delightfully entertained.

0:0

Masters Orlin and Homer Moore entertained a few of their young friends at their home in East Marion Thursday evening. Delightful refreshments were served and many games engaged in. Those present were Misses Margaret Joiner, of Russellville; Katie Yandell, Anna Allen Elgin, Gwendoline Haynes, Madeline Jenkins, and Masters Emmet Clifton, Robert Jenkins, John Butler, Galen Dixon and Elmer Franklin.

A delightful evening of music and conversation was spent at the home of Miss Ellis Gray on Wednesday evening, July 11. Dainty refreshments of ices and cake were served and the merry crowd bid good-night to their charming hostess at a late hour, voting the evening a splendid success. The guests were Misses Fen Wathen, Allie May Yates, Willie Croft, Pearl Doss, Inez Price, Mildred Haynes, Maud and Bernice Driskill, Mary Deboe, Cora Melton, Messrs. Will McConnell, Harvey Mulhall, Wilbur Haynes, Lottie Gilbert, Gray Rochester, Creed Taylor, Virgil Moore, Leslie Melton.

0:0

On Tuesday evening at his home on Walker street, Sylvan Price entertained a number of his friends in honor of his visitor, Will Watkins, of Mayfield. Refreshments were served and a lively time was spent. Those present were Misses Bernice and Maude Driskill, Pearl Doss, Ina Koon, Mabel Yandell, Bulah Conyer, Sallie Jo McGeehe, Freda Pickens, Mary Joiner, Grace Moore, Mildred Haynes, Vera McCord, Maude Gilliland and Messrs. Will Watkins, Virgil Moore, Creed Taylor, Ray Flannery, Clarence Gilliland, Curtis Pickens, Gray Rochester.

0:0

Master Harry Weldon celebrated his 9th birthday last Tuesday evening, at the beautiful home of his father, county clerk C. E. Weldon, and many of his little friends called to pay their respects and spend a pleasant afternoon. Refreshments consisted of ice cream, cake, sherbets, and sandwiches, and were enjoyed by the little folks. Among those present were James Howerton, Paul Lowry, Dudley Noggle, Russell Ray, Robt Sayre, Arnold Driscoll, Carl Frazer, Schley Frazer, Mary Ray, Floyd Wheeler, Ivan Hina, Escoll Daughtrey.

0:0

Miss Carrie Moore invited several of her friends to her home on Main street on Friday afternoon last, to meet her guest, Miss Nan Walker of Hopkinsville. Miss Carrie is an ideal hostess and entertained her guests in a most charming manner. Delightful refreshments were served during the afternoon.

The following were present: Misses Dell Barnes, Kitty and Fanny Gray, Ruby James, Margaret Moore, Lily Cook, Nell Love, Susie Gilbert, Sallie Woods, Bessie Trisler, Mabel Mues, Mesdames Jno. A. Moore, Levi Cook, Chas. Moore, J. L. Shrode, A. C. Moore.

HANDSOME INCREASE

In the Postoffice Receipts this Year Over Last Year

April, May and June of this year have increased receipts at the Marion post-office over the same months last year of \$27.85.

In 1905 the total receipts for April, May and June were \$788.26; this year they were \$816.11.

The year 1905 was the year of wonderful building. Postoffice receipts show that 1906 is better, and their record is a good barometer.

Let us examine the first three months of each year:

	1906	1905
Jan.	\$356.90	\$281.36
Feb.	313.30	267.70
Mar.	429.14	296.28
	\$1099.34	\$845.34

Increase over 1905 of \$254.00.

Who said Marion was dead? Who said there was less business in Marion this than last? If Marion is dead who is buying stamps? Why are there more postoffice boxes rented now than last year or year before? The firms who advertise are doing more business each year.

OUR CHURCHES

The sermon at the Presbyterian church last Sunday morning was on the subject of "judging." The text was taken from two passages of scripture, Mt. 7:1 and John 7:24. "Judge not that ye be not judged," "Judge not according to the appearance, but judge righteous judgment." These passages of scripture teach both the positive and the negative side of the principle of judging. The speaker applied this to the various phases of human life showing how man is to regard the rights of his fellowman. Man is not to judge his brother when there is no absolute need for it, but when he must judge him then he is to observe the positive statement of the principle and judge righteous judgment. Man is to observe this rule of life in regard to the habits, the private affairs and the conscience of his brother.

The Union services of the churches were held at the Baptist church last Sunday night and the sermon was preached by Rev. Andres of the Presbyterian church. The text was 1 Cor. 16:13, "Watch ye, stand fast in the faith, quit you like men, be strong." The speaker called this Paul's Guide to Strength. The three points of strength are to be on the guard, to take a stand and to be courageous. The strong man is ever on the alert against his foe. We as christians are to be on the alert against sin. The christian is to be watchful and ready for the second coming of Christ. One of the chief points of strength is the stand a man takes against his enemy. The Child of God is to stand fast in faith. If man is firmly rooted in the faith of Christ he is given strength to overcome many conflicts against the forces of evil. The last point of strength is courage. Men must be courageous to win life's battles. The christian man must be a man of courage and then he will be able to overcome. The speaker gave as such examples of courage, Joseph, Daniel, Paul and Luther who stood in hazardous places and came away wearing crowns of victory because of their dauntless courage. Thus to be men of strength we are to be on our guard take a firm stand and be of a courageous spirit.

Rev. J. R. McAfee delivered a sermon on the subject "The Son and Daughter's part in Maintaining a Christian Home" last Sunday morning at the M. E. church which was full of sound logic and good advice and was heartily enjoyed by the large congregation present.

Regular services at the M. E. church next Sunday morning at 11 o'clock by the pastor. Sunday school at 9:30 a. m.

Services as usual at the Presbyterian church next Sunday. Sunday school at 9:30, preaching at eleven o'clock by the pastor.

Rev. Duke S. Hill, of Evansville, a former citizen of this county, will preach at the union services at the Methodist church next Sunday night.

Rev. Andres will preach next Sunday night at 7 o'clock at the Presbyterian church at Tolu.

Another Railroad Accident.

Tuesday an Illinois Central freight train backed into Louis Sisco's wagon and team, cutting off one of his horses legs and damaging the other considerably. Mr. Sisco escaped by jumping off the wagon. The injured animal lived until Wednesday morning but as there was no chance for it to recover it was shot to put an end to its suffering. It was buried near the spar mill.

GENERAL NEWS

At a meeting of the directors of the Baptist Educational Society of Kentucky, in Louisville last week, it was determined to make an effort to raise \$500,000 for the purpose of developing the schools and colleges of that denomination in the State.

Plans have been completed for the organization of a \$1,000,000 to build and operate nine fast steel steamers on the Mississippi river between St. Louis and New Orleans and St. Louis and St. Paul.

Miss Gaston, of Chicago, head of the American Anti-Cigarette League, has gone to Indiana to start a crusade for the enforcement of the law in that State relative to the sale of cigarettes to minors.

Ten thousands miners in the Hocking district, near Athens, O., have gone out on a strike, claiming their pay checks were not as large as they should have been under an agreement with the operators.

Mrs. Anderson Crawford was assaulted by an unknown negro at her home in Ford, Ky., last week. She fired two shots at her assailant as he ran away. Mrs. Crawford is in a critical condition.

Rev. J. L. Rea, pastor of the Mangum, Oklahoma, Christian church, shot and fatally wounded George A. Stephens, his brother-in-law, and then cut his own throat. Rea and his wife had separated. Mrs. Rea going to the home of her brother. Stephens went to the minister's home and asked for his sister's belongings. The men quarreled and Rea fired at Stephens with a shotgun.

E. H. Puryear, a well known attorney and a democrat, has been appointed Police Judge of Paducah to succeed the late Judge D. L. Sanders.

County attorney John C. Duffey has filed suit against L. R. Davis, former sheriff of Christian county, to recover money said to be due the State. The amounts as given in the petition which it is alleged were received by Mr. Davis as penalties and which are now sought to be recovered are as follows: For 1902, \$479.72; for 1903, \$680.80; for 1904, \$859.57; total \$2007.56.

As a result of the movement all over the State to prevent the hanging of Mrs. Aggie Myers, sentenced for murdering her husband, it is likely that a bill abolishing capital punishment in Missouri will be passed by the next Legislature. Gov. Folk and Judges Fox and Valliant of the Supreme court, are said to favor such a law as is now being prepared by Rev. Fred W. Loss, member State Board of Charities.

In an effort to stop the brutal criminal attacks on women and children which have been so prevalent in Chicago recently, the city council today unanimously passed a resolution recommending capital punishment for such outrages. The committee on state legislation to which the resolution was referred will prepare a report to be transmitted to the legislature at Springfield next winter.

The little town of Lynnville, Ind., was almost wiped off the map last week by fire. Twenty-five buildings were burned, and the loss is estimated at one hundred thousand dollars.

An explosion of gas in the room of the Black Diamond Coal and Coke Co., at Drakesboro, Ky., injured six men, two of whom died.

Between four and five hundred patients and many physicians of the North Texas Insane asylum at Terrell, Texas, are suffering with an attack of what shows many symptoms of cholera morbus.

Henry Clay Evans, of Hamilton county, Tennessee, was nominated for governor of Tennessee by the republican state convention last week.

Mrs. Blanche Collins, 28 years of age, while temporarily insane, committed suicide at the city hospital in Owensboro, by jumping from the window in the room which she was confined.

Walter Pettus, the negro who stabbed and killed Brice Edwards at Hopkinsville, was arrested at Princeton and returned to Hopkinsville.

Mrs. Mary Fay died in New York last week at the age of 105 years.

John G. Herman, a devout layman, has organized the chickens in the neighborhood of Wesley Methodist Episcopal church, near Sykesville, Carroll county, Maryland, into a missionary society to raise funds to aid the church. Each hen is a lay member so to speak. The farmers of the neighborhood have agreed to give to the church the eggs that their hens lay on Sunday. They will be placed in a basket at the pulpit every Sunday afternoon at the hour of the Epworth League meeting, and Mr. Herman will stamp each egg with the date on which it was laid. The following day, Monday, he will take them to Baltimore. He had agreed to realize 2 cents on each egg no matter what the market price may be.

Modest Claims Often Carry the Most Conviction.

When Maxim, the famous gun inventor, placed his gun before a committee of judges, he stated its carrying power to be much below what he felt sure the gun would accomplish. The result of the trial was therefore a great surprise, instead of disappointment. It is the same with the manufacturers of Chamberlain's Colic, Cholera and Diarrhoea Remedy. They do not publicly boast of all this remedy will accomplish, but prefer to let the users make the statements. What they do claim, is that it will positively cure diarrhoea, dysentery, pains in the stomach, and bowels and has never been known to fail. For sale by Woods & Orme.

"Painted Rock" Destroyed

Washington, Pa., July 13.—"Painted Rock," a historic boulder which stood on the top of a hill overlooking the Monongahela River, near Millsboro, was blown up yesterday by dynamite, by Joseph Horner, upon whose farm the stone was located. Horner destroyed the rock because he was annoyed by the thousands of persons which it attracted to his farm each year. The boulder was in the shape of an altar, and had been carved by the Indians with figures of men, bears, wolves, snakes, and strangest of all, a kangaroo. For more than a hundred years it has been considered one of the most important remains of the written characters of the North American Indians. Columns have been published about it from the pens of eminent scientists and historians.

A Modern Miracle.

"Truly miraculous seemed the recovery of Mrs. Holt of this place," writes J. O. R. Hooper, Woodford, Penn., "she was so wasted by coughing up pus from her lungs. Doctors declared her end so near that her family had watched by her bed-side forty-eight hours; when, at my urgent request Dr. King's New Discovery was given her, with the astonishing result that improvement began and continued until she finally completely recovered, and is a healthy woman to day." Guaranteed cure for coughs and colds. 50c and \$1.00 at Woods & Orme's Druggist.

Stenographers Wanted

There is a great demand for good stenographers. You can secure a good position by attending the Bowling Green Business University, at Bowling Green, Ky. Address as above for catalogue and further particulars. 7-2

Half The World Wonders

How the other half lives. Those who use Bucklen's Arnica Salve never wonder if it will cure Cuts, Wounds, Burns, Sores and all Skin eruptions; they know it will. Mrs. Grant Shy, 1130 E. Reynolds St., Springfield, Ill., says: "I regard it one of the absolute necessities of housekeeping." Guaranteed by Woods & Orme druggist 25c.

In Great Demand.

The graduates of the Bowling Green Business University are in great demand, and are to be found almost everywhere holding the best paying positions. Write for catalog and particulars. Address Bowling Green Business University, Bowling Green, Ky. 72-

A NOTED DAMAGE SUIT IS SETTLED

Richard N. Dorr vs. Missouri Pacific Ry. Company.—Victory for Dorr.

The damage suit of Richard N. Dorr, the present city clerk of Wichita, against the Missouri Pacific Railway Company, is ended. A small journal entry on the books of the clerk of the district court indicates that the case has been dismissed by mutual agreement of the attorneys representing Mr. Dorr and the railway company, the costs to be paid by the company.

This means that a settlement has been effected between the company and Mr. Dorr and that one of the most noted damage suits ever brought against a railroad by an individual in Sedgewick county is ended. Mr. Dorr received \$12,500 in settlement of his claim and said last night that the matter was settled in full.

Two years ago last April Mr. Dorr was a brakeman in the employ of the Missouri Pacific Railway. While in the discharge of his duties he was thrown beneath the wheels of a moving train and both legs were cut off, one above and other just below the knee. After many weeks of suffering he recovered sufficiently to begin a suit for damages against the company. From a strong young man with a physique like an athlete, he was reduced to the lot of a helpless cripple and all because of a defective safety appliance on an engine. In the court it was shown it was not carelessness upon the part of Mr. Dorr that caused the accident, but in one of the most hotly contested cases ever in the district court here his attorneys, Houston & Brooks, proved the justice of their cause so clearly that the jury returned a verdict granting Mr. Dorr \$35,000 damages against the company. This is the largest damage award for personal injuries ever made by a jury in Kansas, and it excited much comment at the time both in this state and elsewhere.

Naturally, with such a verdict against it the company appealed the case to the supreme court and when it came on for a hearing there it was sent back for a new hearing on a technicality. The case was still pending in the district court when the settlement was effected.

Mr. Dorr was elected city clerk a year ago last spring by the largest majority of any man on the ticket, which tends to show his popularity, and his many friends in Wichita will be glad to learn that the case has been finally settled so advantageously to him.—Wichita (Kan.) Daily Eagle.

New Coal Mine Opened

The K. P. Coal Company have opened new mines on the Providence and Casoyville road near Golds. They struck coal in full bloom at the depth of fifteen feet and tunneled ten yards. The timber works are all first-class, and are working a large crew of hands. Cal Tash, of Blackford, is driving the entry, and the prospects are bright for them to do the biggest business in the whole country.—Clay Times-Herald.

ON YOUR HUNTING TRIP

Be sure to be properly equipped with the STEVENS' ARMS AND TOOL CO. We make RIFLES . . . from \$2.25 to \$150.00 PISTOLS . . . from \$2.50 to \$50.00 SHOTGUNS . . . from \$7.50 to \$50.00

Ask your dealer and insist that for safe passage through the woods you have the STEVENS' ARMS AND TOOL CO. product. If you do not, you are not properly equipped. We ship direct, carriage charges paid to you. Mailed prepaid, upon receipt of the four cents in stamps to catalog price.

Our attractive three-color Aluminum Hanger will be sent anywhere for 10 cents in stamps.

J. STEVENS ARMS AND TOOL CO.
P. O. Box 496
Chicopee Falls, Mass., U. S. A.

WORK HAS BEGUN ALL ALONG THE LINE

Work is Being Pushed All Along the Line of Madisonville's New Railroad.

All of the Madisonville, Hartford and Eastern Railroad has been subcontracted except a section from Sunnydale to Smith's Creek, and from Centertown to Ben's Lick Creek. Work of grading is well under way at a number of points, and it will soon be lively all along the entire line.

The twenty miles out from Madisonville is to be built by C. H. Dishman of Pensacola, Fla., who made a bid on the entire line.

J. W. Miller, of Evansville, Ind., has been awarded the section from Bens Lick Creek to Sunnydale. This is the section through Hartford. It is expected the work will be commenced by Mr. Miller on this part in a few days.

Borecher & Bolt will build from Green River to Centertown.

A. Goodman, of Breckinridge county, has the contract from Mitchell's to Smith's Creek and has already been at work two weeks.

Mike Crahan, of Hors Shoe branch has the contract to bridge Bough river at Dundee.

Captain Fagin and his corps of engineers have moved into their new quarters and have settled down to their work as though they expected to make there home their for some time.

May Live 100 Years.

The chances for living a full century are excellent in the case of Mrs. Jennie Duncan, of Haynesville, Mo., now 70 years old. She writes: "Electric Bitters cured me of Chronic Dyspepsia of 20 years standing, and made me feel as well and strong as a young girl." Electric Bitters cure Stomach and liver diseases, Blood disorders, General Debility and bodily weakness. Sold on a guarantee at Woods & Orme's drug store. Price only 50c.

Eddyville School.

For another year Prof. J. Nall has been placed in charge of the Eddyville graded school as principal. His efficient services and successful term last year, did much to secure the position for another year. Prof. Nall has been very successful in preparing teachers and this feature alone brings many young men and women to him who expect to teach. One of the best recommendations of a teacher is his ability to successfully prepare young people for their life work, and in this regard Prof. Nall has done well.—Lyon County Times.

Will Interest Many.

Every person should know that good health is impossible if the kidneys are deranged. Foley's Kidney Cure will cure kidney and bladder disease in every form, and will build up and strengthen these organs so they will perform their functions properly. No danger of Bright's disease or diabetes if Foley's Kidney Cure is taken in time. Woods & Orme.

After Oil.

Drilling for oil near the Kuttawa mineral springs is going along nicely. Two crews operate the drill day and night. A considerable depth has already been reached. Good wages are paid for laborers, and several men have found employment with the drilling company. The Hillman Land and Iron company has been of great benefit to our town. The company has spent a good deal of money here, putting in its various enterprises and operating them, and their work seems only to have just begun.—Lyon County Times.

Beats The Music Cure.

"To keep the body in tune," writes Mrs. Mary Brown, 20 Lafayette Place, Poughkeepsie, N. Y. "I take Dr. King's New Life Pills. They are the most reliable and pleasant laxative I have found." Best for the Stomach, Liver and Bowels. Guaranteed by Woods & Orme druggist 25c.

The Crittenden Press

Established - - - - 1879

Has the Largest Circulation of any Country Weekly Published in Western Kentucky

To Prospective Subscribers

For over Twenty-Seven Years the old Crittenden Press has been a welcome visitor to the homes of Crittenden county, in fact it has become a part of the family. Those who have been on our books all these long twenty-seven years, say "it gets better each year; like wine it improves with age," which is the best advertisement we can offer, except the Twelve Pages crowded with news of Home, Farm, Neighborhood, Local, General, Deaths, Births and Marriages it conveys to you each week.

We Reach the People

To Advertisers: The best and surest way to reach the homes of Crittenden county is through the Crittenden Press which visits them each week, and is read from the oldest to the youngest member of the family. Others have succeeded through its columns, why not you?

Sample Copies Sent Free to any address on request.

Our Job Department

Is equipped with the latest improved machinery; our type faces the latest, and every job we turn out is neatly executed, and first-class.

We Print Everything

From a Visiting Card to a Full Sheet Poster and print it right. If you want Note Heads, Letter Heads, Bill Heads, Statements, Circulars, Wedding Invitations, Reception Cards, Funeral Notices see us. Mail orders receive prompt attention.

We are Printers and we Pride Ourselves on our Work

Prominent Man Dead.

Paducah, Ky., July 10.—Edwin P. Noble, President of the Globe and Trust company, and first chairman of the Board of Public Works, died this morning at 3:30 o'clock, after undergoing an operation for appendicitis. Mr. Noble was fifty years old, and one of the most popular and progressive citizens of Paducah. He married the daughter of Charles Reed, for many years proprietor of the Palmer House in this city. Mr. Noble's bank was instituted by W. H. Smith, now under indictment in the Federal court in Louisville. Under the management of President Noble, the institution has prospered, and paid its first dividend July 1.

Feel Impending Doom.

The feeling of impending doom in the minds of many victims of Bright's disease and diabetes has been changed to thankfulness by the benefit derived from taking Foley's Kidney Cure. It will cure incipient Bright's disease and diabetes and even in the worst cases gives comfort and relief. Slight disorders are cured in a few days. "I had diabetes in its worst form," writes Marion Lee of Dunreath, Ind. "I tried eight physicians without relief. Only three bottles of Foley's Kidney Cure made me a well man. Woods & Orme.

Cold Blooded.

A woman in California has been granted a divorce from her husband on the ground that he is a consumptive. The promise "for better, for worse," seems to be a mere perfunctory one in these days, in no way taken seriously by those who make it. Tuberculosis is not the most pleasant of things, but practical desertion on account of bad health, does seem a bit too cold-blooded, even for the formal atmosphere of courts.—Baltimore American.

Hot Springs Ark.

Special Summer Tourist Rate to Hot Springs, Ark., and return \$15.60. Tickets on sale June 22 to Sept. 30, good return Oct. 31.

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never fails to restore Gray Hair to its youthful color.

BOSTON'S NEW CHURCH.

CHRISTIAN SCIENTISTS DEDICATE TWO MILLION DOLLAR MOTHER TEMPLE.

Thousands Egan All Parts of World Through Historic City—Church Seats 5000.—Taller Than Bunker Hill Monument.

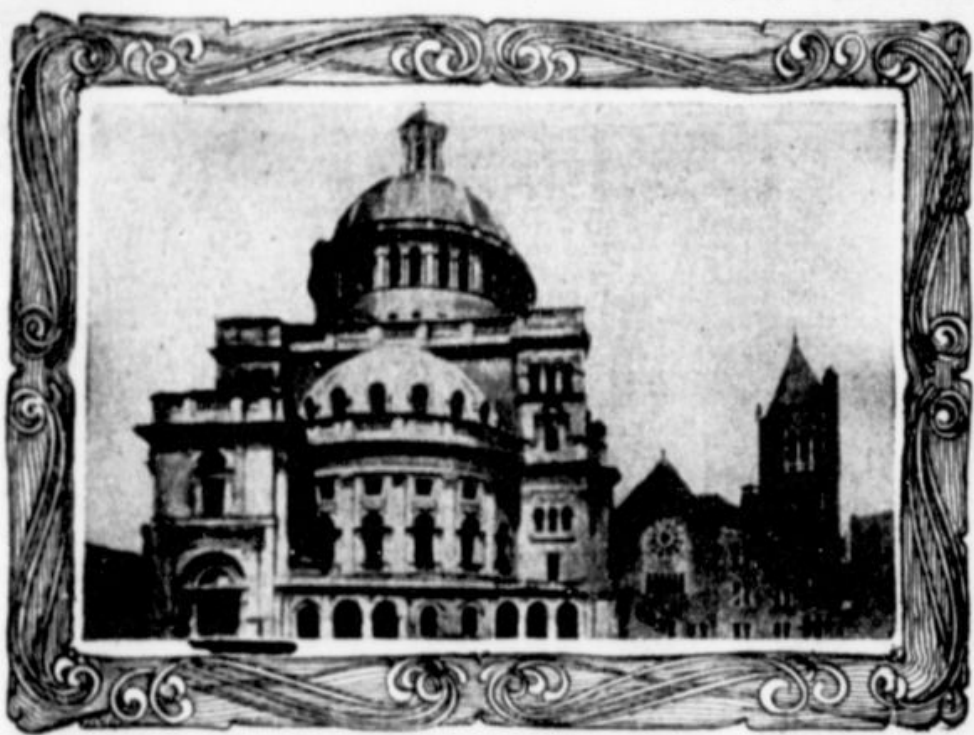

The dedication in June of a magnificent new addition to the Mother Church of the Christian Science denomination, in Boston, was an event of the highest significance in the history of this religious body.

Built as the result of a spontaneous recognition of Mrs. Eddy's life work and of the imperative demands of the marvelous growth of the movement, expressing the liberality of thousands of Christian Scientists, and embodying the best in architectural design and modern construction, this new building was logically the central feature of this year's gathering.

The church is one of the largest, if not the largest in the United States, its seating capacity being 5,012. Its style of architecture is Italian Renaissance. The pews and other interior furnishings are of mahogany. The walls are Concord granite and Bedford stone, with beautiful decorative carvings. The inside finish is a soft gray to harmonize with the Bedford stone columns supporting the dome. The height of the building to the top of the lantern is 224 feet, just one foot higher than Bunker Hill monument. The dome is eighty-two feet in diameter and is covered with terra cotta to match the Bedford stone. The building presents a stately, dignified and impressive appearance, and it is already recognized as one of the landmarks of Boston.

The cost of the building is something less than \$2,000,000. The new chimes consist of eleven bells, the largest of which weighs 4,000 pounds. The smallest bell weighs 400 pounds. The organ is one of the largest and finest in the world.

The original "Mother Church" which adjoins the new building seats about 1,200, and yet three Sunday services are required to accommodate the attendance. It is said that when this edifice

NEW CHRISTIAN SCIENCE TEMPLE IN BOSTON.

was planned some of the members were disturbed on account of its size. They thought that the provision of so large an auditorium was entirely uncalled for, the attendance at that time being only about 550.

Mrs. Eddy organized the First Church of Christ, Scientist, in Boston in 1879 with twenty-six members. So slow was the growth of the movement at first that in 1880, ten years later, there were only eleven churches. From that time, however, the increase was more rapid. In 1889, there were 301 churches. There are now 657 churches and 275 societies not yet organized as churches, making 932 societies holding church services. In 1889 there were only 450 members in the entire connection. In 1894 the total membership was 2,536. Five years later it had reached 18,134. These figures show that the principal growth has taken place during the past seven years. The membership at the present time is about 72,000.

The dedicatory exercises were attended by visitors from all parts of the United States and Canada, from Great Britain, Australia, Sweden, Denmark, France, Germany, Switzerland, the Hawaiian Islands, South America and other foreign countries.

One hundred and forty-five church edifices have already been erected by the Christian Scientists. These, as a whole, compare favorably with those of the older denominations. It is said that when funds are no longer needed for the completion of the Mother Church a large number of buildings will be commenced in different parts of the country.

EARTHQUAKE RECORDERS.

They Are the Most Delicate of All Instruments.

The instruments invented for the recording of the motions of the earth's surface during an earthquake are looked upon by scientists as the most delicate of all machines. So highly sensitive are they, indeed, that the very slightest vibratory motion is recorded perfectly. Even the tread of feet cannot escape this instrument, if sufficient to cause vibration.

There are three classes of instruments for the automatic recording of earthquakes, each with its own particular function. First is the seismo-

scope, which will merely detect and record the fact that there has been an earth tremor. Some of these are so equipped as to indicate the time of the disturbance.

Second is the seismometer, the function of which is to measure the maximum force of the shock, either with or without an indication of its direction. The third instrument is the seismograph, which is so arranged that it will accurately record the number, succession, direction, amplitude and period of successive oscillations. The last instrument is by far the most delicate of the three.

In the construction of this earthquake-recording machine the maker must so suspend a heavy body that when its normal position is disturbed in the most infinitesimal degree, no reactionary force will be developed tending to restore it to its original position. The inventor has never been found who could accomplish this suspension of a body to perfection. The seismograph of to-day, however, has reached a stage of perfection where close approximations are obtained in the records made.

The complementary part of the instrument is composed of a system of levers connecting an astatically suspended body with various surfaces that are moved by clockwork. These surfaces are constructed of highly sensitive material, on which needles play as the suspended weight responds to the vibrations of the earth's crust.

The most elaborate of these machines are capable of recording the vertical and two horizontal motions of the earth in the case of a seismic disturbance.

HAD A GOOD SPANKING.

Boy, Rescued From Drowning, Mother Administers an Additional Lesson.

An interesting little story of very human interest comes from the river front on the outskirts of New York City where Signora Genaro, who recently came to this country from Naples, was walking the other day with her seven-year-old son, Antonio, for an airing. While she was watching a passing steamboat the little chap frisked along the pier and then—splash, into the river.

The mother's shrieks were heard by a patrolman. He jumped into a boat

and fished out Antonio. The police-

man had only one oar, and it was awkward work getting to the boy and lifting him into the boat.

When the signora saw that her son was safe the anguish in her face gave way to a look of resolute purpose, and as the dripping Antonio was placed on the wharf she laid him across her knee and did what Neapolitan and other mothers have done to their erring jewels ever since boys wore pants.

Her Master Was a Gentleman.

A Boston couple were recreating near Augusta, and met an old negro woman to whom they took a fancy. They invited her to pay them a visit, and the colored woman accepted, especially as her expenses were to be paid.

In due time she arrived in Boston and was installed in the house of the white folks. She was given one of the best rooms, and ate at the same table with her host and hostess.

At one of the meals the hostess said: "Mrs. Jones, you were a slave, weren't you?"

"Yes, mum," replied the old colored woman. "I belonged to Mars Robert Howell."

"I suppose he never invited you to eat at his table?" remarked the Boston lady.

"No, honey, dat he didn't. My master was a gemmen. He ain't never let no nigger set at the table 'longside er him."

Eschew Teeth Examinations.

Never look a rift horse in the mouth; but if he's spavined or knock kneed there's nothing to hinder your taking account of these accomplishments.

Could Talk United States.

A Cuban negro, who came to Alabama shortly after the cessation of the Spanish-American war, became involved, says General Fred Grant, in a quarrel with a native colored citizen of the State mentioned. In his imperfect English, the Cuban darkly contemptuously referred to the Alabamian as "an African."

"Maybe I is," quickly rejoined the offended one, "but if I is an African, I thank de Lawd I ain't no Spaniel; an' what's more, I aint no black Phillistine! I kin speak United States, I kin!"

RENAMING THE SIOUX.

SOME TWENTY-FIVE THOUSAND INDIANS ARE RECEIVING CHRISTIAN NAMES.

Educated Indian Tribesmen Selected by the "Great Father" to Rechristen Braves—Bob-tailed Coyote Becomes Robert T. Wolf.

Uncle Sam has recently inaugurated a unique and ingenious project in connection with his Indian wards—or at least the most populous division of them. This is nothing less than a scheme for renaming every chief and brave, every squaw and papoose of the Sioux tribe. The object of this wholesale rechristening is to insure the right descent of property, something that has been attended with much difficulty under the old condition of affairs when the Sioux had no family name, and each redskin could be identified only by his own individual fanciful name, a cognomen which most likely had not the slightest resemblance to those of any of his relatives.

The renaming of the 25,000 members of the Sioux Indian tribe was ordered by President Roosevelt on the advice of Hamlin Garland and George Bird Grinnell, well known authors, and other persons who have made a study of the needs of the Indians. To decide upon the renaming was however an easy matter in comparison to the actual carrying out of the strange undertaking.

SUSPICIONS OF THE INDIANS.

The President and his advisors realized from the outset that it would be one thing to give the Indians new names and quite another to induce the sons and daughters of the forest—ever suspicious of the white men—to accept and use these new names. However, the Great Father at Washington was fortunate enough to enlist the cooperation of Dr. Charles Alexander Eastman, a highly educated physician and clergyman, who is a full-blooded Sioux, and who came into national prominence some time since when he married Elaine Goodale, the talented young New England poetess. At the President's solicitation Dr. Eastman, who is considered the best educated Indian in the world, agreed to personally undertake the task of inducing his people to adopt the system of family names desired by the government.

Just what this responsibility meant will be better understood when it is explained that not only was Dr. Eastman to visit all the Indian villages of the Sioux tribe and personally bestow names but he must also devise or invent the new names. Just imagine selecting given names for 25,000 persons of both sexes and apportioning perhaps half as many or one third as many different family names in addition.

In this portion of his novel missionary work for Uncle Sam the Name Giver, as the Sioux now term their educated tribesman, has displayed rare judgment and a fine regard for family history and tradition among the Sioux—a thoughtfulness that has done much to win the good will of these intelligent but conservative Indians for the new project. Whenever possible he has perpetuated an Indian's old name in his new one. For instance High Eagle becomes Mr. High Eagle, Bob-tailed Coyote was changed to Robert T. Wolf, and Rotten Pumpkin has been transformed into Robert Pumpkin.

Dr. Eastman has been making a round of all the Sioux reservations which are located for the most part in the Dakotas and elsewhere in the Northwest. When he arrives at a branch agency, or tribal headquarters, for the purpose of rechristening the inhabitants his first move is to have a conference with the chief men or councilors of the place. They, in turn,

send out a herald or town crier to summon all the people to a sort of mass meeting and at this the "Name Giver" explains the President's wishes at length.

THROUGH INDIAN SUBTLETY.

At the outset many of the assembled Indians may be prone to grumble against the new system, but gradually Dr. Eastman will win them over, and in his labors thus far he has not encountered more than half a dozen Indians who have steadfastly refused to change their names. However, hundreds of the Indians have confided to him that they would accept the new system of names only because they had the assurance of a fellow tribesman (Dr. Eastman) that it was a good plan, and that they would never have tolerated it had a white man come among them and broached the scheme.

Although the renaming of the Sioux is not yet completed it has already

been proven that the new system of names will be of the greatest benefit and value in insuring the correct descent of Government allotments of land from generation to generation. Incidentally it may be noted that even thus early this untangling of lines of descent has won for some Indians valuable property rights previously denied them. As a case in point it may be cited that only a few weeks ago Dr. Eastman was instrumental in securing for a young squaw 640 acres of rich land of high value which had been temporarily lost to her owing to her separation from her own tribe, and which an unscrupulous relative was on the point of selling when President Roosevelt's special commissioner stepped in and set things right.

'Phoning Through Flesh.

To talk through the human body—or a row of human bodies, for the matter of that—is one of the weirdest

THE NOTED SIOUX CHIEF, "BLACK CHICKEN."

of the electrician's feats. If a telephone wire be severed and the two ends be held by a person, one in each hand, but far part, it is quite possible for a conversation to be carried on through the body, as readily and as distinctly as if the line had been properly connected.

Their Compass Points to the South

The Chinese do everything backwards, from a Caucasian point of view. Their compass points to the South, instead of the north. The men wear their hair long, while the women coil theirs in a knot. The dressmakers are men, the women carry burdens. The spoken language is not written, and the written language is not spoken. Books are read backwards,

THE BLACK SEAL PURSE.

"Snatch it! Snatch it!" whispered Reddy the "lookout," pal to "Jimmy the Swift," who won this title from the lightning rapidity with which he was known to relieve men's pockets of their contents.

In a moment the practiced fingers of Jimmy had skillfully extracted a fat seal purse from the pocket of a slight young man who was busily elbowing his way through the crowd that was besieging a belated Broadway car.

The day had not been a rich one for the "picks," and Jimmy eyed the thin purse rather suspiciously.

"Mighty slim-looking, hey, Red?"

spell the hard words 'o his chum, who listened with a cynical smile. At the end of the reading he was about to shout with derisive laughter, when Jim, springing forward, collared him, and with a tone utterly new to him, said sternly:

"Look here, Red! You and I's friends—that's all right; but as sure as I'm a thief, this here ain't no stuff for a feller to laugh at!"

For an answer Red thrust his hands into his pockets, eying Jim curiously the while, and turned on one foot with a long low whistle.

"I never had no mother," murmured Jim. "She died when I was a little chap, so I never knew her, but it must be awfully nice for a feller to have a mother like that to be good to him, and learn him things. Why, who knows, perhaps if you and me had had mothers like that livin', instead of bein' kicked 'round by the 'boss,' we never gets enough out of us, we might a had a good schoolin' and been makin' an honest livin', instead of thievin' in New York."

These words of regret upon the past of his young life, and the expressed desire for something better, from one whose only home almost since infancy had been the street, and whose companions had been crooks and ne'er-do-wells, was too much for the incorrigible Reddy, whose worship consisted of heroes that were daring villains, and not penitent sinners.

He could hardly suppress his contempt for the, to him, now "Soft" Jimmy, hence he drawled, with a sneer:

"You—ain't—goin'—to squeal on account of that find, be you, Jim?"

"See, there you are! Go ahead, Jim. Look at the bunch of greenies sticking out of the old feller's coat—quick, Jim!"

The habit of years could not be overcome in a moment. Goaded by his tempter, Jimmy stealthily leaped forward, and in a second his fingers would have been on the bunch of paper money which the evil eye of Reddy "spotted" in the old man's pocket. Like a flash came the sight of the purse, the gray lock of hair, the words in the newspaper that made such an impression upon him—no, he would not, he could not any more. His hand dropped to his side. The old man disappeared with the money, safe from Jimmy's wicked fingers.

Jim's head sank until his chin rested upon his naked chest, his companion glaring at him with eyes furious with anger.

"Well, 'tain't no use," said Jim, quietly but firmly; "I couldn't, Red, somehow, after that—and I'll never try it again."

"You got another pal—if you want to—but I tell you that I ain't goin' to keep this here pocketbook nor nothin' what's in it. It's done it for me; I've quit the profession."

That night a black seal purse was left in the office of one of the great New York newspapers, with a note scrawled in pencil, as follows:

"Please try to find the owner of this I guess he wants it bad. The thief as was."—Los Angeles Times.

In Extremis.

The four-year-old daughter of a clergyman was ailing one night and was put to bed early. As her mother was about to leave her she called her back.

"Mamma," she said, "I want to see my papa."

"No, dear," her mother replied, "your papa is busy and must not be disturbed."

"But, mamma," the child persisted, "I want to see my papa."

As before, the mother replied: "No, your papa must not be disturbed."

But the little one came back with a clincher:

"Mamma," she declared solemnly, "I am a sick woman, and I want to see my minister."

PALISADE PATTERNS.

A DUSTING OUTFIT

Designed by BERTHA BROWNING.

No housekeeper can afford to be without a useful apron, cap and sleeves for the time when the house must be swept and dusted and there is no one else to do it. These are invaluable on other occasions when there is other work to do which would soil a lady's gown and the models sketched are designed especially for home construction and very easily made. The apron consists of a narrow square yoke from which the full straight portion depends. The underarm seam is left open for a short distance to allow plenty of room for the sleeve to pass through. The cap is modelled on the quaint Dutch order and very becoming. The sleeves provide for a shirring or elastic to be run in top and bottom to hold them in place. Gingham, percale and madras are suitable materials. For the medium size 4 yards are needed.

OUR HOME TOWN.

A Department Devoted to Village Betterment.

RICHARD HAMILTON BYRD.

The editor of this department desires to keep in touch with the active members of Civic and Local Improvement Associations, and every one interested in the improvement and the protection of rural village life.

What is being done in your town to encourage small industries and for home employment? What is being done along the line of street improvement and the beautifying of private lawns and public parks?

Are your local merchants receiving the support of the local trade?

Experience, plans and suggestions will be welcomed by the editor of this department and so far as possible given place in these columns.

THE INDEPENDENT TOWN.

Make Each Rural Center Dependent Upon Itself and Its Own Resources.

There has lately developed a strong sentiment looking to the improvement of the home town—making each community, as much as possible, dependent upon itself and its own resources and those of its surrounding country, and independent of the great centres which are constantly striving to secure a portion of the local wealth. This local self-sufficiency may be fostered by an individual and co-operative determination to bring the town up to its highest possible plane of comfort, general usefulness and beauty to its residents. This may be described as a movement for civic improvement. The accumulation of considerable wealth in many American villages and towns, during the last ten or twenty years, the development of popular education and the increase of leisure, has given an opportunity for the performance of public duties, such as had not seemed to exist to the farming man or woman of the former generation, who, in the effort to secure a livelihood and establish a home had given little thought to the duties of citizenship and social responsibilities.

It is only within a comparatively few years that, "nature study" has entered into any of the public-school work, or even manual training, while there are many who yet think that such institutions as gymnasiums, baths, playgrounds, and even vacation schools and free lectures are unnecessary time-consumers for the young.

Nevertheless the general movement for a better education along rural lines and for backyard and street improvement, and the general betterment of the village and town is rapidly increasing. As an instance of this, even in such a large city as St. Louis, girls and boys are given practical instruction in gardening, through the Junior School of Horticulture of the Missouri Botanical Gardens. The children are permitted to sell their own products—a decided stimulus to their efforts—and in this way many of them earn considerable pocket money for vacation time. This school has been in operation for a number of years and is of great value to the citizens as well as to the children of the city, the latter of whom would otherwise know practically nothing of nature as country children know it.

Even in Texas the school garden and town improvement idea has made headway, although there has been greater difficulty in obtaining popular approval and support, possibly, than in any other section of the country, owing to the fact, perhaps, that the Lone Star State has vast areas of uncultivated land, and to the fact that the influential majority has been but a short time removed from the cattle

THE AGRICULTURAL HIGHSCHOOL

Successful Examples Described by Crosby of Department of Agriculture.

Threat of Rural Education

In the new Year-Book of the Department of Agriculture, just issued, a description by D. J. Crosby, of the office of Experiment Stations, which shows, in a number of instances, what splendid results are being attained through the introduction of common sense agricultural studies in some of the country village schools, and how they directly affect and benefit their home towns. There is what appears to be, an almost ideal Pennsylvania village high school, which the writer visited. He describes what he saw:

In Erie County, Pa., surrounded by a good general farming and dairy country, is the village of Waterford, on the outskirts of which is the site of Fort Le Boeuf, of French and Indian war fame. At Waterford the first school in Erie County was established in 1821, and here as far back as 1822 was erected a stone academy building, which is used to-day as the main part of the high-school building. The township of Waterford has a population of 1,400 and about one half reside in the borough of Waterford. The borough has its own elementary school, but the high school is supported and controlled jointly by the borough and township.

This high school, with its three teachers and three courses of study (language, scientific, and agricultural), has an enrollment of 80 pupils, and 35 of these are in the agricultural course. This course includes agriculture, five hours a week for four years. The work of the first year is devoted to a study of plant life—germination, plant growth, plant food, reproduction, propagation, transplanting, pruning, and use of plants; the second year to a study of field, orchard, and garden crops; the third year to domestic animals, dairying, and soil physics, and the fourth year to the chemistry of soils and of plant and animal life.

Text books are used in the class rooms; a small library of agricultural reference books, reports and bulletins of this Department and experiment stations, and agricultural papers contributed by the publishers is in almost constant use, and lectures on agricultural subjects are given before the class and before the whole school by the instructor in agriculture, who is an agricultural college graduate. But the feature of instruction which chiefly distinguishes this agricultural course from the ordinary high school course is the prominence given to the laboratory work and the outdoor practice. For the laboratory work there is no elaborate apparatus. The pupils make much of their own apparatus, furnish their own reagent bottles, and, moreover, use them in the plant-life course the pupils study not elaborate and carefully prepared drawings, but

salaries and only \$370 for other expenses, has a faculty made up of numerous specialists and an equipment in illustrative material such as few technical high schools could afford. And the pupils are being trained in the "elements of failure and success," not only on "all the farms of the neighborhood," but in the village shops and markets. This is training for efficiency. It is training for culture, for breadth of view, and for sympathy with all that goes to make up the life of the community.

Homecroft and Craft.

The "homecroft" idea, referred to by George H. Maxwell in his address before the Biennial Convention of the General Federation of Women's Clubs, is closely allied to the "home arts and crafts" propaganda, in which so many, in and out of the federation, are interested. The homecroft, owning its home and a little patch of ground—an acre or two, more or less—is of all persons the one most likely to be interested in home crafts—little lines of manufacture, which, added to the produce of his ground, may afford a support to his family, either constantly or as a substitute for wage-earning employment when some great shop or factory may be suspended. Aided, perhaps, by a little gas engine or electric motor, he may have a choice of an infinite variety of crafts, in which he and his family may profitably engage. Here is a combination which seems to offer relief from the demoralizing and dehumanizing conditions of our present factory system; also a mode of multiplying the number of those citizens, independent of both landlord and employer, who are the backbone of American democracy. Give us the homecroft and the craftsman in one!

Keep Politics Out.

Every public-minded citizen should make it known that he is absolutely opposed to partisan, political control in the management of public parks, roadside improvement, playgrounds and like town betterments. Nothing can be more detrimental to such development than the interference of politics. Party responsibility, as a remedy for municipal mismanagement, has been proved a "delusion and a snare." Such methods have raised to important places bigoted, incompetent and sometimes dishonest men, who, by reason of their weaknesses or mismanagement, have disgraced what should be honorable and respected positions. Our citizens should insist absolutely that no political considerations are allowed to interfere with park affairs, and should visit with marked censure and disapproval all city officials who prostitute their trusts for mere political gain.

Fresh Air Playgrounds.

American cities are far behind European cities in making provision for public parks, especially in providing for the instruction and amusement of children in them. In modern municipal equipment in Europe, much provision is made for the instruction and amusement of children, and in most modernized European cities large sums of money have been expended in procuring open spaces for them in districts of congested population.

It had been organized only three or four weeks, and yet the interest manifested and the readiness with which the boys and girls described the beef type, the dairy type, and various breeds of cattle, the mut and wool types of sheep, the principal breeds of draft horses, and some of the standard-bred roadsters and trotters, were indeed surprising. At the close of the recitation the class was taken to a barn in the village where a very fine roadster was owned. The owner was not at home, but the teacher had standing permission to take the horses from the barn in order that the class might examine them. A fine Hambletonian mare was led into the yard and examined critically by the pupils and criticized by them, the different points being brought out by skillful questioning on the part of the teacher.

From this place the class went to a livery barn where a splendid black Percheron stallion was stabled for the day. A member of the class had discovered the horse as he was being driven in from another town 11 miles away, and following the driver to the barn had got permission for the class to examine him. When the livery barn was reached the driver brought his stallion out into the street, put him through his paces, and helped the teacher in calling attention to his good points and the contrast between the draft type and the roadster type of horses, and allowed us to take several photographs. It was an instructive lesson not only for the members of the agricultural class, but for the score or more of farmers and townsmen who collected around the livery stable. In much the same way the local butcher is the instructor in the high school. The class studying the beef type of cattle, or the mutton sheep, or the different classes of swine is taken to the butcher shop and given a demonstration lesson on cuts and their relative values, which of the breeds are apt to produce the better cuts, which the better quality, and so on.

Thus this little village high school, though it pays only \$2,230 a year in

WATERFORD HIGH SCHOOL CLASS JUDGING A HAMBLETONIAN MARE

ment exercises took occasion to refer to the philosophy of Ingalls' famous poem. "It is false and misleading," said Mr. James. "It is not a single opportunity which comes to a man; it is a train. It is a never-ending procession, some small, some large, growing perhaps more small and more insignificant as the years flow on, but ever and always opportunities too numerous, too great, and too large for us to utilize fully."

This is good healthful optimism. There never was a time when opportunities of all shapes, sizes and colors bobbed up on every corner as they do today. And they are not confined to any particular country or locality. They are waiting everywhere. Under the rapidly changing industrial and economic conditions they are springing up in old and out-of-the-way places. Old settlements—old villages, moss-grown and for years silent as the cemetery that clings to their skirts, are finding new youth in the revival of occupations and simple industries which twenty years ago were deemed impossible. The abandoned farms of New England—The farms that were left to rot because it was thought that the only opportunities for success were to be found in the West—are receiving new leases of life.

PENDULUM IS SWINGING BACK.

For a full half century the American people have been moving mad. Everything has been sacrificed to the one idea of accumulation. The dollar sign became the sole badge of honor, and a man's success was measured not by what he made of himself, not by what he accomplished for his fellows or the world at large, but by the size of his pile.

This standard of success has warped the imagination of the whole people. The merchant and professional man bent every energy to the piling up of gold bricks. And the farmer, not to be outdone, lies awake nights thinking how he may get more land. He has now more than he can till, but the land lust has seized him and home comforts and a quiet life are sold in the market in order that the line-fence may be removed.

This has been the condition for many years, and it requires careful observation to detect any change. But a reaction has set in. The pendulum is swinging back. A growing sentiment favor of a moderate success, a quiet life and a home surroundings is apparent. With this comes a desire to get back to original principles; to abandon the cities and seek the healthful life of the farm and the village.

The growth of our cities has been abnormal—the direct result of abnormal transportation conditions. "To him that hath shall be given, and to him that hath not even that which he hath shall be taken away," has been the working policy of modern commercial transportation companies. The small town has been sacrificed to the city. This was the natural result of competition. In centers where numerous railroads meet, low rates are given to both the incoming and outgoing freight, but where there is but one road, the traffic is taxed all that it will bear. This condition has had a

OPPORTUNITIES AT HOME.

PERNICIOUS PHILOSOPHY OF JOHN J. INGALLS' FAMOUS POEM.—HOW HOME OPPORTUNITIES HAVE BEEN OVERLOOKED.

Solution of the Labor Question to be Found in the Development of Home Industries.

Many a beautiful thing is pernicious in its effect. There is no telling how many men have given up a good fighting chance and have literally laid down in harness because they had absorbed from John J. Ingalls' poem OPPORTUNITY the idea that they had their chance, and that for them at least opportunity would not return. Here is the poem:

"Fame, love and fortune on my foot-steps wait.
Cities and fields I walk. I penetrate
Deserts and seas remote. And passing
By hovel and mart and palace, soon or late
I knock unbidden once at every gate.
If sleeping wake; if feasting rise before
I turn away; it is the hour of fate.
And those who follow me reach every state
Mortals desire and conquer every foe
Save death; but those who doubt or hesitate
Condemned to failure, penury and woe,
Seek me in vain, and uselessly implore;
I answer not, and I return no more."

A beautiful poem—yes, but pernicious as is the theory of fate or the twin tenet of predestination. If opportunity comes but once, where is the use of striving?

President James of the University of Illinois during the recent commencement exercises took occasion to refer to the philosophy of Ingalls' famous poem. "It is false and misleading," said Mr. James. "It is not a single opportunity which comes to a man; it is a train. It is a never-ending procession, some small, some large, growing perhaps more small and more insignificant as the years flow on, but ever and always opportunities too numerous, too great, and too large for us to utilize fully."

Homecroft and Craft.

The "homecroft" idea, referred to by George H. Maxwell in his address before the Biennial Convention of the General Federation of Women's Clubs, is closely allied to the "home arts and crafts" propaganda, in which so many, in and out of the federation, are interested. The homecroft, owning its home and a little patch of ground—an acre or two, more or less—is of all persons the one most likely to be interested in home crafts—little lines of manufacture, which, added to the produce of his ground, may afford a support to his family, either constantly or as a substitute for wage-earning employment when some great shop or factory may be suspended. Aided, perhaps, by a little gas engine or electric motor, he may have a choice of an infinite variety of crafts, in which he and his family may profitably engage. Here is a combination which seems to offer relief from the demoralizing and dehumanizing conditions of our present factory system; also a mode of multiplying the number of those citizens, independent of both landlord and employer, who are the backbone of American democracy. Give us the homecroft and the craftsman in one!

Keep Politics Out.

Every public-minded citizen should make it known that he is absolutely opposed to partisan, political control in the management of public parks, roadside improvement, playgrounds and like town betterments. Nothing can be more detrimental to such development than the interference of politics. Party responsibility, as a remedy for municipal mismanagement, has been proved a "delusion and a snare." Such methods have raised to important places bigoted, incompetent and sometimes dishonest men, who, by reason of their weaknesses or mismanagement, have disgraced what should be honorable and respected positions. Our citizens should insist absolutely that no political considerations are allowed to interfere with park affairs, and should visit with marked censure and disapproval all city officials who prostitute their trusts for mere political gain.

Fresh Air Playgrounds.

American cities are far behind European cities in making provision for public parks, especially in providing for the instruction and amusement of children in them. In modern municipal equipment in Europe, much provision is made for the instruction and amusement of children, and in most modernized European cities large sums of money have been expended in procuring open spaces for them in districts of congested population.

BE A HOMECROFTER

Learn by Doing. Work Together. Give every Man a Chance.

THE SLOGAN OF THE HOMECROFTERS IS
"Learn by Doing—Work Together—Give Every Man a Chance."
"Every Child in a Garden—Every Mother in a Homecroft, and Individual, Industrial Independence for Every Worker in a Home of his Own on the Land."

"A little croft we owned—a plot of corn.
A garden stored with peas and mint and thyme.
And flowers for posies, set on Sunday morn.
Bricked while the church bells rang their earliest chimes."
—Wordsworth.

"The Citizen standing in the doorway of his home—contented on his threshold, his family gathered about his hearthstone, while the evening of a well spent day closes in around and around him—his heart full of the Republic when the drum-taps are faint and the barracks are exhausted."
—Henry W. Grady.

THE FIRST BOOK OF THE HOMECROFTERS

HAS JUST BEEN PUBLISHED AND AMONG ITS CONTENTS ARE THE FOLLOWING ARTICLES OF ABSORBING INTEREST

The Brotherhood of Man
Charity that is Everlasting
The Secret of Nippon's Power
Lesson of a Great Calamity
The Sign of a Thought

Copies of "THE FIRST BOOK OF THE HOMECROFTERS" can be obtained by sending twelve two-cent stamps with your name and address (carefully and plainly written) to The Homecrofters' Guild of the Tailman, 143 Main St., Watertown, Mass.

This book is the first of a Series on the Platform of the Tailman. The following is taken therefrom:

EDUCATION, EMPLOYMENT AND HOMES ON THE LAND.

That children shall be taught gardening and homecraft in the public schools, and that Homecraft and Gardening Training Schools shall be established by county, municipal, state, and national governments, where every boy and every man out of work who wants employment where he can gain that knowledge, can learn how to make a home and till the soil and get his living straight from the ground, and where every boy would be taught that his first aim in life should be to get a home of his own on the land.

BUILD HOMECROFTS AS NATIONAL SAFEGUARDS.

That the New Zealand system of Land Taxation and Land Purchase and Subdivision and Advances to Settlers Act, shall be adopted in this country, to the end that land shall be subdivided into small holdings in the hands of those who will till it for a livelihood, and labor find occupation in the creation of homecrofts, which will be perpetual safeguards against the political evils and social discontent resulting from the overgrowth of cities and the sufferings of unemployed wage-earners.

PROTECTION FOR THE AMERICAN HOMECROFTER.

That Rural Settlement shall be encouraged and the principle of Protection for the American Wagesworker and his Home applied directly to the Home by the Exemption from Taxation of all improvements upon, and also of all personal property, not exceeding \$2,500 in value, used on and in connection with, every Homecroft or Rural Homestead of not more than ten acres in extent, which the owner occupies as a permanent home and cultivates with his own labor and so provides therefrom all or part of the support for a family.

ENLARGEMENT OF AREA AVAILABLE FOR HOMECRAFTING.

That the National Government, as part of a comprehensive national policy of internal improvements for river control and regulation, and for the enlargement to the utmost possible extent of the area of the country available for agriculture and homes on the land, and for the protection of those homes from either flood or drought, shall build not only levees and revetments where needed, and drainage works for the reclamation of swamp and overflowed lands, but shall also preserve existing forests, reforest denuded areas, plant new forests, and build the great reservoirs and other engineering works necessary to safeguard against overflow and save for beneficial use the flood waters that now run to waste.

OPPORTUNITIES AT HOME.

tendency to draw the manufacturing interests into the great transportation centers, the tide has flowed strongly toward the city and the small town has had a hard struggle to retain its own.

In this respect, however, the pendulum is swinging back also. The conditions surrounding the workers in the cities, the lack of home life and the pressure of accumulated vice, have demonstrated to the satisfaction of every one that we will never reach our highest industrial success until the average workman is placed where he can have fresh air, a family, and a home for that family. The small town, everything else being equal, is the place for industries. A man with a home, and who spends his evenings with his family beautifying that home, is not only a better citizen, but he is worth infinitely more to his employer than his brother laborer who has no interest other than that he finds with his saloon companions and in ward politics.

When the reformers have settled the industrial labor questions they will not be calling for less hours of work, but a distribution of the hours of work. Six hours in the factory or the mine and the balance at home working out an acre of ground may be made a solution of the whole question between labor and capital. Any man with a home and one acre of the earth's surface that he can call his own, and with employment at fair wages during five or six hours of the day, need never fear for himself or his family. Under such conditions his family will be reared and educated and live under the advantages of a wholesome social atmosphere.

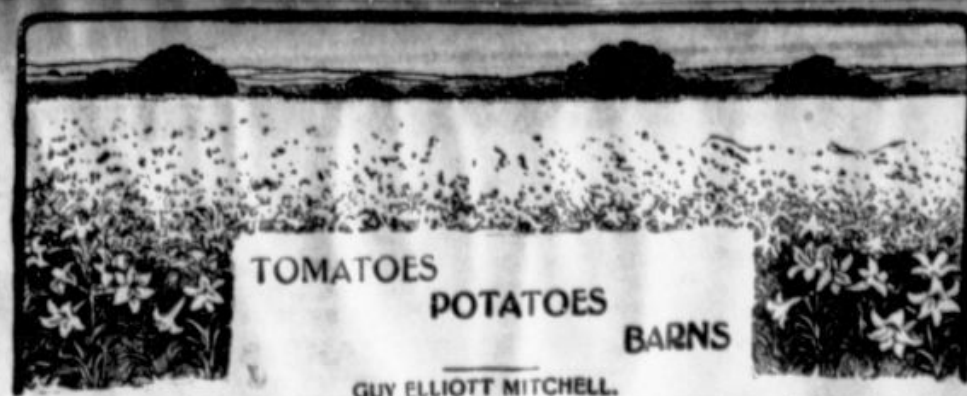

We believe that, as a Nation, we should be less absorbed with Making Money, and should pay more heed to raising up and training Men who will be Law-Abiding Citizens; that the welfare of our Workers is of more consequence than the mere accumulation of Wealth; and that Stability of National Character and of Social and Business Conditions is of greater importance to the people of this country as a whole than any other one question that is now before them; and we believe that the only way to Preserve such Stability, and to Permanently Maintain our National Prosperity, is to carry into immediate effect and

CLASS IN LIVE STOCK JUDGING CATTLE AND PLANT LIFE at Waterford, Pa., High School.

range business. However, the more centralized portion of society has taken the matter up, and it is stated that the most public-spirited citizens of the towns and cities, together with the progressive teachers have made school gardens and rural education a success during the past two seasons and have aroused such enthusiasm among the pupils, that wherever it has been tried, the school garden has become a fixture.

"Let your child plant his own garden, gather his own harvest of fruit and flowers, learn through his own small experience something of the influence of the sun, dew and rain, and gain thereby a remote presentiment of the reciprocal energies of nature and a reverent feeling for the divine life and law expressed in nature. The child is a plant, a vegetable, and must live out of doors, or nearly so, as conditions will permit." Froebel realized that health was the basis and test of all our energies, and that this was one of the morning stars of the new hygiene.

Tomatoes For the Cannery.

Raising tomatoes for the canneries has grown to be quite an industry in a number of States. Maryland leads the list with about two million cases per annum; Indiana, with her million cases, second; followed, in turn, by New Jersey, California, Delaware and Ohio. The canneries are permanent institutions, the demand is increasing, and there is no reason why the growing of tomatoes will not continue to be a profitable business with many.

Growing tomatoes for a cannery differs from raising them for the market. In the former case, first of all, a large yield is sought. Early maturity is of less importance since the grower contracts to sell the whole crop at a fixed price. It is said that good corn land is rich enough for tomatoes, although medium clay loam is preferred by many.

Splendid results follow fall or winter plowing. At any rate land should be plowed as early in the spring as possible. Plow deep and follow with earth mulching, that is, maintain a thin layer of fine earth on the surface by shallow cultivation, which will be of great value in saving the moisture. The variety should be such as the canneries prefer. They will generally provide the plants at a nominal price to those who grow tomatoes for them. In case it is preferred to grow the plants near where they are to be set, they should be started in a cold frame or on the south side of a board fence in a rich warm soil. The plants will increase to proper size in four or five weeks, and should be set out in the field in rows about four feet apart, for ease of cultivation. Start the cultivation early, but be careful not to bark the plants, as that will kill them. When they begin to branch do not cultivate closer than the ends of the branches. Continue stirring the soil

A New Potato Culture.

A queer tale in agriculture comes by way of Chicago. It is stated that a half-bushel of sawdust, a dash of chemical solution and fifteen potatoes carefully enveloped with the sawdust will enable the average householder to grow a bushel of tubers on his house-top or in his cellar within sixty days. This process has been discovered and elaborated by W. D. Darst, of Great Falls, Mont. Moreover, the grower will have no potato bugs to contend with, no turning over of the soil at certain intervals, and no contest with worms.

The product of Mr. Darst's process is termed the "vineless potato" from the fact that, grown under these apparently unnatural conditions, there is no surface vegetation, because of which, each potato buried in the sawdust is enabled to produce at least twelve normal-sized tubers.

Recently at the Oakland Plaza, in the rear of the Oakland Hotel, Mr. Darst disclosed the methods of growing potatoes by his system. Operating on the theory that the presence of surface vegetation was only a method of securing nourishment and in reality sapped the vitality of the tuber, Mr. Darst experimented more than six years and found he could overcome this seemingly natural course on the part of the plant by supplying it artificially with its needs.

By employing sawdust, peat, straw, or any other earth product that would permit of the circulation of air, moisture and heat, and by applying solutions of various fertilizers, discovered that a single potato would multiply itself by attaching to itself from twelve to sixteen other potatoes of approximately the same dimensions without throwing off any of its energy above ground.

Packed in loosely arranged bins permitting the free access of air and arranged in rows six inches above each

matter of fact, what are commonly regarded as the petals of the dogwood are no part of the floral structure at all, but merely four large white leaves, which, during the winter, served as protective wrappers to the flower buds. The real flower is about the size of shoe-pegs, of greenish color and are bunched several together in a small cluster in the midst of the four white leaves, and if observed at all by the average wild flower gatherers, are mistaken for stamens.

So, too, with the flowers of the pretty "painted cup," which when in blossom in May frequently makes whole meadows rosy with brilliant color. Picking one, we may think we are looking at a pile of gorgeous, flame-colored flowers, while the fact is that the striking effect is produced entirely by numerous reddened leaves intermingled with the real flowers which are as plain as Cinderella's sisters and practically hidden from sight.

Indeed, so fond is Mother Nature of befooling her unobservant devotees that she has caused one whole family of plants to be given over to this make-believe habit of flowering. To it belong that favorite little preacher of the April wood—Jack-in-the-pulpit; the arrow arum that shares with the

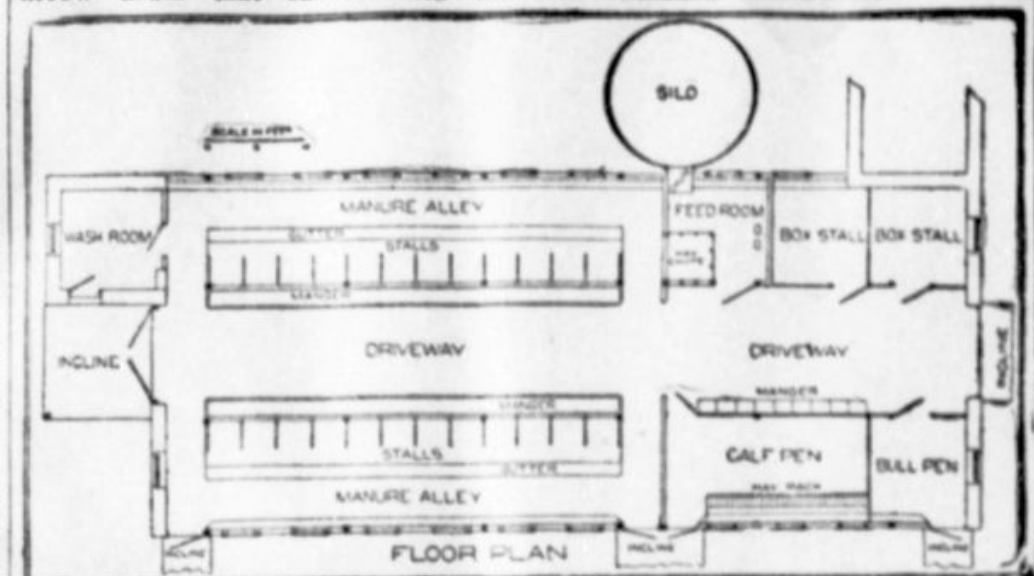

first, it allows ample room for the stalls and passageways, and, second, it permits of the most economical use of lumber in building. The length shown is 84 feet, but this feature is wholly dependent on the number of cows the dairyman wishes to handle. One of the weakest joints in barn construction is the small amount of window space usually allowed. This error is rectified by the Department in this plan by allowing approximately 6 square feet for each cow.

The bulletin or circular may be obtained by application to the Department of Agriculture. (Circular 90, B. A. L.)

Earn this newly invented BURECH LOADING GUN or BARE BALL CUTTER, consisting of large Min. Cap, and fine base ball by selling 10 splendid lead pencils at 10 cents each. It's dead easy; boys we trust you will write for pencils and circular showing gun, Indian Club, Target and other premiums.

Thirteenth Street Lead Pencil Co. 200 W. 13th Street, New York.

DEPARTMENT OF AGRICULTURE'S PLAN OF A DAIRY BARN.

paddock and pickered weed the muddy margins of shallow streams, the skunk cabbage, and that aristocrat of the greenhouse, the immaculate calla lily. With all these, the flowers are unrecognizable in themselves as such, except by the initiated, being minute and crowded on a fleshy spike.

Another gay deceiver is the poinsettia of the hot-house. In this case it is a circle of scarlet leaves which popular estimation rates as a flower, while the poor little real blossom clustered in the midst of these robbers of their good name live and die unappreciated. Relatives of the poinsettia are the wild surges of our sandy fields. The flowers of many of these, inconspicuous in themselves, are similarly provided with relatively showy appendages, deceiving all but student.

Model Dairy Farm.

The Department of Agriculture has recently published a bulletin containing suggestions for constructing a model dairy farm. It has been the endeavor of the Department to plan a farm embodying the best ideas in scientific and sanitary construction that are consistent with practicability and cheapness, and it is believed the result accomplished by the plan published will help the dairyman to get the best products from his cows in the most economical manner.

The plan is designed for 24 cows, and allows ample room for calf pens and box stalls for bull and cows; also space for feed room, hay chute, wash room and silo. In presenting the plan it is not intended by the officials of the

GROWN IN THE GOOD OLD-FASHIONED WAY.

until the stalk has grown so heavy as to fall upon the ground, then cease. For heavy yields it is essential that strong land or heavy fertilization be used. While it is true that on many of the soils in the Middle States a remunerative crop may be produced with little fertilization, it is also true that on nearly all of these soils a liberal use of fertilizers will be profitable.

The tomato plant is a gross feeder, and especially requires an abundant supply of potash. Prof. Voorhees, of New Jersey, who is authority on such subjects, estimates that ten tons of fruit, with the accompanying vines, would contain fifty-seven pounds of nitrogen, sixteen pounds of phosphoric acid, and ninety-four pounds of potash. On many of our clay lands phosphoric acid is relatively low, and the application of potash is needed to produce the most profitable crops. The nitrogen supply is more variable, and can often be secured by turning under a leguminous crop. On Eastern lands, which have been devoted to last year's tomatoes, nitrate of soda can be used with a profit. In the Central States, manufacturers of fertilizers have not offered goods specially prepared for this vegetable because of a lack of demand, due largely to the ignorance of same, and from lack of knowledge of the requirements of the soil. But of late both the growers and the canners are asking for advice regarding fertilizers to be used on tomatoes. A mixture that has been officially recommended contains:

- Nitrogen 4 per cent.
- Phosphoric acid... 7 per cent.
- Potash 12 per cent.

Using about 500 pounds of this mixture per acre.

Some experiments of early tomatoes seem to indicate that sulphate of potash gives them a better quality. A properly made tobacco fertilizer is also suited for this crop, and the potash in it is derived from sulphate.

LEAVES WHICH POSE AS BLOSSOMS.

has attended them Mr. Darst. It is stated, has the indorsement of Luther Burbank, the eminent horticulturist and botanist.—From Chicago Record Herald.

Counterfeit Blossoms.

When the dogwood is in bloom in the spring woods, he would be a very unobservant traveler who did not know it; yet it is questionable if one out of fifty of the multitude of people who come home from their country walks with their arms full of snowy branches has ever noticed the real flowers of this beautiful tree. As a

Department to insist that the arrangement shown is the only satisfactory one, but the idea is to present some important features often overlooked by the builder and which are vital to a well-planned structure.

The amount of space allowed for the various purposes named on the plan is thought to meet the requirements so far as the square feet of floor space is concerned. The arrangement of the space can be adapted to the needs of the particular location.

The design calls for a width of 30 feet 4 inches outside. There are two main reasons for adopting this width:

This seems a

Clean Food Era

We are inclined to believe that some magazine writers in their anxiety to attract attention to themselves have overstated the case against the meat packers.

We do not sell meat but believe in fair play, and also in a complete knowledge, by the people, of exactly what they are eating.

We have always printed on each and every pkg. of

Grape-Nuts Food

exactly what it is made of and the scores of visitors who pass through our works every day find the Pure Food Factories as clean and sweet as a maiden's fresh white apron. The food is thoroughly cooked in these factories from the choicest white wheat and barley, the sweet offering of the fields.

No food on earth gives the same sustaining power from meal to meal as Grape-Nuts.

BECAUSE—

The starchy parts of the wheat and barley are changed by moisture and heat to a form of sugar required by the human system and almost immediately absorbed without stress to the digestive machinery. And again, the certain elements in these grains are incorporated to insure rebuilding of the soft gray matter in the brain and nerve centres to fit one for the wearing work of the day. A dish of Grape-Nuts and Cream at each meal supplies the GO and you can feel it in a way that leaves no question. It is not stimulation but simply scientific feeding.

"There's a Reason."

ONLY \$1.00. SPECIAL 60 DAY OFFER TO INTRODUCE OUR NEW EXCELSIOR SOLAR TELESCOPE. THE WONDER OF THE AGE.

OVER 3 1/2 FEET LONG

JUST WHAT YOU WANT ON SEA, FARM, RANCH OR IN THE SCHOOL.

This is a large powerful achromatic Telescope for Terrestrial and Celestial use. The Telescope is provided with an adjustable solar eye-piece. With this wonder-ful Eye-piece you look the sun square in the face, on the brightest and hottest day, and study its face as you do the moon at night. Every student, male or female, needs this Telescope to study the sun in Eclipse, also the mysterious recurrent Sun spots which appear and disappear at intervals, and move about in different latitudes of the sun. You will regret it if you neglect to secure this Telescope. Fully fifty such good Telescopes were never sold for this price before. These Telescopes are made by one of the largest manufacturers of Europe, and are used 12 inches and open 8 1/2 inch in five sections, and 3 1/4 inches in circumference. They are Brass lined, Brass safety cap on each end to exclude dust, etc., with Powerful Lens, scientifically ground and adjusted. Guaranteed by the makers. Hereafter, Telescopes of this size have been sold for \$2.00 to \$10.00.

Every soldier in the army or at military resorts should certainly secure one of these instruments, and no farmer should be without one. Objects miles away are brought to view with astonishing clearness. Sent by express safely packed, for only \$1.00. Sent by mail prepaid for \$1.10. Our new catalogue of Guns, etc., sent with each order. This is a grand offer and you should not miss it. We warrant each Telescope just as represented or money refunded.

Send \$1.00 by Registered Letter, Post Office Money Order, Express Money Order, or Bank Draft payable to our order. If you desire Telescope by mail add 10 cents postage.

Interesting Booklet, entitled "Telescope Talk," FREE with each order, or sent on request. This booklet tells all about the care of Telescopes, and about Eclipses of the Sun and Moon the evening and morning for year, where visible, etc.

WANTS ANOTHER.

Gentlemen—Please send another Telescope. Money enclosed. Other was a bargain, good instruments cost many times the money.

SUPERIOR TO A \$15 GLASS.

Fred. Walsh, of Howe Island, Ontario, Canada, says: "Gentlemen—I have just received your Telescope, and must say it surpasses all expectations. It is far superior to one which we have had, which cost \$15.00 some years ago. Just a few nights I have seen with it are worth more than double what it cost me."

COULD DISCERN BOATS FROM FIVE TO TEN MILES.

Mr. C. M. Moxley, of Duluth, Minn., who purchased one of these Telescopes, says they are superior to anything he expected that with it he could discern boats on the Great Lakes at a distance of 5 to 10 miles, and in clear weather he could read the names of steamers and other craft at a distance of one-half mile away.

WORTH MANY TIMES THE PRICE.

The Saxon, New York, Nov. 4, 1905.

Gentlemen—I had with me on my recent Eastern trip, one of your Excelsior Solar Telescopes, with which I observed an Eclipse of the Sun. At the Austrian Tyrol it was almost 80 per cent. concealed. Your Solar Eclipse

A Telescope brings new brain cells into play, opens up new avenues of thought and broadens the scope of the mind. It is a great thing. Its value to me on this occasion was many times greater than the entire outlay for the Telescope. Yours truly, L. S. HENRY.

Thousands of others are saying good things about these Telescopes. In numerous ways it will repay its cost a hundred times over. Get one and try it.

SECURE THIS TELESCOPE AND TAKE A LOOK AT OLD SOL.

Never before sold on any Telescope for less than \$5.00 or \$10.00. Now is a chance to secure one for \$1.00.

This Eye-piece alone is worth more than we charge for the entire telescope, to all who wish to behold the face of the sun. At the Austrian Tyrol it was almost 80 per cent. concealed. Your Solar Eclipse and you have a good, practical telescope for land observations. Address:

INVADING TROOPS MEET WITH DEFEAT

Former President of San Salvador is
Killed in Battle--Guatemalans
Are the Victors.

Washington, D. C., July 12.—Regalado, former President of Salvador and leader of the Salvadorean troops, in the recent conflict with Guatemala, was killed in battle yesterday; the announcement of his death was received at the State department yesterday, through a dispatch from our Minister at San Salvador. The dispatch stated Regalado was killed in the last movement of the Salvadorean troops, against the Guatemalans, but did not indicate what the result of the battle was.

Tomas Regalado was president of Salvador from 1899 to 1903. The provision of the Salvadorean constitution prevent him from having another term immediately following the first but he was a candidate to succeed President Escalon, whose term will expire next year and doubtless would have been elected, as he was a popular idol who achieved much fame as a soldier.

New Orleans, July 12.—An official cablegram to the Guatemalan consul here says the battle in which Regalado was killed was fought at El Jicaro, a place about five miles from the frontier, in the department of Jutiapa, Guatemala, and twenty-five miles from the Pacific coast. The dispatch says the Salvadoreans were defeated.

Panama, July 12.—Senor Barrios, foreign Minister of Guatemala, this afternoon cabled to the Panama government as follows:

"Guatemala, July 12.—Salvadorean Government invaded Guatemala territory, compelling us to make energetic defense. We obtained complete victory yesterday at El Jicaro, where General Tomas Regalado, chief commander of the Salvadorean army, was killed."

Saved His Comrade's Life.

While returning from the Grand Army Encampment at Washington City, a comrade from Elgin, Ill., was taken with cholera morbus and was in a critical condition," says Mr. J. E. Houghland, of Eldon, Iowa. "I gave him Chamberlain's Colic, Cholera and Diarrhoea Remedy and believe saved his life. I have been engaged for ten years in immigration work and conducted many parties to the south and west. I always carry this remedy and have used it successfully on many occasions."

Stopped Marriage With Shotgun.

Corydon, Ind., July 14.—Miss Hallie Matthews, a school teacher, aged 24 years, who attempted to kill her father, July 4, has made an explanation of her act. Her father, who has been a widower a year, was preparing his wedding toilet when his daughter, who objected to the marriage, entered with a gun in her hand. He saw her reflection in the mirror, before which he was standing, and turned in time to knock the gun aside, as he daughter pulled the trigger. Only a small portion of the lead struck him and he was not seriously injured. The gun had but one barrel, and Miss Matthews carried a shell in her hand, with which she intended to kill herself after she had killed her father.

The wedding is postponed and Mr. Matthews has left his home. He is one of the leading men of New Amsterdam.

For the Housewife.

In her timely paper in the August Delicater, Isabel Gordon Curtis has some remarks of interest on the making of Frozen Desserts, with a classification of them. Anna W. Morrison tells how to prepare Cool Salads for Hot Days, and A. M. Calkins writes on innovation in salads, which will appeal to jaded appetites. This is the season for the enjoyment of the inviting field mushrooms, and Margaret Hall in the article entitled "The Luscious Field Mushroom," gives many tested receipts for their preparation. Tomatoes take the first place as vegetables for summer tables, and suggestions for utilizing them are also given. During the "dog days" one will find that the serving of fancy iced beverages will furnish a happy combination of both food and drink. With this consideration in view many selected receipts are suggested in the article entitled, "Cold Comfort," by Eleanor Marchant.

Marion Marble Works.

Why will people go elsewhere to buy tombstones and monuments when they can save money by buying at home, and at the same time you will be encouraging home industry and thus be patronizing those who patronize you. We handle nothing but first class material and a high grade of workmanship is our speciality.

HENRY & HENRY.

How to Avoid Typhoid

Typhoid fever is a disease brought about by your own or somebody else's uncleanness. It is a disease of the intestinal canal. It is caused directly by the water or milk you drink or the food you eat getting poisoned with the discharges from persons ill with the disease—and in no other way. It is most easily acquired by those who suffer from constipation. Therefore, keep the bowels open and regular.

Water and milk are the two articles most frequently poisoned by typhoid. Heat kills the typhoid poison; therefore, boil all drinking water ten minutes. Scald all milk and cream, especially that intended for the young. Dirty hands may also carry the typhoid poison; therefore wash your hands carefully before handling an article of food or drink. Food gets poisoned, especially green stuff, by being manured with night soil, by flies crawling over it, or by flies crawling over it, or by contaminated dust from the street, or by being washed or watered with polluted water; therefore wash all the vegetables and fruit intended to be eaten raw with boiled water. Keep flies out of the house and shops. Keep food supplies covered so that flies cannot have access to them.

If all the discharges from every case of typhoid were disinfected, there would be no more typhoid fever in the world; therefore, if you have a case of typhoid in the family, disinfect everything with the utmost care.

Clean up about your house and premises. Cleanly surroundings mean cleanly people. Bad odors, dirty yards, dirty houses, bad ventilation, lower human resistance render you more liable to contract the disease; therefore be clean in every detail of housekeeping.

Lives in Three Centuries.

Centralia, Ill., July 10.—Peter White, a negro, has reached his 107th birthday. He was born in Virginia, a slave, and remained a bondsman until freed at the time of the civil war. White saw a large part of the war of 1812, and recalls many events of that day. He says he has seen Presidents Harrison, Polk, Tyler and other great men of early times.

SIX CHILDREN DROWN TRYING TO SAVE BABY

Young One Slipped in Deep Hole and the
Others Attempted Its Rescue.

Grand Rapids, Iowa, July 12.—Eight children at a picnic on a river bank went three blocks from home, went wading this afternoon. The smallest one slipped into a deep hole in the river and in trying to rescue her six others were drowned.

The dead—Lucile Sweeting, aged 7; Hazel Sweeting, age 14; Gladys Sweeting, aged 10; Rose Sweeting, aged 12; Ruth Coyle, aged 11; Cora Coyle, aged 9; Clara Usner, aged 16. The Sweeting children lived with their father, near Ellis park, on the outskirts of the city. Clara Usner was the daughter of his housekeeper, and the Coyle children were her nieces who were there on a visit.

Ruth Kerry the only one who escaped, says they were wading in the river when Lucile Sweeting slipped into a deep hole. Hazel Sweeting rushed after her, slipping into the hole; then the next girl rushed after her, and so they kept trying to save each other until all the girls except Ruth Kerry had been drowned. She then ran home and gave the alarm.

Whole Family Bitten By Rat

Pittsburg, Pa., July 13.—W. N. Grimes, his wife and 11 months old baby went through a frightful experience at a late hour Tuesday night when they were bitten about the face and hands by a huge rat. Grimes was bitten on the hands five times, and the baby was literally covered with the wounds. The whole family was taken to the Allegheny general hospital, where their wounds were dressed.

Grimes retires early. About eight o'clock his wife came into the room and was almost overcome by seeing her husband lying in a pool of blood and a huge rat just jumping off the bed. She awakened her husband, who was so very weak from such an enormous loss of blood that he could hardly stand.

He was sent to the hospital to have his wounds dressed, and returned home about 12 o'clock, when all went to bed again.

They had not been asleep for an hour when both husband and wife were awakened by the cries of the baby. They lighted the light, and both were astonished to find that both the wife and the baby had been bitten by the same animal, which had returned.

The wife and child were both sent to the hospital, where their wounds were dressed. The doctors of the institution think that there might be some other infection from the bites. The baby is the worst injured of them all, and Grime's nose is swollen to twice its normal size.

Asthma Sufferers Should Know This.

Foley's Honey and Tar has cured many cases of asthma that were considered hopeless. Mrs. Adolph Bueising, 701 West Third St., Davenport, Iowa, writes: "A severe cold contracted twelve years ago was neglected until it finally grew into asthma. The best medical skill available could not give me more than temporary relief. Foley's Honey and Tar was recommended and one fifty cent bottle entirely cured me of asthma which had been growing on me for twelve years. If I had taken it at the start I would have been saved years of suffering." Woods & Orme,

MARION MILLING CO.

Sinful Doings in Boston.

There must be some wicked people in Boston who "are given to revel and ungodly glee." Recently a lot of alleged citizens conceived the sinful idea of having beer with their supper after the theatre—what else could be expected of the frequenters of playhouses?—and so tried to get a bill through the great and general court allowing drinks to be sold after 11 o'clock p. m. on week days. Being foiled in that, they took to buying flowers on the Sabbath, but the local authorities soon put a stop to such wickedness, and now everybody is wondering in what direction the disorderly element will break out the next time.—N. Y. Press.

Losses in Lemons.

New York, July 12.—There are now 290,000 boxes or 70,000,000 lemons unsold on shipboard in New York harbor. This enormous accumulation has been brought about by peculiar market conditions. The market was high, early in the season and the shipments of lemons have been very large. The market subsequently declined and the receivers have adopted a policy of postponing sales until the market becomes better. But it did not improve as expected.

The supplies will now be turned loose, 73,500 boxes being scheduled for sale at auction this week. The average box contains 350 lemons so it may be seen that the sales this week will be 25,550,000 lemons.

Ninety days ago the bulk of the lemon sales here were being made upon a basis of between \$4 and \$5. The bulk of the stock, however, is not of the best.

These lemons were bought under contract, and it is conservatively estimated that the importers have already lost \$150,000 on the season, and that the losses will reach \$500,000, if conditions do not change before the end of the season.

BALLARD SNOW LINIMENT CO., ST. LOUIS, MO.

SOLD AND RECOMMENDED BY

Woods & Orme, Druggists, Marion, Ky.

Situations Guaranteed.

We do not guarantee situations to prospective students in order to get their patronage. Schools of merit do not resort to such dishonest practices. Fake schools "guarantee" situations in order to secure students, because they have no other inducements to offer. Our work is so thorough that a guarantee is superfluous. Business men are so eager to get competent help here that a large percentage of our students take positions before they graduate. See us before making arrangements for your business and shorthand education at some inferior, fake school. We will take pleasure in telling you all about the loopholes in the "position guarantees" of dishonest schools. Catalogue free.

THURSDAY, JULY 19, 1906

By a recent decision of the French Ministry Capt. Dreyfus, the falsely condemned French officer, has been declared innocent and restored to all the rights and privileges of his rank in the army that were forfeited under his condemnation. For nearly a quarter of a century this brave officer has been made to undergo all the misery and disgrace and torture that the ingenuity of the French War Office could heap upon him. Falsely condemned of treason by perjured testimony, stripped of his rank in the army, loaded with chains, banished to Devil's Island (that hell on earth) and there chained in an iron cage and left to perish by inches; such was a portion of the punishment he was forced to endure at the instigation of his perjured persecutors. But happily, after years of suffering, his case attracted the attention of a sympathetic world. The French Government was forced by public sentiment to re-open the matter, with the result that infamous conspiracy against the prisoner was uncovered and he was restored to freedom. Captain Dreyfus entered the cage on Devil Island a robust young man; he left it a grey-haired, physical wreck. And yet God reigns!

It was a grand sight when Admiral Rojestvensky, knowing he was innocent, stood before a Russian court-martial at Cronstadt, vehemently declaring himself guilty and demanding the death punishment in order to save his staff officers. "Greater love than this hath no man for his kind."

Louisville has been selected as the place at which the State Fair is to be permanently located. Louisville has 165,000 to Lexington's 550,000 for the fair, which heretofore has not proven a very brilliant success.

THE HARGIS TRIAL

Some three weeks ago the PRESS stated editorially that Judge James Hargis might be guilty of the heinous crimes imputed to him, but that it would take more than the testimony of the Curt Jett and Mose Feltner gang to convince it of that fact.

The trial at Beattyville of Judge Hargis and Ed. Callahan for the murder of J. B. Marcum, which has just closed, fully justifies the confidence of this paper in Judge Hargis. The trial jury consulted only fifteen minutes before bringing in a verdict of "Not Guilty as charged." The verdict of the jury is said to have "stunned" the Commonwealth's Attorney, and Mrs. Marcum "wept pitifully" at the loss of her revenge. Of course there have been whispers of "dirty work" and "tampering with the jury," all of whom were accepted by both sides without challenge. But an acquittal was bound to evoke such criticism notwithstanding the character, or rather want of character of the prosecuting witnesses, many of whom the jury evidently believed to be perjurers.

Thus ends the Marcum trial, and it is a sad blow to our Republican friends, who have hounded Judge Hargis to the gates of the grave in order to make party capital through his connection with the Democratic State Committee.

The Marcum case was the strongest the prosecution held against Hargis, and as the same witnesses for the prosecution would have to be used in the other cases they will probably be nipped.

Killed by a Train.

Nortonville, Ky., July 16.—L. Legate was struck by Louisville and Nashville passenger train No. 51 and instantly killed Saturday night. He was 71 years old and apparently did not hear or see the train which was running at a high speed and on a curve. Mr. Legate leaves a widow and several children, all grown. His son, G. C. Legate, is telegraph operator here, and was at the key when the news of the accident was wired to the main office by a block operator near the point where the accident occurred.

Car load of Lime just received at Cochran & Pickens.

WOULD STRENGTHEN THE TICKET.

The Record takes pleasure in calling the attention of the Democrats of Trigg county to the fact that H. V. McChesney, of Livingston county is a candidate for the nomination for Auditor in the State primary to be held on Nov. 6th. Mr. McChesney, who is at present Secretary of State, is our neighbor, being in the same Congressional and same Senatorial district with Trigg. He is not unknown to our people, for aside from his record as a public official, he is well remembered by many as having spoken in the county in the campaign of 1899.

As State School Superintendent he gave his best efforts to the improvement of the public school system and among other things securing the passing of an act increasing the school term to six months.

Mr. McChesney is the only First District man among the present State officials, and we know nothing in his record for which Old Gibraltar need apologize, but on the other hand there are many of which she should feel proud.

In every campaign for years, whether he has been a candidate or not, Mr. McChesney has been on the stump for the cause of Democracy, and if nominated he will add strength to the ticket in this particular, as well as in the matter of his record as an official.

Being a First District man and a neighbor, and having many warm, personal friends in the county, every indication is that Mr. McChesney will carry this county by a very large majority.—Cadiz Record.

The beautiful and artistic should be encouraged in the school life of every child. The school building should portray these ideas and those things which adorn the tasty home and which are used to beautify the lawn in front of the home should also be applied to the school room and grounds. Within should be neatness and refinement—without, flowers, trees, a well kept lawn—walks and terraces. An untidy house is a great demoralizer, and a neglected school house and yard must have the same effect upon the scholars, besides creating a bad impression with strangers who may visit within our gates. Place a child in a dilapidat-

ed or poorly furnished school room, and its natural instinct is to further mutilate the premises. The same applies to the lawn and exterior. It is easy to teach children to adapt themselves to beautiful surroundings and to train them to assist in maintaining order wherever they may be placed. It is a matter of education entirely, and is one which every citizen should take an interest in.

The Man and the Place!

Having removed to the Carnahan Block, corner of Bellville and Fords Ferry street, and added largely to my stock I am fully prepared to cater to the public in all their wants in groceries. I have glassware, queensware, stoneware, granitware, wash boards, brooms, brushes, combs, knives, forks, spoons, soaps, washing powders, bluing, baking powders, fruits, nuts and candies. All kinds of pickle, spices, can goods, both fruits and vegetables, sugar and coffee, meal, flour, hams, bacon, lard, Vinegar, syrup, N. O. molasses, gasoline and coal oil, axle grease, jellies and preserves, buckets, oil cans, cakes of all, cereal food of all kinds.

Anything you want in Groceries and Prices that defy Competition

Would be pleased to have
you call and see me.

When you have anything
to sell no one will pay you
more than I will, and don't
forget the place and the man.

A. M. Hearin,

Carnahan Corner
MARION, KENTUCKY.

MT. ZION CHURCH.

The church at Mt. Zion was organized in the year of our Lord 1838 by the Presiding Elder Cain. The log house was built near that date. The charter members were Rilon Heath and wife, Wm. Hill, wife and son, Dr. Bristow and wife, Wm. Hughes, Ezekiel Porter, James Broadfoot and wife and Ingram Lucas. Patsy Hughes, J. B. Hill, James T. Taylor and wife came in later on.

The writer is under the impression that old brother Ira Nunn and wife were also charter members, as services were held at his house and also at Dr. Bristow's before the church was built.

When the log house was built Uncle Highley Gilbert helped to cut down the first tree that was put in the building. He was just a boy at that time and died a member of the church. The promise is to the faithful. J. W. Hill was a boy 13 years old at that time. The names of many more could be given but, as the tree is known by the fruit, we are sure their names are in the Lamb's book of life.

Well does the writer remember, when quite a little girl, seeing old Brother Nunn going by to class and prayer meeting; just as regular as the time came he was there.

Many were the good meetings held in the old log house and many were brought into the fold of Christ that were bright and shining lights, and were ornaments to the church and community.

Many have gone out from here to build homes for themselves and their influence has helped to build up other churches; so their influence still lives. Among those was the father of the writers who was a member of this church. He and his wife were the founders of the Methodist church at Shady Grove. They have passed away, and still their work goes on. Praise to His holy name!

Mt. Zion can well be called the mother of Methodism in this county. On Jan. 25, 1859 a deed was made to the church and Masonic fraternity by Wm. Williams and wife for the sum of five dollars and was recorded in 1864 by Berry S. Young. During the civil war the church

had her ebbs and flows like most of churches. But since the war many souls have been brought to Christ on this consecrated spot. The writer, with others she could name, has had many seasons of refreshing from the presence of the Lord.

Brother Big Truitt was one of the pillars of the church at that time. He went out from this church to preach the gospel. He did not live long but he lived a true Christian life, and many will rise up in that Day to call him blessed.

On March 27, 1890 the house was blown down by a cyclone, this being the second house. Then more land was secured and deed made by Robt. Heath in 1901, L. R. Hughes, J. W. Cook and G. P. Wilson, trustees. Then a new house was built and was dedicated by Rev. J. W. Bigham.

Brother Thrasher was preacher in charge at that time and the church has been wonderfully blessed since. It has been under the care of Bros. Gibbons, Archey, Boggess, Crowe, Smithson, Roland and Love.

And now dear brethren and sisters as man's chief end is to glorify God, if we have anything good let us pass it along perhaps it may help others and let us continue to pray 1st, for the enrichment of individual experience; 2nd, for a special outpouring of the Holy Spirit preparing us for a more Christ-like life and for better service; 3rd, for the unsaved of our homes and friends generally, also for the millions in heathen lands.

A little heaven leaveneth the whole lump. Bear ye one another's burdens and so fulfill the law of Christ.

Yours in Christ,
G. A. TRAVIS,
W. J. HILL.

Dr. James Gets Nomination.

Bowling Green, Ky., July 16.—Dr. A. D. James was nominated this morning for Congress in the Third district on the Republican ticket. He was formerly U. S. Marshall.

Misses Ethel and Estelle Bennett and Myra Williams, of Georgiana, Ala., are the guests of Mr. and Mrs. A. J. Bennett this week.

Milton S. Rice, of Fredonia, and Miss Mary Garrett Ratcliff, of Princeton, were united in marriage in the Presbyterian church at Princeton last Monday morning at 10:30.

Mrs. Nannie Hamilton and little daughters, Annie and Carmen, of the Sheridan vicinity, were guests this week of her mother, Mrs. Margaret Wright, on North Main street.

Mr. and Mrs. A. M. Witherspoon who left here a few years ago for California, and who removed from that state last year to Texas, have returned to Kentucky and are living at Fulton.

A team belonging to John Canady run away last Friday evening, throwing son, who was the only occupant of wagon, out, from which he received several severe wounds about the head and shoulders.

Mayor J. W. Bine was called to Union county last Saturday by the death of his aunt, Mrs. Lench. She was injured internally in a fall and she received the day before was a half sister of the late Mayor.

18 pounds of sugar at Hicklin Bros. for \$1.00.

20 All Steel hay rakes at \$13.50, Cochran & Pickens.

P. S. Maxwell is visiting in Ardmore I. T. this week.

G. L. Rankin, of Weston, was in the city Wednesday.

Marion Sanders, who was connected with a newspaper in Marion several years ago, is visiting his old friends here. He now resides at Jackson, Ohio. This is Mr. Sanders' first visit to Marion in twelve years.

The Crittenden Springs Hotel is now having a great many visitors from all parts of the country and Manager Davidson is giving the public a good meal and is satisfying the public. The hotel is now headquarters for mineral men who are coming from every section.

Thos. Lantry, of Covington, Ky., one of the stockholders of the Schoolfield-Spees Mining Co., passed through the city last week enroute to his home from a visit to the Company's mines near Carrsville. He was accompanied by Mr. Tucker, son-in-law of President Schoolfield.

Mrs. Jessie Marshall Powell, of Galveston, Texas, who is now the guest of her sister, Mrs. R. D. Drescher, received the first wireless message that has come to Marion last Tuesday from her husband who is now enroute to New York City from Galveston, Texas by steamship. He sent the message when opposite the Atlantic City New Jersey wireless station.

In honor of Prof. Evans the high school class of 1905 will give a picnic today at the Crittenden Springs. Of course every one of the class will attend who possibly can, and as there are several in that class who have reputations in the culinary art, it goes without saying that a bountiful feast will be prepared and that many well filled baskets will be taken and that a glorious time will be had.

A number of the "young crowd" stormed Emmett Clifton at the home of his father on West Bellville Tuesday evening. Refreshments were served and a gay time was the result. Those present were: Maude Flanary, Nannie Rochester, Marion Clement, Gussie Burget, Katie Yates, Margaret Joiner, Madeline Cook, Galen Dixon, Homer Moore, Orlen Moore, Elmer Franklin, Emmett Clifton.

A Growing Institution.

The Bowling Green Business University is growing every year. It is the largest Business school in the South. Catalog and particulars will be sent on application. Address, Bowling Green University, Bowling Green, Ky.

NOTICE.

All parties having fence stretchers belonging to us will please return them at once. If not we will expect you to pay for same.

Prof. Evans Here.

Chas. Evans, superintendent of the schools in the city of Ardmore, I. T. arrived in the city Saturday for a short visit.

He was welcomed by his many admirers who are glad to note that he is enjoying fine health and is well pleased with his new field of labor.

Stenographers Wanted

There is a great demand for good stenographers. You can secure a good position by attending the Bowling Green Business University, at Bowling Green, Ky. Address as above for catalogue and further particulars.

**SUNDAY SCHOOL TEACHERS'
TRAINING CLASS**

—By—
REV. J. F. PRICE

LESSON XXXIX.

There are two S. S. lessons in this week's readings. Oct. 14: The ten
Virgins, Mt. 25:1-13; Oct. 21: The Talents, Mt. 25:14-30.

DAILY MANNA.

Sunday, July 22, Christ the light of the world, Jno. 12:44-50.
Monday, July 23, Destruction of the temple foretold, Mt. 24:1-2; Mk.
[13:1,5; Lk. 21:5,6].
Tuesday, July 24, The disciples' questions, Mt. 24:2; Mk. 13:3,4;
[Lk. 21:7].
Wednesday, July 25, Destruction of Jerusalem and end of the world,
[Mt. 24:4-51; Mk. 13:5-37; Lk. 21:8-36].
Thursday, July 26, Parable of the Ten Virgins, Mt. 25:1-13.
Friday, July 27, Parable of the talents, Mt. 25:14-30.
Saturday, July 28, The last judgment, Mt. 25:31-46.

HELPS TO STUDY.

In John 22:44-50 Christ shows his identity with the Father. They
that believe on him, believe on the Father; they that behold him, behold
the Father; and the words that he speaks are the words of the Father. He
speaks of his present mission as one not to judge the world, but to save it,
nevertheless there will be a time when Christ will judge the world by the
principles of eternal truth and according to our works.

The twenty-fourth chapter of Matthew and the correlative Scriptures in
Mark and Luke have long been the subject of disputation. The disciples
ask three questions: "When shall these things be?" referring, without
doubt, to the destruction of Jerusalem, and "What shall be the sign of thy
coming?" and "of the end of the world?" Jesus, no doubt, answers each
of these questions, but the answers are so intermingled, and prophecy is so
blended with type and symbol that it is difficult to make the distinctions.

The parable of the ten virgins is beautiful and has been strikingly de-
picted in poetry, painting and drama. The kingdom of heaven doubtless
refers to the visible church. The virgins are church members. The lamp
is the symbol of profession; the oil, the grace of God. The "bridegroom"
represents Jesus Christ, and "midnight" an unexpected hour. "Wise,"
prudent, foreseeing, acting with good judgment, looking to their present
and eternal interests. "Foolish," lacking in discretion, sensual, seeking
the pleasures of this world, putting off the necessary preparation. "Give
us of your oil;" the grace of God and Christian character cannot be trans-
ferred; this must be a self-appropriation.

The parable of the talents is closely connected with that of the ten
virgins. The virgins were represented as waiting for the Lord; the serv-
ants, as working for him. There the inward spiritual rest of the Christian
was described; here, his external activity. There by the fate of the foolish
virgins we are warned against carelessness and delays in the inward spiri-
tual life; here against sluggishness and sloth and laziness in the line of our
Christian duty. There, the foolish virgins failed from thinking their part
too easy; here, the wicked servant fails from thinking his part too hard.

Our talents are education, training, energy, skill, health, wealth, op-
portunities, time, christian experience, the truth of the Gospel, the ability
to teach and preach, and the endowments of the Holy Spirit. These are
given according to ability and we are responsible according to talents. Im-
provement and right use of talents increase one's ability. We are rewarded
according to faithfulness.

The scene of the last judgment is not a parable, but a picture and a
prophecy. It does not liken the kingdom of God to anything, but describes
"the literal Son of man, in his literal person at his literal coming to a literal
judgment," in that language and picture form which can most vividly and
truly express to us the great reality. The personal and visible coming of
Jesus Christ shall be at the judgment. Men will be rewarded according to
their deeds and assigned to their eternal destiny.

THE TEACHER.

Principles of teaching:—

2 The Principle of Co-operation.

a The teacher must be in thorough sympathy with his work and
with his scholars.

b The scholar's attention must be maintained throughout.

c The co-operation of dull and slow scholar is to be sought even at
the expense of the bright ones.

d This co-operation should extend forward and backward through
the week in some form of research, or of topics and questions assigned for
investigation.

SEARCH QUESTIONS.

1 What three parables of warning does Matthew record as addressed
by Jesus to the Jews? 1 State the substance and meaning of each as it
applied to the Jews then. 3 Put the teaching of each in general terms
applicable to all times, and suggest applications to our own day. 4
What feeling and purpose did these parables rouse in the Jews? 5 What
were the three questions by which his enemies hoped to embarrass Jesus?
6 In answering them, what does Jesus teach as to politics? 7 What as
to the resurrection? 8 What is the chief duties of men? 9 What ques-
tion did Jesus ask the scribes? 10 What was the point of his argument?
11 Mention some of the vices for which Jesus denounced the Pharisees.
12 Do such vices exist today? 13 In what form do we need to be on
our guard against them? 14 What is the remedy for Phariseism? 15
Tell the story of Jesus in the treasury. 16 What element of Jesus' char-
acter does the event illustrate? 17 What instruction does it carry for us?
18 What did the coming of the Greeks that desired to see Jesus suggest
to his mind? 19 What other thought quickly followed it in his mind? 20
What great principle did he set forth in this connection (Jno. 12:24)? 21
Does this principle apply to his life only, or to all men? 22 What do you
learn concerning Jesus' character and relation to God from the two petitions
of his prayer in vs. 27, 28? 23 What concerning prayer from the whole
incident? 24 What does Jesus mean by "the judgment of this world" in
v. 31? 25 What does he mean by being "lifted up" and by "drawing
all men" to him? 26 What connection is there between the two? 27
What does this whole incident show as to Jesus' attitude toward his death,
and his thoughts about it significance? 28 Explain the perplexity and
question of the people in v. 34. 29 What is the meaning and purpose of
Jesus' warning in Jno. 12:35,36? Are the words of Jno. 12:37-43 those
of Jesus or John? 31 What is the writer's explanation of the failure of
the Jews to receive Jesus?

**COUNTY SUNDAY
SCHOOL CONVENTION**

Will Be Held With the Sugar Grove Congregation, Wednes-
day, August 1st, 1906.

The Crittenden County Annual Sunday School Convention which meets
with the Sugar Grove congregation, Aug. 1, will undoubtedly be the best
convention held in the county for some time. The program is strong and
every effort will be made to carry it out. Mr. T. C. Gebaur, State visitor,
will be present. He is thoroughly conversant with every detail of Sunday
school work and his talk will be practical and helpful. Some of the best
eloquent talent will also be utilized. The following is the program:

9:30 Devotional exercises by W. J. Hill.
9:45 The Meaning and Purpose of this Convention by R. M. Franks,
County President.
Singing by Sugar Grove class.
10:00 The Parents and the Sunday School by Rev. R. C. Love.
Music by Chapel Hill Class.
10:25 Primary Work by Miss Stella Hill.
10:45 Reports of County Officers.
Music by Crayneville Class.
11:15 The Sunday School's Place and Power by J. B. McNeeley.
Music by Marion Class.
11:40 The Pastor and the Sunday School by Rev. J. R. McAfee.
Music by Crooked Creek Class.
Announcement of Committees.

NOON INTERMISSION.

1:15 Music by the classes.
1:30 The Teacher and his Work by A. A. Deboe.
Music by Sugar Grove Class.
1:50 The Statutes and Needs of the Work, Rev. T. C. Gebaur, State
Visitor.
Offering.
Music by Chapel Hill Class.
2:20 The Sunday School as an Educational Institution by Rev. Andres.
Music by Male Quartette.
2:45 The Sunday School saving the Children by Rev. W. T. Oakley.
Music by Marion Class.
3:05 Character Building by W. H. Walker.
Music by Crooked Creek Class.
3:30 A Model Sunday School by Rev. J. F. Price.
Music by all the classes.
Any class not mentioned on the program will be given a place if
present.
It is expected that all who can conveniently will bring their bas-
kets well filled.
We want all to pray and work that this may be the greatest con-
vention that we have ever had.

Underground System for Mail.

Chicago, July 12.—The under-
ground system for the transportation
of mail in Chicago will be inaugu-
rated next Monday, when the tunnel
connection between the post-office
and the LaSalle street station will be
put into operation.

Postmaster Busse announced today
that this tunnel is completed and
that the tunnels to the other five
railroad stations in the city will be
opened by Sept. 1. The underground
conduits extend from the post office
to the Illinois Central, Grand Cen-
tral, Polk street, LaSalle street, and
Chicago and Northwestern railroad
stations, and two to the Union sta-
tion.

All these tunnels are part of the
system of tunnels which underlie the
streets and which aggregate nearly
seventy-five miles of underground
electric lines for the transportation
of freight. When connection has
been made with all the railroad sta-
tions, the use of the heavy mail wa-
gons on the streets will be abolished
and the driveway beneath the post
office building will be used only by
receivers of mail, who send their own
wagons to the office.

**Bile
Poison**

has a very bad effect on your sys-
tem. It disorders your stomach
and digestive apparatus, taints your
blood and causes constipation, with
all its fearful ills.

**Thedford's
Black-Draught**

is a bland tonic, liver regulator, and
blood purifier.

It gets rid of the poisons caused
by over-supply of bile, and quickly
cures bilious headaches, dizziness,
loss of appetite, nausea, indiges-
tion, constipation, malaria, chills
and fever, jaundice, nervousness,
irritability, melancholia, and all
sickness due to disordered liver.

It is not a cathartic, but a gentle,
herbal, liver medicine, which eases
without irritating.

Price 25c at all Druggists.

Christening a Young Duke.

Vicksburg, Miss., July 13.—The
young Duke of Manchester, who is
the great-grandson of Mme. Yznaga,
and whose father, the Duke and his
bride, who was Miss Zimmerman, of
Cincinnati, have often visited at the
Yznaga home, is to be christened
with water taken from the Mississip-
pi river.

The water was shipped in a sealed
jug by express. It was ordered by
cable and telegraph. The Jug was
sealed in the presence of a Justice
of the Peace, who put upon it his
seal declaring it was genuine from
the "Father of Waters." The Duke
will use the water at the christening
in London, as a tribute to Madame
Yznaga, whom he greatly ad-
mires.

The Use of the Comma.

In a village on the eastern coast
of Massachusetts, it is the custom for
the minister to read in churches the
requests of members for the prayers
of the congregations on special occa-
sions. One Sunday the regular min-
ister had exchanged pulpits with a
clergyman from the interior of the
State to whom the custom was un-
known. The deacon, at the usual
time in the service, ascended the pul-
pit stairs and gave the minister the
written requests for prayers, explain-
ing what was to be done with them.
A few minutes later the congrega-
tion was puzzled and not a little
amused to hear in a slow and delib-
erate voice: "A man going to see his
wife desires the prayers of the con-
gregation for his safe return."

The note was: "A man going to
sea, his wife desires the prayers of
the congregation for his safe re-
turn."

**\$5,000
Reward**

will be paid to any person who
can find one atom of opium,
chloral, morphine, cocaine,
ether or chloroform or their
derivatives in any of
Dr. Miles' Remedies.

This reward is offered be-
cause certain unscrupulous
persons make false statements
about these remedies. It is
understood that this reward
applies only to goods purchas-
ed in the open market, which
have not been tampered with.
Dr. Miles' remedies cure by
their strengthening and invig-
orating effect upon the nervous
system, and not by weakening
the nerves.

"I consider that there are no better
remedies put up than Dr. Miles'
Nervine, Anti-Pain Pills, and
Nerve and Liver Pills. We have used them
for years, and recommend them to
many others. My wife is using
Nervine, and considers it the best
medicine in the world. A lady friend
of mine, who was almost a total
nervous wreck, through my earnest soli-
citation has used several bottles of
Nervine with wonderful results."
WM. CHROME, Salt Lake City, Utah.

Dr. Miles' Anti-Pain Pills are sold
your druggist, who will guarantee
the first package will benefit. If
it fails, he will return your money.
25 doses, 25 cents. Never sold in
bulk.

Miles Medical Co., Elkhart, Ind.

IS DOUBLE CROSSED BY CURT JETT

Both Curt Jett and Tom White Go Back
On the Prosecution.

Beattyville, Ky., July 11.—Curt Jett, who had freely confessed to his part in the Marcum assassination, double-crossed the prosecution when placed on the stand at the afternoon session of the Hargis-Callahan trial. Jett was attired in citizens' clothes, and imprisonment has cost him nothing of his pert manner. The court room was crowded for the first time during the trial. The court admonished counsel for both sides that sparring and side remarks must cease. Hargis is Jett's mother's half brother.

"Mr. Marcum had prosecuted me in several cases, and was my bitter enemy and I am the man who killed him said Jett.

He then told of the assassination, tallying with the description given by B. J. Ewen. Jett said he had not conferred with White in regard to the killing. The pistol used, he said, was his own, and had been owned by him several months. He told the attorneys this morning that Callahan had given it to him. He said that he could not swear the defendants helped to defend him in his previous trial. He did not know, but thought they had paid his attorneys fees. He suddenly lost his memory at the most crucial moments, and could tell nothing about his or White's actions, preceding or following the murder. Jett did not remember seeing White in the court house at all, and as far as he is concerned White is perfectly innocent.

The drift of his testimony was so apparent that he was turned over for cross-examination without being asked who induced him to fire the shots. He was not asked a word on cross-examination.

That he has had some marvelous change of heart is apparent, but the reason may be found only in the statement of the Commonwealth's Attorney Adams, who said that Jett was beastly drunk and that another attempt would be made tomorrow to get him to repeat his confession. As Hargis was not mentioned, the defense could not cross-examine him.

Makes The Liver Lively.

Orino Laxative Fruit Syrup gives permanent relief in cases of habitual constipation as it stimulates the liver and restores the natural action of the bowels without irritating the organs like pills or ordinary cathartics. Does not nauseate or gripe and is mild and pleasant to take. Remember the name ORINO and refuse substitutes. Woods & Orme.

A Narrow Escape.

East Greenwich, R. I., July 15.—A brace on the locomotive drawing, the Colonial express, southbound from Boston to Washington, broke just after the train passed through this place today, and for over half a mile the engine plowed its way along the sleepers, dragging its six coaches and Pullman cars, which were filled with passengers. No one was hurt, the probability that the cars would telescope and plunge down a high embankment induced the engineer not to attempt a quick stop. The engine was ruined. When the accident happened the train was traveling at the rate of fifty miles an hour.

CHERRY PECTORAL.

Our Magazine Section.

Our Magazine section next week, will contain a number of interesting articles on current topics; one on Canadian reciprocity, a timely discussion on a matter which awaits action by this country, being looked on with favor by our neighbor at the North; an article entitled "A Grocery in Congress," telling of the unique display of adulterated food and drugs during the recent discussion of the Pure Food Bill; a sketch of the Countess Warwick, one of England's most famous philanthropists; "Friend of the Workingmen"; a patriotic article on "The U. S. Army Transport," holding up our Pacific squadron as a model for the handling of Government troops; A warning-overlooking opportunities at home. The story of the model establishment at Watertown, Mass., The Homecroft's Guild, where the children are taught handicraft and gardening; do not fail to read the "Home Town Department." Our agricultural page will contain a great story of free alcohol, its advantages to the farmer and the people; In this installment of "The White Company" the interest becomes thrilling as the scene changes to the French Wars and Sir Nigel is off to the war and his vessel overhauled two sea pirates.

The Fashion department is especially fascinating in its breezy notes on summer fashions. An article on "New Parisian Linen" will be sure to interest our feminine readers.

Bowel Complaint in Children.

During the summer months children are subject to disorders of the bowels which should receive careful attention as soon as the first unnatural looseness of the bowels appears. The best medicine in use for bowel complaint is Chamberlain's Colic, Cholera and Diarrhoea Remedy as it promptly controls any unnatural looseness of the bowels. For sale by Woods & Orme.

Henderson's First Fight.

Henderson, Ky., July 10.—The summer dullness was enlivened today by a fist fight between City Attorney John Francis Lockett and former City Tax Collector John D. Alvers. The trouble arose over the matter of turning some tax bills over to Lockett for collection. Judge Lockett went to Alvers' office and demanded of Alvers an explanation of certain statements that Alvers is said to have made. The lie, it is said, was passed and the men came to blows. Some friends of the parties interfered and stopped the trouble. Alvers swore out a warrant for Lockett who will appear in police court tomorrow.

Uncle Sam and The Powder Trust

THERE is talk at Washington about blowing up the powder trust. At any rate, the bills now under consideration in congress would have some such effect as this if enacted into law. It has been stated on the floor of the house of representatives that the government is in the power of a trust, so far as obtaining its supply of powder is concerned, and that in case of a war it could not get enough powder for a prolonged campaign, as the plants now in existence would not be able to provide it. It has been argued that the government should have a powder plant of its own, and this is contained in bills which have been introduced. Secretary Taft of the war department has notified congress, however, that he would not counsel the embarkation of the government in powder manufacture to such an extent as to drive from business the plants of a private character now engaged in powder making.

The institution commonly called the powder trust is the company known as E. I. Du Pont de Nemours & Co. The parent plant is in Delaware, but there are now other plants in various parts of the country. The history of this company dates back to the beginning of the nineteenth century, and the Du Pont family has had a prominent part in the defense of the nation. The Du Ponts have borne themselves gallantly in the fighting, and they have supplied powder to the government in three wars.

The founder of the American Du Pont family was Pierre Samuel Du Pont de Nemours, who was born near Paris in 1739. He was an expounder of the economic system of Quesnay and was secretary of the assembly of notables in 1787, member of the states general from Nemours in 1789 and later was president of the constituent assembly. Though he was a reformer, he was conservative in his methods and thus won the hostility of the revolutionists and only escaped the guillotine through the death of Robespierre. After his house had been looted and his property destroyed by the mob he took refuge in this country, bringing with him his sons Victor and Eleuthere.

T. COLEMAN DU PONT.

Irene. They landed at Newport in 1800. During the reign of terror the younger son, Eleuthere Irene, was in retirement at Essonne, where the government powder works were located, and there he became a student under the great chemist Lavoisier and examined the processes by which powder was produced. This knowledge served him in good stead on arriving in this country. His attention was called to the bad character of the powder in use by the American government, and he determined to establish a plant for manufacture of this much needed article. Thomas Jefferson invited him to locate in Virginia, but on account of the existence of slavery in that state and also in Maryland he chose Delaware instead and in 1802 brought models and machinery from France and set up the original plant on the Brandywine. A short time afterward the elder Du Pont, who had returned to France, assisted in the negotiations which resulted in the transfer of Louisiana territory to the United States. He remained in France until 1810, but died in 1817 at the family home near Wilmington. The great powder making industry founded by E. I. Du Pont has remained for a hundred years in the hands of the Du Pont family. When E. I. Du Pont died in 1834 he was succeeded as head of the business by his son, Alfred Du Pont, who in turn was succeeded on his death in 1850 by his brother, General Henry D. Du Pont. His son, General Henry A. Du Pont, is perhaps the most distinguished living member of the family. He was a Union soldier in the civil war, was brevetted four times for "distinguished services and gallantry in action" and won a congressional medal of honor. He claimed election to the United States senate from Delaware in 1895, but was not seated owing to the famous factional contest which for several years has prevented Delaware from having more than one representative in the upper branch of congress. He is one of the most powerful of Edward S. Addicks' opponents. The present head of the powder firm is T. Coleman Du Pont. The late Rear Admiral Samuel Francis Du Pont, son of Victor and grandson of Pierre Samuel Du Pont de Nemours, was one of the most conspicuous of the naval officers on the Union side in the civil war, and another Du Pont, Lamont, rendered the Union cause great service.

Grove's Tasteless Chill Tonic

has stood the test 25 years. Average Annual Sales over One and a Half Million bottles. Does this record of merit appeal to you? No Cure, No Pay. 50c. Enclosed with every bottle is a Ten Cent package of Grove's Black Root Liver Pills.

The Streamlet's Song.

BY O. G. W.

The streamlet's song blythe child-hood sings,
It's fairy tale youth's lips unfold;
How twitting swallows dipped their wings,
And cowslips filled rare cups of gold.
While phlox and daisies on its bank
Helped by the breeze stooped low and drank.
It prattles through the grassy meads
And laves the root of beech and fir;
When Morning hangs her radiant beads
On many a bridge of gossamer.
So through the night and through the day
It sings and seeks the sea away.
The zephyrs bear its scent of flowers,
And kiss it gently as they pass;
Nor linger in the wind-made bowers
Of bended fern and meadow grass;
The stream replies when winds would woo:
"I tarry not, there's work to do."

So on I race, through field and wood,
And, passing, serve the thirsting kine;
You axman scares the wild bird's brood
From sheltering beds of columbine.
As now he hastens to the brink,
Where I must pass to give him drink.
The mill wheel waits, so I must speed
Through glen and glade, through glistening pool,
Whose shallows burefoot urchins wade,
While loitering on their way to school.
I can not stay for youth or for age,
The ocean bounds my pilgrimage!
So on and on it darts and whirls,
Through rustic vale and bustling town,
On rocky beds it breaks into pearls
Flows seaward on, and down and down,
And ever thus from source to sea,
It bears a life's true melody.
And so the child, long years ago,
Rehearsed the tale the streamlet told.
Thus will it sing, thus laugh and flow,
The same for me, now I am old.
I follow, till life's greater sea
Shall drown the streamlet's melody.

And yet its tide in song shall flow
For aye to memory's listening ear,
Beyond that sea its banks shall glow
As if those flowers meads were

near,
Then I shall sing, as the streamlet sung
So shall my soul be ever young.

BOSS NO LONGER.

Israel W. Durham, Who Was Driven From Power In Philadelphia.

Israel W. Durham, the former boss of Philadelphia, who is in California suffering with consumption, has experienced enough reverses of fortune in the past twelve months to break the health and spirits of almost any man. A year ago the reform wave in the Quaker City was gathering force, but it had not then broken over the heads of Durham and his associates and swept them from the position of influence and power in which they then seemed so firmly entrenched. Durham in his prime as a political organizer is said to have exacted subservient allegiance from some 10,000 officeholders and city employees, over whom he held sway not the less powerful because unrecognized in the statutes and ordinances. Durham's critics claim that as boss of the organization in Philadelphia he built up a system

ISRAEL W. DURHAM.

whereby every branch of the public service and every contract let for the execution of public improvements was made to yield graft. On the other hand, his worst enemies credit him with possessing many admirable qualities, and his success as a political organizer is attributed in part to the fact of his loyalty to friends, his fidelity to truth, his generosity and his courtesy. Numerous stories are told of the fallen leader's amiability and fondness for relieving the strain of political boss-ship by indulgence in practical jokes. Once on a trip with a party of politicians he put a giant firecracker in the drawing room occupied by the mayor of the city. He played a neat trick on some of his card sharp friends one time by putting twenty queens in a poker deck.
"It" Durham, as intimates have known him, was born in Philadelphia in 1856 and educated in the public schools. He was apprenticed to a bricklayer, but left that occupation to engage in the flour business with his father. In this he continued until politics took up his attention to the exclusion of other matters. He held the office of state insurance commissioner, but resigned it last July at the governor's request.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Draughon's Chain of 26 Colleges.

Elsewhere will be found an advertisement of Draughon's Practical Business Colleges located at: Paducah, Ky., Evansville, Ind., St. Louis, Mo., El Paso, Texas, Jackson, Miss., Memphis, Tenn., Fort Worth, Galveston, San Antonio, Waco, Denison, Texas, Oklahoma City, O. Seventeen bankers on Board of Directors. Draughon's chain of Colleges secure positions for those who take the guarantee course or refund every cent of money paid for tuition. For catalogue address J. F. Draughon, Pres't., at any of the above places.

CANCER CURED

No knife, no pain, book free. Address Cancer Sanitarium, Harrisburg, Ill.

Changes Colors Three Times a Day.

Changing first pink, then a dark ginger color, then an alabaster white little Eli Rami, the fourteen months old babe of Count and Countess Nathoo, is causing the greatest excitement, as told in the world a few days ago. Now President Roosevelt has been informed of the varied existence of little Eli, says a Des Moines correspondent of the New York World.

This little fellow is the son of Count Nathoo, a Hindu, and an American girl who is a graduate of the University of Wisconsin.

In many ways he is just like other babies. He has a lusty pair of lungs, eats heartily and is bright. When little Eli Rami awakes in the morning his skin is the color of rose leaves. At noon a dark color begins to creep over his face and soon he is the color of his princely ancestors. At night he looks like a little marble image.

The little fellow has been the subject of much discussion among the medical and scientific men of the city. It is the general opinion that the mixture of bloods causes the strange phenomenon. Whether the child will grow up a tall, white American or be a little dark Hindu, with silky black and sharp eyes like his father is a question.

Count Nathoo has opened up a temple of psychology here and has quite a following. He is also a clever trick artist.

Count and Countess Nathoo were married in Quincy, Ill., several years ago. The girl's home was in Madison, Wis.

Their marriage caused something of a furor, as not only did the girl defy convention in marrying him, but the dark skinned count broke some of the prime laws of India by marrying an American girl.

A Guaranteed Cure For Piles

Itching, Blind, Bleeding, Producing Piles. Druggists are authorized to refund money if Pazo Ointment fails to cure in 6 to 14 days. 50c.

Bids Wanted.

Sealed bids will be received for construction of a brick church in Smithland, Ky., until August 1st, '06, plans by architect shown on application. Brick and stone on lot, foundation ready. Smithland, Ky.

Chas. Rutter, W. I. Clarke, C. H. Wilson, Building Committee.

An Established Institution.

The Bowling Green Business University is an established institution. Write for catalog and particulars. Address Bowling Green Business University. 7-2

Has Stood the Test 25 Years.

The old, original Grove's Tasteless Chill Tonic. You know what you are taking. It is iron and quinine in a tasteless form. No cure, No pay 50c.

HAS IT OCCURRED TO YOU WHY . . .

So many wheat flaked foods have come and gone? Lack of quality of course. The richness that is distinctively noticeable in Cream Crisp gives it a taste quality unequalled. This accounts for growing business.

Start now and get full value for your dime. Ask your Grocer and accept no substitutes.

SHADY GROVE.

Quite a number of people from these parts attended county court at Marion Monday.

Clarence Crittenden and family visited in the Blackford country last Sunday.

John R. McDowell attended church at Blackford Sunday.

Dennie Hubbard and Ross Horning went to Blackford Wednesday.

Tom Cannan of St. Louis is visiting friends and relatives in this section this week.

Mr. Art Babb, of Providence, passed through here last week en route to Marion.

Miss Mattlock, of Piney was here Tuesday.

Elbert McConnell talks of going with his father to New Mexico.

John L. Gardner, of Piney, was here Friday.

Claude McConnell, of Henderson is visiting friends and relatives here this week.

R. Travis and F. A. Casner, of Bellville Bend, passed through here with a lot of sheep, en route to Repton.

Shady Grove has just organized a baseball team and when they beat the Bellville Bend team they intend to challenge the Boston League team. Bellville Bend is the next to Boston.

Peddlers thick as bees this week but money scarce.

The rain Friday night was welcomed by all.

Hoing and plowing tobacco makes news scarce this week.

HEBRON.

Mrs. Snider Wilborn, of Marion, visited friends in this neighborhood last week.

L. E. Cook is spending a week in Evansville.

H. B. Phillips and family, of Colon, spent Sunday evening with their in our section.

Jim Head Moore and family visited Mrs. Alvis' family last week.

Whooping cough is having a good time of it with the children as well as the old ones, in our neighborhood.

Good rain Friday night brought smiles to our long-faced farmers.

Mr. Eb. Sullenger was in our section buying sheep and lambs last week.

Mr. G. P. Wilson, of near Weston was through our section last week, looking for wheat to thresh; we are still looking for his threshers.

John M. Phillips sold his sheep and lambs to Eb Sullenger last week to be delivered Thursday of this week.

Roe Williams talks of moving to Marion this fall.

I have three full-blooded Scotch collie pups left yet. Ed. Cook.

Miss Nannie Campbell, of Livingston county, was her many friends in this vicinity last week.

Miss Ora Hale spent last week with friends in Marion.

Ruth Cook is visiting friends in Blackford this week.

EAST MARION.

Erastus Champion has returned from an extended trip through the west.

Mr. John Isaacson an expert machinist, of Chicago, is at work at the ice plant this week.

R. D. Moore is suffering with rheumatism.

Miss Ora Trimble, of Livingston county, was the guest of Miss Iva Hicklin last week.

Mrs. J. D. Asher and daughter, Misses Naomi and Ruby, were the guests of her mother, Mrs. Mary Hicklin, a part of last week. They left for Dawson springs Sunday to spend a few days.

Mr. T. E. Griffith and wife were in town Friday to meet their daughter, Miss Alice, who arrived from Mexico.

Mrs. Vic Farmer, of Sheridan was in town Friday shopping.

George Ordway of Crayneville left Tuesday for New Mexico.

IRON HILL.

Miss Edna Roberts has gone to spend a few weeks with relatives near Charleston, Mo.

Mrs. J. T. Stewart spent last week with her sister, Mrs. Linnie Thomas of Uniontown.

Marion Dean is moving his mill to near Fish Trap, in Webster county, but will move it back to this place in this fall.

Mrs. J. H. Porter of Marion spent last week with Mrs. George Roberts, in this vicinity.

John Stewart is putting a new floor in the iron bridge near here.

Frank Lamb, Harve Crowell, and Monk Givens are building a new residence for Ed. Dean.

Mr. and Mrs. A. A. Deboe, of Marion attended church at Sugar Grove last Sunday.

M. K. Givens and family visited at Rose creek, east of Providence, Sunday and Monday.

An Old Folks reunion will be held at Sugar Grove Saturday, August 18 and a large crowd is expected.

WEEKSVILLE.

J. N. Meeks was in Marion Saturday.

We are glad to see our old friend, Hatcher Beck, able to be out once more.

Connie Hodge started for Colorado again Tuesday.

Rev. John Davidson and wife, of near Pineknayville, and Frank Brown and wife and little daughter, Mary, visited aunt Mary Davidson on Saturday and Sunday.

Geo. Beck went to Kuttawa Sunday to see his best girl.

They have purchased a nice organ at Emmaus.

Mr. Billy Campbell and family visited O. T. Hodges family last Sunday.

Al Black left last Sunday for Colorado.

Great Provocation.

"You say, madam, that you were under great excitement when you struck this woman."

"Yes, she had just found the family Bible with my age in it."—New York Times.

Incredible.

He—Congress will never be composed of women.

She—Why do you think so?

He—Can you imagine a house full of women with only one speaker?—Judge.

Presence of Mind.

Mrs. de Platte—All is over between us. I shall go back to mother at once.

Mr. de Platte—Quite so. As you please, of course, but would you mind putting a stitch in my braces before you go?—Punch.

Answered.

"Papa, what is an enlightened public opinion?"

"It is an acquaintance, my son, with the amount stolen."—New York Life.

Force of Habit.

"Do you drink?" asked the manager of a manufacturing company to the applicant for a position.

"Why, yes," responded the applicant cheerfully; "I don't care if I do."—Lippincott's Magazine.

Practice Makes Perfect.

Mrs. Benham—The paper tells about a poor fellow who fell downstairs three times.

Benham—I suppose he was bound to do it until he could do it right—New York Press.

Fortune in Misfortune.

"Unfortunately that is my wife."

"And you say that in her presence?" his friend whispered in his ear.

"Fortunately," the miserable man replied, "she is deaf."—Chicago Inter Ocean.

Not a Nonsequitur.

"Did you notice that the dead man's physician was riding in the first carriage after the hearse?"

"Yes. It's the first time I ever saw the cause follow the effect."—Le Rire.

Where It Landed Him.

"What a peevish young Goldrod has for getting at the inside of things!"

"What now?"

"Bank, then jail."—Milwaukee Sentinel.

FARM AND GARDEN

MARKETING LIMA BEANS.

Some of the Things to Remember in Order to Best Dispose of the Crop.

August is the month for heavy production of lima beans. They continue to bear, however, till the first hard killing frost. The amount and length of profitable bearing depends largely upon keeping the vines picked clean and not allowing pods to get dead ripe, for the ripened seed of any kind takes most vital substance out of the plant and causes it to die. Besides the beans when not quite ripe bring the highest prices. The time to pick the pods is when they show faint traces of light green to yellow. After the pod becomes yellow, the beans inside are ripe, turn white and are then considered "dry" beans. White ones mixed with the green damage the selling price from a few cents to half their value per quart.

TRAY OF LIMA BEANS READY FOR MARKET.

On the market lima beans are sold by the quart, hence the best pack is the ordinary 16 or 24 quart berry crate. Read early beans often sell better in pint boxes, as the price is so high that customers of the retail stores do not want as many as a full quart. The peck market basket is another package used, six to ten quarts being put in each basket with a covering of green netting to enhance the greenness of the beans.

Many beans cannot be shipped in bulk, because they heat the easiest of all vegetables, and heating results in souring, sprouting, mildew, spotting and decay. Although itself green and full of water, the lima bean must be absolutely free from outside moisture when packed for shipment, says Farm, Field and Fireside. Nor must the package in any way get wet, or a total loss will result inside of 12 hours. A novice in the business often blames the express company or commission merchant for the spoiling of his goods and consequent bad returns, when it is his own fault in allowing the beans to be packed in a damp condition.

Shelling, as well as picking, must be done by hand. Shelling is the more tedious process. A good sheller can shell eight to 12 quarts per hour. One and a half to two cents per quart is usually the price for shelling, children most often doing the work, although the supervision of a competent grown person is necessary at all times. If for any reason the beans after being shelled are damp, they should be placed for an hour or more before packing on a clean cloth, or some other clean, absorbing substance, in the open air—but not in the sun. This is to dry the outer surfaces. They should be spread not more than an inch deep and rolled from side to side every few minutes to secure even drying. The cloth will absorb a part of the moisture and the air the rest. Usually, however, no such drying process is necessary.

SEEDING PASTURES.

How One Man Handled His Land After Prairie Grasses Had Been Fed Out.

My experience is not very extensive, but I will say that I seeded a prairie pasture after the prairie grasses had been fed out, with one part timothy, one part red top and one part blue grass. I found that the timothy and blue grass took good on the high ground and the red top took best on the low ground. I found, too, that after about three years the blue grass had crowded everything else out, even the weeds to a certain extent. At takes blue grass about two years to get a good start. But the red top did fine on low ground the first year. If I were going to seed a pasture for cattle, horses and sheep, especially if the land had been under cultivation, I should sow two parts red clover, one part timothy and one part blue grass, and on low lands I would put one part timothy and one part red top, for the reason red top does best on low ground. I find in my pastures on the high, dry knolls that in June and July, when the weather is dry and the sun is hot, these knolls dry out and give little or no feed, hence my reason for sowing red top on the for stock during the driest part of the season, and, too, there is always a heavy growth around the sloughs or low places that make fine grazing during the winter months when it is not covered with snow. Now, continues the correspondent of Farmers' Review, my reason for sowing timothy and clover is that the clover helps to shade the timothy and blue grass after the harvest has been taken off, and it helps to fill out the stand until the timothy and blue grass get a good start.

New Firm! New Goods!

HINA & COX

We handle everything that can be found in a first-class Hardware Store and our prices are right, our goods right, and if honest goods and fair treatment merits your patronage come and see us.

Delker Bros. Famous Two-in-One Buggies.

Come in and let us show you this buggy. It has pleased hundreds of others and we know it will please you.

We also handle the Genuine F. A. Ames Buggies and Wagons.

Coquillard Tubular Axle Wagons

A Full Line of Heavy and Shelf Hardware

Green Seal and Hammar Bros. Paints.

The American Field Fence

Buy your new fence for years to come. Get the big heavy wires, the hinge joint, the good galvanizing, the exactly proportioned quality of steel that is not too hard nor too soft. We can show you this fence in our stock and explain its merits and superiority, not only in the roll but in the field. Come and see us and get our prices.

HINA & COX.

Successors to the Hina-Hardware Co.

CHAPPEL HILL.

A nice rain July 14th, everything looks promising.

Sunday was regular meeting day, at Chappel Hill and Bro. Thompson was on hand with a nice congregation.

We are informed that Mr. George Oraway of Crayneville, will leave these parts for New Mexico next Tuesday, and will be gone about two years. We are sorry to lose George, and sorry that our boys have to leave Kentucky to get their start in the world; they stay with their parents until they receive their education, and then they are left for parts unknown, to battle with the world.

Mr. W. H. Clark and wife, of Oak Grove, attended church at Chappel Hill Sunday.

Mr. W. R. Cruce and wife, from New Orleans, were at church Sunday. Mr. Cruce is on a visit to his parents and to see after his fine crop of hay.

Mr. Mort Davenport and family from View, were the guests of Mr. and Mrs. Bart Brown, Saturday and Sunday.

Mr. Al Adams and wife and master Dixon were the guests of Mr. and Mrs. H. S. Hill Sunday.

Mr. Bob Elkins and family, of Midway attended church Sunday and took dinner with Charlie Clement and family.

The tobacco crop in this section is growing off nicely; it is in good shape and the prospect now is there will be a fine crop of the weed in these parts.

Tilford Bigham, of Crayneville, sold to James Loyd of Crayneville, thirteen fine Southdown ewes at \$5 a head.

The understanding now is that Mr. and Mrs. M. G. Jacobs will not go to Kansas until August, on account of Mrs. Jacob's health.

DYCUSBURG.

Mrs. J. P. Brissey was called to Monterey last week by the death of her father.

Mrs. W. B. Grove visited in Louisville last week.

Miss Lillian Decker has been a guest of friends in Livingston.

Mr. and Mrs. L. B. Vosier are in Nashville.

Mr. Sam Ramage and family are guests of relatives here.

Rev. Robt. Johnson held services at the new Methodist church Sunday. He preached an excellent sermon from Ps. 10:3. Sunday school was organized to meet every Sunday at 9:30 a. m. Mr. J. R. Glass was elected Supt. and Mrs. Jennie Vosier Asst.

Miss Edmonia Bennett of Paducah is visiting relatives in Dycusburg.

Mesdames Sue Ramage and Ruth Duvall are quite ill at their homes.

Mr. Faint Hamby is critically ill.

Misses Maud and Marion Richards visited Tucker Temple Monday.

An infant of Chas. Duvall died last week.

Claude Daughtery has returned from Texas.

An ice cream supper will be given for the benefit of the Methodist church on the church grounds Saturday night.

STRING TOWN.

Everything is on a boom in String Town.

Mrs. Lillie Darte is keeping boarding house this week.

S. W. Taylor and wife and Mrs. Fannie Taylor went to Blackford last Saturday trading.

John Dart and John Beaskner have the finest tobacco we have yet seen.

Miss Birge Tetherington was in our midst last Sunday.

Notice to Taxpayers!

Your taxes are due, and it will save trouble for all concerned if you will pay them at once. I, or one of my deputies will be at

Dycusburg, Thursday, July 26.

Levias, Friday, July 27.

Sheridan, Saturday, July 28.

Tolu, Wednesday, August 1.

Fords Ferry, Thursday, August 2.

Rodney, Friday, August 3.

Shady Grove, Saturday, August 4.

J. F. FLANARY, Sheriff C. C.

Maud Stallions says she does love Brown biscuits.

We are patiently awaiting the arrival of Mrs. Gardner and her daughter here.

Yes, fortune telling is the order of the day on Piney; sometime when people go to tell other people's fortunes they get their own told.

John Beckner is preparing him a new home. John what is the fraction?

We are glad to state the Hood's boys won the ball game.

Dick Taylor and Bill Brown have been putting up hay this week at Blackford.

NEW SALEM.

Health generally good.

Farmers about done cutting hay.

Crops looking fine.

Clay hauling from the Stevens mines in full blast.

Henry Brouster went to Paducah last week.

No wheat threshing yet; may yet have to fail it out.

Rev. Johnson will fill out the unexpired term of Mr. Thomas, at Turner's Chapel.

Who would have a turnpike from Salem to Marion. We have good roads five months out of the twelve anyhow.

From present indications hog and homony will be plentiful in Kentucky next year.

What tobacco planted promises to be good, but not over 50 per cent. of a crop is set.

The man that waits on the Lord for the rains and sunshine can generally count on saying grace over a square meal the year round.

Miss Beulah Austin spent part of last week visiting her grandparents at Pineknayville.

John and Lan Harpending went to Madisonville Monday.

Truth and honesty will get along in this world, and don't you go back on that.

John Pace and family visited at Hampton Sunday.

The Home Telephone company are putting two more lines on their poles in this section.

Marion Marble Works.

Why will people go elsewhere to buy tombstones and monuments when they can save money by buying at home, and at the same time you will be encouraging home industry and thus be patronizing those who patronize you. We handle nothing but first class material and a high grade of workmanship is our speciality.

HENRY & HENRY.
