Every dollar that goes into the Central Trust Banks in his year will increase a hundred fold in his old age.

Here’s the FACT. The money you spend now is just as many times the interest you will make on it in your native house or anywhere else in the world. The dollar is the bank that lends to you, the Internal Revenue, the government, the railroad, the bank. Every dollar that you save on a farmer’s bond means an increase to himself an interest of no less than 10 or 15 percent on the money invested.

In other words, you are throwing away the chance of a small thing, when you are casting away the seed which would bear fruit.
