JOE CUSHIONBERRY WAS IDENTIFIED

Attempted to Assault Her.

Madisonville, Ky., Aug. 7. - Joe Cushionberry, tho negro who was arrested Monday on the charge attempted assault, was identified b his victim, Miss Myrtle Fugate, this morning about 9 o'clock. He was placed in line with three other negroes but was positively identified in the presance of Commonwealth Attorney J. L. Grayot, County Judge Wilson and others.

"That is the man, I can tell him by his webbed hands and his clothes," were Miss Fugate's words almost immediately upon seeing the negro.

Considerable excitement was aroused when it became known that the negro had been identified and many threats were heard and to prevent "Judge Lynch" from trying him he was taken to Henderson and placed in jail. There has been mob talk indulged in all day in and around Madisonville.

Judge Gordon held an examining trial of the coon yesterday but as we go to press we were unable to learn

QUIET WEDDING

Landram to Col. Bailey

Yesterday morning at eight o'clock at the residence of Mr. G. W. Landram, father of the bride, Miss Ora Evelyn Landram was married to Col. F. N. K. Bailey, of Edgefield, S. C., in the presence of only a few friends. Rev. W. C. Hayes officiated.

Miss David Cowper and Capt. R. B. Cain and Miss Emma Shemwell and Ensign C. E. Landram were the attendants, and Miss Edaa Presnell played Mendehlson's wedding march.

After the ceremony the party at once took carriages for the boat landing and left on the Royal for Padueah to which point Mrs. V. D. Presnell, sister of the bride, accompanied them. From Paducah Col. Bailey and bride will go to Cincinnati and Cleveland, Ohio, and to Niagara Falls and other points east, on an extended bridal tour, after which they will be at home in Edgefield, S, C., and begin school work in the South Carolina Co-Educational Institute of which Col. Bailey is owner and manager.

Col. Bailey is not known here only since recently when he visited Miss Landram, but is quite a handsome

Nervous Worn-Out

If you are in this condition, your nerve force is weak-the power is giving out, the organs of your body have "slowed up," and do their work imperfectly. This failure to do the work required, clogs the system and brings distress and disease. When the nerves are weak the heart is unable to force the life-giving blood through your veins; the stomach fails to digest food; the kidneys lack power to filter impurities from the blood, and the poisonous waste remains in the system to breed disease. Nerve energy must be restored. Dr. Miles' Nervine will do it, because it strengthens the nerves; it is a nerve medicine and tonic, that rebuilds the

entire nervous system. "Several years ago I was all broken down. I was nervous, worn-out, could not sleep, and was in constant pain. I doctored for months, and finally the doctor said he could do nothing for me. I began taking Dr. Miles' Nervine, and used altogether eight bottles, and I became strong and healthy, and now weigh 170 pounds."

Nervous Worn-Out

If you are in this condition, your nerve force is weak-the power is giving out, the organs of your body have "slowed up," and do their work imperfectly. This failure to do the work required, clogs the system and brings distress and disease. When the nerves are weak the heart is unable to force the life-giving blood through your veins; the stomach fails to digest food; the kidneys lack power to filter impurities from the blood, and the poisonous waste remains in the system to breed disease. Nerve energy must be restored. Dr. Miles' Nervine will do it, because it strengthens the nerves; it is a nerve medicine and tonic, that rebuilds the

entire nervous system. "Several years ago I was all broken down. I was nervous, worn-out, could not sleep, and was in constant pain. I doctored for months, and finally the doctor said he could do nothing for me. I began taking Dr. Miles' Nervine, and used altogether eight bottles, and I became strong and healthy, and now weigh 170 pounds."

New York, July 25 .- Ened in a hermetically sealed copper calcd envelope, placed within a solin mahogany coffin, the body of Russell sage was today placed in a chilled steel case, four inches thick, rivited with steel bolts, locked with a lock which cau only be opened from the inside and lowered into a grave carpeted and lined with evergreens, on which the clods will be heaped and the mound built. The steel case will weigh three tons,

Ammediately after the steel box and contents were lowered into the grave electrical connections were made and wires were strung so that an immediate alarm will be given if any attempt is made to tamper with the remains. The extraordinary efforts to thwart the attempts by grave robbers, were sanctioned by Mrs. Sage and her close advisers.

The expenditure for this protection and for the coffin and accessortes were greater, so far as known, than any sum expended in the burial of any other private citizen of the United States and is in striking contrast with the rigid economies practiced during the long and active life of Mr. Sage.

The coffin alone, of solid mahogeny, with its inside casing of copper, trimmings and mahogeny handles cost approximately one thousand dollars. The steel case and its patent unpick. able leck cost \$22,000. It is called the burglar proof coffin and it is asserted that even without the added precaution of electrical protection, or guards it would be impossible for

In this day of perfectly fitted garments, the particular woman appreciates economy in bands and belts. Here is shown a petticost and corset cover joined in one, both attractive in design and perfectly fitted. The corset cover is cut with square neck and a very narrow band over the shoulder. Groups of tucks intercepted by bands of insertion provide an easy fullness over the bust, while the tucks continue the entire length in back. The girdle joining the garments is shaped to the figure and closes in front. The petticoat may be daintily trimmed with lace to match the corset cover. A fine quality of nainsock or long cloth will give best service, while lawn or muslin may prove very pretty. In the medium size, 4% yards of 36-inch material are needed. It is easily set up securely buyer may feel certain that it is not king red apples is commonly guaged by their color and that of yellow apples by the color of the seeds. The latter is the only reliable test of ripeless, for an apple picked just as the ds have turned a light brown, and they become dark around the edges, will be found to have not only full flavor, but the best keeping quality. But red apples are often left for some time after the seeds indicate mag tarity to allow them to put on mon color, which they do rapidly under the influence of the bright days and frosty nights of autumn; and indeed this is the only way of obtaining color on fruit in the shady portions of the tree. Growers should bear in mind, however, that to defer picking after the seeds indicate ripeness, invites watercore and shortens the life of the fruit in storage, often to a series extent with the midwinter varities.

TOO LATE PICKING

Much of the complaint recently of rotting at the core, according to a report of the Idaho Experiment Station, is believed to be attributable to late picking. Unless this trouble is corrected the sale of this valuable variety is sure to be hurt. The purchaser is completely deceived by the perfect appearance of the fruit, not a sign of decay being visible until it is cut open, when the flesh for some distance about the core is discovered to be brown, radiating in narrow rays towards the skin, which, however, it seldom reaches. It is worse than a worm hole, for that can be cut out. A box containing even a few such specimens makes the consumer distrustful of the variety, while half or more sickens even the most enthusiastic friend of "Brother Jonathan."

Few farmers are considered capable of packing their own apples, as the statement is made that, as regards

seeing worm holes, their eye-sight is deficient. Where there is a fruit union, the Idaho bulletin suggests that a rule should be adopted forbidding any members thereof from doing their own picking, but, they should profit by the employment of the same body of trained pickers successively at the various orchards. Even the isolated growers should endeavor to have a croup of expert pickers, and employ the same ones, as far as possible, year after year. This is the way to build up a reputation that has a grea cash

PACKING IN BARRELS

While the simplest method of packing apples is the old barrel of the east in which the bottom and top are faced, the apples in the middle being simply poured in, this is a slovenly, not to say deceitful method, for it requires no grading expert to sort out the best ones for facing. The Western box method, on the other hand, is more desirable, especially in cases where one wishes to cater to the fancy trade. One of the pretty points about the box package is that the exact number of apples contained therein is always known, and if stamped on the box as it should be, gives information much appreciated by the buyer. Of course this only applies where the packer adopts one particular method of placing the apples in the box.

Every picker has his own opinion as to the best style of receptacle in which to place the freshly picked fruits. Buckets, baskets and bags have their devotees, and some even go so far as to provide the pickers with coal scuttles. The latter, however, too strongly suggest pouring and such ough treatment is not to be thought of with apples any more so than with eggs. Where bags are used, as is commonly the case, they should be lined with burlap though this should not cause any relaxation of care in placing fruit in them. Bags are open to the objection that the fruit in them is easily bruised where the bag brushes against a limb or ladder. The usual form of packing does not admit of removing the fruit except by pouring, and this is objectionable. The bottomless sack overcomes this difficulty as it allows the fruit to roll from the bottom when the chain is released. Such treatment might do with oranges, but with apples-never. The average picker could never withstand the temptation to let them shoot from the bag the moment the foreman's back was

turned. THE IDEAL PICKING BAG

dent Homes, Each on a Acre of Land

An address on "The Significance of the Country Home" was deffyered by Edward H. Chandler, secretary of the Twentieth Century Club at the recent raduating exercises of the School of ations of nature, serves two distinct Domestic Science of the Boston Young vocating a deliberate system of training nature study by means of school gardens, he said: Most important of all is the beginning of a national movement for the making of "homecrofts" or small independent homes with perhaps an acre to enable each family to find out the true values of rural life. It would be an absurd erfor to suppose that such homes are now lacking. There are multitudes throughout the land. What is new is that these homes are coming at last to their own. Instead of continuing to be "e insigation, coupled with the three R's, the nificant haunts of one's childhood, of which one who has risen to distinction is expected to be a little ashamed, they are being sought out as typical of the best in home life and as models to be reproduced in essentials with some adaptations to the new needs of the times.

FLOWERS AND BIRDS

To grow up, Mr. Chandler said, with the flowers and shrubs and trees and to learn to care for the birds, squirrels, rabbits and domestic animals is a training whose influence on character O. P. Pilling & Son, 2012 Arch St., Phila. Pa can never be over-estimated. An acre of ground is enough for Nature's purposes if he who lives on it wishes to be her pupil and helper. The country home makes possible the simplicity of living and fosters true democracy. It is both noteworthy and somewhat pathetic that hosts of city dwellers should rush to welcome and listen to the prophet of the simple life who came to us from France. Yet he had no other btained without cost, by writing message than that of the country home. Live among the real things of life in contact with elementary forces. Live above conventionality. Learn to be ember of Congress. It contains much simple in your tastes and straightaformation which is useful and out forward in your motives. There you may not have so much orestry-tree planting and tree money to handle, but you do not need it. Ostentatious display kills the spirit of such a home. Democracy is talked USE AND INFLUENCE OF TREES, of in the city but it is felt in the coun try. A town meeting is the type of democracy yet attained. There is a common interest which binds all country dwellers together. But who are so far separated and indifferent to each others' needs as the various tenants of a city tenement or apartment house?

THE STRENGTH OF NATIONS.

Not all who live in the country realize its significance. Here and there is a decadent home and a degenerate family. But all over the world the strength of nations is found among those who have been fostered near to nature and have become free beings by working together in honest labor. This is a home ideal to be placed among the highest. There is little danger of its over emphasis. No matter what one's work or how heavily the burden of the city presses the determination to live on the home acre in the country may easily become almost the most powerful influence in making a successful life!"

. Parking for the Town.

The town parks, or the town or vilinge square are the lungs of its cit zens.

If the town is growing, it is none too soon to start a movement to provide for the securing of ample town parking. The land is increasing; when the town has doubled and has become a small city, it will not be so easy to secure sites, readily accessible to the people, without paying an exorbitant price. Secure first the land; it is not important that a large amount of money should be at once expended upon its beautification, possibly it needs but little, since nature may have made it more beautiful than can man. transformed into carpet beds of the time, some of his struggles and

THE TEACHER.

Principles of teaching:-- .

4 The Principle of illustration.

a Use familiar illustrations such as belong to the daily life of the

a scholars. b Use such illustrations that point clearly to the truth indicated. on't use an illustration that will call the scholar's attention away from truth to the illustration itself.

Never let a child see an object until you are ready to use it. As the matter you put on the blackboard grow as you teach.

an more than additional and the best possible illustrations of scripture lessons are to the scriptures themselves. The Principle of Repetition.

No mind can retain everything taught at the first impression. A little learned so that you can use it better than a great mass

c Reviews deepen the impressions so that the mind is able to re tain and express the truths taught.

d The review gives the teacher a chance to correct any errors the

scholars have imbibed. e The review gives the teacher an opportunity to supplement the scholar's knowledge with anything needful.

f Review! Review! This is the rule. The teacher should begin with a review and close with a summary of the lesson. The superintendent should not fail to have a review sometime during the session of the Sunday School. Then, of course, there must be the Quarterly Review.

SEAROH QUESTIONS.

THEY HAVE SOME

One Man is Hanged Sixteen Week for \$50 a Monf

In the strenuous scramble ay and a living the great competit ve game of life in New York many en and women in that city are drien to odd occupations for a livelihood. Some of these are described as pilows:

George Therma makes his liv by being hanged sixteen times a wrek for 4850 a month and his cakes as his contract reads.

Therma is a Mexican, and as the tar performer in Pawnee Bill's Wild est Show at Brighton Beach riated while riding a horse at breakneck speed, and is dragged at the pd of a lasso a distance of several andred feet to a tree when he is rung up in true Judge Lynch style He has a piece of stiff coat lining ed around his neck, and the rope is little damage, though the Mexn Rurales, who come along to take body, save him from a most uninfortable position. On several ocsions since he has engaged in this tork the cowboys who hang him have grown careless, and Therma has been cut down more nearly like the dead man he is supposed to be than the years. He had never married be ise fve man he wants to be.

Big Jose Barraro, the Mexican who lands the cowboys in the capture of Therma, is no gentle child, and when he has a sportive spirit at work within him, he findsit great fun after he has lassoed Theron to drag him through all the ugly and rough places on the ground. One him the palm. lay Barraro dragged him over a big one and Therma spent three weeks a hospital having a broken skull farmer, will sell at public vendue all

Therma has had his arms broken is occasionally taken from the field to the hospital tent unconscious, he ould not leave the work for anything you could offer him.

. He thinks Barraro has a bet with mind to marry the Widow Bidwell, a friend in the show that he will kill Therms yet, and he is betting that Barraro won't.

Charles W. Moore' a machinist of Ford City, Pa., had his hand frightfully burned in an electrical furnace. He applied Bucklen's Arnica Salve with the usual (result, "h quick and perfect cure." A large meteor fell near the mouth of Green river last week. It came from the South and lighted the heavens for several moments. When the Editor "Puffed"

By DONALD ALLEN

There was just one reason why the Widow Bidwell refused the matrimonial offer tendered her by Editor Flint of the Weekly Clarion and Fergus County Advertiser. Editor Flint had owned and edited the Clarion for many he had been too busy making up and working off his edition of 600 copies, getting up and printing auction bills, writing thrilling local notices of wood wanted on subscription and other matters connected with a weekly journal of twenty years ago. Some of his esteemed contemporaries sneeringly remarked now and then that he stole his editorials, but when it came down to writing out an auction bill they yielded

"Auction! Auction! Auction!" read the average bill. "Take notice that on the 14th of September George Styles, the live stock and other personal property on his farm on the Red Bridge road. Said stock consists of horses, ad a leg dislocated, but he likes the cows, sheep and hogs and about 100 reitement of the job and while he bens and geese. Sale to begin at 10

> There was no doubt about the success of the Clarion as a newspaper or about the success of Editor Flint as an editor. When he finally made up his there was no doubt that he would be a snag, however. The widow had been obliged to turn to dressmaking since her husband's death, and she did not rank with the Four Hundred of the village, but she was a lover of poetry and she had dreams of poets. While this kept her grocery bill down, it interfered considerably with her getting out orders on time, and she calculated

> that one about offset the other. The poetry loving widow had had fifty different pactic effusions published in the Clarion over the nom de plume of Flossle, but Mr. Flint had received the copy with a grunt, and the public had recovered from the shock each time within twenty-four

> The "poems" had been published to save carrying dead advertising. Mrs. Bidwell was rather surprised when the editor dropped in on her one evening and proceeded to say that he wanted her for the mistress of his house, but she soon rallied and answered that there was an insurmountable barrier between them. He didn't look like a poet. She knew what he could do in the way of an auction bill, but the man who wed Flossie must look the part. She would attend to the poetry as heretofore, but he must at least have long hair, an aesthetic face and

The editor saw at once that be couldn't fill the bill. He wore his hair short, had a fat face, and his eyes were on the lookout for delinquent subscribers instead of looking into the far away. He therefore picked up his

hat and walked back to the office. However, the iron had entered Mr. Flint's soul. He had laid his fortyyear-old heart at a woman's feet, and she had spurned it. He either wanted to commit suicide or secure revenge, plant was worth about \$4,000 he decid-Evansville, July 27. The heav- stallment of his revenge was shown in

There were more congratulations, and the widow got deeper into the toils. It was so nice to be patted on the back and soft soaped that she couldn't bring herself to deny the re-

Between the second at of the Ciarion the editor had a caller His ostensible occupation was selling Bohemian oats to farmers at \$5 a busiel and sailing mighty close to prison as a swindler, but he had the hair and face and eyes of a poet. Even the fat and healthy editor had to admit that. The caller wanted to insert a small ad, and ask about the Widow Bidwell. He had seen the notices in the Clarion about her legacy, and he canted a few pointers.

Editor Flint praised the woman who had jumped on his bleeding heart. Aye, he spoke in highest terms of her. and even told Mr. Harold De Lisle how he could get an introduction to her Then the third issue said

"We had a pleasant call the other day from Mr. Harold Be Lisle, who has just made a million dollars out of Pennsylvania oil. We understand that be may remain in our village for some days. Indeed, Dame Rumor is consecting his name with that of a rich and prominent widow on Chestnut

Mr. De Lisle was duly introduced to the Widow Bidwell. She had no sooner set eyes on him than her heart began to palpitate. The poet had come. He looked and dressed the part. He also acted it. Nothing was said of her dressmaking on the one hand nor of his oat business on the other. They talked of sonnets and poems and idyls, and the widow was not in the hotel dining room to note the quantity of corned beef and cabbage he got away with at dinner.

There was a fourth notice in the Clarion. The spurned editor hadn't much to do with auction bills just then, and he had time to keep track of affairs on Chestnut street. He had Bucks been told that Mr. Harold De Lisle was only a traveling agent for a gang of eastern swindlers, but he wasn't he said was:

"The wealthy and distinguished Mr. not won the heart of a Reed City lady Good plain ewes then rumor has gone far astray. The wedding will probably be a quiet affair, and bride and groom may make a

There were more farmers waiting to weeds, but still Harold De Lisle lingered. There were dresses that customers were waiting for, but still the widow's sewing machine was silent. The languidness and lethargy of looking like a poet and being a poet beat sliding down hill all hollow. The fifth "puff" in the Clarion was a send-off.

The event of the season occurred at the Methodist church two days since," it read. "As we have all along pre dicted, we have lost our fairest flower, In other words, Mr. Harold De Lisle prevailed upon the charming Widow man and wife in a very impressive ceremony. The happy couple left for Chicago immediately after, but may return next week to prepare for the jaunt

Ten days later in a distant state the bridegroom was talking up Bohemian oats. They had come to an understanding about money matters. They had understood that each had played the confidence game on the other and that

they hadn't \$300 between them. Editor Flint of the Clarlon and Fergus County Advertiser sat down and wrote an auction bill for Farmer Jones and told him what the price for 200 copies would be, and as he found himself setting it up he found himself say-

They stood under a palm tree. I sot on a log and watched 'em. The medicine man put the right arms of the savage and the explorer close together and then, flourishin' a dull lookin' knife, he nicks a vein in the white arm and then an artery in the black arm. The blood come a-gushin' and a-gushin' out of the black arm, and the medicine man scooped it up in the holler of his hand and rubbed it into the nicked white arm. He must 'a' rubbed in a pint before he closed the wound. Transfoosion o' blood is what they call it. They say it saves a white man from jungle fever and from all the evils of the miasma, of the hot swamps, of the damp heat, the rettin' vegetation. They say Stanley had black blood transfoosed into stood Africa, I know it's a common thing for African explorers to go through the transfoosin' process. And I'll foll you a funny thing about it. It
