DEAD MAN ELECTED PROSECUTING ATTORNEY

What would have been the destiny of the late
Lee Rogers, candidate for the Democratic ticket for
the Marion County Prosecuting Attorney for Floyd county
and former dead in his loss on
Friday. The news of the death spread swiftly throughout
the district, as he carried his home
post at Prestonsboro almost universally, and the entire dis-
trict tendered him the marks
of twenty-four hours after his
body was found lying face down in the County Attorney's office.

"If you've ever heard of a smallpox flu, you'll

remember that smallpox is not the same as

flu. Smallpox is a disease that is caused by a

virus, while flu is caused by a different kind of

virus. Smallpox is usually spread through

airborne droplets when an infected person

talks, sneezes, or coughs. Flu, on the other

hand, is spread through close contact with

an infected person, such as touching their

hands or clothes, or kissing them. The symptoms

of smallpox are very different from those of

flu. Smallpox can cause a high fever, red

spots on the skin, and swelling of the lymph

nodes. Flu usually causes a lower fever,

cough, sore throat, and muscle aches.

In the United States, smallpox was

eradicated in 1977, and the disease

has been declared to be extinct. However,

smallpox is still a threat in some parts of the

world, and there is a risk that it could

spread to the United States again.

In the United States, smallpox flu is

reported to the Centers for Disease Control

and Prevention (CDC), which is a federal

agency that is responsible for preventing

and controlling the spread of diseases.

If you are concerned about smallpox,

you can learn more about it by visiting the

CDC's website at www.cdc.gov.
