CREAM INDUSTRY A GROWING ONE

This Industry Thrives on Big City<br>Waste Notes Remarkable

Of the many business enterprises that are benefiting community for its progressive gift and success, Dairy Farming is probably the most important. A few years ago dairy farming was largely confined to the farms in and about the city. Now as the city grows so does the demand for milk and dairy products. The trend is toward the use of these products as a substitute for meat. The public is becoming more health conscious and is turning to dairy products for their vitamins and minerals. The demand for these products is expected to continue to grow as the population increases.

SCHOOL PARENTS BIG SUCCESS

The meeting with Dr. Clark on Wednesday afternoon was well attended. The Parent's Night at the High School on Monday evening was a great success. It provided an excellent opportunity for parents and students to meet and discuss matters pertaining to their common interests. The Parent's Night has become an annual event and is looked forward to by all.

How much of the fire risk are you carrying?

More than you think unless you have increased your property value and insured it. If your home burned, it would cost twice the money you paid originally to rebuild it. At a time when your home is most vulnerable! Why risk having your property partially insured. Insure it in the Hartford.

OUR SCHOOLS
By Prof. J. V. Chapman

The most common theme of the educational institutions is the goal of educating children for the work of the world. The need for education is met by a system of schools that includes primary, secondary, and higher education. The aim of education is to prepare children for the responsibilities of adulthood. The schools provide instruction in various subjects, such as reading, writing, mathematics, and science. The schools also offer opportunities for extracurricular activities, such as sports and music. The schools are funded through taxes and fees. The curriculum is designed to meet the needs of the community and the nation. The schools are staffed by teachers who are trained in their respective fields. The schools are held accountable for the education of their students through standardized testing and other assessments. The schools are supported by parents who are involved in the education of their children. The schools are open to all students, regardless of their background. The schools are committed to providing an equal education for all students. The schools are supported by the community, who recognize the importance of education. The schools are dedicated to preparing students for a successful future.
