Sheep Are Useful in Pasturing Weeds in Standing Corn After Cultivation Stops.

This habit particularly adapts them to being kept in large numbers on lands of sparse vegetation or furnishing a variety of grasses or other plants, says the United States department of agriculture. They do better on short and fine grasses than on coarse or high feed. They will eat a good deal of brush and, if confined to small areas, will do a fair job at cleaning up land. When used in this way, or on land producing brush only. they can not be expected to prove very satisfactory in the production of good

PROPER CARE OF YOUNG PIGS

First Thing to Be Done Is to Cut Off Four Sharp, Hard Tusks-Never Pull Them.

Soon after pigs are born, the four sharp, hard tusks, two in the upper and two in the lower jaws should be cut off. Take a pair of nippers and cut the teeth off, but not too near the gums. Often these tusks cut the sow's

seen that a pig is getting too fat, it is evidence that it is robbing its mates. To prevent this, take a sharp knife and cut its rooter in two or three places, deep enough to make it sore, and it will stop taking more than its sically, "if you will do me the honor to the prevent that a pig is getting too fat, it is pigted as the prevent that a pig is getting too fat, it is pigted as the prevent that a pig is getting too fat, it is pigted as the pigted and on the prevent this, take a sharp knife and cut its rooter in two or three places, deep enough to make it sore, and it will stop taking more than its sically, "if you will do me the honor to the pig is getting too fat, it is pigted as the pig is getting too fat, it is pig is getting too fat, it

# OPPORTUNITIES FOR PROFITS

Only About 4 or 5 Per Cent of Live Stock Is Purebred and Demand Steadily Growing.

There are many opportunities for good profits in the breeding of purebred live stock. When it is considered that only about 4 or 5 per cent of our stock is purebred and that demand for better stock is steadily growing it must be clear that there is still room for capable men with a love for live stock to make breeding a profitable business. But the man who is not prepared either through training or inclination to devote large part of his time to the care and bus sailed to America, according to management of his stock is surely making a mistake to engage in the purebred business.

The searchers, it seems, start out ir-responsibly, frankly and specifically the thrill of their great moment after demanding the worst boy. never find him in such a simple man for the boy they're seeking bad, and that means he's clever. He probably does not attend Sunday school the year 'round, but very likely he gets in on all the Christmas trees Why not, then, catch him with a Christmas tree? Pass the word out that next Christmas there will be a tree with presents for good little boys; no bad little boy will be allowed a look-in; bad little boys are not war ted and are defied to get in by any book or crook. Then, after the excercise are under way, the searchers may look over their audience, and pick out their worst boy. He may be hard to pick out from all the rest, but he'll be there. -Kansas City Star.

Pays to Remove Gasoline.

From its investigation of the effects of removing gasoline from natural gas, the United States bureau of mines has concluded that the gas is not only not made poorer, but that its consumer is gallon of gasoline burned in the gas is worth about 1% cents, but the condensation of the light oil in pipe lines causes large leakages and lowering of pressure-troubles that are mostly eliminated when the gasoline is removed. As automobile fuel the extracted gasoline is worth about 30 cents a gallon, the several hundred million gallous obtained yearly from this source being prized over ordinary gasoline on account of the lower boiling points:

Violets Profitable. Violet farming is profitable work, woman horticulturist whom I know

Hampshire (says an English respondent) made a good livelihood out of it in pre-war days, and, having now been demobiled, is again installed on her picturesque estate. She cultivates violets of a mammoth size, and of exquisite perfume. Some are desfined for decorative purposes, some for the scent factory, while others find a ready market in the confectionery trade, where crystallized violets are in large demand.

# For more than Forty Years Cotton Growers have known that **POTASH PAYS**

More than 11,651,200 Tons of Potash Salts had been imported and used in the United States in the 20 years previous to January, 1915, when shipments ceased. Of this 6,460,700 Tons consisted of

# **KAINIT**

which the cotton grower knew was both a plant food and a preventive of blight and rust,-with it came also 1,312,400 Tons of

# 20 per cent MANURE SALT

which has the same effects on Cotton, but which was used mainly in mixed fertilizers.

Shipments of both Kainit and Manure Salt have been resumed but the shortage of coal and cars and high freight rates make it more desirable to ship Manure Salt, which contains 20 per cent of actual Potash, instead of Kainit, which contains less than 13 per cent actual Potash.

MANURE SALT can be used as a side dressing on Cotton in just the same way as Kainit and will give the same results. Where you used 100 pounds of Kainit, you need to use but 62 pounds of Manure Salt, or 100 pounds of Manure Salt go as far as 161 pounds of Kainit.

MANURE SALT has been coming forward in considerable amounts and cotton growers, who cannot secure Kainit, should make an effort to get Manure Salt for side dressing to aid in making a big Cotton Crop.

# Muriate of Potash

50 per cent actual Potash, has been coming forward also,—100 pounds of Muriate are equivalent to 400 pounds of Kainit or 250 pounds of Manure Salt.

These are the three Standard GERMAN Potash Salts that were always used in making cotton fertilizers and have been used for all these years with great profit and without any damage to the crop.

The supply is not at present as large as in former years, but there is enough to greatly increase the Cotton Crop if you insist on your dealer making the necessary effort to get it for you.

FUEL SAVED BY GOOD ROADS

Wear and Tear on Trucks and Amount of Gasoline Consumed Shown in Recent Ohio Test.

A test conducted in Ohio recently to determine the saving in gasoline from running over a good road as compared with gas consumption over bad and medium-grade roads, disclosed a surprising difference. Five new srms standard "A" trucks with seven different types of road service, showed you will feel weak and sick and nau- between the best and worst types of a gain of six miles per gailon of fuel ronds. All the trucks were empty during the test.

The trucks loaded showed that the poor road took seven times as much gasoline per mile as the good one.

The test results showed an average of 5.78 miles per gallon over a diet road in good condition, 7.19 over fair gravel, 9.39 over good gravel, about the same over fair bituminous macadam and good brick roads, 11.44 over extra smooth brick and 11.78 over good

The saving to the motoring public in gasoline alone would ame millions of dollars annually. Perhaps equal to this would be the saving in tires, which is considered as important an item of car upkeep as is gasoline Calculating the saving in wear and tear on the mechanism of cars and trucks and also the item of time lost undoubtedly a sane investment.

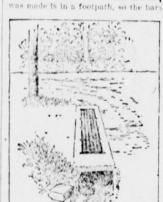

Much Trouble Obviated by Invention

paths become clogged with debris and frequently give trouble because they cannot be readily cleaned. The device illustrated obviates all this difficulty. It consists of a grate of from bars supported by crosspleces which rest in notches or upon the surface of stonework or concrete, says American for stonework or concrete, says American for them. In making a selection in her maids trocks that the American for a bride one must remember to look for dignified designs, but for brides maids this is not so important.

The dress shown above has an unsurface and sprightliness. Sometimes it serves as a foundation for much airy can Agriculturist. The bars and the crosspieces should be of heavy enough material to support any load that wil

be driven across the grating.

quarter of an inch thick. The cross pieces are of the same material, bent the ends and riveted to the bars. All that is necessary to clean such a work with a spade or a hoe.

# HIGHWAYS IN SOUTH DAKOTA

State Has 6,000 Miles of Improved Roads-Only Ten Other States Exceed in Mileage/

South Dakota has 6,000 miles of main highways, out of a total of 203. 523 in the United States. Definite road systems have been established in 44 states, either through legisla tive action or through state and local officials. North Dakota has 4,000 miles and Minnesota 12,700. Only ten states exceed South Dakota in mile age, while several of them have lest than 1,000 miles of main highway.

# BIG HIGHWAY APPROPRIATION

State of Wyoming Has Let Contracts for Improvements to Cost \$3,000,000 in 1920.

The total estimated cost of highway ers. improvements for which the Wyom ing state highway department has let contracts, and which will be completed during the present year, exceeds \$3,000,000. This total represents \$15 for each inhabitant of the state.

Moroccan Read Traffic. highways is very large. In addition to expected but effective touches in its the transport of passengers by private or public automobiles, the roads permit an important movement of merchandise by motortrucks.

# Cities Could Not Survive.

Without roads, cities could not sur vive, and country-folk would be without many of the present necessities, comforts, and luxuries of life, which they are now able to enjoy.

# Bad Roads Impede Progress.

It is common for farmers to find that they cannot haul their produce to market when prices are highest, be cause the roads are impassable.

Road Drag Most Useful. The road drag is used extensively in every state; probably nine-tenths of the road maintenance is done by dragging.

Best Good Road Argument. The best arguments for good roads are good roads themselves.

# PRETTY DRESS FOR JUNE BRIDESMAID

American design that will commend it-self to the bridesmaid at a June wedof Grate or Iron Bars, Resting in Notches.

Often culverts under roads and other some good after the wedding.

There are many white dresses—of like colors for bridesmalds' dresses and

# Why Brunswick Tires

Win Preference There are two main reasons - one, the name itself. which certifies superfine value - the other, that time

tells the same story. Thus reputation and performance unite in giving

you all you expect - and more. Yet Brunswicks cost no more than like-type tires. Many motorists would pay more readily, but the Brunswick idea is to GIVE the utmost, rather than to GET the utmost. And this has been true since 1845. You can appreciate what Brunswick Standards mean by trying ONE Brunswick Tire. It will be a revelation. You'll agree that you could not buy a better,

regardless of price. And, like other motorista, you'll decide to have ALL Brunswicks. Then you'll know supreme satisfaction from your thes -- longer life, minimum trouble, lower cost.

### TO PUT BACK FAMOUS STONE

Plymouth Rock Will Be Restored to Its Original Resting Place on Harbor Shore.

Plymouth Rock, on which the Pilrims landed in 1620, is to be moved. It will be taken from its present location at the foot of Cole's hill, Plymouth, and restored to its original resting place on the harbor shore. Moving the famous boulder is part of the plan to restore the Plymouth water front, making it conform, as nearly as possible, with its original setting. The project will be completed in time for the historical drama next year, when the threehundredth anniversary of the landing of the Pilgrims will be celebrated. The rock was taken from its original resting place many years ago and eventually was placed in its present location, several feet from the water's edge.

The wharves which were built

after the rock was removed prevented the waves from "lapping the rock." It is now planned to replace the wharves with a seawall, from the center of which will rise a granite portico of Grecian design. Openings in the seaward base of the portico will permit the entrance of the tidewater, and the rock will lie below the level of the floor, permitting a view only from above. Pillars supporting the roof probably will bear the names of the Pilgrims who signed the compact in the cabin of the Mayflower. The estimated cost of the portico is \$47,000.

cid-Stomach HAYNES & TAYLOR

The rollicking comedy success, "Nothing But The Truth," will be presented on the sixth night of the coming Redpath Chautauqua by a New York cast. The plot of this great American play is so full of amusing complications and surprise's that it is one constant gale of merriment from first to last. Merely because he tells the pure, unadulterated truth, the hero gets into one complication after another until he abandons himself to an orgy of fabrication. "Nothing But The, Truth" is a clean, wholesome, delightful comedy.

Well-Known Writer and Lecturer Has Wide Knowledge of Pres-ent-Day Conditions.

Donald H. McGibeny, novelist and traveler, comes with a broad back-

study of bolshevism and what it aims

to the investigation of bolshevism, not only abroad but in America as well. His experiences in Washington in tracking down the national society of anarchists revealed important events

of present-day history. Besides being a lecturer of unusual ability, Mr. McGibeny has also received marked recognition as a writer. The Ladies' Home Journal is carrying each month a story by him, illustrated in color, and a new Mc-Gibeny novel, "Bullet Proof," has just

# 

Newly Married Man Seems to Thir

A young newly married man told the writer not long ago that he al-most dreaded taking a friend home to dinner because his wife, every time she expected visitors, imagined it was necessary to scrub the house from cellar to garret and polish every bit of silver on the sideboard.

It made him uncomfortable all day long to think of his wife giving herself this wholly unnecessary

"Of course a man likes to see his home looking nice when he takes a chum into it, and of course the chum does, too," he said, "but I'd be far happier if I could convince my wife that a house can look tidy even if it hasn't been gone over that very day. I like the books to look a bit disorderly. You get the feeling that they're being read all the time, and that's what books are for. And I like the music to look a trifle disarranged. It looks as though we really used our piano. What if the curtains are not just even at the windows? Things ought to look as if they were touched and used and enjoyed. If the sofa cushions are dented you know some one has leaned against them; isn't that what they are for? But if they stare at you in a prim row you're a brave man if you dare to put your back against there-much less your tired head. And when a fellow comes home at liam Patrick Foley, who came to night he usually has a tired head!" Isn't this young man right?-Ex-

### COUNTRY HAD BRIGHT SIDE tion to hear him play the drum part Old Gentleman Was Able to Enumerate cert. Few bandsmen have a right a Few Advantages It Possessed

The married daughter and her family had come from their home in the city back to her father's farm for a visit. After supper one evening she began to try to persuade father to move to the city so that mother in her old age would not have to work ly instructed—he followed his drum so hard. "I don't have any lamps to part carefully and intelligently. One clean or any wood to carry or any water to carry a quarter of a mile, boasted the daughter. "When I his elbow, but, after all, because he want a light, all I have to do is to was a musician and understood his press a button, and when I want wainstrument. - Christian Science ter I turn a faucet, and when I

want heat just pull a chain."
"Yes," agreed her father, "and MANY FLOWERS HAVE EYES when we want meat all we have to do is to whistle up a chicken, when we want roasting ears or potatoes we just walk to our garden, but when you want a good square meal you have to ride 30 miles out into the country to get it. So for all parties tatoes have eyes, but how many concerned I guess we'd better stay in the country-mother and I." and wild flowers are similarly

# ASKING TOO MUCH.

Occasional flashes of humor lighten the seriousness of the senate League of Nations battle. Here are three stories the league debate is responsible for:

rays of light upon a sensitive patch of tissue behind them. A nastur-Senator Williams, Mississippi, tium has a thousand such "eyes" on was explaining that though the league covenant was not all the its leaves, but it is not yet known if United States desired, it was all we could expect under the circum-

"One day the curly-haired one was grumbling about some fancied hardship, and her sister rebuked her

"'Well, you know, you can't have everything and curly hair." AMERICA'S CHINESE CARTOONIST

"Paul Fung was born twenty years ago in Seattle," writes Agnes Lockhart Hughes in Everybody's. "But he went to school in China and studied the orthodox Chinese art. While Paul excelled the other pupils in his work, conventional drawing did not hold a strong appeal for him, because he had been introduced to the Sunday paper comic supplements, sent him by his sister in Portland. The seed of cartooning was sown. Paul was obsessed with it. Cartooning is not cultivated by the Chinese, but Paul cartooned and cartooned to the amazement of his oriental comrades.

"Today Fung serves a prominent-Seattle newspaper as cartoonistand he is only twenty years oldand with a good education, splendid vocabulary, softly accented speech, keen sense of humor, he has already won the name of humorist."

# AND SO THE COST GOES UP.

"Aren't you afraid you will make furs cost so much that women will not be able to wear them the year 'round?"

"No," replied the dealer. "The reason we raised the price was to make them more desirable. No fashionable lady will tolerate the suspicion she can't afford them."

Scene from Rollicking Comedy, "Nothing But The Truth," Sixth Night of Chautauqua

As a novel by Frederick S. Isham, it was read by million later as a play it ran more than a season on Broadway. It is the ingenious, entertaining story of a young society idler withat he can tell the absolute truth for one whole day. A complete production of "Nothing But The Truth" will be given on the sixth night of the Redpath Chautauqua here, by a New York company of

# Sick Men! Make No Mistake

27 Years Experience

DR. LUCKETT

Don't—Consider marriage true bill of health, or, if you have violated the laws of nature. Many men make this mistake through neglect, ignorance or improper treatment, consequently domestic discord and uahappiness follows. If you have violated the laws of your God, or nature, or have tainted blood, nervouskess, lack of confidence, bashfulness, shun society, poor memory, pimples, black specks before youreyes, backache, falling hair, sore mouth, red spots, bone pains, headaches, painful or difficult passages or discharges, day or night losses, kidney or bladder troubles, do not let money matters, modesty or self-pride keep you away. Many men are skeptical from being unsuccessfully treated elsewhere, and allow this to deter them from being CURED. Your health is most important, and you should not trifle with unreliable or would-be specialists. I want to talk to men in just such condition. I want to prove to you beyond a doubt that there is you. I do not ask a cent of EAAT I CAM GUAR YOU.

# Weak, Nervous, Diseased-

# **Nervous Debility**

seives to take prompt steps to relieve a condition which ulti-mately leads to misery and helplessness. At no time in a man's life does he need more the service of a skilled specialst.

I give each and every case individual treatment and my original perfected methods are safe,
sure and certain in bringing
back strength and vigor. They
build up the physical, mental
and vital man, permanently stop
all drains or vital losses, emissions, invigorate the wasted orcans and soon restors the suf-

# Unnatural Discharges

Whether recent or chronic, gon-orrhea, stricture, inflammation of the bladder and prostate, orchitis, hydrocele and varico-cele in all their stages, forms and complications, cured quick-ly, permanently and without hindrance to business, by rem-edies tested in many years of special practice.

REMEMBER—That what my treatment has done and is doing for others it will do for you.

In the vast catalog of the all-In the vast catalog of the ali-ments afflicting poor, frail and erring humanity, none are fraught with such terrible con-sequences as cases of neglected or mistreated private disears.

# "606" Cures Blood Poison

Positive blood tests prove that "606" when introduced directly into the blood by the intravenous method, is a certain and absolute cure for all syphiletic blood and skin affections. One injection will usually do as much as a year's medicine via the stomach. If you have sore throat, enlarged glands, falling hair, sores, pimples and eruptions, rheumatic pains, Acne, Eczema, Psoriasis or any to me and be permanently cured of it. For your offspring's sake don't marry until you have taken "606". Accept only the Intravenous Method-the only right way to administer "606". The

### Don't Give Up! See Me At Once!

sipation, excesses? Have private and blood diseases ravaged your system and undermined your already weakened vitality? weaknesses developd into organic disase? Are you prematurely oid, and not the man you should be? Your manhood is on the decline and you will soon be lost. Awake to your true condition, 1 can restore you to perfect health and manhood with strong physical, mental and vital powers complete.

STAR PERFORMER ON DRUM

Writer Recalls British Army Man Whe

Got Real Music From the Big Instrument.

Anyone with a strong arm and an

uncertain idea of time can spoil the

performance of the best band in ex-

istence. One of the best big drum-

mers in the British army was Wil-

Canada in the '70s with his regi-

ment, and after his discharge re-

mained in Canada. It was a revela-

either on parade or at a band con-

estimate of the value of the big drum, yet there is no doubt of its

enhancing the beauty of the band

when properly handled. It was in-

spiring even to hear Foley's three

preliminary strokes given out at the

opening of a march, not only with

precision but with resonace every

beat vibrating. He had been proper-

Most people are aware that po-

Beethoven's "colossal name" was not altogether to the taste of the Abbe Liszt, writes a London correspondent of the Christian Science Monitor. He says it was used to crush all contemporary composers and tells more than one story of tests that he applied to find out if the crowd were indeed "subjugated by the power of genius" or whether their "brilliant displays of enthusiasm" were not largely induced by mere attribution of a composition to the great master.

An inversion of the order of the program on a particular occasion showed decisively how the case stood. Without any explanation a trio of Pixis was played in the place of one by Beethoven. The bravos were more numerous, more brilliant than ever; and when the trio of Beethoven took the place assigned to that of Pixis it was found to be cold, mediocre and even tiresome.

# The KITCHEN

We are done with petty conduct We are done with narrow creeds We have grown to men and women And we've noble work to do,

### THREE MEALS A DAY.

And today we are a people With a larger point of view.

To begin the day, a little season able fruit is always appropriate, and at this season

beginning to be abundant; nothing could be more appetizing than a dish of the fresh red berries served around a mound of powdered sugar. The berries are not hulled and are eaten from the fin

gers, dipping the berry into the sugar.

A dish of any preferred cereal follows the fruit. Whole wheat soaked overnight and cooked until tender and gelatinous makes an ideal breakfast food, and one which is both wholesome and inexpensive. Take the wheat from the granary or bny it at the mill; wash carefully after picking it over to remove any chaff and seeds, then sonk and cook until tender. Serve with top milk. Enough may be prepared for several days to save time. This food is especially good for chil-

If the main meal is served at night, the noon meal should be simple but nourishing. The following are only suggestions: Hot cheese sandwiches, a simple salad of lettuce or a dish of radishes and tender green onions, baking powder biscuit, gelatin with whipped cream, cookies, and tea. Another good luncheon menu is potato salad, either hot or cold, smoked herring, brown betty, and cocoa.

Another luncheon menu: Escalloped fish, cabbage salad, steamed brown bread, canned peaches or fresh fruit, macaroons and tea.

For dinner one may have broiled steak, a roast of some kind, a roasted or fricasseed fowl, a baked stuffed fish. broiled chops, veal cutlets or baked -a few of the good things from which to choose,

With the stuffed fish serve parsley potatoes, cauliflower with Hollandaise sauce, sliced cucumbers, a caramel custard and coffee with small cakes, With the brailed steak, baked potatoes, creamed onlons, buttered carrots and lettuce salad; with an ice cream served with a sauce, either maple, caramel, or chocolate, and coffee.

Banana Custard Pic.—Prepare a custard pie as usual and just before serving cover with sliced bananas (ripe ones), and finish with a meringue which is quickly browned in the Chopped pineapple may be used instead of the banana and whipped cream instead of the meringue, if preferred.

"Talk not with thy guest of his own affairs, for with those he is sufficiently acquainted; but discourse ever of thine own-of thy good luck and ill, of thy horses, thy servants, thy children and thy ailments. If thou dost not succeed thereby in making him feel at home thou mayst at least induce him to wish himself there."

# A DAY OF DATES.

than a confection is worthy attention. Date Puffs-Make a cream-puff mixture and fill the puffs with finely chopped dates and sweetened whip-

ped cream, beaten together until the mixture becomes thick and light.

Date Custard Pie.-Add one and one half cupfuls of dates which have been washed in hot water, stoned and press ed through a coarse sleve to a custard pie filling and bake with one crust, This makes a large pic.

Date Whip.-Cook one cupful of chopped stoned dates in boiling water until smooth; press through a sieve. Bent the whites of three egg until stiff; add one-third of a cupful of sugar, one-half teaspoonful of salt and a tablespoonful of lemon juice. Fold in the date pulp, pile lightly in a buttered baking dish and bake in a slow oven 30 minutes. Serve with a custard or with whipped cream.

Date and Apple Pla.-Line a ple plate with rich pastry and fill with a mixture of chopped dates and apples, sprinkled with cinnamon and sugar; cover with a crust and bake in a moo erate oven an hour. Serve hot or cold

Date Sandwich.—This is especially the children's lunch. Spread buttered bread with a layer of cottage cheese, which has been moistened with cream; over this a layer of chopped dates. Cover with a slice of buttered bread.

Jewel Biscuit.-Make a good rich biscuit dough. Roll out rather thin and cut with a small biscuit cutter. Dot with bits of butter and lay a ten spoonful of chopped dates on each and lap over as one would Parkerhouse rolls. Bake in a quick oven.

Add chopped dates with nuts to boiled frosting for a cake filling. Add n tablespoonful of cream to the fros ing used between the layers as that

# LADY LARKSPUR

By MEREDITH NICHOLSON

Copyright by Charles Scribner's Sons

### "YOU SCOUNDREL!"

Synopsis.—Richard Searles, successful American playwright, confides to his friend, Bob Singleton, the fact that, inspired by the genius of a young actress whom he had seen in London, he has written a play, "Lady Larkspur," solely with the thought that she should interpret the leading character. This girl, Violet Dewing, has disappeared. Singleton, an aviator, has just returned diavaided) from France. His uncle. Raymond Bashford, had contracted a marriage a short time before his Synopsis.-Richard Searles, suc valided from France. His uncle. Raymond Bashford, had contracted a marriage a short time before his death, while on a visit to Japan. He left Singleton a comparatively small amount of money and the privilege of residing in the "garage" of his summer home, Bartonon-the-Sound, Connecticut. Mrs. Bashford is believed to be traveleing in the Orient. The household at Barton is made up of brokendown employees of a New York hotel, where Bashford made his home. Singleton goes to Barton, taking with him the manuscript of "Lady Larkspur." There he finds the household strangely upset, some of its members being suspected by their comrades of pro-Germanism. Antoine, head of the establishment, informs him that he has been perplexed by the somewhat mysterious visits of a stranger, apparently a foreigner, seeking Mrs. Bashford. Antoine has formed the male members of the household into a guard for protection. Singleton reads Searles play with approval. "Aunt Alice arrives unexpectedly, meets with a lively reception and turns out to be young and charming. Mrs. Farnsworth is her traveling companion Torrence, Bashford's lawyer, suspects the two women and warms Singleton "Aunt Alice" may be an impostor. The mysterious stranger, Count Montani, makes a call and is seen to be very much interested in "Aunt Alices" ostrich-plume seen to be very much interested "Aunt Alice's" ostrich-plume fan, which has been repaired by a jeweler in Japan. Singleton is fas-cinated by "Aunt Alice." Antoine reports a "spy" has been tempting a woman servant to steal the fan.

### CHAPTER III-Continued.

I had noticed that she had substituted a tiny Japanese fan for the one that Montani had inspected so eager-When I spoke of the change she had said the other was too precious for everyday use, and she meant to keep it locked up.

"I hate to bother you, sir, knowing

The mention of the fan had brought me to an abrupt halt. I resented hav-ing the thing thrust at me in the cestatic mood in which I left the house, but the visit of the Germanspeaking stranger was serious, and Antoine knew startled me. He told me further that the man had carefully outlined to Elsie just how she could take advantage of her freedom of the house to appropriate the fan when the ladies were out and the servants off the second floor. She was to be paid for her as-Dates are so generally well liked; been promised; even more had been suggested. Elsie and the stranger had sistance; two hundred dollars, had few ways of serving left the garage and passed out of earshot before Elsie fully consented; but Pierre had given Antoine the impression that she would make the attempt.

"It was to be for the kniser, for Gerdeclared Antoine bitterly. straight-I did indeed, sir!

"I think Flynn and his wife are both honest, but we'll take no chance, Warn don't want Elsie to get the iden that she's being watched; so tell the men to now far from the boundary wall back she's being watched, so the garage. Til keep of the garage from which with the keep away from the garage. Til keep he had entered the grounds. With the an eye on the Flynns. You go home and go to bed.

had settled upon the shore, and the Flynns' quarters were perfectly tranquil. It didn't seem possible that an international episode was in process of incubation in that quiet neighborhood. I began to think that the general distrust of the German woman by her as-sociates might be responsible for Pierre's story. But, viewed in any light, I had a duty to perform. If Elsie had visited the house and purloined the fan, she would be very likely to get rid of it as quickly as possible, and I de-termined to keep watch. I drew the blinds, got into my dressing gown and. re-enforcing the lampshade with a newspaper to deaden the light, pro-

ceeded to read. It was on toward one o'clock and I top now?" was dozing when a sound roused me A door on the Flynn side of the hail creaked; there was silence, then I heard furtive steps on the stair. I the window just as Elsie's robust of the window just as Eisie's robust as figure disappeared into the shadows. I the garden," remarked Antoine.

"He broke for the garden," I sugwas about to follow when the creaking of the Flynn door was repeated. In moment another peep through the shade showed me Flynn himself, and he, too, quickly vanished. Here was a situation indeed! If Elsie was keeping tryst with her co-conspirator of the atternoon and her husband was spying upon her, a row of large proportions was likely to result at any moment. I leaned from the window as far as I dared and saw the woman close to the wall at the farther end of the building. The scene was well set for trouble, and I was wondering what I could do to

Spouting water, "that I seen Elsle, who's been sneakin' me meals to the who's been sneakin' me meals to the When I reached the open Flynn was old stables, an' she says to me: ancing round the belligerents like an Dutch,' she says, 'they's all ag'in us excited boxer, occasionally springing in to land a blow; and all the while show 'em we's good Americans,' she Elsie continued to address her captive says. An' she tole me a feller been to and the world at large in her native tongue. Flynn was rather more than fer 'im, he thinkin' 'er likely to do ut tongue. Fiynn was rather much his ju-sixty, and Elsie was not much his ju-fer love o' the kaiser. She said as 'ow or, while the invader was young and she'd nail 'im when he comes tonight The man had loosened one arm to git a fan she's promised to lift fer 'im. She said that'd prove she wasn't was pounding Elsie in the face. 1 no Dutchwoman and recommended if I snocked the gun from his hand with got the chance to do the same. I ny waiking-stick and shouted to Eisie thought nothin' wuz goin' to happen let go of him. Her shouts had roused an' wuz sleepin' on me bench here in the guards and, hearing answering the garden when the hollerin' at the cries and the beat of hurrying feet on the walks, he redoubled his efforts to

and pounded him vigorously on the ing he had captured the enemy, grip- back, assisted by Zimmerman, the obliging valet, who had seized the occasion to show his hand on the side of the allies. "Shall I telephone for the walks and driveways, and Antoine was Barton police, sir?" asked Antoine,

> thing that vitally concerned the nations at war, common chivalry demanded that I handle the arrest of Montani's agent in such a manner as to shield them. I was thinking hard and in my perplexity even considered sending a messenger to Torrence; but he was already suspicious and would be very likely to summon Raynor immediately and precipitate a crisis I was not prepared to face. To invite the attention of the American state department to the increasingly complex situation would not be giving my aunt the chance I meant she should have to clear herself.

> The captive had got upon his feet and stood dazedly staring at us. He refused to answer my questions, even when I suggested that if he could give a satisfactory account of himself he would be released. He only doggedly shook his head. When I asked if he had been hurt in his bout with Dutch he smiled and extended his arms in denial. He was a very decent-looking fellow, blue-eved and smooth-shaven, who seemed to accept his plight with a degree of good humor.

I decided that as nothing would be gained by sending him to the Barton calaboose that night, I would assume the responsibility of detaining him until I had groped my way through the that enveloped him.

"Aunt Alice," Count Montani and the mysterious fan.

(TO BE CONTINUED.)

### GOES BACK TO ROMAN LAW of Injunction Almost as Old as

the Institution of Trial by Jury.

Use of the injunction is a feature of the law almost as old as the institution of trial by jury. It was first used in 1382, when the king of England empowered the chancellor to issue writs restraining the barons from overriding the common law courts. principle of injunction dates back furher still to Roman law: sified in the law as one of the 'ex-traordinary writs.' Its essential purpose is to prevent the doing of a wrong whose effects, if consummated, would be irreparable. In other words in stead of waiting for a threatened wrong to work its damage, which law court might redress by punishment or the assessment of damages, the equity court steps in with its 'extraordinary writ' of injunction to prevent the damage being done. Its twin is mandamus, which commands perform ance of certain rights and duties, while the province of injunction is to forbid performance of certain act. which might interfere with rights or result

where such an appliance is not avail. Drainage Ditches Should Be Provided able, a man can follow the machine with a pitchfork and remove the plants at every round out of the way of the team, for if trampled upon many of the seeds will be shelled out and wasted. The shelf-rake reaper, which really is a mowing machine provided with a bunching attachment, gives sat isfactory results, as it barvests the crop without exposing it to injury.

When cut with a mowing machine or with a self-rake reaper, the beans may be raked in small piles or placed in trees. If the trees are planted on small shocks. These piles or shocks should be left for four or five days the same depth that they stood in the in good drying weather or until the grain is found to be fairly dry in the they should be planted two inche pods. Wet weather does not injure deeper. Be sure to buy from reliable the crop seriously, provided the plants nurseries. It is a waste of labor, time are not allowed to rest on the ground

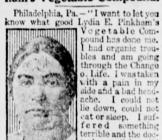

for any length of time. Where a binder is used the bound which they are to be grown. bundles should be shocked eight or ter to a shock and allowed to remain until DON'T NEGLECT SMALL FRUIT thoroughly dry. Hay caps are not nec essary when the piles or bundles are shocked properly. in the field until thrashing time or if thoroughly dry they may be housed and thrashed later. The cured plants are ordinarily gathered from the field by hand, but the web loader commonly used for having will do the work more rapidly and with less loss of seed than the hand methods. Should Adjust Separator.

The ordinary grain separator can be adjusted to thrash any beans successfully, but as equipped for small grains a large percentage of cracked beans will result. The chief cause of split

beans is the high speed of the cylinder, which should be reduced at least one half, although the speed of the fans and other parts of the separator should be maintained. This may be accomplished by doubling the size of both cylinder pulleys. In some cases special set of thin concaves is used. while in other instances some of the concaves are removed. Good judgment on the part of the thrasherman will enable-him to adjust the ordinary

United States a Real Democracy Only When It Votes for President.

By MARY ROBERTS RINEHART, American Writer.

votes.

This is one of the most critical periods in the country's history. The nation faces a vitally necessary industrial and economic adjustment, in which every man and woman must aid.

The basic economic factor is the home and it rests with the women to take the initiative in measures affecting the home.

Autocracy of mass is as bad as autocracy of class. The strongest emotion prevailing in the country today is fear of radicalism. The people must shake off their political lethargy and realize that they are the government. The only time the United States is a real democracy is when it

Every four years the country puts all its eggs in one basket and must take its chance until the next general election. We have been particularly fortunate in selecting our presidents in the past, but we can't afford to make a mistake at this critical period of our national life.

There must be no "rubber stamp" delegates to the national conventions. They must reflect the wishes of the people they represent.

The greatest problem before the American people, I believe, is industrial and economic adjustment, so that we may take the lead in this. The men are doing their part now. They earn in their capacity, while the women now must achieve the impossible by maintaining the home at a decent standard in the face of continually increasing living costs.

### Reactionary and Progressive and How America Will Be Made Secure.

By NICHOLAS MURRAY BUTLER, President Columbia University

The sure mark of the reactionary is unwillingness to make use of the teachings of past experience or to read the lessons of history and apply them to the problems of today.

The true progressive, on the other hand, is he who carefully reads history and carefully examines the experience of mankind in order to see what lessons have already been learned, what mistakes have already been repeated and what principles of organization and conduct have established themselves as sound and beneficent.

America will be saved, not by those who have only contempt and despite for her founders and her history, but by those who look with respect and reverence upon the great series of happenings extending from the voyage of the Mayflower to the achievements of the American armies on the soil of France, and upon that long succession of statesmen, orators, men of letters and men of affairs who have themselves been both the product and the highest promise of American life and American opportunity.

The declaration of independence rings as true today as it did in 1776. The constitution remains the surest and safest foundation for a free government that the wit of man has yet devised.

Faithful adherence to these strong and enduring foundations and a high purpose to apply the fundamental principles of American life with sympathy and openmindedness to each new problem that presents itself will give us a people increasingly prosperous, increasingly happy and increasingly secure.

### "I Have Preached the Doctrine of the Red. White and Blue Forever."

By JOHN KJELLANDER, Superior Court Clerk, Chicago.

The initial fact in my case is that I, a native of Sweden, am proud of my American citizenship. There my glory begins and ends.

When I arrived at Castle Garden I had \$10. I came to Chicago, the metropolis of the Golden West, and I partook again of an effervescent cup of optimism. Quoting Theodore Roosevelt, "the name of American is to bear the most honorable of titles and whoever does not so believe has no business to bear the name at all." Send all such back,

These United States have given me opportunity. I have been honored by the electorate. Class distinction would have barred me abroad. This country has afforded me the privilege of knowing, personally, men and women of all classes, from the lowly to the chief magistrate of the nation.

Respecting my fatherland, I have gained adoration for the land of my adoption. I wish the same were true of other foreigners who have come to our shores. To all such as have been classified as "Reds" I would say "get out!" To deport them is a pussyfoot method. Their place is before a firing squad. In my job as clerk of the Superior court of Cook county I have made many addresses in my office to applicants for citizen. ship and I have preached the doctrine of the red, white, and blue-

### "Some Large Questions on Which the Future of the Nation Depends."

By MRS CARRIE CHAPMAN CATT, Woman Suffrage Leader.

Some large questions are coming up today. To cite a few of them. How shall the peace of the world be maintained? How shall food enough be produced to bring the necessary variety within the possession of every human being? How shall industrial profiteers be brought to book? How shall the illiteracy, so glaringly revealed by war statistics, be removed, for ignorance in a republic is an ever-present menace?

As many women die every year from perfectly preventable causes at maternity as there were men from this country killed in the great war. Why should this go on?

These are a few of the questions calling for attention at this time. And the future of the nation, the happiness of posterity depends upon the manner in which men and women voters of today meet these questions. To my mind, it is the duty of the women voters in the coming election

to place their eyes upon the big things at issue and let those big things govern their choice of party and candidates.

George Cushing, American Wholesale Coal Association-If we coal men believe that this is the last chance in history to make a dollar; if we believe the end of 1920 will be the end of opportunity for profit, and if we try in the nine months to make all the money we want for the rest of our lives, then we can expect the condemnation of the public. And we may reap as a reward perpetual federal control.

Roger W. Babson, Business Statistician-A dollar saved today will be worth \$2 five or ten years from now, when the cost of living has dedined to what it inevitably will.

### MAKING MILK DISEASE-FREE

Thriving Vermont Municipality Is First Small City to Adopt Strict Regulations.

Barre, Vt., a thriving municipality of about 15,000, is the first small city in the United States which requires dairymen furnishing it with milk to place their berds under federal-state tuberculosis. The result has been accomplished by close and persistent cooperation on the part of the mayor and other municipal authorities, the United States department of agricul-ture, the state commissioner of agriculture, the local veterinarian.

Eradication of tuberculesis was be gun in a thoroughly systematic man-ner. The regulations of the federal bureau of animal industry and of the state commissioner of agriculture were supplemented by a city ordinance. The city provided at its own expense a large barn, in which were assembled

Experts.

all small herds, scattered lots, and individual cows. The city also furnished necessary conveyances, and employed a man who devoted his time to notifying owners when to bring their cattle in for test, assigning them stalls as they came in, and keeping the cattle moving out promptly after ests were completed.

Two hundred and sixteen herds, aposed of 2,107 individuals, were ested, and 379 reactors-17.9 per cent of the total—were found. Those reshipped out and slaughtered under ederal inspection.

Among the larger cities whose milk obtained entirely or chiefly from tuberculin-tested cattle that have passed federal and state tests are Birmingham, Ala., and Washington, D. C. In addition, numerous others ordinances requiring the tuberculin test applied under local super-

# PROPER MANAGEMENT OF COW

Ration Should Be of Such Kind That Animal Will Be in Good Flesh on Freshening.

During the dry period, the cow should be given a good ration so that she will be in good flesh when she freshens. This will improve the quality as well as the quantity of the milk. Just before freshening the grain ration should not be too heavy and should contain plenty of bran. The bowels should be kept well regulated. If necessary, one to one and one-half pounds of Epsom salts may be used as a drench. The cow should have a period of rest of four to six weeks in order to give the best supply of milk during the period of lactation.

# GOOD COWS ARE ECONOMICAL

Animals Provide Cheapest, Best and Most Wholesome Feed—No Way of Doing Without Them.

The first reason for having good fact that they provide the cheapest, best and most wholesome food for the family. Their value is hard to estiwhen we consider the amount saved on the bills. Their produce is superior substitute for many foods necessarily purchased at high prices. doing without plenty of good milk cows on the farm.

# SILO HAS MANY ADVANTAGES

Owner Can Carry Maximum Number of Cows and Supply Necessary Succulent Feed.

The farmer who has a silo can carry a maximum number of cows and supply his herd with a palatable, succulent feed of a uniform quality at any time during the year, conditions favorable to a large milk production.

### DAIRY NOTES

Use clean bedding only.

In selecting a sire attention must be paid to the average type of females in

The old country breeders were very careful in the females selected to replenish their herds.

Improvement of the herd conies through the sire. Therefore, make sure you get a right good one.

A good-sized barrel in a dairy cow fadicates large capacity for digestion. There should be a good spring of ribs. Draw a line on careless cleaning of

the tubes and teat cups of the milking machine. It surely is the boundary between success and fallure. Quality in a dairy cow is largely in-

dicated by a thin, loose, pliable skin, medium-sized, closely-knit bones and firm, clean muscular tissue. Milk is approximately 88 per cent

plain water. Unless this is supplied in sufficient quantity and in palatable form, milk can no more be produced than if the cow is under led.

Head Hunters Wage Constant Warfare Against Camphor Producers in the Forests of Formosa.

Formosa, owned by Japan, holds a ket of camphor. The life of a camphor worker is described in a letin of the National Geographic society as being an adventurous one, in that the worker is never safe from the Formosa head hunters. Although a woodsman with an ax never moves except in the company of an armed guard, there always is danger of an ambush. Camphor forests now exist, thanks to the head hunters of Fornosa, for if this menace had not existed, the forests would have disap-

Camphor stills are operated in a simple manner. Camphor chips are placed in a chip retort over boiling water, and as the camphor vaporizes it passes through pipes into submerged vats, which are so arranged that cool water from a mountain stream can run over them to accelerate crystalization. After the camphor has crystaluct is placed on wooden troughs to alwhatever free oil there to drain off. The oil will yield 90 per cent of crude camphor in the process of refining.

### FORTUNES LEFT BY MISERS Hard for Normal Mind to Understand

What Actuated the Hoarders of Great Riches.

Thomas Cooke, known as "the Isington miser." who lived a life of enury, saving and petty trickery in Islington, a borough of London, England, left a fortune of more than \$300,000 for his heirs to squabble over after his death. Cooke managed to get his meals free of cost by the old and yet ever new trick of falling in a pretended fit in front of a house at dinner time. He would be carried into a house and then, on making his usual quick recovery, he naturally would be asked to share the meal.

Among other beggars who left fortunes after death was Jeremiah Monihan, upon whom, when he was about to be buried in St. Louis, was found a ty box contained \$60,000 in perfectly good interest-bearing bonds. Another, Marshall McMurran, a ragged recluse, was found in a starving condition in his tumbledown shack on the outskirts of Fvansville, Ind. He was taken be fore a commission for examination as to hist sanity and when he searched \$22,000 was found in the lining of his coat and in his pockets.

When Hubby "Cleans Up." A woman looked haggard and worn the other day and said that she was resting up after her husband's day of rest. "I always plan to go away," she said, "when my husband has a holiday, but this time I didn't

know it was coming." "You know," she said with a sigh, "he will lie down after breakfast on such an occasion after he has done some of the chores. After he has smoked for a time and read the papers he becomes restless and always de cides to clean the cellar or rearrange the clothes in his closet or in his dress er. Then he starts to putter. about an hour he gets tired if the task is a long one and leaves everything in a heap if it is in the cellar or stuffs things out o fsight if it is in the house. I usually have to get a boy to put the cellar to rights and must take the If It is back in orderly fashion. Do you know that there have been times when I have had to rescue anything from good rubbers to bulbs of plants from the

# WORKERS ALWAYS IN DANGER RHODESIA "LAND OF OPHIR?"

Archeologists Have Long Contended for and Against Arguments to That Effect.

The extensive ruins of ancient forts, temples and gold workings in Rhodesia have ben given rise to considerable controversy from time to time, some archeologists contending that they are only four hundred or five hundred years old and others howing that they date back to at least two thousand years before the Christian era, and that Rhodesia was the land of Ophir, mentioned in the Bible at

chapters ix and x of I Kings. It is noteworthy that Milton in "Paradise Lost," book II, speaks of the angel Michael leading Adam to a hill of paradise from whose top His eyes might there command

City of old or modern fame, from the walls of Cambalu to

Sofala (thought Ophir) to the realm of Congo, and Angola, far-thest south.

The theory has been advanced that Rhodesia was not actually Ophir, it was at least the "Havilah" whence the gold of Ophir was obtained and which was so much in evidence at Solomon's entertainment of the queen of Sheba. If this theory is correct then Sofala of today would be the site of "Tarshish," the ancient sea-port for "Havilah," and the outlet for precious stones, metals and other nerchandise, Ophir being situated in all probability on the southern coast of Arabia and constituting a distributing emporium rather than the place of origin of these things.

Emaciated Bride Considered Beautiful. Javanese marriage customs include a period of religious instruction for both the bride and the groom. The young man starts his instruction by paying daily visits to the priest of village, and learning all the complicated phrases which he will have to utter on the day of his wedding. The pupil is placed in a tank of cold water and stays there submerged up to his chin while the priest bends over him and reads the Koran, the perfor ance taking place in front of the

The girl begins her preparations for the great day by several weeks of semi-starvation during which time she takes only sufficient rice and hot wa-teg to sustain life. Because of this inger strike enforced by custom, she loses considerable weight, an emaciated bride being considered a thing of beauty on the island of Java.—Detroit News.

Where the Shah Sits. The throne of the Shah of Persia is the most valuable one in the whole world, and its enormous dimensions and exquisite decorations would inspire a multimillionaire with awe.

It is of pure white marble, and is no less than 18 feet in depth by 10 feet wide. The actual seat is mounted on a large platform of the same material, and is upheld by fourteen spottess ivory pillars, carved in the shape of men and women; while the whole is covered with pictures worked in the purest gold leaf. Ascending to the platform is a staircase of solid gold.

Steel gauges accurate to the incredible fineness of a millionth part of an ties at the United States bureau of is the method of manufacture, simple and the balance all within .000,002 inch of precision, says Popular Mechanics Magazine. The guages are ash barrel?"-Lawrence Telegram. | steel discs.

# WHY PAY MORE
