

The Crittenden Record.

VOLUME 3.

MARION, CRITTENDEN COUNTY, KY., NOV. 30, 1906.

NUMBER 21

COLORADO OIL LAND AND CATTLE CO.

The Following Report Was Made By a Crittenden County Boy Who Is Interested

IN OIL LANDS IN COLORADO

Report as made to the Colorado Oil, Land and Cattle Co., Sept., 15th, 1906 and published in the Daily Mining Record of Denver, Colorado, for the first time.

"In the northeast corner of Chaffee county, the southwest corner of Park county and the northwest corner of Fremont county there is a basin which is completely surrounded by mountains, and inside this basin is where the Colorado Oil, Land and Cattle Co. secured the land mentioned in this report, covering the entire basin. This basin is supplied with numerous springs of water, which show on the surface of the water as fine a quality of paraffine oil as is found anywhere in the United States. The surface formation on this land, consisting of Cretaceous shales, sand and limestone, which with other surface indications, is good evidence of oil below. On the west side of this basin, on the mountainside, is a large field of vulcanized coal which dips toward and underneath this basin. The oil seepage from the spring, the bogs and gulleys is plain to be seen as the grass that grows on the many beautiful meadows scattered over the land in the basin. It is possible, and more than probable that the flow of gas that will be encountered in putting down an oil well in this basin will be immense.

"Take a map of Colorado, lay a straight edge or a rule with one end at the Florence oil field to the southeast and the other end at De Beque, and the other oil fields to the northwest. Then draw a line across the map. Now change your straight edge or rule with one end at the Boulder oil fields to the northeast, letting your rule drop down across the oil fields in the north part of South Park, extending to all the oil fields in the southwestern part of the state; draw another line across the map, and where these two lines cross each other is where this basin is located. To be more explicit, the crossing of these two lines will be on the southwest quarter of section 14, township 51 north, range 9 east, New Mexico, P. M. eight and a half miles north of Salida, Colo., and on the Calumet branch of the Denver & Rio Grande railroad, and six and one half miles east of Hecla Junction, which is on the main line of the Denver & Rio Grande railroad, and virtually is an extension of the famous South Park oil fields, where early in the summer Canadian capitalists bought up 15,000 acres of land for oil, paying \$2,000,000 for it, this being on a direct line with the Boulder oil field.

"Colorado is noted for its high-grade oil, and the wells at Florence (the oldest fields in the state) for their staying qualities. There are numerous upheavals over this basin, which shows plainly that they have been thrown up by the over accumulations of gas beneath the surface, which found vent through the crevices in the rocks, and this being the case it is hardly to be doubted but what each oil well put down will be a gusher. Every surface indication bears this out.

"While the above description may seem a little optimistic, there is nothing said only what I saw in looking the land over on different occasions in the past few months. There is another story to tell about this land. Every since this part of the state has been settled this basin has been known as the finest grazing land in Colorado and on my last visit about three weeks ago I saw thousands of head of cattle roaming at will over this basin, and ranchmen tell me that hundreds of head winter there and come out in the spring of the year in fairly good condition. There are about 3,000 acres of this basin suitable for agricultural purposes, such as the raising of hay and potatoes, and there are also about 1,000 acres of A No. 1 white and yellow pine timber on the land, which, when sawed into lumber, will bring a fancy price.

Card of Thanks

We desire to thank our many friends who so willingly came to our assistance when our house was destroyed by fire. Our constant prayers are that God's richest blessing may rest on all.

Gillie Thomason and wife.

Soldier in a Tight Place.

Most Marionites remember Mr. Elbert Degraffenreid. He is a brother-in-law to Mr. Cam Wallace, of this city and formerly lived here and at Mattoon.

Mr. Degraffenreid joined the army and was sent to the Philippine islands. He was assigned to company C. of the 9th infantry. This company was composed of 72 officers and men and they were sent to the island of Samar to suppress an uprising of the natives. On arrival they pitched camp, dug trenches, stacked their guns and made preparations for breakfast. There was no one on duty except the guard. All at once the air even seemed full of yelling, fighting Moros. There were in fact about 500 but reports were circulated and also it seemed to those interested that there were thousands of those vicious blood thirsty devils all fighting with bolos. It was a veritable surprise. Uncle Sam's soldier boys were caught like rats in a trap. Some one was at fault for this, but as death covers all faults the regulation court martial did not figure in this case. Each and every soldier did the very best he could under the circumstances and out of seventy-two men all were killed except one officer and ten privates. The conflict was hand to hand and desperate. With sure death staring them in the face the men fought like demons. It was merely a butchery. They were killed by disemboweling as they fought in the trenches. After the fight was over the Moros burned the dead by pouring coal oil over the bodies. Nearly all left stumps of bodies and legs. Degraffenreid escaped with his life but had the misfortune to lose his left ear from a bolo in the hands of one of the natives.

In the midst of the fight Degraffenreid saved the lives of five comrades by rushing into the thickest of the fray and absolutely carried them out. All this is a matter of official record and can be verified.

Mr. Degraffenreid was offered an honorable discharge or a promotion from the ranks for his distinguished conduct and bravery by the War Department at Washington City but would not accept either. He desired only to serve the remainder of his time as a private soldier which he did. At the expiration of his time he retired to private life and came home to his native land. He has been employed as baggage master on the Erie Railway and the last account his people had of him he had married and was doing well.

MISS DELLA KEVIL

A Marion Girl and B. L. Stevens United in Marriage November 26

Cards were received in this city Tuesday announcing the marriage of Miss Della Kevil to Mr. Blackman Lee Stevens. The wedding took place in Richmond, Virginia, Monday, November 26th, 1906.

Miss Kevil is the daughter of Mr. and Mrs. J. B. Kevil of this city and is a charming young lady. She left Marion about a year ago for North Carolina to practice osteopathy.

Mr. Stevens is a dry goods merchant of Smithfield, North Carolina.

Mr. and Mrs. Stevens arrived in Marion, Thursday for a visit with her parents. Mrs. Stevens will remain two or three weeks, but Mr. Stevens will be here only a few days.

Advertised Letters

List of letters remaining in the Marion, Kentucky Postoffice for week ending November 17th.

Berryman, E. E. Butler, O. J.; Crittenden, Lewis; Conger, Marion; Fletcher, O. T.; Ferguson, Marion; Gass, Harry; Hill, Claude; Hill, Jack; Higgins, Maud; Hays, Jno. Miss; Hunt, Winter; Hughes, Wm; Heyde, Jno. B.; James, Tom; John, Lanzo; Johnson, D. W.; James, Thomas; Loverin, Jim; Lows, Georgia; Leiter, W. W.; Maxifele, Will; McCord, W. K.; Pierce, Lillie; Purson, Nora; Rushing, Ed; Rushing, Frank; Sisco, Lewis; Towery, J. N.; Wood, E. T. Mrs. Watson, H. W. Mrs. Walker, J. H.; Wheeler, W. T.; Weatherholt, Ma. ion; York, D. L.; Crider, Addie, col; Postal, Cards: Furgerson, Marion; Granklin, Carson, J.; Fritts, H. G. Herod, Sam; Dodge, R. S. Hutson, J. T.; R. S. Hodges; Johnson, H. E.; James, J. A.; James, Florence; Jenkins J. R.; Kemp, M. V.; Kelley, Joel; Lemar, G. A.; Lovelless, R. T.; Lamb, P. C.; Lovelless, W. W.; Sharkey, W. A.; Shaders, W. H. Terr, Grace; Ruching, J. C. and Wyatt, Anthony.

In calling for these letters please say advertised. Geo. M. Crider, P. M.

VICTIM OF PNEUMONIA

S. P. Hinman, Operator at the Depot Died Sunday Evening

Mr. S. P. Hinman, of Evansville, who has been day operator at the depot for the past few months died at his boarding place, Mr. Rob't. Hodges' Sunday evening November 25th, at seven-thirty.

He was a victim of pneumonia and had been sick only a few days. He had a chill Sunday, but remained at the station until his time to leave.

Mr. Hinman has been in Marion nearly a year. He first worked as night operator but was promoted a few months ago to day work.

He was a very fine young man, always pleasant and agreeable in his manner. He won many friends by his excellent demeanor.

His mother, father and two sisters were with him at the time of his death. The remains were taken to Evansville for burial.

The funeral services were conducted at the home on Monroe Avenue, Tuesday afternoon at two o'clock and the interment at Oak Hill Cemetery.

The floral offerings were magnificent and the boys of the Western Union Telegraph Company acted as pall bearers.

A number of operators on this division of the I. C. attended the funeral.

A BUSY ATTORNEY

Knows Much Law and Practices For Many Clients

Mr. C. C. Grassham, formerly of Smithland, and now of Paducah, was in the city last week. Mr. Grassham is not only large physically, but is a lawyer with a large practice.

He is first representative of the Ayer & Lord Tie Co., of Chicago, and attends to all their legal business in this country. For this he receives his office rent free and a salary of \$2,500 per year.

He next represents the Illinois Central Railroad, and then the Hillman Land, Iron & Improvement Co. He also represents the Western Pipe & Tube Co., of Kewanee, Ill., the Morning Star Mining Company and the Memphis and Cincinnati Steamboat & Transportation Co.

For all these services he receives about \$7,000 and now has an offer from the Ayer & Lord Tie Company to come to Chicago and represent them exclusively for a handsome salary.

Has Issued Invitations

Mrs. Harriett Donakey has issued invitations to the marriage of her daughter, Miss Lena to William D. Baird, which will be solemnized December 6th, 1906, at the Cumberland Presbyterian church at seven o'clock.

The bride to be is a very attractive young lady, she is beautiful and accomplished.

The groom is so well known that it is useless to give his many good qualities. Mr. Baird came to Marion several years ago and has engaged in the tobacco business most of the time. A few years he was 'in a host' at the New Marion Hotel, but he soon grew tired of this and went back to his former business.

Returns From Louisville

Captain Haase and John L. Harpending returned from Louisville Sunday where they had gone to attend a stockholders and directors meeting of the Colorado Oil, Land and Cattle Co., of which they are officers. This company owns 5,920 acres of land in the oil district of Park and Chaffee county, Colorado. You will find in same issue of this paper a clipping from the Daily Mining Record, of Denver, concerning the properties owned by this company.

Administrator's Notice

All persons having claims against William H. Morse, deceased, will please present same to me by Dec. 15th, properly proven or they will be forever barred.

R. L. MOORE, Administrator.

Marriage License

John W. Simpson to Miss Lou Pickering. W. F. Cannon to Miss Nonie Parmaley. W. Reynolds to Miss Minnie M. Woodward.

Hugh Witherspoon to Rosa E. Denny. John Holdman to Annie Culley.

Notes of the Show

The County Fair was held at the opera house Thursday night, Nov. 22.

The cash receipts at the door were \$74.40. The expenses amounted to \$34, which left \$40.40 to the good. This is to be used for the benefit of the Presbyterian church.

Henry Haynes was ticket seller and Mr. Press Maxwell door keeper.

Miss Daisy Sink, of Rising Sun, Ind., was stage manager, drill master and promoter of the County Fair. Some of the children called her Miss Zinc.

Misses Lillie Cook, Jennie Potter and Mr. Percy Noggle, all did well. Mr. Noggle carried the part of Boss Jones. He was Boss of the Fair.

Yes, Bob Sayre has all right. He took the part of a typical boy and did not have to act much to do it.

Mrs. Dupuy looked well in glasses.

Carey Henry lost his whiskers too. They were in demand.

Did you see Mrs. Switzerburger? She was well made up. Some one asked Mrs. Sayre after it was all over if she talked dutch all the time.

Mr. and Mrs. Carleton had a great deal of trouble with their children. Of course they lack experience.

The Hosting girls succeeded in getting their noses in the air. Miss Leaf-fa Wilborn had Miss Della Barnes distanced though at that.

The drills and special songs were all good. The greatest hit of the show was the duet by Hazel Pollard and Dugan Ramage.

There were so many stage people that the question was asked, "from where is the audience to come?"

The management returns thanks to all those that helped in whatever way. The help of so large a number made it quite a success.

Mr. J. W. Blue was down for the part of Uncle Jake Sprucey but did not appear. The part was carried by Prof. Kee. He certainly looked it. It was too bad that he had to lose his whiskers before retirement but the needs of some of the other players necessitated this drastic action and so Uncle Jake stepped aside and got a clean shave. However, his good wife, Mrs. Dorr, would not recognize him afterward.

And were you not astonished at Mrs. Wilson. Who would have thought it? She sailed around and was perfectly at ease at all times and acted the part to perfection. Did not forget a word either and showed wonderful histrionic ability. Mrs. Wilson took the part and then walked to the lunch counter presided over by Miss Lake Farris and took the cake.

Will Clark was Hiram Green and his bride Mrs. Effie Jenkins. She played her part so well that one could almost tell she had been a young bride at one time. Peanuts popcorn and red cran berry water without sugar in it was in demand when this couple appeared. Hiram had money to burn.

All the special plays were introduced by Prof. Sparatti. Maurice Sutherland took this part. Introduced by him Mrs. Noggle sang a song, Walter Hutchen gave an exhibition of fancy paper tearing and Mrs. Trisler appeared as Madame Slenderpole with her toes turned in. This is a difficult feat. The wild man from Borneo barked, the Hokey Pokey man shouted, "Hokey pokey have a cakey, More you eatery more I makey."

The star part was taken by Mrs. A.

H. Cardin. Mrs. Cardin gave every evidence of having been before the public before. She, like Mrs. Wilson, was perfectly at ease at all times and if we mistake not coached some of the other players. Mrs. Cardin was the widow and the man she finally landed was Mr. H. H. Sayre in the part of Widower Jones. Mr. Sayre also did well. While falling under the charms of the dashing widow he sat at one end of a rustic seat swinging one foot and with his chin in his hand and elbow on knee listened intently at her tale of woe. At each pause she made for breath he would say, "Do tell." He had a great deal of trouble with his children but this did not feaze the widow. She took widower, children and all.

BY DECISION OF THE JUDGES

Morganfield High School Wins Victory Over Marion High School Friday Night

The Marion High School met the Morganfield High School in a debate last Friday night at the Grand Opera House in Morganfield.

The subject was:—"Resolved that the United States is following in the footsteps of Ancient Rome"

Morganfield discussed the affirmative side of the question and Marion the negative.

Gray Rochester, Misses Annie Dean and Fenwick Wathen represented the Marion school.

Though, the decision of the judges was against our school, the representatives certainly did well, answering every argument that was given by the affirmative.

Morganfield certainly should be proud of the victory, for the students of Marion Graded School are mighty hard to down.

Messrs. Sugg, of Henderson, Sloan, of Nashville and Knott, of Atlanta, were the judges.

Quite a number of the teachers and pupils attended the debate and were received with hospitality. If Morganfield will meet us at home, we will return good for good.

AT THE SCHOOL AUDITORIUM

Monday Night Dec. 10th. One of the Best Companies Out of Cincinnati

On Monday evening, December the tenth, Marion will be most fortunate in having brought to her talent that is recognized by critics to be most artistic. The program will appeal to all, old and young, even those who are not music lovers and claim they do not understand music for,

"There is in souls a sympathy with sounds, And as the mind is pitched, the ear is pleased With melting air or martial, brisk or grave; Some chord in unison with what we hear Is touched within us, and the heart replies."

There is nothing on the program heavy and fit only for the musical artist, but is a carefully selected lot of gems and bids all who are care-worn to come, for such "music washes away from the soul the dust of every-day life."

"The man that hath no music in him self Nor is not moved with concord of sweet sounds, Is fit for treasons, stratagems, and spoils; The motions of his spirit are dull as night, And his affections dark as Erabus: Let no such man be trusted."

This is the way Shakespeare in his "Merchant of Venice" stamps a man without appreciation for music.

The talent is brought from Cincinnati and each one is an artist, bearing wide reputation. The concert is given under the auspices of Dr. P. S. Stillwell and Miss Lillie Cook for the benefit of the sixth grade of The Marion Graded School.

House and Lot for Sale.

One house and lot in Marion, corner of Depot and Walker streets. Comparatively new, six big rooms, four porches, one hall, two good cisterns and good outbuildings. For terms address J. P. REED, Kuttawa, Ky. 20-3

POOLED TOBACCO IS NOT TAXABLE

The American Society of Equity Has Practically Won Its Fight Against Owensboro

OVER TAXING POOLED TOBACCO

Owensboro, Ky., November 23.—The American Society of Equity has practically won its fight against the city of Owensboro over the question of taxing the pooled tobacco owned by the members of the Society. Judge Henry S. Barker, of the Court of Appeals, has delivered an opinion in the case, affirming the decision of Judge Birkhead, of the Daviess County Circuit Court, and refusing to dissolve the temporary injunction granted by Judge Birkhead prohibiting the city from selling any portion of the tobacco for taxes. He goes further, and says that the pooled tobacco was never subject to taxation by the city, that the ownership never passed from the growers to Turpin & Wood, and the mere fact that the tobacco was housed in Owensboro on taxing day did not give it a situs for taxation.

The sweeping decision of Judge Barker is likely to put an end to the case although it might still be tried on its merits in the circuit court. Judge Barker's opinion is full and clear. He maintains that the growers did not pass the title of the tobacco to the warehousemen, but simply made an agreement with them whereby they hoped to get their tobacco on the market in better shape and in more remunerative form than they were able to do themselves. The motion to dissolve the injunction of the circuit court was overruled on these grounds.

MR. RICHARD SHELBY

An Old And Respected Citizens of the Salem Valley Called Home

Mr. Richard Shelby, one of the oldest and best known citizens, of Salem Valley, died at his home Thursday morning November 22, 1906.

He was born March 9th, 1834 in Livingston county. He was married July 7th, 1852 to Miss Elvira Fraser. He has been a member of the Christian church since 1872.

He is survived by his wife and seven children, Dr. T. R. Shelby, of Princeton, S. L. Shelby, Mrs. W. B. Crichtlow, Misses Ella, Fannie, Willie, Shelby, and Mrs. Birdie Grissom, of Salem. The funeral services were conducted by Elder Eldred, of Princeton.

Show Every Night

The coming week will be a full one at the Wells-Bijou Theater in Evansville with a show every night. Beginning Sunday the attraction for the first three nights will be the great Irish Tenor Fish O'Hara, whose voice is said by the critics to outrank Chauncey Olcott's. His vehicle is Mr. Blarney from Ireland. The booking for the last three night of the week is Grapevin & Chance in the big musical show. The awakening of Mr. Pipp. This is a widely different but equally as good as the former attraction. Both will be put on at popular prices.

TO POLICY HOLDERS

Of the German Insurance Company of Freeport

Upon presentation to this office we will endorse all policies of the German of Freeport, and give a guarantee that the contract will be fulfilled as expressed in the policy. This guarantee will be made good by the Royal Insurance Company, of Liverpool. Examine all your policies and if any are found to be written in the German, of Freeport, forward here at once.

GEO. M. CRIDER & Co., Marion, Ky.

Card of Thanks

We wish to thank the people of Marion for the kindness shown us during the illness and death of our son.

MR. AND MRS. HINMAN, Evansville, Ind.

KENTUCKY FLUORSPAR LEAD AND ZINC!

Under Date of Nov. 22, the Manufacturers' Record Contained the Following Report By Albert Phenix, Who Recently Visited this District.

No other part of the United States has a more unique history in the way of mineral development than the section hereabouts, and in none are these development undertakings of a more interesting character. Nevertheless, I presume I am safe in saying that the preponderating majority of the people in this world know no more of conditions in this section than I did when an invitation came to me to come over here and see what is being done in the way of flourspar, zinc and lead development. I had seen flourspar specimens at the magnificent State exhibit made by Kentucky at the Louisiana Purchase Exposition in St. Louis, and had vague ideas of the lead and zinc deposits Kentucky was said to contain. But when Marion was mentioned the name conveyed to me so little of intelligence as to what I would find down here that the results of my investigations are altogether in the nature of revelations to me.

I find in flourspar this section is producing practically everything that comes from American flourspar mines today, and is seemingly destined to largely supply not only the entire American demand for this product, but to ultimately ship its output to foreign ports as well. Also that there are geological and mineralogical reasons for believing that this district will become a great and permanent producer of lead and zinc, rivaling the famous Missouri lead and zinc sections, while there are likewise expectations that there will be an important revival in iron ore production here, as well as a development in the mining of barytes and other minerals, including cobalt, a substance so important in electrical work that Edison has declared he can tremendously reduce the cost of electric automobiles by its use. Cobalt is a new find here, but it is said to have been found in promising quantities, and it is hoped that by further prospecting it may develop into a commercial proposition. Barytes is found here in several counties in quantities sufficient to justify mining operations, and some of it runs as high as 99 1/2 per cent. pure.

It is on other minerals, however, that the section bases its claim to consideration, especially flourspar and zinc, and while the present iron production is of minor importance, too, is counted on too add to the development and wealth of the section, and is iron which gives to the district its most unique historical aspect. For iron has been mined here for three-quarters of a century, and one of the mines was owned and operated by Andrew Jackson, and is known to this day as the Jackson mine. In this district also, on the Cumberland river, in Crittenden county, was the site of the Kelly furnace, where the first Bessemer steel ever made in the world was produced; for it is a matter of record that some years before Bessemer announced in England the process of making steel, to which his name is irrevocably fixed, William Kelly had discovered the same process over here and had entirely perfected the process of manufacture on identically the same lines for which Bessemer has received such universal credit. There were dozens of furnaces in this district before the war operated by charcoal fuel and by slave labor, and in Lyon county there are still two or three charcoal furnaces in operation to this day.

There is a lack of railroad transportation here, however, and in competition with modern methods the iron mines of this district have little show in recent years. There are, however, fine bodies of hematite ores

in Crittenden, Lyon and Livingston counties, and while exact definite data are yet to be compiled, it is the belief here that a very important iron-ore field may yet be demonstrated to exist in this section. With lime, flourspar and coal in the immediate vicinity, with the inevitable construction of railroads to open up the whole district, and with three great navigable streams skirting the district—the Ohio, Cumberland and Tennessee rivers—it is declared that a more favorable location for iron-making can hardly be found.

The only notable effort that has been made to develop the iron industry here on a big scale was a futile undertaking made some 15 years ago by Thomas W. Lawson and Boston associates. The fine town of Grand Rivers was laid out at point where the Tennessee and Cumberland rivers come within a mile and a-half of each other. Plans for a great industrial center at Grand Rivers were made, a blast furnace was built and houses were constructed, among them a business house for Lawson made of the iron ore of the district. Numerous reasons are given for the failure of this project. The fact that although the town was on a branch of the Illinois Central Railroad, it was 25 miles away from iron ore, which had to be hauled in wagons, is considered as an entirely sufficient explanation of the failure, to go no further, although another might be suggested in the discovery made quite generally in the South following the town boom era of 15 years ago that even an altogether successful blast furnace is a wholly inadequate foundation on which to build a big industrial center.

Although this mineral district, composed, on this side of the Ohio river, of the counties of Crittenden, Caldwell, Livingston and Lyon, is at the present time under development as to flourspar, lead and zinc to an extent and on a scientific basis not before reached, it is the belief that merely a beginning has been made, and that the next succeeding years will see a degree of development of vastly greater importance. In the light of what is expected of the district by those interested, it may be commented that nothing in the way of the marvelous has been achieved up to the present time. But it is explained that the district is platted over with mistakes, and it is declared that if a man comes in here with money and experience or with a disposition to seek or avail himself of expert advice as to conditions, geologically and mechanically, there is not a more inviting field anywhere. Some failures have been made here in the flourspar, lead and zinc lines by parties who had little money and less experience, and who proceeded on the theory that profitable operations could be conducted from the "grass roots." On the other hand, there have been numerous comfortable fortunes realized out of operations here; a number of companies are now operating very profitably; but there have been no companies organized on the scale of the two operating just over the Ohio river in Hardin county, Illinois, where at Rosiclare John R. McLean, the Washington and Cincinnati newspaper man, and at Fairview John Mulholland, New York and Kansas City banker, are extensively engaged in flourspar, and lead and zinc mining.

Geologically this is a unique field, and unlike any other. In a recent report made by E. O. Ulrich and W. S. Targier Smith, under the direction of the United States Geological Survey, it is declared that this district differs from others chiefly in the presence of basic igneous dikes, in

the abundance of fluorite and its almost constant association with lead and zinc ores, and in the mode of the occurrence of the ores, which are found principally in true fissure veins that have resulted from fracture and subsequent faulting. Local authorities point out that the ore bodies are along fault planes and true fissure veins, and that in one of the numerous intrusive igneous dikes ore is carried as contact on each side of the dike. The displacement along the fault planes in fissures is known to exceed 1500 feet, which gives certain 3000 ft. as the depth of the ore deposits, with every geological reason for supposing that they go even beyond that to depths where mining would be impractical. The country rocks penetrated by these fault planes and fissures are the Ste. Genevieve, St. Louis and Spargen Hill limestones, which are the same that carry the lead and zinc ores of Southwest Missouri. It is argued that at any increased depth there should be no less ore than at present. The deepest mines on either side of the Ohio river are those of the Fairview and Rosiclare properties, and as they are down no more than 385 feet, it is evident that merely the surface has been scratched so far.

With these conditions, it is declared that the district needs only capital in sufficient quantities and efforts intelligently made to secure results, there being no question of the existence of ore or of the quantities of it.

In a letter from C. F. Z. Caracristi, published in the Manufacturer's Record of March 22, 1906, the statement was made that the flourspar now being shipped from England to this country comes from the mill tailings of abandoned lead mines, none of them now being worked, and that in two years these old accumulations will become exhausted. At the present time England is shipping this flourspar as ballast; it is admitted duty free, and is being sold under cost of production. With the exhaustion of the English sources of supply there will be an increased demand for American flourspar. About 70,000 tons are used for smelting purposes in this country now, and the use is constantly increasing. It is the finest flux known for metals and refractory ores, and is used by the big steelmakers of America. It eliminates largely sulphur and phosphorus, makes the tensile strength greater and enables lower grades of iron to be used, and is of vast advantage in blast furnaces, open-hearth steel furnaces, cupolas, crucibles and brass foundries. The finer qualities are ground and used in chemistry for enameling, glassmaking, copper refining, etc.

Local authorities state that published statistics as to the production

of flourspar in this district are too high. Instead of 26,000 tons for 1905, it is declared that 23,000 tons would be nearer the exact figures. It is also claimed that the shipment from the Illinois mines was materially less than published figures show, so that less than 50,000 tons was about the quantity mined and shipped from the Kentucky-Illinois field last year.

To meet all present requirements, therefore, there would have to be about a 50 per cent. increase in production, for outside of the Illinois and Kentucky fields there are declared to be no other deposits in the world that may be relied on for such extensive and economical development as these. There is some flourspar in Germany, but so little that its exportation is prohibited, and right now German consumers of flourspar are writing to Kentucky companies for prices for immediate delivery in thousand-ton lots. As the known deposits on the Illinois side of the river are in the hands of the companies now operating there, it devolves on the Kentucky field to furnish the greatly increased demand that will soon be made for American flourspar. It is the expectation locally that the district will arise to the occasion. If this is done there will be a good deal of outside capital put into operation here.

It would seem that the outlook and the possible profits are sufficient to induce such investments, especially since improved processes have added new possibilities in the way of profits. Heretofore it has been impossible to separate flourspar and zinc, because they are of the same specific gravity.

While flourspar is helpful in all other smelting operations, it is harmful to zinc, and such ores have been thrown out. By the discovery of a new process now in successful operation here, flourspar and zinc are separated completely, and as zinc occurs in almost all flourspar mines, there will be a greatly-increased production. Present operations are being carried on by the Sanders Ore Separating Co., with daily capacity of 25 tons. The Messrs Sanders, of New York, believing that the field offered advantages for operations here, established the works. In addition to this process, others are being experimented with by various mine operators here, and it is considered altogether probable that other discoveries will be made, greatly to the advantage of the entire district.

Lead has been known to exist in this field since 1812, and in 1835 operations were carried on in this line by Andrew Jackson and others. Mining in a small way was continued down to the war, but no flourspar was shipped until 1873. Lack of transportation facilities retarded the mining operations, and even now there is so great a lack of adequate transportation that developments in that line are urgently in demand. It is declared that an electric trolley line 25 miles in length would open the whole district and become one of the best paying propositions in the country. It costs now an average of \$1 per ton to transport ore by wagon to the railroad or river. If half this price were charged by the trolley line it would yield a handsome revenue, as the production of the district would be greatly increased, and it would be in position to supply the entire demand of the country for flourspar, shipping by barge to Pittsburgh and other large cities reached via the Ohio and Cumberland rivers. In addition there would be a large local business secured from a territory not supplied with railroad transportation, and there would be an increased population with an accompanying still further increase in local business. It is declared that the line could be easily built; that the location is an ideal one for the trolley line, and that investigations will demonstrate the proposition to be a particularly attractive one from any standpoint.

There have been periodical seasons of activity in these fields, and a considerable amount of money, mostly in small sums, has been put into the district at various times by people from a number of outside places. One of the oldest operations is at the Columbia mine. The present Colum-

Marion, - Kentucky

FLUORSPAR, LEAD AND ZINC.

(Continued from second page)

his Mining Co. is owned by Paducah, Louisville and Chicago "people" and has no local capital in it. This company's holdings are along the Columbia fault, where developments have been made for a distance of nearly two miles. This is a lead and zinc field, where the zinc is not mixed with the fluorspar. The field is practically owned and controlled by the Columbia Company and Messrs. Blue & Nunn the latter of this city. While the Columbia Company has probably made the largest shipments from this district, yet Messrs. Blue & Nunn have made combined shipments aggregating from 10,000 to 13,000 tons. A phenomenal production was made by them at the Old Jim mines, where they took out of an open trench carbonates needing no concentration of the amount above named.

The zinc ores here run much higher in metallic zinc than those of Joplin. The average with the Joplin ores is 34 to 4 per cent. Here the average is 15 to 20, and in some rich samples of carbonates as high as 30 per cent, or more is shown. The crystallization is finer than the Joplin ore, however, and a fatal error has been made in one instance at least in putting in a mill of the Joplin style. More ore was lost in the tailings than was saved in the concentrates, and the mill will have to be remodeled for finer grinding.

The Kentucky Fluorspar Co., of which four Marion men own a controlling interest, and in which there is Chicago capital invested, have been in continuous operation 10 years, and may be ranked as the pioneers among those at present engaged in fluorspar business here. They handle, grind and ship most of the fluorspar in the Kentucky district. In addition to buying the fluorspar from other producers, they are large miners themselves. In ground fluorspar there is a very material increase in output. The Kentucky Company ground and shipped 2500 tons in 1902, while in 1905 the amount was 5300 tons. This district has no competition in ground fluorspar, and its product is shipped all over the country and to Mexico and Canada. The Kentucky Company has been limiting its production to the finer grades. From its Memphis mine the ore averages 99 per cent. calcium fluorites. As the highest English average is 88 per cent., the foreign is adapted simply to fluxing.

This district as a whole has been handicapped by lack of money or the proper expenditure of it. A great deal of the work—and there are hundreds of openings in the district—is of a very primitive kind. Here and there machinery is being put in, and some of the properties are being

excellently equipped for extensive development. The Kentucky Fluorspar Co., which owns numerous properties besides the mill at Marion, is confining its efforts to the development of four mines only at this time. One of these, the Memphis is already equipped with hoisting machinery, compressor, air plant and such modern machinery, with the result that it is producing 60 tons of ore daily at less expense than 10 tons were formerly produced under the old hand methods so common in this field. Equipment is on the ground for largely increasing the output.

At the long-operated Yandell mine where gravel fluorspar is found comparable with the gravel iron-ore deposits of the peninsular district, there is also an equipment of steam hoist and other modern machinery. It has been proved by numerous shafts that the character of this deposit extends some distance from the present operating shaft, so that the supply of this fluxing spar can be increased almost indefinitely to meet the growing demands.

At the Hodge mines the Kentucky Company is sinking three shafts on three separate veins. Here the fluorspar is strongly disseminated with lead and makes every attractive proposition. The company is proposing the installation of a central power plant to work the various openings that have been made.

The Tabb mines will be the last of the four properties the Kentucky Company will get to but when developed they are expected to prove very satisfactory producers of fluorspar, lead and zinc. Up to a year ago all the production from these mines was simply through surface openings.

Along the Tabb fault is the Tabor property, a well-developed mine that has already produced thousands of tons of fluorspar and lead. The mine has been developed 214 feet, and levels have been driven through a solid vein of lead and spar 300 feet in length, showing an ore body of from 4 to 16 feet wide, with well-defined walls. A steam plant is about to be installed here. Adjoining the Tabor is the Ashbridge mine, which from the discovery shaft has produced about 10,000 tons of gravel fluorspar in a distance of 264 feet. This shaft is now down 200 feet. At the east end of the property two new shafts have been put down, and at 80 feet a six-foot vein of ore was struck, which has been drifted on for 100 more feet. Adjoining is the Pogue mine, now opened to a depth of 195 feet, which has produced thousands of tons of ore. A new 80-horse-power steam plant has recently been installed here. Between this and the Yandell a number of openings have just been made, all of which are in spar.

The Marion Zinc Co., is an organization of outside capital, mostly of

Fort Wayne, Ind. The president of the company is Mr. C. S. Knight of Fort Wayne, who has been in the district giving his personal attention to the work for the past five years. At the Riley mine, a spar and lead mine, now down a depth of 209 feet in a shaft, there is a fine equipment of steam hoist, drills, etc., and a regular Joplin mill for the separation of the spar and lead. Work is being done at 35, 70 and 172 foot levels, and at 172 feet they are cross-cutting. There is a production of 20 tons daily, and the work is going ahead. In driving the 172 cross-cut a fine vein of steam coal four feet thick was struck. This company is arranging to put in a grinding mill to make ground spar for the market.

At Lola there is the Mann mine, one of the principal zinc mines of the district, which is under private ownership. Carbonate of zinc is being mined here, of which there are 600 tons piled up on the dump ready for the market. A nine-foot face of this valuable ore is exposed at the present workings.

Over in Livingston county, about one and one half miles south of Salem, is the Eastern Star group of mines, owned by the Eagle Fluorspar Co. of Wheeling, W. Va. Here a shaft has been sunk to a depth of 180 feet, and at this depth the vein, between perfectly well-defined walls, was 20 feet, measured by tape line. The ore is lead, zinc and fluorspar. The company has been working for three or four years on the problem of separating the zinc and fluorspar, but with what result is not yet ascertained.

The Albany Mining & Investment Co., composed of Muncie (Ind.) people, have erected at the Nancy Hanks mines, near Salem, a Joplin type of mill for the separation of lead and fluorspar. They have also added a small fluorspar grinding plant. They are down about 220 feet, are in very valuable ore, and are one of the dividend payers of the district.

Between the Evening Star and Nancy Hanks properties is the Morning Star mine, owned by the American Lead, Zinc & Fluorspar Co., an organization of Cleveland capitalists. Two discovery shafts have been sunk, cutting the vein in each. The company also run in a tunnel, exposing a vein of fluorspar and lead measuring 20 feet in width.

In addition to these properties there have been opened the Hudson mines, the Butler, the Guill, Babb, Klondike, Benard, Pierce and Hodge, in all of which development work has been done sufficient to prove that the vein are continuous.

In addition to this mineral wealth of such variety, there is near Salem what is called the Stevens fire-clay deposit. Not only is there a practi-

cally inexhaustible quantity of it, but so superior a quality of fire-clay has it proved to be that it stands a handicap of \$2 per ton for hauling by wagon from Salem to Marion. Over 13,000 tons of the clay have thus been moved and shipped by rail to the Western Tube Works at Kewanee, Ill.

With adequate transportation facilities, which can hardly be much longer in coming in, it would seem that there is a combination of conditions here which ought to prove very attractive to men with the means and the knowledge necessary to bring about a really notable development of the vastly valuable resources of this neck of Western Kentucky.

ALBERT PHENIS.

Local Option Election Friday Dec. 7th.

The election set for the above date should bring every man to the polls that favor the moral and intellectual elevation of our country. That there has been great revolutions in regard to the drinking customs of our people are unquestionable. This revolution has necessarily caused a change of sentiment in regard to the sale of whisky. There is a tidal wave of prohibition sweeping over our beautiful southland and penetrating many of the liquor fastnesses of the East and North. Tennessee, Georgia and Texas are largely under the control of prohibition laws. Quite a number of the other southern states are falling into line. Even Kentucky is not lagging behind in this movement. About two-thirds of the counties in Kentucky are already under local option rule. Almost every month some county in the state votes on this question, and so far, with one or two exceptions, every county has voted for local option. Can the citizens of this county afford to vote against it? Certainly not. There are only two or three reasons which a man could possibly have for voting against local option. The man who wants to sell it in order to make money out of it will vote for it. This, perhaps, will include a dozen men in our county. These men want to make money whatever may be the results of their business. This is purely a selfish motive. There is another class that may vote for it because they love to drink it. They want to make provision to fulfill the lusts of the flesh, Rom. 13:14. They want it to satisfy an abnormal appetite. They want to make it convenient for them to get it regardless of consequences of the rising generation. When you hear a man say that "prohibition does not prohibit," or that there is "more whisky sold under local option than under saloons," forty-nine cases out of fifty that man loves his dram and wants to make it convenient to get. Notwithstanding it may subject his boys to the greatest temptation and to the probability of becoming a drunkard, yet he will vote for it, because he loves it. There is only one other reason that I can see why a man should vote against local option; that is for the revenue. Shall we subject the young men of our county to the insidious temptations of the saloon for a few paltry dollars? Would we measure the character and destiny of young manhood in dollars and cents? Have we no higher ideals of life than this? Let us give such an overwhelming majority on the 7th, of December and will give no uncertain sound in regard to the moral and intellectual development of our country.

JAMES F. PRICE.

Ruth

Roy Guess, of Marion, was through here Saturday.

J. M. and Shell Spickard went to Princeton Monday.

Albert Hillyard and wife went to Fredonia Friday.

J. M. Hillyard and Master Orr went to Fredonia depot Thursday and brought out goods for J. T. Morgan.

Earl Morgan helped J. A. Clift strip tobacco several days last week.

J. M. Spickard is riding sheriff.

J. T. Morgan took produce to Princeton and bought back goods, Friday.

C. C. Vinson, of Sons School House, got a load of boards from J. T. Morgan Saturday.

Mrs. Mildred Harper and son, of Marshall county, visited in this neighborhood last week and attended church Sunday.

Albert Dunn and wife, of Crider, stayed at T. W. Morris's Saturday night.

Miss Aldora Cartright and Merchant Brown and wife, of Farmersville, were at church Sunday.

Misses Lucy, Edna and Jennie Vinson and Dora Blackburn visited Misses Morgan's Sunday.

J. M. Stevenson and wife, of Princeton, were at church Sunday.

Messrs. Brown and Blackburn have moved their saw mill to Mr. Tackwell's on the Vanhoosier place.

TELEPHONE 136

FRIDAY, NOV. 30, 1906.

AMONG OUR CHURCHES

Rev. J. H. Butler preached two very good sermons Sunday.

In the morning he talked on "Intemperance," his text is found in Ephesians 5:18—"Be not drunk with wine, wherein is excess, but be filled with the spirit." The subject was divided into three thoughts; the evil of intemperance, the causes of intemperance and the remedy for intemperance. Some of the evils are; loss of health, an inactive brain and demoralizing to character; some causes, hereditary, natural depravity, association, and open saloons; remedies, first remove the causes as many as possible and then depend on Christ to help overcome all the temptations in the way.

0-0

In the evening the sermon was addressed to young men, the subject was "Secret of Success." The text is found in Joshua 1:8—"Thou shalt meditate therein day and night, that thou mayest observe to do according to all that is written therein, for then thou shalt make thy way prosperous and then thou shalt have good success." The following are some of the secrets of success:—Be careful in selecting a calling, diligent in business, honest and upright, kind and courteous, wise and prudent, sober and temperate, watchful and prayerful, courageous and hopeful, earnest and faithful and be a Christian.

After the close of this service, Mr. and Mrs. W. S. Hutchin united with the church.

0-0

Rev. Elgin preached at the Methodist Church Sunday morning. His subject was "Our Enemy." The text used is found in Isaiah 5:22-23,—"woe unto them that are mighty to drink wine, and men of strength to mingle with strong drink."

23rd—Which justify the wicked for reward and take away the righteousness of the righteous from him.

He talked of the evils of selling and using strong drink.

Mr. T. H. Cochran's and Dr. Nunn's babies were baptised. The Nunn baby cried while being baptised and the Cochran baby laughed.

0-0

The subject at the Methodist church last Sunday morning was "Our Enemy." Text Isaiah 5:22-23. Our greatest enemy was shown to be whiskey, its use and sale.

1. It is the enemy of the man, physical, mental and moral.
2. Enemy of the home.
3. Enemy of the dearest relations and fondest affections.
4. Enemy of business and financial interests.

II. This enemy must be gotten rid of. How?

1. Subdue, if possible.
2. Go out of business, at least, with the enemy.
3. Expel it.

A fine and attentive audience heard the sermon and it is hoped it will bear fruit. Services every Sunday morning and evening. The public cordially invited.

0-0

Pastor U. G. Hughes filled his regular appointment at Old Salem church last Saturday and Sunday Baptizing Sunday morning at 10 o'clock preaching at 11, baptizing again at 1 p. m.

0-0

The subject at the Methodist church on next Sunday evening will be, "A Correct Life and its Influence." All, especially young men, invited.

The Falling Leaf

By RUSTIC

"It hath been so with rulers, Emperors
Nay, Sages who held secrets of great
time;
They have sore sickened at the loss
of one."—George Eliot
Life's air is full of falling leaves.
Man sobs slowly, frets and grieves
That summer is no more.
Time pauses not. Our days fly by.
Hopes of our hearts fade, fall of yore.
Yet Hope lives as of yore.

MARION SCHOOL SPARKS

(By SALLIE ALLEY.)

New bookcases, new maps, and new song books, all purchased by the school itself, water-coolers given by the trustees and individual cups purchased by the pupils. Besides that the teachers expect new desks and chairs before Christmas. Marion's school is most certainly up-to-date.

•••

Good attendance, good work and splendid interest in every department. Everything is moving in the right direction.

•••

The faculty has organized a "Teachers Improvement Society." It has regular meetings, at which splendid and well prepared programs are carried out. The teachers expect to derive much benefit from this work.

•••

Many contagious diseases threatened the attendance for a few weeks but now all danger is past inasmuch as teachers, parents and Board of Health can make it.

•••

The third, fourth and fifth grades made a flying visit to "Petrified Hill" not long ago. They reported a delightful and profitable time, although they did not start until after school dismissed. Some of these primary students are now able to astonish their High School friends with their knowledge of Geology.

•••

Miss Carolyn Harris, third grade teacher, is very ill this week. Miss Mary Deboe, senior in the High School, is teaching her grade.

•••

Mrs. Walker, first grade teacher, has been teaching Whittier's "Barefoot Boy" to her class. After a few minutes work one little boy eagerly reported his ability to repeat the opening words. In all seriousness he repeated these words, as the third line, "With thy turned up Yankee Doodles." It took faithful work on the part of teacher to convince the little fellow that the poet had said "pantaloon."

•••

The fourth grade teacher reports that her room is now the proud possessor of a beautiful bookcase made by Senator Maxwell with his own hands. Master Robert M. Sayre presented it but admits that the Senator made it. The teachers invite all of the many friends and devoted admirers of this much admired statesman to visit her room and view with their own eyes this newly acquired treasure. She says that she feels confident that the present visitors register used in her room will not hold the names of those strangers who come to see Senator Maxwell's handiwork.

•••

After a sketch by the teacher on the blackboard during a physiology lesson, this was found on an examination paper, "The small intestine is like a rubber pipe on the outside and like a washboard with holes in the inside. I don't see how we live with it in us."

•••

The grades on the lower floor do not have recess at the same time as those on the upper floor. Professor Keese brought over a great big bell to be used below and gave it to one of the teachers. "The chicken neck breaking" act with this ding dong did not appeal strongly and each teacher passed it on. It finally lodged with the teacher of the second grade. It is real interesting to watch her ring this bell (with both hands.)

•••

Not long ago a pupil in geography stated that a certain mountain was 50,000 miles high in place of 50,000 feet high. Little Joe Walker asked the teacher if you could not step into heaven from the top.

NEW LAW!

The new tax law, 700 tax warrants are in my hands for collection and must be collected at once. The new tax law is right to the point. All who failed to pay their taxes by Nov. 15 will now have to pay cost and six per cent penalty, six per cent interest and six per cent commission on tax interest, penalty and cost. Do you want me to levy and advertise and sell, if so it will cost you more and will be unpleasant for me. All persons working for wages will be garnished at once if they do not come and pay their taxes. This will be an additional cost to you.

The new tax law means pay your taxes. Kindly tell your neighbor.

Very respectfully
J. F. FLANARY, S. C. C.

MINING NOTES

John R. Steinman, in driving a drift southwest at the 100 foot level in the Ada-Florence mine, made another rich strike. He had in the drift four feet of lead and fluorspar and at forty-five feet from shaft cut another vein 26 inches in width assaying 32.5 in metallic zinc, 3.39 in lead and 2 per cent. in fluorspar. Consequently when you visit the mine the first thing Steinman says to you is, "Won't you go down and take a look?" and it will pay you to do so.

0-0

The Leona and Glendale mines are shipping a car of ore each week and are getting in shape for permanent work.

0-0

The Miller carbonate of zinc mine don't do much loud talking, but the weekly shipments are as regular as clock work.

0-0

Capt. Haase has completed the installing of the machinery at the Tabor and Asbridge mines and is now rushing things, mining and hauling the ore to Mexico for winter orders and of course more money.

0-0

The owners of the Hopewell mine are now putting the roof over the new derrick and within the next ten days they will have completed the installing of their sinking plant.

0-0

The Nancy-Hanks continues with the same regularities for which it is noted. The success attained on this property certainly should promote greater courage and endeavor in the district. Patience and perseverance are always demanded.

0-0

C. S. Knight shipped three car loads of lead and spar the past week from this mine, the Big Riley.

0-0

D. Grant Hearne returned to Wheeling, W. Va., last week where he has gone to have some screens made to his order. He hopes to return within two weeks and will at once start his two hundred ton concentrating mill.

0-0

The Pariah mine near the Tabor in the Mexico district, have their new steam sinking plant in operation and informs us they will now sink their permanent shaft 100 feet deeper.

0-0

H. D. Walford was here this week looking for good machine men for his mine, the Klondike. He has decided to sink his 300 foot shaft and another 50 feet. This is one of the best producing mines in the entire district.

0-0

A. E. Detweiler, secretary of the Edwards Mining Co., was in the city this week and arranged to erect a building on the property and in which they will install a sinking plant. They expect to have every thing completed within the next sixty or ninety days. They have been working and hauling spar the past week and will continue to do so as long as weather and roads will permit. The sinking of this shaft is progressing nicely and will be pushed as rapidly as possible. All through the winter keep your eye on this property.

0-0

All ye who may read this and who are faint hearted, let me call your attention to one significant fact. Have you ever noticed that almost every noted mining property, no matter where situated, has been financed by capital other than where the mine is located. Leave and see now. Crittenden county is an exception. The people here are not afraid to eat of the pudding before passing it around. It is indeed a credit to this district when you consider the amount of home capital which is invested in the numerous mining properties in Crittenden county. They, the majority, have no reason to regret a penny so invested.

Autumn Voices

By RUSTIC

When autumn binds her sheaves,
Through yellow rustling leaves,
I hear a voice that grieves,
In solemn undertone,
Chiming with sweetest moan,
In mournful melody.
Echo to this sad strain
In my heart found refrain,
Repeating o'er again
Its sad note of farewell;
Adieu to summer fair,
To balmy, perfumed air,
Bird, bee, and flower.
Then in my spirit's ear
A voice I seem to hear,
A deeper voice and clear,
Which said "Be of good cheer;
True mortal joys will pass,
All flesh is like the grass,
But God abides away."

No hunting or fishing allowed on my farm.
W. M. Clark.

\$2 Per Day House

Good town and all right. Reason for selling am going west. Will sell for cash or on three or five years time. A Bargain. Call on or address

D. W. STONE, - - Tolu, Kentucky.

Crayneville

Dorcas, the nine year old daughter, of Mr. and Mrs. George Tabor, died very suddenly Sunday evening. Besides her parents she leaves two brothers and four sisters to mourn their loss. She was buried Tuesday at the Crayneville cemetery.

Preaching at Crayneville church Sunday Nov. 25, by the pastor Rev. W. T. Oakley. A large audience as is always the case.

Mrs. Nina Cruce joined the church Sunday.

Mr. A. P. Lack's father from Christian county is visiting him this week.

Mr. J. R. Woodall had two horses to die recently of blind staggers.

Rev. Henry Holloman is reported better at this writing.

Go to J. F. Canada's and buy goods as cheap as the cheapest.

Corry Minner and E. H. Bigham were in Fredonia Monday on business.

Mrs. Sarah and Lillie Elder, of near Marion, visited Mrs. Canada Saturday afternoon.

W. B. Brinkley comes to Crayneville every Sunday, but he has so many girls we can't guess who the lucky one will be.

Our congenial agent for the I. C. was wonderful worked up a few days ago as he had the depot locked up and his keys lost, so you see he was in quite a dilemma for a while, but the good folks instituted themselves into a search party and the keen eye of Jim Jones discovered the lost keys. As soon as a passing freight could 'whistle' Mr. Brown (the agent) off the track, he at once entered a store and gave Mr. "Jim" a five cent cigar for his success for finding the lost.

Miss Mamie Henry our school mistress dismissed school two days on account of the death of her little pupil, Dorcas Tabor.

Famous Strike Breakers

The most famous strike breakers in the land are Dr. King's New Life Pills. When liver and bowels go on strike, they quickly settle the trouble, and the purifying work goes right on. Best cure for constipation, headache and dizziness. 25c at Haynes & Taylor's, druggists

Dycusburg and Caldwell

Bill Campbell and wife spent the evening Sunday with Sam Grimes.

Edge Campbell called on Miss Ada Dycus, Sunday.

Jessie Grinder visited his grandfather, G. H. Kirk, near Tyners Chapel.

The farmers are all nearly through stripping tobacco in this neighborhood.

Homer Grimmer, wife and little son spent Sunday with his father and mother.

Miss Linnie Travis made a flying trip down to uncle Tom Campbell's Sunday.

Thos. Fuller had a tobacco stripping the other night.

Tom Hall had a tobacco stripping a few nights ago and also had plenty of help.

Miss Ada Campbell visited Miss Franky Grime last Sunday.

There was a large crowd attended the singing Sunday at Lovis Atens.

J. D. Farris took dinner with S. R. Grimer Tuesday.

Bro. Virgil Elgin, of Marion, spoke at Dycusburg Tuesday night on temperance at the Methodist church.

O. Boaz thinks that Dycusburg is the flour of the world, he is coming back.

Wanted

Agents to represent us in every town or city none too large or small. Our shears and novelties sell at every house. Best terms, liberal commission and extra low prices to introduce our good. Mrs. John Vaughn returned from Missouri Wednesday. Mr. Vaughn came back about three weeks ago. They were not well pleased with the country.
All human history attests that happiness for man—the hungry sinner—since ever ate apples, much depends on dinner. Dr. F. S. Stilwell, Dentist over Marion Bank.
When you wash woolen clothes at home you are very careful of the treatment you give them to prevent shrinking. We give it personal attention. Come and see it then you can see why we do better work at the laundry. Wilson Steam Laundry.
Chickens, we pay 6c pound.
Eggs, 24c per dozen.
Turkeys, 9c per pounds.
Geese, full feathered, 50c per head.
Hides, green, 9c per pound.
Furs are fancy prices.—SCHWAB.
Miss Carolyn Harris, teacher in the Marion school, left Tuesday for her home in Corydon. Miss Harris has been ill of pneumonia for the past two weeks and has gone home for a few days visit before resuming her duties in the school room. Miss Mildred Haynes is teaching in her place.
We are in the laundry business to stay. That is more than the Evansville agent can say. We have our money invested in Marion, pay tax and license want to do all we can for our town. We have all our money in Marion, it is little, but every little helps. Our Evansville agent sends 60 per cent. away. Who does the most for the town? Think the matter over and give all of your work to Wilson's Steam Laundry.

A hit a very "palatable hit" is Thanksgiving. Dr. F. S. Stilwell, Dentist over Marion Bank.
FOR SALE—Two good houses and lots in Marion, Ky. One of five rooms and one with six. Apply or write to A. H. McNeely, Princeton, Ky.
No hunting allowed on my premises. I will prosecute every one found hunting.
A. H. CARDIN,
View, Ky.
"There was never yet philosopher that could endure toothache patiently" Dr. F. S. Stilwell, Dentist over Marion Bank.
FOR SALE—Two good houses in Marion, Ky., one contains five rooms and the other six. Desirable location. Apply or write to A. H. McNeely, Princeton, Ky.
See the difference between our laundry and the Evansville work. Just the appearance of the linen worn by every body and you will observe a great difference. You may be sure your linen will look nice if it comes from Wilson Steam Laundry.
Mr. E. H. James and Mr. A. Dewey will move their families to Kuttawa next Monday. They, with Col. L. H. James, have purchased the flour mill at that place. They are having the building remodeled and are having new machinery put in. This with the wheat they have already bought will cost them about ten thousand dollars. Col. L. H. James is president, E. H. James secretary and treasurer and Mr. Dewey general manager.

A Well Known Remedy

One of the oldest, safest and most favorably known remedies in the world to-day is Brandreth's Pills—a blood purifier and laxative. Being purely vegetable they can be used by young or old with perfect safety and while other remedies require increased doses and finally cease acting altogether, with Brandreth's Pills the same dose always has the same effect no matter how long they are taken. One or two pills taken each night for a while is the best thing known for any one troubled with constipation, indigestion, dyspepsia or any trouble arising from an impure state of the blood.
Brandreth's Pills have been in use for over a century and are sold in every drug and medicine store, either plain or sugar-coated.

New Cure for Epilepsy

J. B. Waterman, of Watertown, O., Rural free delivery, writes: "My daughter, afflicted for years with epilepsy, was cured by Dr. King's New Life Pills. She has not had an attack for over two years." Best body cleansers and life giving pills on earth. 25c at Haynes & Taylor.

"I wasted time and now doth time waste me." Be wasteful of your teeth. Dr. F. S. Stilwell, dentist over Marion Bank.

More Brains and Less Muscle

There are two classes of workers which form two important factors in our civil life. Each is interdependent upon the other; in fact one can not exist without the other. They are the brain worker and the muscle worker. They both have their spheres of action, but too often they are too far apart. The separation and lack of unity between them causes strikes, and labor troubles. The harmony and co-operation between these two great forces produce the raw materials, and to a greater degree the manufactured articles of the world. It would be most fortunate for any country if the brain worker would take up a part of the burden of the so called laborer and the laborer could assume a part of the duties of the brain worker.

The clothes upon our backs, the shoes we wear and the money with which they are bought represent, in their production, the combined efforts of brain and muscle. In this case as in most manufactured articles the mechanical work has reached such a high degree of excellence that we speak of it as skilled workmanship. The workman has not only applied his muscular force, but he has used his mind also. The man who grinds the lenses which are used in the great telescopes can command a greater salary than the President of Harvard. What we need, therefore, is a co-operation of mind and muscle in order that we may produce the highest order of workmanship.

The railroad president must have the co-operation of brains and brawn, and likewise the Standard Oil, the merchant, the farmer. If you are a producer you need the co-operation of these two forces.

The Government, the railroad, the educational institutions and the producers of manufactured articles have the best trained intellects and the most skilled fingers to carry on their far-reaching policies and their gigantic business enterprises. Perfection in any of these lines has come by planning, then by experimenting, then by readjustment to suit the conditions.

What I have said has been by way of an introduction to what I now wish to say to the farmers who may be readers of THE CRITTENDEN RECORD.

There is a tendency among the farmers in almost every section of the country to use a large amount of "elbow grease" and a small amount of ingenuity commonly known as "horse sense."

For our money crop we raise tobacco, wheat, cotton, cattle, cane as our fathers have done before us until we wear out our land and likewise our muscles. We do not do enough experimenting to see what else our land will grow, or whether we could improve upon what we already produce.

I know from sad experience that the farmers of Crittenden county have poor land to cultivate. For this reason

on scores have left the country in search of more fertile fields. The muscular man has cleared the land and "gotten the cream off," and the man who follows him must use a little head work to survive. The question naturally arises then, "how can we better our present condition?"

In every line of business there is one man who is making a success where hundreds are simply making a living or perhaps failures. There is a secret about his business the successful man could tell you. The secret usually lies in the fact that he studies his surroundings, he studies his business in the light of his surroundings and then gives it his best efforts. Every neighborhood has its successful farmer. His crops seem to grow whether it rains or not. That man ought to be a help to every man in that section.

In teaching English we take the best man's work as standards and study them closely. Would it not be a wise thing, therefore, to study the results of the farmers who have made a success of their work?

The State Experiment Stations and the Agricultural department of the Government are coming to the rescue of the farmers. They are thinking and experimenting and offering free

CONSTIPATION

is no respecter of age, and it is just as common a condition among children as it is with their parents. The condition is far more likely to reach an acute stage, develop seriously with the little folks, because of the difficulty in detecting it. Many a child has died from constipation, or illness arising from it, when it might have been saved by the timely use of

Dr. Caldwell's Syrup Pepsin
(Laxative)

This is the greatest remedy known for correcting constipated conditions. Don't wait until your child is affected, but administer a dose of the medicine occasionally.

You will notice a perceptible change for the better, a healthy color and a livelier disposition.

Dr. Caldwell's Syrup Pepsin is a good thing to have in the house, because it is good for the whole family.

Dr. Caldwell's Syrup Pepsin can be obtained in both dollar and half-dollar sizes from all druggists.

Your money will be refunded if it does not benefit you.

Your postal card request will bring by return mail our new booklet, "DR. CALDWELL'S BOOK OF WONDERS" and free sample to those who have never tried this wonderful remedy. Mothers write today.

PEPSIN SYRUP CO.
Monticello, Illinois
Sold by Haynes & Taylor.

of cost the results of their labors, which are printed in the form of bulletins. Many of the farmers do not know what would benefit them or how to obtain these free publications. In this connection the RECORD could do a great service for the farmers. The lawyer wants to know the best books on Practice and Pleading; the physician keeps abreast of the advanced thought in the medical world; the up-to-date brick maker keeps up with the improvements made in brick machinery. And likewise the farmer should keep abreast of the advanced thought in farm machinery, in the selection and breeding of corn, cotton, tobacco, wheat, potatoes and live stock.

At the Mississippi State fair, which has just closed at Jackson, there was one farmer in the state who had an exhibit which showed a co-operation of mind and muscle in the production of his crop. The other exhibit showed the result of muscle and rich land.

Mr. Jones lived about seven miles from Jackson on what is here termed medium rich land. A seasonable crop year with good cultivation and plenty of fertilizer the land will produce a bale of cotton and thirty-five to forty bushels of corn to the acre. Without one pound of fertilizer Mr. Jones produces two and one-half bales of cotton and one hundred bushels of corn to the acre on exactly the same character of land as his neighbor. The secret of Mr. Jones' success lies in prompt cultivation and a careful selection and breeding of his seed from year to year.

His corn and cotton stalks grow but little larger than his neighbor's, but they are filled with fruit from top to bottom. Mr. Jones can take a common grade of corn which will under ordinary circumstances produce one ear to the stalk and by breeding it make it, in two years, produce two ears, in three years three ears and so on until the stalk is full. The corn which he had on exhibition had from five to seven well filled large ears to the stalk. In like manner he breeds his cotton. The selection and breeding of seed is one of the most important things the farmer has to do.

Mr. Sherffus of the Kentucky State Experiment Station who has attended your Farmer's Institute for the last two years has laid special stress on the selection of seed corn.

A. F. CRIDER,
Biloxi, Miss.

The new Pure Food and Drug Law will mark it on the label of every Cough Cure containing Opium, Chloroform or any other stupefying or poisonous drug. But it passes Dr. Shoop's Cough Cure as made for 20 years; entirely free. Dr. Shoop's all along has bitterly opposed opiates or narcotics. Dr. Shoop's Cough Cure is absolutely safe even for the youngest babe—and it cures, it does not simply suppress. Get a safe and reliable Cough Cure, by simply insisting on having Dr. Shoop's. Let the law be your protection. We cheerfully recommend and sell it, Haynes & Taylor.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used only on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure and get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Haynes & Taylor, druggist. Price, 75c. per bottle.

Take Hall's family Pills for constipation.

Irma

(Last week's letter.)

We are having some very cold weather at present.

Miss Pearl Sullenger is on the sick list.

Mrs. Macil Champion, of Mexico visited her mother Mrs. Sue McMaster last week.

John Perry who has been confined to his room for some time is improving.

Mrs. Mary Gray visited relatives here last week.

Birdie Scott and sister returned from Washington last week. They are visiting their sister Mrs. Lena White of this place.

The singing at James Sullenger's Saturday night was well attended.

Rev. Shelby Rowe passed through here Monday.

Mrs. Emma Love is visiting her parents.

Miss Necie Sullenger was the guest of Miss Pearl Sullenger Sunday.

Mrs. Jennie Morris was here shopping last Wednesday.

Miss Eva Clement passed through here last Friday enroute for her home at Tolu.

Mrs. Catherine McMaster was here last week shopping.

Miss Susie Scott was the guest of Miss Bertha Sullenger one day last week.

To Consumptives.

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease Consumption, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for Consumption, Asthma Catarrh, Bronchitis and all throat and lung Maladies. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address Rev. Edward A. Wilson, Brooklyn, N. Y.

Baker Station

Plenty of rain all week. But good old sunshine now.

Mrs. Bob Hill spent Thursday with her sister Mrs. George Tolley.

Miss Lizzie Quisenberry, of Cobb, is visiting friends and relatives here this week.

Miss Fannie Baker, of Louisville, is visiting her cousin Miss Mattie Baker.

Mrs. Ida Belle Butler's school is progressing nicely.

Charley Jackson was in Fredonia Thursday.

Cecil Taylor spent Sunday with his cousin Noel Todd Baker.

George Baker went to Princeton Monday.

Russell Young surprised the people of this community last week by a quite little marriage at the home of the bride's parents Mr. and Mrs. Robert. We wish Mr. and Mrs. Young a long and prosperous life.

Meeting is in progress at New Bethel this week, though we are afraid the people will not be attentive on account of rain and sickness.

Will Baker was in town Thursday.

Miss Mattie Baker is visiting friends in Hopkinsville this week.

Weak Women

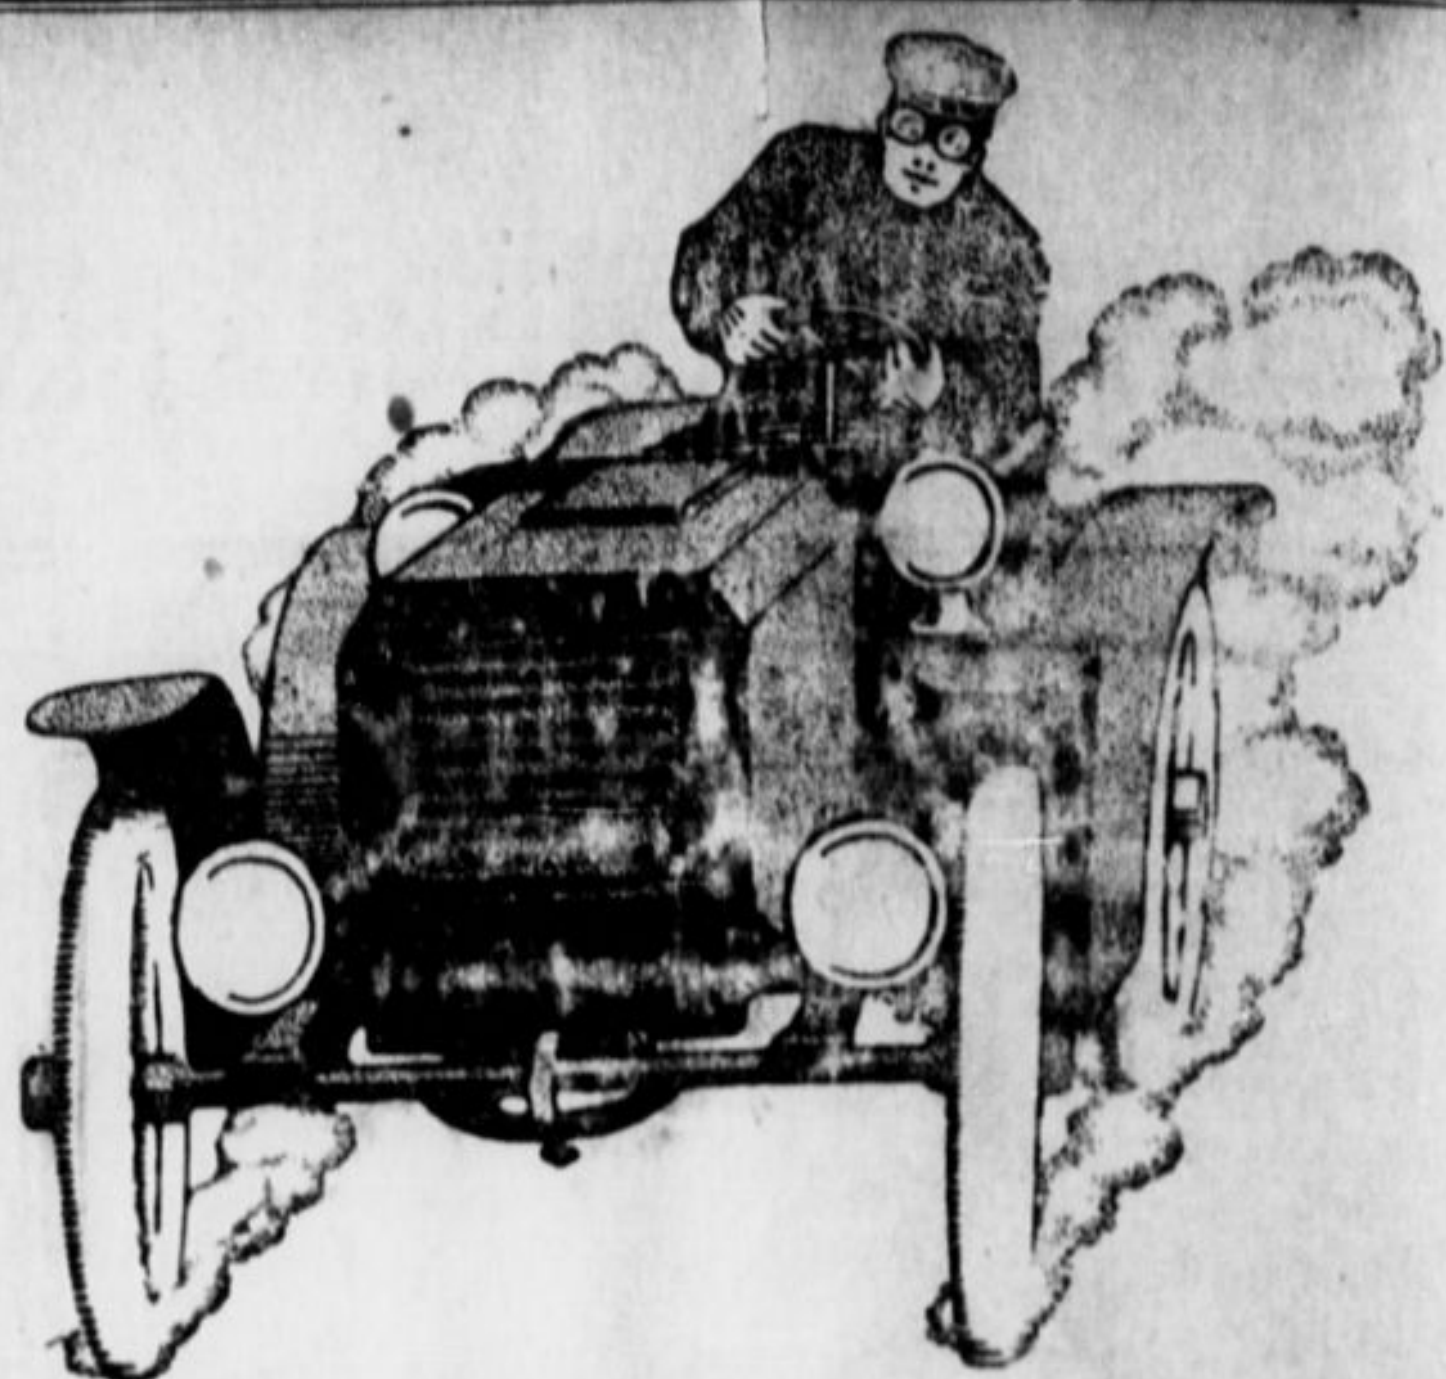

To weak and ailing women, there is at least one way to help. But with that way, two treatments, must be combined. One is local, one is constitutional, but both are important, both essential.

Dr. Shoop's Night Cure is the Local.

The former—Dr. Shoop's Night Cure—is a topical anesthetic suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood ailments.

The "Night Cure", as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, heals local weaknesses and discharges, while the Restorative, raises nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Tablets or Liquid—as a general tonic to the system. For positive local help, use as well

Dr. Shoop's Night Cure

Irma

There has been beautiful weather in this community for the past few days.

Rev. Barnett filled his regular appointment, at Liberty Grove Saturday night and Sunday.

Ebb Sullenger went to town Saturday and made high preparations to visit Mr. Bracy's Sunday.

The Liberty Grove Boys are trying their luck on the ball playing since the season is over, they are trying to raise their names while there is no one to play against them.

The clearing at Logan Ferrell's was liberally attended by four hands. The party was appreciated as well as the clearing.

The people are still gathering corn in this vicinity.

J. A. Sullenger has many Christmas articles, he says it will be Christmas about six weeks with him.

School is progressing well at Sullenger school house, with Libbert McDowell, teacher.

Come on boys with your fun and celebration for Thanksgiving and Christmas are coming.

Marshall Harp and Edd Watson left Sunday night. They went out for the purpose of finding them some girls.

Ethie Tharp and Miss Cleo Clomons went to Ernest Watsons Sunday night. Mr. Watson has a graphophone that is very attractive.

Merchandise at Cost

Having decided to close out my stock of General Merchandise at cost and less than cost for cash. Every day will be a day for bargains as long as the stock lasts.

All who know themselves indebted to me by note or account will call and settle same at once as I need the money to pay my bills.

Any one wanting a good stand for business can get a bargain by calling on, or writing me at Crayneville, Ky.

J. F. CANADA.

P. S.—This is on account of my wife's health.

Republican Campaign Text-Book

A departure has been made in the Republican Campaign Text-Book just issued, in that its contents are wholly devoted to live issues, and these are treated in the briefest possible way, yet comprehensively enough to include all necessary facts and figures.

First, there is a general statement of the issues of 1906, followed by a brief review of Republican legislation in general and the work of the Fifty-ninth Congress in particular. The Railroad Rate Law, Pure Food Law, Free Alcohol Law, Employers' Liability Law and the Meat Inspection Law are given in full, as is Chairman Tawney's clear explanation of the appropriations.

The Labor question is next fully presented, followed by Representative Watson's exposition of Anti-Trust proceedings. About one hundred pages are given to the Tariff, Agriculture and Manufactures, and the tables showing the various phases of industrial activity. Among other subjects treated under the tariff are:

Protection and Free Trade, Customs Revenue, Foreign Commerce, Home Market and Internal Trade, Wages and Prices, Export Discounts, Reciprocity, Free Hides, Revision, etc., etc. Some half hundred tables give official and authoritative figures down to the latest possible date. The work of the president and administration is then briefly presented, the condition and status of the Philippines, the Panama Canal, the Navy, Postal Service, Irrigation, etc., etc.

The President's letter to Representative Watson concludes the work, which has a copious index of over a dozen pages.

Scattered throughout the book are quotations from President Roosevelt and other Republican leaders. Among these is the extract from Senator Hanna's speech where he used the "stand pat" expression, it being the only instance in the Text-Book where the words "stand pat" are used. A page is given to Mr. Bryan and his view, with the comments of the New York World. A so-called "Prosperity Postscript" is added, giving treasury conditions, trade reports, etc., down to August 1.

For the first time in a political campaign, the Text-Book will have a general circulation, as together with other literature, it will be sent on receipt of one dollar by John C. Eversman, Assistant Treasurer, 1133 Broadway, New York.

Notice

All parties knowing themselves indebted to Hina Hardware Co. by account will please call and settle at once. We must close up our books immediately.
