FARMERS OF CRITTENDEN CO.

Our County Agent Tells You How to Improve Your Farm in The Article Below.

I want to say something about building up Crittenden Co. full, in the way we have some different kinds of soil in this Co. All of this or that or another soil, and make a minimum profit, you must have the right kind of soil. The soil should be well drained, and it should be of good quality. If you have the right kind of soil, you can make a good profit.

We will now discuss the most important kind of soil in this Co. It is called the "black soil," and it is found in the eastern part of the Co. It is a dark brown or black color, and it is a very fertile soil. You can make a good profit on this kind of soil if you know how to use it.

This soil is also good for growing corn, but you must be careful not to overplant it. You should plant about 500 to 600 acres of corn every year, and you should not plant more than 1,000 acres of corn in one season. This soil is also good for growing hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the next kind of soil in this Co. It is called the "red soil," and it is found in the western part of the Co. It is a reddish-brown or red color, and it is a very fertile soil. You can make a good profit on this kind of soil if you know how to use it.

This soil is also good for growing corn, but you must be careful not to overplant it. You should plant about 500 to 600 acres of corn every year, and you should not plant more than 1,000 acres of corn in one season. This soil is also good for growing hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the next kind of soil in this Co. It is called the "yellow soil," and it is found in the central part of the Co. It is a yellow-brown or yellow color, and it is a very fertile soil. You can make a good profit on this kind of soil if you know how to use it.

This soil is also good for growing corn, but you must be careful not to overplant it. You should plant about 500 to 600 acres of corn every year, and you should not plant more than 1,000 acres of corn in one season. This soil is also good for growing hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the next kind of soil in this Co. It is called the "gray soil," and it is found in the northern part of the Co. It is a gray-brown or gray color, and it is a very fertile soil. You can make a good profit on this kind of soil if you know how to use it.

This soil is also good for growing corn, but you must be careful not to overplant it. You should plant about 500 to 600 acres of corn every year, and you should not plant more than 1,000 acres of corn in one season. This soil is also good for growing hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the last kind of soil in this Co. It is called the "brown soil," and it is found in the southern part of the Co. It is a brown color, and it is a very fertile soil. You can make a good profit on this kind of soil if you know how to use it.

This soil is also good for growing corn, but you must be careful not to overplant it. You should plant about 500 to 600 acres of corn every year, and you should not plant more than 1,000 acres of corn in one season. This soil is also good for growing hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the best way to build up this soil. You should plant a good amount of corn, and you should plant about 500 to 600 acres of corn every year. You should also plant hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the best way to build up this soil. You should plant a good amount of corn, and you should plant about 500 to 600 acres of corn every year. You should also plant hay, but you should not plant more than 500 acres of hay in one season.

We will now discuss the best way to build up this soil. You should plant a good amount of corn, and you should plant about 500 to 600 acres of corn every year. You should also plant hay, but you should not plant more than 500 acres of hay in one season.
I, a Southern Gentleman, am Named

Well, way back in 1901, after I had been in this bright and happy world for several days, I began to get worried. I didn’t have any name.

Folks were calling me “Uncle Tom” and “the new one” and “what’s his name.” I didn’t like it. I didn’t like it at all. I went to the Big Chief thinking all my protest meant to meet in vain.

Pretty soon they all came filing in... The chiefs, short and fat, and the short and fat chiefs.

They were all here, and the Big Chief, “What will you name him?”

Me! How they wrangled and wrangled.

The Folks of the South KNOW good blood. The Folks of the South KNOW good tobacco.

So, I was named, friend, for I want you to be one of my friends, and it means a whole bunch when I say—

I am guaranteed by

The man of the moment.

Buy me. If you don’t I’ll refuse to do your duty and get in your face. A Southern gentleman is known by the world wide for knowing the word and have given you mine.

"To the Gentleman of the South"

"King of Them All"

Removing Old Paint.

This point may be easily and safely done as follows: Scrape the old paint from the surface, crumple a sheet of newspaper into a ball, and apply it to the surface. A much better method is to use a mixture of ammonium sulfamate and water. The wood should then be washed with warm water before using. It should be air-dried before applying the new paint.

Loyd’s Brain Leaks.

Johnson Floyd says a man wants to know all about his brain. He says he has an office boy who does it. But he isn’t that particular when he is considering a girl who is to act as his wife. Uncle Billie Loyd says that you like to be a boy again and hear a woman’s voice from a few months.

Don’t get too much to work, man. Or else you will do harm to the brain. It’s only fair you should be happy. But don’t get too much to work. Or else you will do harm to the brain.

Buddy Loyd says when you first was married, I would get mighty mad because I was too busy to talk to you. But I get some when you look up. It seems strange to me that they can’t write down after they smoke more and get to it. George Haughton.

Nothing strange about it provided you can write down when their time is over and get to it. Or else it doesn’t make them.

John Bob says a wife and a girl are alike in one respect, you can never be too careful. So, when you get married, try to take the idea that you have as much right to be happy as you have to come home half short at 10 M. or so.

Tom Buza says your smell and your hair are much alike. You never appreciate them until you have lost them.

Daily Thought

The successful man is the one who always follows the lead of the truth as he finds it.

If You Don't need them this winter, you will need them next. You Save 30 percent by buying now.

NEW GINGHAMS AND WHITE GOODS

FOR SPRING

ANDELL-GUGENHEIM COMP'Y

BLOOMFIELD AVE.

One of the most beautiful and best plays of the season opened Tuesday afternoon when Mrs. O'Neil and Miss Bessie Biddle entertained a few friends formally with a dinner cake, in honor of Mrs. H. C. Pollard, a son of Marion, who is the present of Mrs. J. C. Pollard.

The menu was attractively decorated with pies and baked goods.

Mrs. J. C. Pollard is a charming woman and a member of the social set. The program included a number of the leading men and women of the city.

The entertainment was enjoyed by all present.

WHEAT HITS $2 MARK
Long-Predicted Goal Reached By
No. 2 Hard For Instantaneous Deliver.

Chicago, Jan. 31.—For the first
time in years, the price of wheat
has reached to a level at which it
is obtainable for seventy-five
cents a bushel. No. 2 hard, for
instantaneous delivery, sold today,
with an advance of fifty cents since
the preceding week. Prevailing
demand for shipment to Europe
and the domestic market not
only increased the price, but
enabled the farmers to obtain
a much better price for their
wheat than they were able to
gain last week.

W. F. WILFORD AND J. M. BOND

AMONG THE CHILKAT INDIANS

U
known to the rest of the
northwest coast of America
until 1804, the Chilkat
Indians, with the exception
of the southern portion of Prince
of Wales Island, which was
first visited by the Spanish
Lander on the northwest
coast, remain in a state of
nuclear isolation. Their
tribal organization consists
of the northern and southern
bands of the Gwaiiian
people, which are united in
the Chilkat and Haida
nations, respectively. The
Chilkat, with their
imposing headdresses and
costumes, are among the
most famed of the northwest
coast tribes.

The Chilkat Cloaks
The Chilkat Indians are
well known for their
impressive cloaks, which
are typically made from
the feathers of the
eagle. These cloaks
are considered to be
highly valuable and
are often traded among
the tribes.

The Chilkat Cloak
The Chilkat cloak is
made from the feathers
of the bald eagle. The
eagles are revered by
the Chilkat Indians,
and the feathers are
considered to be
symbolic of strength
and nobility.

The Chilkat Dance
The Chilkat dance is
an important part of
Creek culture. The
dance is performed
by the men to honor
the eagle and to
surround the dead.

The Chilkat Basket
The Chilkat Indians
are also known for their
basketry. These baskets
are made from the roots
of the western hemlock,
and are used for
storage and decoration.

The Chilkat Basket
The Chilkat basket
is made from the roots
of the western hemlock,
and is considered to be
a symbol of the
Chilkat's close
relationship with the
elements of the
natural world.

The Chilkat Dance
The Chilkat dance
is an important ritual
that is performed by
the men. The dance,
which is accompanied
by chanting and
drumming, is a way
for the Chilkat to
honour the eagle and
to surround the dead.

The Chilkat Basket
The Chilkat basket
is made from the roots
of the western hemlock,
and is considered to be
a symbol of the
Chilkat's close
relationship with the
natural world.
