Anne Hathaway "hath a way" her own even as her illustrious name sake, and this way was the perfecone to sister, Constance. To be sure though Constance's reasoning was faulty; it showed the deep love that dwelt within her and made every sacrifice for her sister is deep delight to her soul. Constance reasoned thus here was Anne as beautiful as the morning, twenty-one, with a love for the pleasure and all the beautiful things that go to make up life. Constance was twelve years older than Anne and when she was her sister's age, she had, had everything she desired, for that was before the terrible calamity came that with one fell stroke swept away their entire fortune and left the two-Constance and her littly sister, orphans and almost penniless. As she herself had, had everything dainty and beautiful when Aunie's age, so now desired to give these things to Anne, and to do so she worked diligently, resolved if her life had been somewhat of a failure An-

Constance-though she had passed the mile-stone of old-maidism, was very youthful looking. She was a bachelor girl not an "old-maid," declared empathically, and such of she intended to remain until the end the chapter. Her brown hair was naturally waving, just enough to make it beautiful, and her eyes lookout on the world with smiling assurance that won trust from all she came in contact with. Her complexion was rather pale but each passing emotion brought more of colour that swept over her face and was a constant aunoyance to her-made her appear mor, like a bashful school girl than anything else; as she would say half bitterly. And Anne was very much like her sister, yet more beautiful, though a certain self-consciousness in larity of features. The two sisters. after their father's failure and death ten years before had moved to a distant city. In a tiny flat made marvelously home like and neat by Constances skilled hands they had lived and then Anne had grown to be a woman. Constance worked in a newspaper office -- she had charge of a department devoted to all sorts of information and she was often wearied with the tions asked by her correspondents in the city and various parts of the United states for the paper had a wide circulation. Anne was now taking a course in music, having graduated in the city high school and sons to half a dozen pupils. "Constance" Anne said one evening, looking up from a dainty battenberg collar she was making as she sat on a eozy lounge by the window from which she could see a kaleidiscopic view of the people passing below. "Why is it you always turn so red and look se tearful when I mention that Mr. Hastings that I met at his sisters, Mrs.

Keep Your Nerve

the penalty. You can keep the system strong with Dr. Miles' Nervine. It assists in generating nerve energy; it strengthens the nerves and makes the whole system strong and vigorous. "I take pleasure in recommending Dr. Miles' Nervine to those suffering Dr. Miles' Nervine to those suffering from nervous prostration, insomnia and melancholy. After several months suffering from above diseases I tried this mcdicine and found immediate relief. It soothes and strengthens the nerves, chases away the gloomy and depressing thoughts and gives the sufferer renewed strength and hope. It is a superb nerve restorer."

JUDGE JACOB SEEMANN, Dr. Miles' Heart Cure is sold by your druggist, who will guarantee that the first bottle will benefit. If it faile he will refund your money.

Miles Medical Co., Elkhart, Ind

It is nerve energy that runs the organs of your body. The storage battery is the nerve cells in the brain and spinal cord, and from this battery nerve force is sent out through the system of nerves. To keep the body healthy you must have plenty of nerve force; if you have not, the organs work imperfectly, the circulation is sluggish, digestion bad, appetite poor, kidneys inactive, and aches, pains and misery are

Days.

Bakersfield, Cal., Dec. 22-L. E Hicks, the miner who was entombed by a cave in tunnel of Edison electric power company Dec. 7 was rescued at 11:25 tonight.

Bakersfield, Cal., Dec, 22.-Reports reach here that Hicks has been taken out. Fire bells are ringing, whistles are blowing and fire arms are being discharged. The report has caused great excitement.

Bakersfield, Cal., Dec. 22 .- It is expected to release Hicks within an hour. A physician reaching under the car tested Hicks' temperature which he found to be normal. The miner's pulse was a little high. When first the rescuing force shook Hicks by the hand, the miner said that the touch of a human was the finest he ever felt. A plug of tobacco was then passed to him and he pronounced the first chunk a fine morsel,

Waverly, Ill., Dec. 26, 1906. Mr. S. M. Jenkins, several of my friends have asked me to write them, but I can not spare the time to write them one by one. So if you will allow it I will give you a few lines and if it appears in your paper I may write you something later on. This is a fine farming country and good health, a good portion of it being prairie. I have a good people to serve. It is a very neat little town of about 1600 with one saloon and five churches with every Sunday, I have a nice church and parsonage on adjoining lots, and my beloved Bro. L. J. Millikan lives within fifty feet of me. I am having better health than when in Ky. I am working harder for my Lord. My people have made us several useful Christmas presents, one being a nice tailor made suit of clothes. They are feeding us well and I sure like the yellow legged chickens. the insurance companies. It has been stated with a good deal of insistence that the companies are discriminating between the parties or corporation handling tobacco; this is not the case. Some companies, domestic and foreign, yielping to panic have retired from the field; they have cancelled their risksy as was their right, and will not accept tobacco in rehandling houses. others, less timorous, have reduced their lines, - not for one, but for all. But in no case does discrimination exist and we can state on the authority of an agen who recently appeared before the "field men" of the insurance corporations doing business in Kentucky that where they buy tobacco at all, theytreat trusts, independent and farmers precisely alike, and will continue so to do.

Either they will insure everybody or nobody. - Henderson Journal.

HOGWALLOW NEWS

We are forced to direct attention of the citizens of Hogwallow to the ill-bred manner in which some of our hawgs respond to the voice of their master at feeding time. Instead of approaching their corn in a refined way they east aside all formality and scourage in as though they were half starved. Now all the censure should it not the way they have been reared? The owners are much to blame for yard. this outward manifestation of illbreeding. Now do not understand us to mean that all hawgs are below the standard in manner for we have never saw a more genteel lot of swine than them owned by the Dog Hill preacher. Often, however, we have been forced to be ashamed of the entire hawg family by the rowdvism a majority of them practice. Only a short while ago were over to Tobe Mosely's house when he throwed over the corn the hawgs stampeded for it in a manner most disgraceful, throwing formality to the winds, regardless of the several visitors present. Now teach your hawgs to act properly; teach them to rise gently when they are called, and walk slowly to the jug. The lach string on Frisby's feed, with ears and tails in their jug is always hanging out to his natural positions, take small bites friends. and eat not like they were half staryed, but like a hawg in a civilized country should eat. Teach then to do this and you will see a more refixed class of hawgs.

Jefferson Potlocks has fed his horse so much broom corn that its main and tail sweep the ground.

A remarkable case has just come to light at the head of Gander creek. Ten years ago Columbus Allsop went to that point to fish and cut a willow pole and set his hook and line, sticking the pole in the bank. He then got engaged in something else and forgot his fishing pole. After an elapse of ten years he thought of the inhabitants are so wrapped up in it a few days ago and went to the the soil that they can't enjoy the scene at once and found that his pole had grown to be a willow tree three feet in diameter. The line was its usual size, and when he raised the hook he found sevenal generations of fish on it, the one that was originally caught on it having raised a school of fine ones each season. When Columbus drew up the old fish all the others followed, and he loaded them all in his wagon and drove home, wondering at the strange occurrence.

An ambitious young man once heard that Abe Lincoln split rails and became president of the whole country. As above mentioned, the young man had ambitions, and set in to qualify himself for presidential honors by splitting rails. He made himself a nice maul and camped in the woods and made great stacks o rails, all the while having his eye or the president's chair. After an elapse of fifty years the man is now ready to die, and can do so with laurels on his forehead, because he is known all over that neighborhood as its champion rails-plitter.

FADS AND FANCIES.

Tailored shirt waists in silks and voolens are smart for street wear this season. Few lingerie waists are seen, except indoors, where the hand embroidered and lace trimmed waists of linen and lawn still hold their own for afternoon and evening wear.

Black silk waists, so becoming to both matrons and maidens, and to those who are stout, as well as to the slender, are the favorites. Roman plaid silks and small check designs in silks have also sprung into an amazing popularity.

These tailored waists are not always severely plain, as the word "tailored" implies, for, though simply made, they are quite ornate in effect, especially when made of bright-hued plaids or of plain taffetas with bands or inserts of bias plaid. Many otherwise entirely plain waists have a touch of color in the decorative effect of handsome buttons arranged each side of the front, or wherever the style of the waist permits the placing of ornamental buttons.

Tucks and plaits are characteristic of these waists, and unless there are plaits ter of two tucks at each seam and an or pin tucks, or stitched folds in the front and back, the models will lack the stamp of fashion that is essential for an up-to-date woman nowadays. Price 15 cents.

An exceptionally becoming model for either challie, flannel, cashmere, or taffeta silk is here pictured. It may be nelized cottons. The style shown here fortune more than my made of plaid silk, with the plastron, has the favorite fitted back, full plaited father left me a fortune? feta silk is here pictured. Price 15 cents.

The illustration shows one of the very newest plaited waists, navy blue taffetas with fancy plaid bias pipings. The quaint little pockets at either side of the front give it a very fetching, youthful touch. If preferred, these pockets may be omitted without otherwise affecting the graceful lines of the waist. The style is suitable for either silks or woolens, and is one that is bound to achieve immediate success. The pattern No. 2028 is cut in sizes 32, 34, 36, 38 and 40 inches bust measure. IN THE SHADOW OF SHAME

By Fitzgerald Molloy

Copyright by E. Fitzgerald Molloy

Olive Dumbarton, after the legal separation from her brutal husband, becomes a successful authorses and lives quietly with her daughter, Veronica, in lieston Rosal, St. John's Wood, London. Her husband secretly returns to London and by letter makes Galbraith, a man of Independent wealth who has been in love with her since early vouth, calls to say farewell before starting on a trip to Egypt. A fortingfit later Olive Dumbarton is found in her library holding a dagger over the dead body of her husband. She is arrested and held for trial, and detectives are put on the case. George Rostock, the publisher, and Valerius dailraith take an active interest in the investigations, and the former is shadowed by Inspector Mackworth. Angels Mezza, an Italian woman, swears to Mrs. Dumbarton and inspector Mackworth that the murder was committed by her husband. After following many class, however, the Inspector finds that Mezza ded in a hospital several hours before the murder of Dumbarton. George Bostock is run over by a hourse and upon being assured that he will shortly die, swears before witnesses that he is the murderer.

Here is the end of this terrible suspicion and mystery," he said, as he set down his empty tumbler.

"And now," Valerius remarked in a more sober tone, "Mrs. Dumbarton must hear of this at once.

"You will tell her, sir?"

"I will drive there straight."

"But your dinner?"

"I have no appetite now. I will telegraph to those who expected me, and then bring my cousin the welcome news that she is freed from this damnable charge. Have some more brandy. No more? Then I will, for my throat is still as dry as a limekiln. And once Synopsis of Preceding Chapters

and electrified him flashed upon his "But it was you and none other who killed David Dumbarton?" he almost whispered in Bostock's ear.

And, concluding he had not, he held his peace, while intensely suffering from a conflict in which doubt and fear and hope and despair took acive parts. Ultimately he resolved to conide his thoughts to Mackworth and hear what the inspector would have to say on a point of such importance.

Mackworth, on leaving the hospital drove directly to the flat in which Valerius Galbraith lived. Gaining this, the inspector was at once admitted and shown into the handsomely furnished sitting-room, where he waited with the impatience of one who has important intelligence to communicate, taking off his gloves, stretching and placing them on the table, opening his great coat glancing at himself in the glass and

smoothing down his hair meantime.
