LIKE THEIR NEW BUILDING

Everywhere commented on the new building as it was opened. Mrs. Trotter in particular was pleased with the new building. She felt that it was a perfect place for her and the students. The new building was a wonderful improvement over the old one. It was larger, more spacious, and more modern in design. It was a true building that would be a credit to the Marion Public School.

The building was a two story structure with a large entrance main door. The inside was spacious and brightly lit. The main door had a large window in it, which was open and letting in plenty of air and light. The students were very pleased with the new building and they were happy to be in a more modern and comfortable school.
