INFLUENZA AGAIN!

Influenza has again appeared in epidemic form in this county. It is spreading very rapidly, in fact the whole town is in a state of travel as everyone is afraid to come in contact with it. Influenza is one of the most contagious diseases with which we have to contend, and its spread is nothing to sneer at, for it is capable of killing its victims. However, we can do much to protect ourselves if we will only avail ourselves of the means at hand.

The first and most important step in its prevention is to avoid crowded houses and crowded trains and see that doors and windows are open at all times so we may get plenty of fresh air both day and night.

Avoid coughing and sneezing as much as possible. Suspense of the respiratory organs contain millions of the little germs or seeds of the disease. They are thrown to the air and breathed by people who become infected. If you must cough, or sneeze, cover your mouth and nose with a handkerchief or your hand and in this way help to spread the spread of this deadly disease.

Influenza vaccine: Yet not perfect though proven of sufficient value that everyone should take it. It is harmless and when given and no side effects can come from its use.

We are short of Doctors in this county. It is impossible to give the people the service that the exigencies demand, therefore this condition makes it more imperative that we use the necessary measures of prevention.

ROP MIXED WITH THE MAAUDS TOO

Nothing unique in rural magnificence. Macadams and Mauds are not the only combination in the world. The name is bestowed and the farmer who lives according to the name is a farmer who is content to live according to the name of his farm, and that is all. Macadams and Mauds are a combination of names, and it is a name that has never been before of so many farmers. It is a name that is not likely to be forgotten. KENTUCKY NEWS ITEMS

A WARNING

The arrival of Asiatic Influenza in many parts of Central Kentucky has caused a great deal of anxiety. It is very important that everyone take precautions to avoid catching this disease. Here are some tips on how to protect yourself:

1. Wash your hands frequently with soap and water.
2. Avoid touching your face, eyes, nose, and mouth.
3. Cover your mouth and nose when you cough or sneeze.
4. Stay home if you are feeling sick.
5. Keep a safe distance from people who are sick.

If you or someone you know is experiencing symptoms of influenza, please contact your healthcare provider immediately.

CHAPTER II - CONCLUSION

He looked at him. "What would you do if you could go back to life?"

"I would do what I do now. I would do what I have always done. I would work and I would strive and I would

"But you could do more. You could do something that would benefit others."

"I would do what I do now. I would do what I have always done. I would work and I would strive and I would

"You are a fool. You are a disgrace.
