## POSTAL SAVING BANK VS GUARANTY OF DEPOSITS.

One or the other is going to win in this election. This is no matter of theory, it is a fact according to the platforms of the respective parties. The Republican party pledges a law providing for Postal Saving Banks--The Democratic platform pledges the party to the enactment of a law providing for the guaranty of deposits.

THE REPUBLICAN PLATFORM SAYS:--

"We favor the establishment of a postal savings bank system for the convenience of the people and encouragement of thrift."

THE DEMOCRATIC PLATFORM SAYS:--

"We pledge ourselves to legislation under which the National banks shall be required to establish a guarantee fund for the prompt payment of the depositors of any insolvent national bank, under an equitable system which shall be available to all State banking institutions wishing to use it."

"We favor a postal saving bank if the guaranteed bank cannot be secured, and that it be constituted so as to keep the deposited money in the communities where it is established. But we condemn the policy of Republican party in providing postal savings banks under a plan of conduct by which they will aggregate the deposits of the rural communities and re-deposit the same while under government charge in the banks of Wall Street, thus depleting the circulating medium of the producing regions and unjustly favoring the speculative markets."

### SO THE COUNTRY FACES THE ISSUE.

Every vote will count for one or the other. The Democratic platform endorses the Postal Savings Bank, provided we cannot secure a law providing for guaranty of deposits; But it Stands For the Guaranty of Deposits as Against the Postal Savings Bank.

### ARGUMENTS.

Mr. Taft is in favor of the Postal Savings Bank and opposed to the guarantying of deposits: He Says:--

"The Democratic party announces its adhesion to this plan, and only recommends the tried system of postal savings banks as an alternative if the new experimental panacea is not available. The Republican party prefers the postal savings banks as one tried, safe and known to be effective, and as reaching many more people now without banking facilities than the new system proposed." (From speech of acceptance of Wm. H. Taft, July 28 1908.)

Mr. Bryan stands for guaranty of deposits. He says:--

"Then, too, the banks must remember that the question is not merely whether the depositors shall be made secure, but whether the security shall be given by the banks themselves or by the government through a postal savings bank."

"The refusal of the banks to permit the passage of a law granting security to depositors is responsible for the growth of the sentiment in favor of the government savings bank, and the sentiment will continue to grow unless something is done to satisfy the demands of the people upon this subject."

"The Republican party proposes the establishment of a postal savings bank system; the Democratic party prefers the guaranteed bank because it is better for the depositor and better for the banker; it gives the depositor the security which he needs and yet leaves the banking business in the hands of the banks. But the Democratic platform declares for 'a postal savings bank IF THE GUARANTEED BANK CAN NOT BE SECURED,' and in November more than ninety per cent of the voters will by their ballots in hand demand either the guaranteed bank or the postal savings bank. Can the financiers prevent the carrying out of this demand?"

"The banks must decide, therefore, whether he will favor a postal savings bank which, in the absence of the guaranteed bank, will grow until it absorbs the banking business, or preserve the present system of banking by giving the people through a guaranty law, the protection which they must otherwise find in a government bank."

"The Democratic plan, therefore, contemplates a less radical change than the Republican plan. In his notification speech Mr. Taft charged the Democrats with being socialistic in some of their remedies. The charge was not well

founded, but I might reply by charging him with advocating an unnecessary extension of government's sphere of activity in the establishment of the postal savings bank, when the guaranteed bank would answer the same purpose without any considerable increase in the number of government employees. I would rather see the banks attend to their own banking business than to have it transferred to the government, and because I prefer to have the banking business done by the banks rather than government I urge the guaranty of deposits as the easiest solution of our difficulties." (From Mr. Bryan's speech delivered at Topeka, Kan., Aug. 27, 1908.)

### BANKERS MUST MAKE A CHOICE

Whether the money of the community is to be deposited in the postoffice, or whether it shall be deposited in their own banks.

### DEPOSITORS MUST MAKE A CHOICE

Whether they want to have their money deposited in the postoffice at 2 or 2 1/2 per cent interest, or whether it shall be deposited in a bank which is as sound as the United States Treasury at the usual rates of interest.

MERCHANTS, MANUFACTURERS AND JOBBERS MUST MAKE A CHOICE WHETHER THE MONEY OF THE COMMUNITY which they need in their business shall be deposited in a Postal Savings Bank with headquarters in Washington, or whether it shall be retained in the banks of the community, for the use of the community.

ALL THE PEOPLE must decide whether the banking business shall be done BY THE BANKS safely guaranteed, or BY THE GOVERNMENT.

### THE OBJECT OF THE BALLOT

Is not merely to express a preference as to a candidate, BUT MORE PARTICULARLY to express approval, or disapproval, of methods proposed by the respective parties.

EVERY VOTE CAST FOR TAFT is for a Postal Savings Bank.

EVERY VOTE CAST FOR BRYAN is for a well guarded guaranty of deposit law instead of a Postal Savings Bank.

WHICH IS IN THE INTEREST OF THE BANKER?

WHICH IS IN THE INTEREST OF THE DEPOSITOR?

WHICH IS IN THE INTEREST OF THE COMMUNITY?

## WATCHMAN, WHAT OF THE NIGHT. God's Attitude Toward The Trusts.

A TRUST is a combination of vast sums of money, and a large number of men, for the conducting of business on so large a scale that they may be able to buy out or crush out all competition in their line of business, and have complete control of the article, or commodity, in which they deal. By this means the TRUST will be able to put the price so high, that directly they will amass millions of money as a result of their exorbitant profits.

It is the purpose of the TRUST to monopolize some necessity of life. There are luxuries which the rich may enjoy, but the masses of the people may get along comfortably without. But there are necessities, which all men must have, such as bread, meat, fuel, light, lumber, clothing, iron, steel, tools and implements, and other things that we must have in order to have life and civilization.

It is the purpose of the TRUSTS to corner and control all of these necessities that they can force the people to pay them an exorbitant tax for the living at all. Hence, the "STANDARD OIL TRUST," the "STEEL TRUST" the "LUMBER TRUST" the "BEEF TRUST," and many others that might be mentioned. And so it has come to pass that there is scarcely an article of clothing we wear or an item of food we eat, that is not in some way under the influence and control of some great money greedy combine--especially is this true with the vast city populations.

It will be important for the reader to remember that the vast fortunes which are being made of the farm, the mines, the forests, the factories, and the sea, do not go into the pockets of the laborers who produce them, but into the coffers of the millionaires who form the Trusts.

We would also call attention to the fact that the great steamship and railroad companies, with the telegraph, telephone and express companies, are also formed into combines which force the people to pay exorbitant prices or do without.

The misinformed reader will at once ask why the people submit to such injustice. Why do they not rise up and destroy the trusts. To which questions we answer that the trusts have hedged themselves about with a powerful poli-

tical party, and have in their employment a great army of agents, lawyers and politicians. The TRUSTS manipulate conventions and primaries, select candidates, secure their election, and place their hired servants in the various councils of the nation, from the city council to the United States Senate. With their vast sums of ill-gotten gain they lobby legislatures, influence courts, and manage legislations in the capitol of the nation. They buy with their rich gifts the influences of the universities and colleges, and with donations for the purchase of pipe organs, and the erection of church towers, they save the conscience, and shut the mouths of the many ministers of the gospel.

Again, the uninformed reader will ask why the people buy from the TRUST, paying them exorbitant prices for the necessities of life. Why do they not buy their supplies from the foreign markets of the world? To which we answer, for the simple reason that the great political party, which is at the same time the FATHER and the SERVANT of the TRUST, has fixed a tariff on foreign imports so high that it is impossible for foreign markets to compete with the TRUSTS.

Again, the reader will demand why do the people not rise up and put the party now administering the government out of power? To which we answer that the party now in power has fostered and built up the TRUSTS and the TRUST have fostered kept the party in power until the two have become "SIAMESE TWINS" the life of each of them depending upon the life of the other; they will live or die, stand or fall together. In the light of these facts the reader will understand why the great TRUSTS poured immense sums of money into the campaign fund of the party which has made their existence possible, fostered and perpetuated them.

The present incumbent of the White House climbed into office up steps made of TRUST GOLD, wrong by unjust and diabolical methods from the masses of the people. This explains why it is that the said party objects to publishing where its campaign fund comes from. When it is remembered that the Trust have a number of tried and trusted servants in the United States Senate, it will be readily understood why said party objects to the election of United States Senators by the popular vote of the people. It is much more easy for the trust to manage a few corrupt members of a legislature than to manage the great free people of a State.

It is startling to think that the head of one great Lawless, Greedy Trust four years ago gave at one time ONE QUARTER of a MILLION of DOLLARS for the election of our chief magistrate. The money was received and used for the corruption of our people, and this is only a small part of the Trust loot, the stolen wages of the patient toiler turned into party campaign to be poured like streams of poison through every artery and vein of our body politic, corrupting our American manhood, and polluting our institutions, gradually preparing the way for the downfall of our republic.

These great oppressive monied corporations are described thus in Holy Writ:--"Therefore pride compasseth them about as a chain; violence covereth them as a garment. Their eyes stand out with fatness; they have more than heart could wish. They are corrupt, and speak wickedly, concerning oppression; they speak loftily. They set their mouth against the heavens, and their tongue walketh through the earth. Therefore, his people return hither; and waters of a full cup are wrung out to them. And they say, How doth God know? And is there knowledge in the most High? Behold, these are the ungodly, which prosper in the world; they increase in riches."--Psalms 73: 6-12;

How perfectly those verses describe the modern oppressors of the people who grind and oppress them in order to buy titled European sons-in-laws. Has the minister any right to lift up pen and voice against this condition of things? I think that all reasonable men agree that he has. Of course, he cannot expect to do so and escape the ridicule and abuse of the little hirelings and blind, selfish servants of the "Siamese twins."

The Church of Christ is to be congratulated that no true discipline of Christ is the standard bearer of this aggregation of injustice and corruption. It is appropriate and proper that a man who does not believe in the deity of our Lord should lead this motley and powerful host of despoilers of the rights of men.

I have lifted up voice and pen in protest because I, too, am a patriot. I love the country, the flag and homes of the people. The pendulum of greed, oppression and imperialism has swung away to a powerful extreme. It must swing back or our existence as a free republic is in danger. The chief corner stone of our national government rests upon the patriotic love of our citizens. The legislation and administration of our laws must be without favoritism or in his pursuits of life and in securing a livelihood for himself and those dependent upon him.

The masses of the people will not love a government administered for the advancement of the few and the oppression of the many. Destroy the patriotism of the masses of the people, the foundations will give way and free America will be no more.

Let the "Siamese twins" perish together, and our nation will rise in power and glory, and our grand flag will still be the emblem of the land of the free and the home of the brave.--THE PENTECOSTAL HERALD.

## GRAND AND SUCCESSFUL MEETING.

Last Thursday was a great day in Marion. The F. E. and C. U. of A. met in regular session at the court house. There were more than ninety delegate representing the thirty-four locals of the county, and it is useless to say that every delegate, as well as other members, present, were deeply interested in the workings of our great movement.

The address of President Johnson was characteristic of his unquestionable ability, and was received with enthusiasm and eagerness from both union and non-union listeners. His address was delivered along the line of the purposes and principles of the order. It seemed that all present, believed it was good to be there.

Much business of importance was transacted to the satisfaction of all present, and a feeling of harmony prevailed throughout the session.

The writer has been in the county union every session except one since its organization at Mexico in January, and can see a marked change in its workings. It seems that the farmers are more alert than ever before. It seems that every one feels that he is a part of the whole and that if one should shirk his duty it would effect the body as a whole. And when we all have a keen sense of our duty we will soon have what should be ours—the right to price and sell our own products.

Brother, let us endeavor to stand closer to each other than ever before, as through political campaigns, as well as marketing season, is the hardest time for a united action of our people. So let's put politics behind us and attend to the marketing of our crops in the most sensible manner.

Recollect it is the people who do things and not the parties. Recollect that all political parties in the past have failed to give relief to the "common people," and the only remedy for us is to let the politician go his way alone unless he will go our way.

Lets all get to work and have our order with a greater membership at

the next county union than ever before. I think we can add 34 more locals by next county union and add several members to those we already have.

Fraternally Yours,  
C. O. POGUE.

E. T. Franks said in his talk at Marion Saturday, Oct. 10th, that the republican party was or has the credit of the present good price in tobacco. What do the various Farmers' Union people think of this? We are indeed sorry for the man or men that think as Mr. Franks thinks or says he thinks, but Mr. Franks don't believe what he says in this regard, but tries to make people believe a party or president can or does raise prices on farm products for political reasons. The republican party is no more the cause of the present prices on tobacco, wheat, corn and hogs or any thing raised on the farm than President Roosevelt was the cause of the panic last fall. The republican speakers tells the farmers that Governor Cleveland was the cause of the hard times in his time and that President Roosevelt had nothing to do with the panic last fall. What do farmers think of such talk as that? We think it is poor rule that will not work both ways. The moneyed men puts the price or rate on his money just as the various farm organizations are fixing the prices on their crops which is right so let the farmer think for himself and give credit to whom credit is due.

Let each local bring up the banking question at every meeting and talk it private to his neighbor, who is in the union, from now until the next county meeting which is only a few weeks off; and bring up a good report with your delegates. The committee will visit every local they can in the next six or eight weeks

and do their best for a good and just cause—Remember the shares are fixed at \$100, each but in order to give all a chance, any four farmers can go in together, \$25.00 each and take one share or two can take one share and so on. C.

## In Kentucky.

Moonbeams fall the softest in Kentucky;  
The moonlight walks come softest in Kentucky;  
There happy hours fly fleetest,  
The maiden's dress the neatest,  
And smile on all the sweetest,  
In Kentucky.

The sunshine's ever brightest in Kentucky;  
The breezes whisper lightest in Kentucky;  
Hard hearts are the fewest,  
Blue eyes are the bluest,  
And true hearts are truest in Kentucky.

## On His Farm of Forty Acres.

When a man has reared a family of fourteen children on a farm of forty acres—giving each, and every youngster a good education, comfortable home until manhood or womanhood is reached, and finally a substantial start in life—it's a big boost for acre farming. This was accomplished by C. Y. Trice, who died a few days ago in Kansas City at the home of his son, C. Y. Trice, Jr., 436 Prospect avenue. At the time of his death he was 87 years old.

Mr. Trice came to Missouri from Kentucky in 1850 and bought a 40-acre farm near Cameron, fifty-five miles northeast of Kansas City. He had a wife and six children. Eight more came in after years.

After Mr. Trice paid for his farm at \$2 an acre he had left only his wagon and ox team. He possessed no other capital. The soil, he determined, must yield the family a living, and he began a systematic and scientific cultivation of the land.

He planted even the fence corners; there was no room for weeds. A cockle burr didn't have a chance to go to seed. As soon as one crop was harvested the soil was prepared immediately for another. Some of the land was made to yield two or three crops a year.

"Under a father's management that forty acres yielded our large family a good living," C. Y. Trice, Jr., said recently. "It was our only source of revenue and it was sufficient, but father knew how to farm. He was almost half a century ahead of his time with his farming methods that explained his success. He practiced the so-called 'scientific' farming fifty years ago. We didn't have many luxuries, of course, but we had plenty to eat and to wear and we had an education and father accumulated enough to give us a start when we left home—all off of forty acres."

To the up-to-date, energetic agriculturist the success of Mr. Trice on forty acres of land may seem remarkable. But there are many careless, "slipshod" farmers who fail to earn a good living for a much smaller family on twice that amount of land. And what investment in the city, representing even twenty times the sum invested by Mr. Trice, would yield a like return?

Twelve of Mr. Trice's fourteen farm-reared children are living, and there are forty-eight grand children and fifty great-grandchildren and one great-great-grandchild. Out of 112 descendants eighty-nine are living—Kansas City Star.

## For Extending Use of Cotton.

J. E. Pearson, at the recent Annual Convention of the Farmers' Union introduced the following, which was adopted:

"Realizing the importance, not only to the South, but to the American nation at large, of creating a larger and permanent demand for cotton, we recommend that the representative from each state in this convention, upon their return home, urge upon every local Union and every County and District Union that immediate steps be taken to induce the members that all demand and insist that dealers furnish them with all kinds of wrapping twine, cord, made of cotton only, and that also all sacks for salt, sugar, grain of all kinds, potatoes, etc., be made of cotton bagging when possible, and insist that webbing for bridges and halter and back bands be made of cotton, which is the American product, whereas jute and sisal (from which many of above items are made) are products of foreign countries and money expended for articles made of jute and sisal goes abroad to enrich foreigners. We further recommend that our members secure the co-operation of all commercial bodies in their respective states and other organizations to aid and co-operate in purchasing above articles, and insist that same be made of cotton, which furnishes employment to thousands of American laborers, whereas jute and sisal articles are made by foreign labor. In accordance with a resolution passed along above lines by the Northeast Texas District Farmers' Union, composed of the counties of Bowie, Red River, Lamar, Delta and Fannin at their meeting in June last the Texas Wholesale Grocers' Association on motion of Mr. A. P. Foute of Waples-Platter Company, have taken steps to comply with above recommendations, which was signed by Brother J. E. Pearson of Dodd City, Texas, president of above Farmers' District Union, and we are informed that the Southern Wholesale Grocers' Association have also adopted committee reports favoring to above recommendation, and they claim it will increase the price of cotton at least 1-2 cent per pound and we urge prompt and continuous action from our membership and all friends to bring about this increased demand, which can easily be accomplished by united and continuous action."

It has been demonstrated that the best sailors in the United States navy are the boys from the farms of the west. Still, the best place for the country boy is in the country.

It is estimated that in the United States this year 3,198,000 acres have been planted in Irish potatoes, an increase over last year of 24 per cent.

Watch your neighbor, and if he is doing well, imitate him. But rather make it worth while for your neighbor to imitate you.

Some men just love to tell their troubles to somebody. But these fellows usually fail to tell them to their wives, and that is where they make a big mistake.

## Farmers Educational —AND— Co-Operative Union Of America

### Put It Off Awhile.

What's the awful rush about it?  
Where's the instant need  
Should I "do it now?" I doubt it  
Very much indeed.  
I'll take time for due reflection,  
Let it go on file,  
Use a little circumspection,  
Put it off awhile.

"Do it now?" Well, I refuse to.  
That won't do for me.  
I consider that my cue's to  
Wait a bit and see.  
I'm averse to snap decisions,  
Jumping's not my style.  
Time is wasted in revisions,  
Put it off awhile.

Circumstances call for action  
Now and then perhaps.  
Doing things gives satisfaction  
To a lot of chaps.  
I might "do it now" and rue it.  
As it is, I smile.

Later on's the time to do it.  
Put it off awhile.

### Tremendous Movement.

I want to impress upon you, gentlemen, as never in the previous history of this union, the tremendous significance of our organization and the revolutionary importance of the ends we are striving to promote.

I want you to feel as vividly as I feel that upon the full success of our mission depend the very welfare of this country, and I might say without exaggeration, the permanence of American institutions.

I want you to realize that we are fighting a battle that no political party however great, no crusade in history, however vital and wide-spreading, has attempted.

We are fighting the battle of the producer of the wealth of the country, the most wonderful country in history.

We are doing what no crusader or reformer has ever dared to undertake.

We are saying to the man whose toil feeds and clothes nearly a hundred million people, not to mention the teeming hordes of Europe and Asia:

"Without organization and co-operation, without education and persistent, never-tiring effort, without sacrifice and obedience to discipline you can never attain the true reward for your labor, you can never rise as a class above the hardships and the oppressions that have always been visited upon the man who creates wealth in the sweat of his brow; you can never win the income to which you are entitled, that you may properly feed and clothe and house and educate you wife and your children."

"Without organization you will be as helpless against the man who would prey upon your efforts as one man would be against an army."

From President Barrett's Address.

### Progression in Farming.

There was a day when the farmer who thought a little ahead of his neighbors was immediately branded in his community as a theorist.

It is hardly an exaggeration to say that not so very long ago the farmer who really attempted to depart from traditional rule-of-thumb methods and do a little thinking on his own book was commonly despised as impractical, says Farm and Field.

This is one reason why the young man who is fairly well educated, up-to-date and full of ambition, is inclined to look upon farming as a narrow, limited and cold calling in which the ability to do the hardest physical labor from sunrise till dark, and to scrimp and squeeze, are the main elements.

This is very much the way it used to be, but things have changed marvelously in the farming world in the last few years; agricultural science have done things which have compelled the rule-of-thumb farmers to open their eyes and recognize that knowledge of natural principles, of the why and how of things, brings substantial results; that it gives mastery over conditions instead of merely playing hide and seek with them.

### The Automobile Here to Stay.

One of my newspaper friends out West has always been very much against automobiles. He roasted them in his paper until it appeared that it would not be safe for an automobile to enter the state. He urged the farmers to get on their swiftest horses, arm themselves with their longest guns and go after them. Just lately Henry, the dear old boy, has changed his tactics. He now predicts the automobile will be on every farm, and I quite agree with him.—M. M. Johnson, Nebraska.

It is to the credit of American farmers that more attention is now given to farm crops than at any previous time in our history, and with the result that farmers are making more money than ever before.

Some men just love to tell their troubles to somebody. But these fellows usually fail to tell them to their wives, and that is where they make a big mistake.

"Goose-flesh" isn't to be despised, provided the geese furnish it.

## The Difference in Men.

During the depression in the life insurance business following the legislative exposures concerning it, when a great many insurance agents became discouraged and went out of business, and while others were hanging on the ragged edge, barely existing, a branch manager of one of the large insurance companies shut his teeth, clenched his fists and resolved that he was going to beat his biggest record.

The result was that during the most discouraging year in the history of modern life insurance, this young man quadrupled the best record he had ever made. This is what grit did.

He thought he had worked hard before, but his unprecedented record when he put forth all of his efforts shows what a man can do when dominated by a mighty purpose—one unwavering aim.

If Mr. Wake had said to himself, as many others did during this historic "slump," "Now, the situation looks pretty bad, but I'm going to buckle down to it and do my best," he would have done fairly well, no doubt. But his grim resolve to do better than he had ever done before, regardless of the hard times and the dark outlook, quadrupled his power of achievement.

Nothing else stimulates us like the spur of a great resolution to do some definite some particular thing.

To have merely an understanding with ourselves that we are going to do our level best is not enough. To do the best thing possible to us we must have a great aim, a mighty purpose, an invincible faith in ourselves. This will call out all our reserves.

If Napoleon had said to himself, before some of his great battles, "Now, I am going to do some great fighting; we are going to do our level best to beat the enemy," he would have been beaten himself. But he resolved that when he went into the battle he would beat the enemy at all hazards. He had fought the battle over in his mind before a gun was fired. He did not start out with a loose determination to do his level best, but with a grim resolution to win the battle if it took his last man. This is the kind of resolution that calls out a man's last reserves.

It is astonishing how difficulties get out of the way of a man who carries resolution and determination to his task in the right way. The way we approach our problems, the attitude of mind in which we face obstacles, the grit in our aim has everything to do with our success in life.

We must face difficulties as an animal trainer faces the wild beast. He knows that the slightest indication of fear is fatal. His eyes must carry power, his manner must indicate that he is a conqueror.

The above apply applies to us in this Order today. If we will resolve that we are going into this battle to perpetuate our order with a firm determination to win, we will win. Many of us think that the difficulties of the Order are too great to surmount, that because we do not face the obstacle that confronts us with true grit, let us say with Napoleon, I am going to do my level best to uphold the Order. I am going to do my level best to help brush aside the only stumbling block in its road to prosperity, and we will succeed. Let us face our last and only difficulty as true men, and we will wonder why we ever doubted the result.

## The Successful Farmer of the Future Must Be a Student of New Ideas

The Danbury Reporter sizes up the successful farmer of the future in the following manner: "The day is coming when the small farm, the labor saving machinery, the knowledge of seasons and soils and rotations, and the careful but intense cultivation shall constitute the equipment which will yield handsome returns."

"The farmer of the future who shall win success will be an educated man. He will know his fields like the potter knows his clay, and his mind will be as skilled as the hand of the artisan who fashions the vase."

"He will be able to plan a campaign upon his plots with the same precision that Lee planned at Cold Harbor, and execute it with the success of Jackson at Antietam."

"As the lawyer knows his code, he will be acquainted with soils and strata, and as the practitioner is drilled in the art of civil procedure, he will know the rotations."

"He must be familiar with precedent, and his evenings shall be spent by the fireside with text books and farm journal, and the experience of his fellow soilmen in other counties shall be in his mind always."

"He must be a student, but his knowledge shall not all come from books."

"Personal experience, experimentation, test plots, visits to other model farms, the constant inhibition of new ideas—these shall make his battery invincible."

### WAS WHAT GOVERNOR WILSON TRIE TO PUT OVER.

Asserting He Knew Names of Every  
Night Rider, He Failed to Make  
Good When Called.

Governor Wilson is "stumping"  
Kentucky, and was what we call  
stumped at Hopkinsville the other  
day.

The Governor made a political ad-  
dress in Hopkinsville on the night of  
October 6, and during the speech  
said he knew the names of the lead-  
ers and all about the night-rider  
conspiracy.

This greatly pleased the grand  
jury then in session in Hopkinsville  
for they thought that at last the  
truth about these will o' the wisp  
night riders could, and would, be  
ascertained.

Needless to say, it wasn't, for  
when the Governor was summoned  
before the grand jury he had (under  
oath) to confess that all he knew

undoubtedly mean Scott's  
Emulsion.

It would be just as sensible  
for them to prescribe Quinine  
in its crude form as to pre-  
scribe Cod Liver Oil in its  
natural state. In

## Scott's Emulsion

the oil is emulsified and made  
easy to take—easy to digest  
and easy to be absorbed in to  
the body—and is the most  
natural and useful fatty food to  
feed and nourish the wasted  
body that is known in medicine  
today.

Nothing can be found to take  
its place. If you are run-down  
you should take it.

about night riding was hearsay; had  
to admit that he had not a whit of  
personal knowledge concerning either

We want to remind our readers  
that many political "spellbinders"  
and "stumpers" say many things in  
a Pickwickian sense. The jury  
aforesaid may not have thought of  
this when it ordered a summons to  
be issued for the Governor.

The jury, made up, as it was, of  
real, Simon pure, law and order ad-  
vocates, forgot that few things said  
on the stump can be proved in the  
jury room, so they sent for the Gov-  
ernor to "make good."

He didn't "make good;" he never  
has "made good;" he never can  
"make good" the wild statements  
and charges he has made during the  
time between his inauguration and  
his appearance in the Hopkinsville  
jury room.

We hope the Republican campaign  
managers will keep him on the  
stump so that the particular con-  
gressional candidates that the Tobac-  
co Trust is spending oodles of money  
to defeat may have their majorities  
increased by the gab of the vaporing  
Wilson.

The Governor is telling the farm-  
ers that he's for them and not for  
the trust. Oh, to be sure, certainly  
not, of course not, perish the  
thought, why, the very idea!

What stumper is now, on the eve  
of election? What trust aider ever  
was for the trust and was ready to  
publish the fact?

Suffering suffragist of the land of  
Boone, can't you tell a "heron  
from a hand-saw?" Don't you even  
know beans? Are you ignorant of  
the fact that Tobacco Trust money is  
being spent in some congressional  
districts to elect Democrats and in  
others to elect Republicans?

What the trust wants is men who,  
while serving it, are smooth and coun-  
ing enough to make farmers think  
their chief purpose in life is to bust  
trusts and enrich the horny-handed  
sons of toil.

And they do make many of them  
think so. Many thousands of horny  
hands are clapped in applause for  
the protestations of those Judas-like  
boustons.

But, happily, the number of "dead  
easy" farmers has grown and is grow-  
ing beautifully less.

Most of them in all the States are  
Missourians for the nonce—they  
must be shown, and we feel that  
what the trust and its hirelings may  
show them will not do, will not pre-  
vent them from making for legisla-  
tion under which the trust will be  
made "good" and kept "good."

Lucile, a carefully brought up  
little girl of five years, returned

from her first party in great glee.

"I was a good girl, mamma," she  
announced, "and talked nice all the  
time."

"Did you remember to say some-  
thing pleasant to Mrs. Townsend  
just before leaving?" her mother  
asked.

"Oh, yes, I did," was the enthu-  
siastic reply. "I smiled and said,  
'I enjoyed myself, Mrs. Townsend,  
I had a lots better dinner than I  
thought I'd have.'"

Trim fruit trees so as to have the  
tops open and free, not allowing any  
of the limbs to touch or cross each  
other. Much depends upon the first

trimming of young trees, as their  
shape is then fixed, and the cutting  
away of small limbs can be done with  
less injury to the tree when it is  
young than at any other time.

For a cow that won't give down  
her milk an exchange recommends  
to take a two bushel sack and put in  
it forty to sixty pounds of sand or  
corn, anything to weigh that much,  
and lay it across the small of her  
back, and she will give down every  
drop of milk.

Instead of wasting time pulling  
fodder and damaging the corn more  
than the entire value of the fodder,  
let every stalk be cut at the proper  
time and shocked. In that way a  
large amount of most excellent for-  
age which all kinds of stock will be  
benefited by is saved, and the corn  
crop will be larger and of a better  
quality than for the fodder to have  
been stripped off or the ears dried  
out on the staff left standing.

There is but one construction put on this unprecedented increase by the health board. That is, that a large portion of parents find themselves at the approach of winter either without employment or with their earning capacity reduced, so that the children's help must be enlisted. It frequently happens that boys and girls can get work when men and women cannot, and of course they can do some work for which adults are not adapted. The apparent falling off of marriage is almost as noticeable as is the increase in the number of children asking to be allowed to go to work, though the figures at the department may be misleading, for clergymen who performed marriage ceremonies may not have returned the certificates as required by law. There is absolutely no doubt, however, so it was declared, yesterday, that no failure on the part of the clergymen to send in their re-

Living in the western part of this county, a few miles beyond Golden Pond, is a citizen who, it seems, had not been making proper provisions for fire wood for his good wife to cook and wash with, and she had to go out into the woods and bring up her own wood. The neighbors, it is supposed, seeing this state of affairs existing and, possessing all the instincts of true Kentuckians, could not stand to see this good housewife having to bring up her wood, so a crowd of them banded together one bright moonlight night and proceeded to the residence of this clever but erring citizen. They called him, and when he made his appearance at the door he was taken a captive. After allowing him to dress, they proceeded with him down to the stable, where they put a horse collar about his neck, put a set of plow harness upon him and hitched him to a ground slide. The "captain" selected one of his men as driver, and they then proceeded down into the woods. Here the slide was loaded with about as much wood as they thought their "team" could comfortably draw, and he was then driven to the house with his load. This procedure was kept up until they had enough wood at the woodpile to last the good housewife for some time. They then drove their "team" back to the stable, unhitched him from the slide, took off the harness, put him in the best stall of the stable and gave him eight ears of corn. As they were closing the door to leave the tired but patient "animal," desiring to be as pleasant as a fellow could be under similar circumstances, said to them: " "

The announcement of the coming engagement of "TEMPEST AND SUNSHINE" at Marion Opera House on November 5th, has created considerable comment from the fact that the play is a dramatization of Mary J. Holmes' well-known novel of life in Kentucky before the Civil war. W. F. Mann gave the play a sumptuous production last year which was the initial season of this excellent play. The coming season promises even greater results than last year which was the subject of much talk among theatrical folks and theatre goers every where the play was presented.

## NEW BETHEL AND KUTTAWA'S LOSS, MARION'S GAIN

Rev. M. E. Miller Accepts Call.

The Rev. Martin E. Miller has accepted the call to the ministry of the Baptist church of this city. He is well known to many of our people, as he has had charge of the churches at Fredonia and New Bethel for several years and at Kuttawa and New Bethel the past year. He is a fluent and magnetic speaker and will be a power in building to greater proportions the already splendid membership of his new charge. Our Baptist brethren are to be congratulated on their wise selection.

Miss Margaret Moore, of Marion, is teaching a few days in the Dixon High School filling the place of Miss Hays who has been called home on account of the sickness of her father.

Served as coffee, the new coffee substitute known to grocer's everywhere as Dr. Shoop's Health Coffee, will trick even a coffee expert. Not a grain of real coffee in it either. Pure healthful toasted grains, malt nuts, etc. have been so cleverly blended as to give a wonderfully satisfying coffee taste and flavor. And it is made in a minute, too! No tedious 20 to 30 minutes boiling. Test it and see. Dr. Shoop's created Health Coffee that the people might have a genuine coffee substitute, and one that would be thoroughly satisfying in every possible respect. Sold by Morris and Yates.

Mrs. N. B. Hays and little daughter, Mollie Rose, of Frankfort, arrived in the city Tuesday evening to visit relatives several days.—Providence Enterprise.

Since this column is for the purpose of helping the teacher who needs help, I want to ask some good teacher to lend a helping hand for my benefit.

We have our adopted text book on spelling and most of us pronounce it good. Our Instructor and our best teachers advocated teaching Phonetics to even the small pupils. I was never taught this much, and never taught it much, especially to the lower grades, until this year, when I found it worked admirably.

It is amazing how the little ones learn that a is a, and o is o, and so on, but I have however run against a stump in the form of u. Now my fellow teachers what are we going to call it (yu) or oo?

The diacritical markings in "fume" and "plume" are exactly the same

## How to Cure Your Piles

Due Often To Carelessness or Neglect and Stubborn to Cure

"The knife is not always necessary to cure even desperate cases of piles," says a physician whose years and experience make him an authority. "Indeed," he says further, "I have known some very aggravated cases of long standing cured by a simple home remedy that restored to the bowels easy natural daily movements."

And the doctor is right, as many letters from cured people in various parts of the country prove. If sufferers from piles, rectal tumors and ulcers would try Dr. Caldwell's Syrup Pepsin they would often save themselves the terrible pain and danger and the heavy expense of a severe surgical operation.

Piles are often due to constipation and are always aggravated by it. Easy natural movements of the bowels such as are invariably produced by this famous laxative without pain or gripe do much to restore a normal, healthy condition to the bowels and thus cure piles.

M. H. Miller, Moweaqua, Ill., says: "I have been troubled all my life with piles brought on by constipation. I tried many doctors and numerous remedies, but found no relief until I used Dr. Caldwell's Syrup Pepsin. I have used it as a laxative and stomach remedy for the past nine years and have no more troubles with piles." H. N. John, Minneapolis, Kan., says he suffered for four years with piles which were so bad that he could not work. Four bottles of Dr. Caldwell's Syrup Pepsin cured him, and he says he has not been bothered since.

Dr. Caldwell's Syrup Pepsin is a safe sure remedy for constipation, restoring easy natural daily movements in the worst old chronic cases, yet so mild and pleasant to take mothers give it to their babies with splendid results. It is sold by all druggists at 50c and \$1.00 per bottle. Syrup Pepsin Co., 302 Caldwell Bldg., Monticello, Ill., will send a free sample to anyone who has not used it and will give it a fair trial.

FOR SALE BY ALL DRUGGIST.

yet we call the one "fume" and the other "plume". "Sure" is marked the same way and pronounced shure. Children note the difference and ask the reason; what to be answered?

## Education.

(NORMAL INSTRUCTOR.)

With the results of education even imperfectly realized, what shall we say of their economic importance? First of all, the educated man is the man of awakened desires. Desire is the basis of economic demand. He is the man not of a few and simple wants, but of many wants. This sense of want, this increased desire, is the result of an intellectual and social awakening. The more education, the more numerous are the wants and the more imperious the demand. Education initiates, organizes and emphasizes a person's desires. It opens the vision of better things and develops the capacity for enjoying them. It cultivates the desire until it arouses action to meet it. Here are the essentials of a market. In fact, the educated man is the market and creates the market. He makes the demand and furnishes the supply. The more the educational process is encouraged the more numerous and wider the reach of these desires.—W. O. Thompson.

### Needed.

Edward prayed one night: "Dear God, take care of my mama way off in Europe and do not let her be in a smash-up. Send your angels to take care of her and send Jesus to take care of papa in Cleveland, but you stay here with me."

—The November Delineator.

### In Memoriam.

Earth has one pure soul less, and Heaven one glad, bright angel more, since August 10, 1908, when Bertha Rushing, after a few days of patient suffering, crossed over to be with Jesus. To her, death came not as the king of terrors, but as an angel of peace, who came in love and took the waiting one home.

Death was not even  
So much as the lifting of a latch,  
Only a step in the open air  
Out of a tent already luminous  
With light that shines through its transparent walls!  
O pure in heart!  
Bertha was one of loving faith  
and trust; a devoted daughter, lov-

ing sister and a true friend.

She is sadly missed in her home, in her school and among a large circle of friends, but the blessed assurance that our loss is heaven's gain enables those who mourn to sorrow not even as others who have no hope. It is not for us to question why such useful lives are cut short; but rather to be stimulated to more earnest effort, so that when our time on earth is over it can be said of us, as to her, "Well done, good and faithful servant."

### Removing Temptation.

My neighbor's small son, not yet four years old, appeared at my door one morning and, after looking in a moment, announced:

"Your door's unlocked."

I was busy, so I said, "All right."

"Why don't you lock it?" he said.

"In a minute I will," I answered,

and he was silent a little while.

Then: "I wish you would come do it now."

"But why, Lawrence?" I asked.

"Well," he sighed, "I might tum in and my mamma said not to."

### Barred In The Presence Of The Gentler Sex.

Little Francis, seven years old, was being questioned, in the parlor, by his oldest sister's beau as to what constituted his studies at school.

"Reading, writing, spelling and arithmetic," promptly replied the little fellow.

"Do you know any thing about vulgar fractions?" was asked.

"Yes," replied the indignant child; "I know they are something you oughtn't to be talking about before sister!"

### EASY TO MIX RECIPE

Hundreds of People in Vicinity Here Will Welcome This Advice.

What will appear very interesting to many people here is the article taken from a New York daily paper, giving a simple prescription, which is said to be a positive remedy for backache, kidney or bladder derangement, if taken before the stage of Bright's disease:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Shake well in a bottle and take in teaspoonful doses after each meal and again at bedtime.

A well-known druggist here at

home, when asked, regarding this prescription, stated that the ingredients are all harmless, and can be obtained at a small cost from any good prescription pharmacy, or the mixture would be put up if asked to do so. He further stated that while this prescription is often prescribed in rheumatic affections with splendid results, he could see no reason why it would not be a splendid remedy for kidney and urinary troubles

and backache as it has a peculiar action upon the kidney structure, cleansing these most important organs and helping them to sift and filter from the blood the four acids and waste matter which cause sickness and suffering. Those of our readers who suffer can make no mistake in giving it a trial. 20-3t.

### THE PLAIN TRUTH.

What More Can Marion People Ask.

When well known residents and highly respected people of Marion make such statements as the following, it must carry conviction to every reader:

J. B. Thorp, Marion, Ky., says: "I feel a great deal better since using Doan's Kidney Pills and keep them in the house at all times. I was a victim of kidney complaint for five years. The secretions from my kidneys were very irregular in action the passage being two frequent, especially during the night when my rest was disturbed. The secretions contained sediment and were very unnatural in appearance. My back ached severely and when I stooped or lifted sharp twinges would dart through my loins. During the day I felt languid and the least work left me completely tired out. Whenever I contracted a cold it was sure to settle on my kidneys and at such times my suffering would always be more intense. Doan's Kidney pills procured at Haynes & Taylor's drug store, me helped from the first and I still using them and a steady improvement is noticeable in my conditions."

### Obituary.

On Sept. 29th, 1908, the death angel visited the home of Mr. and Mrs. Cam Hardin, and took their son, Alla, away; Alla was bright six-year-old boy, and second to none in the second grade at Ditney school.

His death brought sorrow to our hearts as well as to home. But we moan not as the hopeless for we know little Alla is at rest in the Glory world above.

In the cold moist earth we laid him When the forest east the leaf.

And we wept that one so lovely Should have a life so brief.

W. L. MATTHEWS.

### ILLINOIS MAN HEAD OF EQUITY SOCIETY.

C. O. Eaton Elected President And M. F. Sharp, of Kentucky, Vice President.

Milwaukee, Wis., Oct. 8.—J. W. Long, of Chippewa Falls, Wis., today addressed the American Society of Equity convention in which he urged farmers to run for Congress. He gave some statistics of the personnel of the administrative and deliberative bodies in Washington and informed his co-workers that they were mostly made up of lawyers and bankers. To offset this state of affairs he asked the farmers to become candidates for the office.

At the forenoon session the convention amended several of its by-laws as recommended by the committee. Most of the changes referred to the local body, their organization and maintenance.

The convention adjourned to meet in Indianapolis in December after electing officers as follows:

President, C. O. Dayton, Greenville, Ill.; vice president M. F. Sharp, Bowling Green, Ky.; secretary-treasurer, D. Kump, Madison, Wis.

Board of Directors, J. B. Whitig, Interiaken, N. Y.; J. C. Davis, Marshfield, Wis.; Charles A. Sparr, Fort Branch, Ind.; Benjamin Watson, Dixon, Ky. The Equity Farm Journal, Chicago, will be continued as the official organ of the society for the present.
