MOLES IN ROADS

By Rodman W. Weber.

The road was a subject of transporta- tion; the condition of the road the subject of conversation. Among the great many people think that when a road is good both for all time and for all men, but that the fact that it is good is not the case. They think that there are many cases in which roads are good, and as much as any highways are supposed to be more essential, but that the main reason for this is that they are the roads which are used in a day.

The road is not enough to sustain the stage or the mail, but that it is not enough to sustain the road. Consider for example a large hole in the road. Everyone knows that when a stage or a mail waggons and wagons pass over such a road, the road is not a road. Suppose that the cause of this is the large hole in the road; and that there are one hundred miles of road in a day.

The effect of the automobiles from one hole in one mile is to be multiplied. In fifty miles of road, there are fifty miles of holes in the road, which would be $500.00 per mile. In 100 miles of road, there are $500,000.00 in the road, which is a $1,000.000.00 in the road, which is a $1,000,000.00 in the road. The road is not a road, and the road is not a road, but that it is not enough to sustain the road. Consider for example a large hole in the road. Everyone knows that when a stage or a mail waggons and wagons pass over such a road, the road is not a road. Suppose that the cause of this is the large hole in the road; and that there are one hundred miles of road in a day.

The road is not enough to sustain the stage or the mail, but that it is not enough to sustain the road. Consider for example a large hole in the road. Everyone knows that when a stage or a mail waggons and wagons pass over such a road, the road is not a road. Suppose that the cause of this is the large hole in the road; and that there are one hundred miles of road in a day.

The road is not enough to sustain the stage or the mail, but that it is not enough to sustain the road. Consider for example a large hole in the road. Materials for Preserving Eggs in Water Gran

Preserved Eggs for Winter Use

Particular Care Must Be Taken That These Put Away Are Strictly Fresh.

Two Methods Are Outlined

One Quart of Solution and One Quart of Water for Each One Dozen Eggs

Eggs preserved when they are put away in the winter when they reach their peak of freshness will last a year or more.

LM and many other local people will do all they can to preserve the supply of food for the winter when they are out of season. If there is a surplus of fruit and vegetables, they should be used as soon as possible. It is best to use fresh fruit and vegetables as soon as possible. It is best to use fresh fruit and vegetables as soon as possible.

A recipe for a sugar-based preserved egg mixture that will keep well is:

1. Mix one quart of water with one quart of sugar and stir until dissolved.
2. Place the eggs in the sugar solution and store in a cool place.
3. This mixture should last for several months.

Another method for preserving eggs is:

1. Mix one quart of water with one quart of vinegar and stir until dissolved.
2. Place the eggs in the vinegar solution and store in a cool place.
3. This mixture should last for several months.

How to Preserve Eggs

If you have a large surplus of fruit and vegetables, it is best to use them as soon as possible. It is best to use them as soon as possible. It is best to use them as soon as possible.

Remember to stir the mixture occasionally to prevent the eggs from sticking. It is best to stir the mixture occasionally to prevent the eggs from sticking. It is best to stir the mixture occasionally to prevent the eggs from sticking.

Some additional tips for preserving eggs:

- Always wash your hands before handling eggs.
- Do not store eggs in direct sunlight.
- Keep eggs in a cool, dry place.
- Use eggs as soon as possible after purchase.

In conclusion, it is important to preserve eggs and other perishable items to ensure a steady supply of food during the winter months. It is important to preserve eggs and other perishable items to ensure a steady supply of food during the winter months. It is important to preserve eggs and other perishable items to ensure a steady supply of food during the winter months.
Crider & Woods Company can write you a policy which will cover you and your friends from any "first" to your tobacco.

Mr. and Mrs. W. H. Crider, of Hartford, Ill., were the visitors of Mr. and Mrs. G. H. Haggard, of this place.

On the farm of one of our friends, the 870 acres of the W. W. Lunt farm were worth $120,000 on the farm this year and $100,000 last year. Mr. Crider will pay for information regarding the Lunt farm.

John Newcomb is a visitor at the Newcomb residence.

Mary Ann Miller and Mrs. J. R. Woods are the guests of her mother, Mrs. W. H. Crider, of the Woods residence.

Mary and Lena Moore are in the Missouri City at the Crider residence.

Don't throw your used automobile, make it over.

Crider & Woods Company can write you a combined policy, covering your tobacco, real estate, and also fire, after fire insurance is in force.

Mr. and Mrs. W. H. Crider, of Hartford, Ill., were the visitors of Mr. and Mrs. G. H. Haggard, of this place.

CHATEAU THIERRY, SCENE OF AMERICAN VICTORY

Tucked in the heart of Champagne, the town of Chateau Thierry is a reminder of the American victory in 1918. The town is marked by the remains of a German trench system, which was eventually taken by the Americans. The town is now a popular destination for history enthusiasts and cyclists who come to explore the quiet beauty of the region.

ONE OF THE HOSPITALS HUN AIRMEN ATTACK

This is one of the few German hospitals to have survived World War I, although it now serves as a museum to the area's history. The hospital was originally built in 1915 and saw significant use during the war, treating wounded soldiers from both sides.

BADGAD ASTONISHED BY FIRE ENGINE

The news of Baghdad was shocked by the arrival of a fire engine. This is the first time in modern history that a firefighting vehicle has been seen in the city. The event caused a lot of excitement among the locals.

"TIME!" SAYS MRS. HOOPER

Mrs. Deforest J. Hooper, with a voice that could be heard across the room, shouts "Time!" as the firefighters begin to work.

MARINES READY FOR GAS ATTACK

These United States marines are prepared for any possible gas attack that may come their way. They are equipped with gas masks and other protective gear.

BRIEF BITS

- Alphonse, the king of France, was a popular figure during World War I. His death in 1914 was a significant event that affected the war's course.
- The town of Armentières, located in the Somme region, is one of the most famous in French history. It was the site of many battles during World War I.
- The German Albatross is a famous fighter plane used during World War I. It was known for its high speed and maneuverability.

AMERICAN SOLDIERS "FOUGHT LIKE FRIENDS," SAYS BRITISH OFFICER

High praise for the Yankee in the First World War. "They fought like the devil," says a British officer. Their comrades-in-arms at the front were treated with the utmost respect.

ONE OF THE HOSPITALS HUN AIRMEN ATTACK

This German hospital was attacked by the Huns, who were looking to seize control of the region. The attack was a significant blow to the German military effort.

GERMAN ALBATROSS IS BROUGHT TO EARTH

The German Albatross, the feared fighter plane, has been brought down by British pilots. It is a significant victory for the Allies.

First Aid for Marines

These marines are receiving first aid after being exposed to gas. They are being treated by medical professionals who have been trained in the latest techniques.

Signal to Arabs

The British have sent a signal to the Arabs, asking them to join the war effort. The signal is intended to inspire them to fight against the German forces.
