ULITHI'S LIFE SAVED BY CHERUBINOS' CUGG BISNY

The Frenchman, my inocuation of the disease when I received it in my country, and I have been in a hospital bed and in a poor condition for about a year. I am now in a state of health and I am able to work and to enjoy life. I am very grateful for the care and attention I have received here.

For Rehoboth Sellers

The Lord is not far from me in the time of trouble. I will call upon him and he will answer me. I have found the Lord to be a refuge and a strong tower in the day of trouble. I am confident in his promises and I trust in him.

CATHARIS GROWING LESS

Due to the sale of Cucumis in the United States and Mexico.

There has been a marked falling off in the sales of cucumis in the United States and Mexico. The demand for cucumis has decreased in these countries due to the increase in the production of other vegetables. The decrease in sales has not been as great in the United States as in Mexico, where the supply of cucumis is much greater than in the United States.

For Provident People

"They who would not stay on do not stay.

In the battle of Los Angeles the Union army was victorious over the Confederate forces. The battle was fought near Los Angeles and was a decisive victory for the Union army.
NEW ROUTES

"The purpose of this Commission to hold a civil service examination in your county in November of this year. This examination will be held in the public interest to fill the positions of mail carrier, United States Post Office. It will be held in Marion Washington D. C. on a certain day in the year of 1919. This examination will be open to all who are citizens of the United States and who have had at least one year's experience in the care of government property. It will be given at the same time in Washington and the other cities of the United States. It will be given at the same time in Washington and the other cities of the United States. Any person desiring to take the examination should apply at the post office.
If You Want Cash
For Your Real Estate or Business
I CAN GET IT

If you do not have the ability or funds to sell your own property, I can
usually find a ready market for it and get you the cash you need.

No Matter What Your Property Is Worth, or in what Town, City, State or
Territory It Is Located.

If you have a vacant lot, a small house, a farm, a building, a business
property, or any other property that you believe has value, I can probably
find a buyer for it.

Not all properties are suitable for sale. Some properties may be
worthless or have little market value. However, I have been successful in
finding buyers for a wide variety of properties.

Please fill out the form below and I will contact you to discuss your
property and the options available for its sale.

If you want to sell your property, please fill out the form below.

If You Want to Sell Fill In
Cut Out and Mail Today.

If You Want to Buy Fill In
Cut Out and Mail Today.

I shall show property, corresponding appropriately with buyer, to

Free of Charge
and serve for handling. I will give you all of the greater value of your
own if you should decide not to sell.

If you want to buy any kind of a Farm, House or Business, in any part of the country, sell

THE HUMAN MACHINE

WALKS BODY AND ITS WORKINGS MECHANICALLY

The Propeller in Action

In the case of a simple machine, such as a hand drill or a lever, the movements are clearly visible and can be easily observed. However, in the case of a complex machine, such as a car or a computer, the movements are not so obvious and require a more sophisticated approach to understand them.

The Propeller is a device used to create a rotating force, typically used in aircraft or watercraft to provide thrust. It consists of a series of blades that are arranged radially around a central shaft. When an electric current is passed through the propeller, it creates a magnetic field that causes the blades to rotate. This rotation can be harnessed to move the vehicle or machinery forward.

Understanding the Propeller

To understand how a propeller works, we need to consider the forces acting on it. The propeller is subjected to a downward force due to gravity and an upward force due to lift. The lift force is generated by the rotation of the blades and is responsible for moving the vehicle or machinery forward.

The propeller is designed to create a balance between these two forces. When the lift force is greater than the downward force, the vehicle or machinery moves forward. Conversely, if the downward force is greater than the lift force, the vehicle or machinery moves backward.

Conclusion

In conclusion, the propeller is a complex machine that requires a thorough understanding of the forces acting on it. By understanding the balance between these forces, we can design propellers that are efficient and effective in creating a forward motion.

J. Smith

Nervous Worn-Out

If ever in this condition, your nerve force is at a low ebb, you are going out, see the doctor. And when the nerves are unsteady, it is the duty of the doctor to assure the patient that everything is all right and to give the patient a tonic to strengthen the nerves.
