MISS DAISY CO-PIER CAPTURED

Popular Mreaka Girl, Scrubbed To Hartford Cap.

Miss Daisy Crossley, one of Mreaka's finest girls, was murdered in Hartford, Conn., Saturday night. Miss Daisy was a popular girl and a fine student at Hartford University. She was well liked by all who knew her. Miss Daisy was last seen in the town square with her friend, Mr. John Jones. She was last seen wearing a black dress and carrying a purse. It is suspected that she was murdered by a local gang.

MISS MAINE WOES Continue Her Sunday School Class.

Miss Maine Woes, a popular teacher at the Sunday School class, was arrested for teaching a lesson on Sunday. Miss Maine was teaching the class to唱 the song "Happy Birthday to You" when she was arrested. Miss Maine was charged with teaching on Sunday and will appear in court on Monday. The judge has set bail at $500.

IN STERLING LIVES A GIRL
Who Suffered As Many Days Too Few Than She Found Relief.

Sterling, Ill., Sept. 19—A girl of 14 years, who had been completely disabled by a fall from her horse on Sept. 12, was operated on by Dr. W. H. Dinges of this place yesterday morning and is expected to recover. The accident happened at the home of friends of the family, a distance of a mile from here, on the farm belonging to Mr. W. W. Butcher, of town, on the road to Eldon. The girl fell from the fence of a cow pen and was under the horse in the yard. The horse was lightly loaded, the girl riding without a saddle, and the accident was entirely unexpected.

In an effort to save the girl from being trampled underfoot, the horse was released from the pen and the girl thrown on the ground. She was taken to the hospital at Eldon and was operated on last night. The girl is the daughter of Mr. and Mrs. W. J. R. Mitchell, of Eldon, and is the only child of the family. (Chicago Record-News, Sept. 19).

LOTUS BROAD LEAKS

S. F. A. LOTUS

To the Editor of THE CRITTENDEN RECORD PRESS:

Mr. W. A. Childs, your correspondent, has just delivered what he considers to be the death knell of Lotus Boreas, and as I have a deep interest in the history of this indescribable mechanism, I am rather inclined to present the case in a different light.

In my opinion, Mr. Childs has failed to appreciate the true characteristics of Lotus Boreas. It is a device that has been in use for many years, and has been the subject of much controversy. It is a machine that can be used for various purposes, including the mixing of ingredients, the testing of substances, and the provision of a means of communication.

In its early days, Lotus Boreas was a simple apparatus, but over time it has been refined and improved. It is now a complex and powerful machine, capable of performing a wide range of tasks.

I am certain that Mr. Childs has failed to take into account the potential applications of Lotus Boreas. It is a device that can be used in a variety of industries, including manufacturing, research, and even in the military.

Furthermore, I believe that Mr. Childs has failed to appreciate the fact that Lotus Boreas is a versatile and adaptable device. It can be used in a variety of situations, and its applications are only limited by the imagination of those who use it.

In conclusion, I believe that Mr. Childs has failed to appreciate the true potential of Lotus Boreas. It is a device that has been in use for many years, and has proven to be a valuable asset in a variety of situations.

Yours sincerely,

[Signature]
