SINCERITY is the keynote of good taste. The quiet refinement of correct attire is instantly recognized.

Worth Hats reflect that note of sincerity which is the result of good materials, good style,

and careful, intelligent workmanship. The hat which is suitable for one man may not be suitable for another. I will not merely sell you a hat to fit your head-I will help you to select a Worth hat which will conform to your personality and represent your individuality.

Wool Sorting, Inspection and Blending.

4Copyright, by American Woolen Co., Boston.) Since the passage of the United States warehouse act in 1916, the bureau of markets, United States department of agriculture, which is charged with the adminstration of this legislation, has received approximate-300 applications for licenses. Half these applications were received othin the past year.

The advantages that accrue from the houses storing agricultural products as cotton, grain, wool, tobacco and flaxseed are just beginning to be fully appreciated, say specialists of the bureau of markets. A continuous educational campaign has been con-ducted to accomplish this result, and the bureau confidently feels that a llly increasing number of applications will be received.

Aids in Financing Crops. The chief purpose of the act, which s not mandatory, is to establish a form of warehouse receipt that will be easily and widely negotiable as deand therefore of definite assistance financing crops. By licensing and the manning crops. By licensing and bonding warehouses the integrity of the receipt is assured as evidence of the condition, quality, quantity and ownership of the products stored. These receipts are approved as collat-eral for loans made by the federal farm loan board; and because of the birty sains of the reaper bankers can high value of the paper, bankers genuld mean reduced interest charges for the growers. It is also a fact that in insuring cotton stored in federally sicensed warehouses reductions of from 10 to 25 per cent have been by rate-making agencies Thus the insurance underwriters give de recognition to the creation moral class of risk and to

ducer who stores his product in licensed warehouses is that he is enabled to hold his goods under the best conditions yet devised, until such time as the market is ready to receive immediately, the low interest rate upon his loan being more than offset "top-of-market" prices received when he finally sells his product. Wool Regulations Issued.

A particular advantage to the pro-

Regulations for the licensing and bonding of wool warehouses recently were promulgated by the bureau, Provision is made for the accurate weighing and grading of wool stored, or to be stored, in such warehouses. The grading tends not only to increase the value of the wool and make it more marketable, but gives the grower information as to the quality or grade of wool he is producing, indicating how the wool and the flocks or bands may be improved to produce the most profitable quality. grower knows that his wool is safe in such a warehouse, and that it is properly handled because of government supervision and inspection.

Where the wool of the growers is being pooled, the place of assembling or storing it may readily be licensed by complying with the regulations, of the associations which have shown a desire to become licensed is to have the growers turn their wool over to the censed and bonded warehouse, where the lots are graded and like grades are put together in large heaps or piles. The warehouse then issues recelpts to the association, which can be used as collateral. From the funds

vances to the individual grower. A copy of the regulations and forms to be used in connection with licensing wool warehouses can be had upon application to the Bureau of Markets. United States Department of Agriculture, Washington,

TUBERCULOSIS TESTS ARE MOST RELIABLE

value of government supervision

in Various Ways

Animals Should Be Purchased Only From Droves Known to be Free From Allment - Community Pastures Are Dangerous

Here are a few ways in which tuberhealthy herd, according to specialists riculture:

By the addition of an animal that is affected with the disease; therefor animals should be purchased only from herds known to be free from tuulosis, or from herds under super vision for the eradication of the dis

By feeding calves with milk or other products from tubercular cows; this frequently occurs where the ownpurchases mixed skim milk from the creamery and feeds it to his calves without first making it safe by boiling or pasteurization.

By showing cattle at fairs and exhi hittons. Reports have indicated that numerous herds have become infected through mingling with infected cattle at shows or by occupying infected

The shipment of animals in cars which have recently carried diseased cattle and which have not been disin fected properly.

Community pastures; pastures is which tuberculous cattle are allowed to graze are a source of danger.

In most cases the outward appear ance of the animal bears no relation to the degree of infection. The disease frequently develops so slowly that in some cases it may be months, or even longer, before any symptoms are shown: therefore, be on the safe side and have your herd tested.

Much valuable information on th ubject is contained in Farmers' Bulletin 1009, Tuberculosis in Live Stock Copies may be had by addressing a re s to the United States department of agriculture, Washington, D. C.

Not Fit for Use. Wooden pails or pails in which soured, decaying materials are kept are not fit for use in feeding a pure clean ration to young calves.

Shelter for Calves. eap stied of some sort furnishe ellent refuge for the young calf ing the middle hours of the day.

on Grasshoppers.

FARM WOODLAND IN THE

Farm woodlands amount to There are about 53,000,000 acres of woodland.

In New England more than 65 per cent of all forested land is on farms, and in Ohio, Indiana, Illinois, and Iowa from 80 to 100 per cent.

The income to farms from timber products is estimated at about \$162,000,000 yearly.

AGENTS HELP IN MARKETING

Various County Representatives Have Done Much to Assist Organization of Associations.

Work of exceptional value to farm ers has been done by various county agents in connection with the organization of live-stock shipping associashipping associations have been especially successful in Minnesota, Michigan, Wisconsin and Oregon, as well as in several states in the South. The live-stock auction sales have been developed in California on an Australian model which was introduced by a county agent who had been engaged in agricultural extension work in New South Wales. The value of the stock marketed through these auction sales in California amounted to \$1,790,330 by \$166,946 over prices which the stock would have brought had the auction sales not been held:

LIVE STOCK

Keep the pigs growing every min-

There should be purebred live stock on every farm.

Give pigs shade, water and pasture if you want them to thrive,

Worms in swine have no commer-

cial value. Discontinue raising them. Not only can beef be produced at

ower cost per hundred pounds by feeding an all-silage ration, but twice as many pounds of beef can be produced per acre of ground in crops.

Were it not for the fact that alfalfa is altogether too apt to cause bloat in cattle it would undoubtedly become popular for pasture.

A SYMPOSIUM OF SALADS.

There is never a sameness in the art of salad making, for one has an

infinite variety from which to choose raw materials. Cooked food, odds and ends of leftovers which would otherwise be wasted, may go into the salad bowl and become an attractive dish, with a wellprepared and an appropriate dressing.

Fisherman's Salad. Take two pounds of cooked fish, one

ound of boiled potatoes, a quarter of a head of white cabbage; season with salt and pepper. After flaking the fish and shredding the cabbage add cay-enne pepper to season well, one pickled beet finely chopped, also two cucumbers. Mix all together and serve with any good salad dressing.

Potato Salad.

The best potato salad is made with potatoes cooked especially for the salad and seasoned before they become cold. Boil small-sized potatoes with their skins on, peel and cut in cubes, add seasonings of salt and pepper and marinate with a thin dressing-either a cooked dressing thinned with cream or a well seasoned French Dressing them while warm sends the seasoning through them and nakes a much more palatable salad, Minced onion fresh mustard finely shredded almonds and a cucumber or two will make the finest kind of a salad, providing the salad dressing is a good well seasoned one. Just before serving add the thick salad dressing and the cucumber unless kept very cold will lose its crispness.

Simple Tomato Salad.

Scald and peel perfectly ripe tomatoes of uniform size. Place in a dish and cover with ice and salt for half an hour to chill thoroughly. Rub a salad bowl with the cut side of a clove of garlic and arrange the crisp, tender leaves of the heart of head lettuce the tomatoes cut in quarters or if small cut in quarters without separating the pieces and pour over a good mayonnaise dressing which has been seasoned with minced onion.

Veal Salad.

Cook a small piece of veal in a broth made of chicken bones and water, or cook the veal with the chicken. Let the ment cool in the broth, then cut it in small cubes; mix with celery and salad dressing and it will be hard to tell from a chicken salad.

THE VALLEY of the GIANTS

By PETER B. KYNE

Author of "Cappy Ricks"

"GOD HELP YOU!"

Synopsis.—Pioneer in the Califor-nia redwood region, John Cardigan, at forty-seven, is the leading citizen of Sequola, owner of mills, ships, or sequoia, owner of mills, slips, and many acres of timber, a widower after three years of married life, and father of two-year-old Bryce Cardigan. At fourteen Bryce makes the acquaintance of Shirley Sumner, a visitor at Sequoia, and his junior by a few years. Together they visit the Valley of the Gianta, sacred to John Cardigan and his son as the burial place of Bryce's mother, and part with mutual regret. While Bryce is at college John Caragam meets with heavy business loases and for the first time views the future with uncertainty. After graduation from college, and a trip abroad, Bryce Cardigan comes home. On the train he meets Shirley Sumner, on her way to Sequoia to make her home there with meets Shirley Sumner, on her way to Sequoia to make her home there with her uncle, Colonel Pennington. Bryce learns that his father's segicht has failed and that Colonel Pennington is seeking to take advantage of the old man's husiness. and many acres of timber, a wid Pennington is seeking to take ad-vantage of the old man's business misfortunes. Join Cardigan is de-spairing, but Bryce is full of fight, Bryce finds a burl redwood feiled across his mother's grave. He goes to dinner at Pennington's on Shiriey's invitation and finds the din-ing room paneled with burl from the tree. Bryce and Pennington dethe tree. Bryce and Pennington de-care war, though Shirley does not krow it. Bryce bests Jules Ron-deau, Pennington's lighting logsing boss, and forces him to confess that Pennington ordered the burl tree cut. Pennington butts into the fight and gets hurt. Bryce stands off a ware of Pennington's lumberfight and gets hurt. Bryce stands off a gang of Pennington's lumber men. Shiriey, who sees it all, tell. Bryce it must be "goodby." Bryce renews acquaintance with Moira McTavish daugnter of his drunker woods-boss.

CHAPTER VIII-Continued.

The thought that he so readily unferstood touched her; a glint of tears and placed his arms fraternally around her shoulders, "Tut-tut, Moira! Don't cry," he soothed her, "I understand perfectly, and of course we'll his hand he indicated the camp. down on the steps, Moira, and we'll talk it over. I really called to see your father, but I guess I don't want to see him after all-if he's sick." She looked at him bravely. "I didn't know you at first, Mr. Bryce, I fibbed.

Father isn't sick. He's drunk, "I thought so when I saw the loading-crew talling it easy at the log-

"I loathe it-and I cannot leave it." she burst out vehemently. "I'm chain-ed to my degradation. I dream to come down to Sequola and go to on Bryce instantly. The road, being unhappy.

She drew his hand suddenly to her lips and kissed it; her hot tears of full for mere words.

"Fiddle-de-dee, Moira! Buck up. be protested, hugely pleased, but embarrassed withal. "The way you take this, one would think you had expected me to go back on an old pal and ad been pleasantly surprised when I what I'll do. I'll advance you two lot of clothes and things in Sequola that you don't need here. And I'm glad I've managed to settle the Mc Tavish hash without kicking up a row nd hurting your feelings. Poor old Mac! I'm sorry I can't bear with him but we simply have to have the logs, you know."

He rose, stooped, and pinched her ear: for had he not known her since childhood, and had they not gathered huckleberries together in the long ago? She was sister to him-just an other one of his problems-and nothing more. "Report on the fob as soon as possible. Moira," he called to her

Presently, when Moira lifted her her on the skyline, there was a new glory in her eyes; and lo, it was an tumn in the woods, for over that hill Prince Charming had come to her, and life was all crimson and gold!

When the train loaded with Card! gan logs crawled in on the main track and stopped at the log-landing in Pen nington's camp, the locomotive uncoupled and backed in on the siding for the purpose of kicking the caboose in which Shirley and Colonel Penning ton had ridden to the woods, out onto the main line again-where, owing to a slight downhill grade, the caboos controlled by the brakeman could coast gently forward and be hooked onto the end of the log train for the return Journey to Sequoia.

Throughout the afternoon Shirley following the battle royal between Bryce and the Pennington retainers had sat dismally in the enboose. She was prey to many conflicting emo tions; but having had what her ser term "a good cry," she had to a great extent recovered her customary poise -and was busily speculating on the rapidity with which she could leave Bryce Cardigan-when the log train ed into the landing and the last of the long string of trucks came to a

load the object of her unhappy speculations was seated, apparently quite oblivious of the fact that he was back once more in the haunt of his enemies, although knowledge that the doublebitted ax he had so unceremoniously borrowed of Colonet Pennington was driven deep tuto the log beside him. with the haft convenient to his hand. admitted. "Then I grew ashamed of probably had much to do with Bryce's

move, should he show the slightest disposition to raise his head and bring ing room. You see, I had to have his eyes on a level with hers, she something here. I couldn't leave my would dodge away from the window

With a smart bump it struck the caboose and shunted it briskly up the declared with emphasis. "The idea of siding; at the sound of the impact our woods-boss's daughter slinging Bryce raised his troubled giance just in time to see Shirley's body. He took one of her hands in his, ing to the shock, sway into full view

With difficulty he suppressed a grin. "I'll bet my immortal soul she was peeking at me," he soliloquized, "Confound the luck! Another meeting this afternoon would be embarrassing." legging-camps to hunt and fish? I al- Tactfully he resumed his study of his ways lived with the McTavishes then feet, not even looking up when the caboose, after gaining the main track berries were ripe, we used to go out slid gently down the slight grade and and pick them together. Poor Moira! was coupled to the rear logging truck. Why, we're old pals, and I'll be shot He heard the engineer shout to the if I'm going to see you suffer. Listen, brakeman-who had ridden down from Moira. I'm going to fire your father, the head of the train to unlock the as I've said, because he's working for siding switch and couple the caboose -to hurry up, lock the switch, and "Can't get this danged key to turn

I'd finance them. Presently he was subconscioushim for a trip to some state institu- ly aware that the train was moving have to do something about it. You're then where they sometimes reclaim gently forward; almost immediately, too fine for this." With a sweep of such wreckage, if I didn't think he's it seemed to him, the long string of "Sit too old a dog to be taught new tricks," trucks had gathered their customary "Perhaps," she suggested sadly, speed; and then suddenly it dawned "you had better talk the matter over upon Bryce that the train had started off without a single jerk-and that it was gathering headway rapidly.

> He looked ahead-and his hair grew I saw him last-such a man as these creepy at the roots. There was no lo woods will never see again-and I comotive attached to the train! It don't want to see him again until he's was running away down a two per cold sober. I'll write him a letter, Ax cent grade, and because of the trefor you, Moira, you're fired, too. I'll mendous weight of the train, it was not have you walting on table in my gathering momentum at a fearful rate.

dreams, and they'll never come true. work in our office. We can use you on privately owned, was, like most log-I-I-oh, Mr. Bryce, Mr. Bryce, I'm so the books, helping Sinclair, and regging roads, neglected as to roadbed lieve him of the task of billing, check- and rolling stock; also it was under "So am I," he retorted, "We all ing tallies, and looking after the pay manned, and the brakeman, who also after the engineer had locked the air-Her hard hand closed over his brakes. As a result, during the five or against the front of the caboose, held six minutes required to "spot in" the We lost while the brakeman struggled of the caboose was not appreciably Cardigans had twenty-five years of with the recalcitrant lock on the slackened. "It's had too good a start!" switch, the air had leaked away Bryce moaned. "The momentum is through the worn valves and rubber tubing, and the brakes had been released-so that the train, without warning, had quietly and almost noise lessly slid out of the log-landing and loy fell on it, but her heart was too started on its mad career. There was nothing to do now save watch the wild runaway and pray, for of all the mad

runaways in a mad world, a loaded logging train is by far the worst. For an instant after realizing his predicament, Bryce Cardigan was tempted to jump and take his chance on a few broken bones, before the train could reach a greater speed than twenty miles an hour. His next impulse was to run forward and set the hand-brake on the leading truck, but a clance showed him that even with hope to leap from truck to truck and land on the round, freshly peeled surface of the logs without slipping, for he had no calks in his boots. And to slip now meant swift and horrible

Then he remembered. In the wildly rolling caboose Shirley Sumner rode with her uncle, while less than two miles ahead, the track swung in a sharp curve high up along the hillside above Mad river. Bryce knew the leading truck would never take that curve at high speed, even if the ancient rolling stock should hold together until the curve was reached, but would shoot off at a tangent into the canyon, carrying trucks, logs, and caboose with it, rolling over and over down the hillside to the river.

"The caboose must be cut out of this runaway," Bryce sollloquized. "and it must be cut out in a devil of a hurry. Here goes nothing in particular, and may God be good to my dear old man,"

He lerked his axe out of the log. drove it deep into the top log toward the end, and by using the haft to cling to, crawled toward the rear of the load and looked down at the caboose coupling. The top log was a sixteen foot butt; the two bottom loss were eighteen-footers. With a sflent prayer of thanks to Providence, Bryce slid down to the landing thus formed. He was still five feet above the coupling. however; but by leaning over the swaying, bumping edge and swinging the axe with one hand, he managed to cut through the rubber hose on the

After accomplishing this, axe in hand, he leaped down to the narrow ledge formed by the bumper in front of the caboose—driving his face into the front of the caboose; and he only grasped the steel rod leading from the brake-chains to the wheel on the mill, and we can't get them with old stop directly opposite the caboose.

John Barleycorn for a woods-boss. Shirley happened to be looking roof in time to avoid falling half Meira. So we're going to change through the grimy caboose window at stunned between the front of the ca-

that moment. On the top log of the boose and the rest of the logging coupled-guess that fool brakeman have leaped in safety. Clinging perilously on the bumper, he reached with the bank. Come out, my dear." his foot, got his toe under the lever on the side, jerked it upward, and white and trembling. The Colonel threw the pin out of the coupling; then with his free hand he swung the axe and drove the great steel jaws of dered. "There, there!" he soothed her the coupling apart.

The caboose was cut out! But already the deadly curve was in sight: in two minutes the first truck would reach it; and the caboose, though cut ose, had to be stopped, else with the headway it had gathered, it, too, would follow the logging trucks to glory.

For a moment Bryce clung to the brake-rod, weak and dizzy from the effects of the blow when, leaping down from the loaded truck to the caboos certain?" bumper, his face had smashed into

was bruised, skinned, and bloody; his nose had been broken, and twin rivulets of blood ran from his nostrils. He wiped it away, swung his ave drove blade deep into the bumper and left it there with the haft quivering turning, he climbed swiftly up the narrow iron ladder beside the rod until he reached the roof; then, still standing on the ladder, he reached the brake-wheel and drew it promptly but gradually around the wheel-blocks

bite, when he exerted his tre-mendous strength to the utmost and with his knees braced doggedly The brake screamed, but the speed

switch, the air had leaked away Bryce mouned, "The momentum is more than I can overcome. Oh, Shirley, my love! God help you!" He cast a sudden despairing lool

over his shoulder downward at the coupling. He was winning, after all, for a space of six feet now yawned between the end of the logging truck and the bumper of the caboose, he could but hold that tremendous strain on the wheel for a quarter of a mile, he might get the demon ca boose under control! After what seemed an eon of wait

ing, he ventured another look ahead. The rear logging-truck was a hundred yards in front of him now, and from the wheels of the caboose an odor of something burning drifted up to him "I've got your wheels locked!" he half sobbed. "I'll hold you yet, you brute. Slide! That's it! Slide, and flatten your infernal wheels. Hah! quitting-quitting. I'll have you in Burn, curse you, burn!" With a shriek of metal scraping

metal, the head of the Juggernau shead took the curve, clung there an instant, and was catapulted out into space. Logs weighing twenty tons were flung about like kindling; one instant, Bryce could see them in the air; the next they had disappeared down the hillside. A deafening crash, a splash, a cloud of dust-With a protesting squeal, the ca-

boose came to the point where the log ging-train had left the right of way, carrying rails and ties with it. wheels on the side nearest the bank slid into the dirt first and plowed deep into the soil; the caboose came to an abrupt stop, trembled and rattled. overtopped its center of gravity, and fell over against the cut-bank, wearily, like a drunken hag. Bryce, still clinging to the brake

was fully braced for the shock and was not flung off. Calmly he descend ed the ladder, recovered the axe from the bumper, climbed back to the roof, tiptoed off the roof to the top of the bank and sat calmly down under a manzanita bush to await results, fo ne was quite confident that none of the occupants of the confounded caboose had been treated to anything worse than a wild ride and a rare fright, and he was curious to see Shirley Sumner would behave in an

Colonel Pennington was first to merge at the rear of the caboose, He leaped lightly down the steps, ran to the front of the car, looked down the track, and swore feelingly. Then he darted back to the rear of the ca-

boose.

"All clear and snug as a bug under titute, and he who relies upon any a chip, my dear," he called to Shirley.

"Thank God, the caboose because up—Francis Wayland.

Copyright by Peter B. Kyne truck. The caboose had once been a forgot to drop the pin; it was the last box car; hence there was no railed car, and when it jumped the track front platform to which Bryce might and plowed into the dirt, it just naturally quit and toppled over against

Shirley came out, dry-eyed but placed his arm around her, and she hid her face on his shoulder and shudaffectionately. "it's all over, my dear, All's well that ends well."

"The train," she cried in a choking "Where is it?" "In little pieces—down in Med

"Bryce Cardigan," she sobbed. aw him-he was riding atop on the train. He—ah, God help him!" The Colonel shook her with sudden ferocity. "Young Cardigan." he cried sharply. "Riding the logs? Are you

She nodded, and her shoulders

shook piteously. "Then Bryce Cardigan is gone!" Pennington's pronouncement was sol emn, deadiy with its flat finality. "Ne man could have rolled down into Mad river with a trainload of logs and survived. The devil himself couldn't." He heaved a great sigh, and added: "Well, that clears the atmosphere considerably, although for all his faults, I regret, for his father's sake, that this dreadful affair has happened. Well, it can't be helped, Shirley. Poor devil! For all his damnable treatment of me. I wouldn't have had this happen for million dollars."

Shirley burst into wild weeping. Bryce's heart leaped, for he under stood the reason for her grief. She had sent him away in anger, and he had gone to his death; ergo it would he long before Shirley would forgive herself. Bryce had not intended pre senting himself before her in his battered and bloody condition, but the sight of her distress now was more than he could bear. He coughed slightly, and the alert colonel glanced up at him instantly.
"Well, I'll be hanged!" "e words

fell from Pennington's lips with a heartiness that was almost touching. "I thought you'd gone with the train." "Sorry to have disappointed you, old top," Bryce replied blithely, "but I'm just naturally stubborn. Too bad about the atmosphere you thought cleared noment ago! It's clogged worse than ever now."

Bryce turns a deaf ear to Shirley and forces the fighting.

(TO BE CONTINUED.)

KNOW NOTHING OF DYSPEPSIA Eskimos Apparently Able to Digist Anything in the Form of Food, Without Cooking It

There is at least one native race of all laws in this relation and to thrive He eats until he is satisfied, and it takes much to satisfy him, if, indeed, he ever is satisfied. He eats as long as there is a shred of the feast before him. His capacity is limited only by the supply.

The Eskimo, it further appears, can make no mistake in the manner of cooking his food for the very simple reason that he does not cook it. Nor, so far as the blubber or fat of the Arctic is concerned, is he worried about his manner of eating it. . Indeed, he cuts it into long strips an inch wide and an inch thick and then lowers the strip down his throat as one might ower a rope into a well. Notwithstanding all this, the Eskimo does not suffer from indigestion. He can make good meal off the flesh and skin of he walrus, provision so hard and grib ty that in cutting up the animal the knife must be continually sharpened.

The teeth of a little Eskimo child will, it is said by those who knew, meet in a bit of wairus skin as the eeth of one of our own children would meet in the flesh of an apple, although the hide of the walrus is from half ag inch to an inch in thickness and bears considerable resemblance to the hide of an elephant. The child of the Are tic will bite it and digost it and never know what dyspepsia means.

Influence of Lunar Cycle. Physical and mental alternations are

well marked in chronic invalids and in the insane. In the case of a suffered from heart disease, with asthmatic symptoms, a careful record was ken of the singularly regular lunar monthly attacks. The cyclic excitement of unatics has also been studied by physicians, and in one of the investigamen and 46 per cent of women in 386 asylum patients had definite periods of

The influence of the lunar cycle up on the prevalence of suicide has been observed by several investigators More cheerful is the evidence that the rate. The rhythm of the aptitude fo mental attention is a topic of great significance in the conduct of life.

HAS NO

What Lydia E. Pinkh Vegetable Compound for Mrs. Warner.

It surely did wonders for me. I have no pains now and I can do my housework without any trouble at all. I will always praise your medicine as I do not believe there is a doctor that can do as much good in female weakness, and you may use these facts as a testimonial."—Mrs. LESTER E. WARMER, R. 1, Box 69, Onalasks, Wis.

The reason women write such letters to the Lydis E. Pinkham Medicine Co. and tell their friends how they are helped is that Lydis E. Pinkham's Vegetable Compound has brought health and happiness into their lives. Freed from their illness they want to pass the good news along to other suffering women that they also may be relieved.

An evil tongue gathers the large

LEAGUE OF NATIONS

Frank Crane, an Eminent Preacher and Author lished in "Current Opinion," September, 1920.

us would I sum up the points in regard to the League ations to date:

. It is the most important issue in the world It is more important than any issue that has ever occurred

the history of mankind

Form

Compared with it, all economic and industrial questions small, because, if we cannot stop war, industry will always subject to periodic destruction.

Compared with it all subjects of dispute between churches be called out who creeds are insignificant, for war is the triumph of maternext world war? ism and heathenism.

you must propose some other way to stop war, or I will

3. It took the most fearful war of history to induce the nations to get together and consider the League of Nations.

Must we wait for another?

4. I have been a lifelong Republican, and my father was a Republican before me. Politicians who are peeved because the League was proposed by the opposite political party, or by a President they do not like, should be willing to swallow their pride and favor the League in spite of objections

If they can not do this they put partizanship above humanity, and are enemies to the human race.

5. It is vastly more needful that some sort of League be formed, any sort, than that it be formed perfectly.

6. We must remember this is a new step for the nations; we must expect imperfections. All beginnings are difficult. But it is of such overwhelming importance to mankind that

we ought to be very patient.
7. America started the League. It is our League. It means the Americanization of the World. For Americanization means the principle of Federation. It is the beginning of a Government of the World, on the model of the Government o fthe United States. Lord Birkenhead the other day said:

"The Americans created the League of Nations. It is their child. At the moment when America's power was the strongest, that trumpet note was heralded to a world broken and stricken with the sacrifice of war-an unforgettable message no steps to prevent another? of idealistic hope—and for it full responsibility must be borne by the American nation.

There is no doubt that this is the belief of all Europe and Asia. Having begun this magnificent scheme, shall we scuttle it, just because of partisan quarrels at home?

8. The League is now in operation. It is not a mere proposal. Thirty-four nations responded to the appeal of America's President. Great Britain, France, Italy, Japan and thirty others now belong. The thing has gone too far; we cannot

9. If we do not join, what else can we do? Can we stay out, and remain forever isolated from the rest of the world? 10. We have to do business with other natons some way. If they are all in a League, shall we stay out, as a suspicious enemy, or an arrogant, egotistic stranger?

11. Let us look to the company we keep. These nations

we realize that every one of them is more jealous of its own national sovereignty than we are of ours? They have been trained for centuries in national pride. And if they are willing to give up a part of their independence, for the sake of the limitless advantages of co-operation can not use the limitless ad

the limitless advantages of co-operation, can not we?

Not even family life is possible without mutual concession, compromise and self-sacrifice; how much less is world-life, the life of the Human Family!

13. If the United States heartily enters the League, one of the very first results will be the decrease of national ar-

maments It is the huge armies and navies that keep the world poor and cause most of its suffering. Says the Bankers' Trust Elkton after having spent the sum-Company: "War creates the bulk of taxation. Outside of the mer wih his grand-parents. maintenance of military establishment, the other expenses of government are relatively small. If a way could be found to stop war, the people would be prepared to take up enlarged plans for social betterment."

14. It is the workingmen, the poorer people, who suffer ducah Saturday, he has been in a Cook, returned home Friday. most from militarism, and would be most benefited by a League hospital there for some time. of Nations, which would relieve the world of its intolerable destruction . It is they who fight in the armies, suffer death

and wounds, it is they who eventually must pay the taxes of war by their labor.

Nobody profits by war except profiteers.

15. The kind of feelings that prompt us to enter the League should be looked at and compared with the kind of

Feelings that oppose The League is Idealistic; its opposition is Materialistic. The League implies Optimism, a Belief in Humanity, a Confidence in the Honor of other nations; Its opposition im-

plies Distrust, Suspicion, Hostility The League will promote Race Understanding; its opposite

The League is in line with every Noble, Chivalrous, Manly sentiment; its opposition is Captious Sneering, Ungenerous.

The League proposes that the nations do business with each other as Gentlemen; without a League we must go on

as rival thieves and robbers. The League spells Cooperation, as a world program; without the League there must be eternal cut-throat Competition.

16. Much has been made of the bugaboo that if we join

the League American boys may have to be sent to Armenia, China or Africa to fight battles in which we have no concern.

They may, it is true. But without the League four million American boys had to take up arms to fight in Europe.

And without the League a similar crisis is likely to arise

any day. Would it not be better to have a few Americans in an army to help police the world, than to have the body of American manhood called on any minute to help put out a universal con-

17. The whole dispute between the political parties about "reservations" to the League, and as to which foot we shall first put forward as we enter, and and as to whether we shall go in under Democratic or Republican leadership, is the veriest political piffle. It stinks in the nostrils of every intelligent

patriot. The League of Nations means Progress, Courage, Hu-Opposition to it means Reaction, Cowardice and Pro-

vincialism.

19. This is the real battle of Armageddon. It is of more value to the future of humanity that a League of Nations be successfully launched than that Germany be defeated. Men who move heaven and earth to keep America out of the League are far worse enemies to the race than the Kaiser ever was.

20. The League is favored by the great majority of thinking, by Philosphers, men in Universities and Churches, by the American Federation of Labor, by writers and by all who are the successful that the successful that

the partisan politicians and those influenced by them

21. Every danger incurred by joining the League and of course there are dangers, will be multiplied a hundred fold by

MEANS TO EACH OF US. staying out.

22. Every Religion, except the fierce heathenisms of national propaganda, has dreamed of some sort of universal peace to stop war, the most monstrous curse of mankind. Christianity, Judaism, Buddhism, Confucianism, Bahaism, all have had the dream. The League of Nations moves with the great spiritual current of humanity.

23. The fear that the League is a deep plot of Great Britain to further her own interests is utterly silly. Would not France, Italy and the other nations who have joined have more reason to fear Great Britain than we have?

24. The League of Nations is not a far off question, one of politics and diplomacy that does not concern you and me.
It is of most vital, individual importance to every man, woman and child in the United States

Does it mean nothing to you, mother, that your boy may be called out when he reaches manhood to take his post in the

Does it mean nothing to you, business man, that gigantic 2. If you are going to oppose the League of Nations to taxes be enforced on you to keep up a huge army and navy? Does it mean nothing to you, workingman, that you may

be used as a pawn in the next game of bloody international chess? Does it mean nothing to you, O lover of your race, when you pray daily that wars may cease and brotherhood prevail, that at last the nations of earth are honestly trying to answer

your prayer? 25. But the final, conclusive and absolutely unanswerable agument for the League of Nations is simply this:

If not this-then what?

What is the alternative? For if there is to be no League, then we must clump back into the old order, every nation must go on arming to the teeth, tax burdens increase, and wars occur with the regularity of hell's clock strokes.

26. And, if we succeed in our noble experiment, if we establish a League of Nations, and if we disarm, think of what we can do with the enormous surplus of wealth which the race is constantly piling up, and which heretofore has been burnt up in powder! What enormous public works we can undertake! What magnificent programs of education we can set forward among the earth's backward populations What highways and bridges, what parks and plaisances, what universities and temples, what vast commercial enterprizes, what grandiose works for the betterment of mankind! Think of the staggering loads of treasure we must pour out in the next few years to pay the debts of the last world war, and shall we take

These are some of the reasons why I do not hesitate to say that the League of Nations is of most immediate and personal concern to every one, that every one should inform him-self upon it and that it is a fair test for every man, to show whether he be intelligent, progressive and humane, or uninformed, reactionary and biased.

Ex-president Taft cannot be accused of being a champion of Mr. Wilson or the Democratic party. In fact he has swallowed his convictions sufficiently to enable him to support Mr. Harding for President. He gives us, however, a clear statement upon the League of Nations. "Had I been in the Senate," he writes, "I would have voted for the League and the Treaty as submitted; and I advocate its ratflication accordingly. I did not think, and do not now think, that anything in the League Covenant, as sent to the Senate would violate the Constitution that have formed the League are our Allies. A little while ago we were fighting by their side for the salvation of the world. French, British and Italian blood mingled with American blood to soak the plains of Europe. Are we going to stand by our pals, or go over to the other crowd?

For if not this League, we must line up with the other. The other fellows are Germany, Austria, Russia, Turkey and Mexico, They are not in the League.

Good Lord deliver us!

12. We talk of the Monroe Doctrine. We fear for our independence. We dread a Superstate that shall boss us. We denounce the Leaguers as plotting to sacrifice our nationality. Can't we stop to think about the other nations? Don't we realize that every one of them is more jealous of its own of the United States, or would involve us in wars which it would

of course, to the parties in mind, it is vastly more important to elect Republican office-holders than it is to secure the peace of the world. But having elected their candidates, they will climb into the band-wagon the best they can.

For the United States to adopt permanently the policy indicated by Hiram Johnson and William Randolph Hearst is uttants, unthinkable.

HEAVY CONSUMPTION

Big Increase Shown in Figures

for Month of January. Largest Percentage of Material Used

Was Fine, Which Has a High Grease Content and Accounts for High Figure Given.

The present year promises to establish a record for wool consumption, if the amount consumed in January is an Indication. According to figures of the bureau of markets, United States de-Eatonic, in Four Days Did partment of agriculture, 72,700,000 Me \$20 Worth of Good" poundes of virgin wool, grease equivalent, were consumed by manufactur ers in the United States in January, compared with 38,200,000 pounds for the corresponding month in 1919 and 65,100,000 pounds to January, 1918.

The amount consumed was more than the monthly average for either 1918 or 1919 and higher than any month since May, 1918. The largest percentage of wool used was fine. which has a high grease content and is, no doubt, partially responsible for When New Growth Near Ground is these high figures. At the same time It continues to reflect the public's insistence for fabrics composed of fine wools, the consumption of fine wool being the largest reported for any month since the inauguration of the monthly wool consumption report by the bureau of markets.

The percentages of grades used are as follows: Fine, 33 per cent; onehalf blood, 18 per cent; three-eighthsblood, 17 per cent; one-fourth-blood, 17 per cent; low, 3 per cent; carpet, 111/2 per cent; and grade not stated, one-half of 1 per cent.

Method Suggested for Mending Fissures That May Appear in Walls -Use Hot Pine Tar.

To repair cracks 'hat may appear in a concrete wall the following method has been suggested: Cut out the cracks and brush them until thorough ly dry. Dust cement into hot pine tar until the mixture becomes so stiff that it is difficult to work. Fill the cracks with this mixture while hot, and repeat as often as it becomes cold.

Eradication of These Plants Will Do Much Toward Elimination of Mosaic Digease,

Wild cucumbers are a serious menace to pickle growing. The eradication of these plants would reduce, if not entirely eliminate, the mosaic disease of cucumbers which in some sections has practically ruined the pickling business.

INCREASE YIELD OF ALFALFA

If Soil Is Not Reasonably Rich Good Top Dressing of Manure Will Ald Materially.

The soil upon which alfalfa is seeded should be reasonably rich. If it is not, a good top dressing of manure and, in many instances, an application of phosphate fertilizer, will aid an securing a good stand and increased

SMALL FLOCK IN BACK YARD

OF WOOL INDICATED Amount of Space Available-Table Scraps Good Feed.

> The size of the flock which can be most efficiently kept will depend upon the space available and the amount of table scraps, or other waste available for feed. Over-stocking is a mis-take. Better results will be obtained from a few hens in a small yard than from a larger number, poultry specialists of the United States department of agriculture say.

The backyard poultry flock rarely should consist of over 20 or 25 hens, in many cases of not more than 8 or 10, and occasionally of only 3 or 4. of not less than 25 by 30 feet should be available for a yard. Where less space is available the size of the flock should be reduced, allowing on the average 20 to 30 square feet per bird. A few hens are sometimes kept successfully with a smaller yard allowance, but if the space is available a yard of the size indicated should be

TIME FOR CUTTING ALFALFA

Well Started is About Right-Saves Loss of Hay.

is one-third or one-half in bloom, new shoots begin to grow out from the crowns of the plants in preparation for a new crop. Sometimes this new growth comes before the old growth is in bloom, and sometimes only when the stage of full bloom is reached.

The time to cut alfalfa is just when this new growth near the ground is well started; if cut sooner, the new growth will be very slow in starting if later, there will be a loss of hay REPAIR CRACKS IN CONCRETE | for the old may stops growing we the new growth gets well started. for the old hay stops growing when

INDEFATIGABLE LITTLE BEE

Busy Little Honey Gatherer Carries Readily Half Its Own Weight in Delicious Nectar.

When a bee loads up with honey it arries readily half of its own weight In nectar and it sometimes carries as Bee studies at the Iowa agricultural experiment station show that a bee requires about an hour for a round trip while gathering honey. In a MENACE OF WILD CUCUMBERS strong colony the bees will gather as much as eight or nine pounds of honey in a day under favorable conditions,

WOODLAND IN THE SOUTH.

Woodlands on farms com prise one-half of all the forested

There are more than 125,000,-In Maryland, Virginia, North Carolina, Kentucky and Oklahoma more than 60 per cent of all forest land is on farms.

The present yearly farm income from woodlands is estimated at about \$150,000,000.

Baled Hay Is Handy.

Some farmers say it pays to bale hay or straw solely for the case with which it is handled. It surely does occupy small space and baled forage

DR THACHER'S LIVER AND BLOOD SYRUP

You're as Sick or LIVER as Well as Your

How's your liver? Are you constipated, billous, grouchy? Have you dizzy spells, dull headaches, bad taste in your mouth, foul breath? If so, you need Dr. Thacher's Liver and Blood Syrup; which has been knocking out troubles of your sort ever since the good old southern doctor first pre-scribed it away back in 1852. On sale at your drug store.

You're as Old or BLOOD

If you would stay young in health as you grow older in years, have a care for your blood. Dr. Thacher's Liver and Blood Syrup puts life into your blood; purifies and enriches it; makes it tone up the whole system. Also keeps your Bowels open and is a tonic and a cleanser combined. Good for the whole family. Sold at your drug store.

Hunting From an Automobile

Thrilling Description of Unique rifle out of a car going at from forty to Sport in the Moroccan Desert.

FOUR GAZELLES ARE BAGGED

Fast Driving Over Stony Plain to Get Within Range-Great Skill on the Part of Chauffeurs Necessary to Handle Cars.

London.-The Morocco correspondent of the Times sends a thrilling description of huntin: :azelles by auto-mobile. He writes

Glavis, the Basha of Marrakesh; Kald Hammon of the Atlas, Sid Ayadi, Kaid of Rahamna, and your correspon-

It is time to start. There is a car for each of us four sportsmen, and at the invitation of my hosts I take my seat beside the chauffeur, with two beautifully dressed black slaves in the back sent in attendance. The kaids enter their cars and we set out.

The cultivated lands are quickly left behind and the great plain of Rahamna lies stretching away before us with the snow peaks of the Atlas bounding its southern horizon.

Kaid Ayadi gives the signal and the four cars spread out—a few hundred yards apart-and proceed at a slower pace, about fifteen miles an hour. The ground is stone-strewn and rough, and careful steering is necessary. There are boulders of every shape and size loosechannels worn by water, insignificant enough in themselves, but highly dammaneuvered. Our chauffeurs, three Frenchmen and an Algerian, are skillful drivers and accustomed to this spied in the open, and at an increased the skill, sport of the "Great Kaids."

Sighting the Game,

see a herd of gazelle bounding over the plain. My car is on the extreme left of the line and our object is to head off the herd from the more stony head off the herd from the more stony.

Sinn Fein Courts Return Most Unto operate their father's farm jointly after his death until one of them should decide to marry. Then it was "'Arf a mo', major," interposed the sergeant-mashould decide to marry. Then it was "'Arf a mo', major," interposed the sergeant-mashould decide to marry. ground and turn them to the right away always to the left our car quickens its pace, rolling from side to side and bumping. Seizing every opportunity of a few yards of good ground, we spurt forward, only to have to slow down again to manipulate some awkward spot. The gazelle are out of range, for it is only with a shotgun cases sometimes are most unusual.

fitty miles an hour over rough ground is too much to ask or expect. There exhibitation is intense are less stones now and we are making headway.

The three cars on my right keep a minutes, we are traveling at over forty looks as though it will be my car that some little watercourse or some extra right, and pass down the line of adstony patch gives them their chance and they increase the distance again. At length our course seems clear and the car bounds forward. The pace is splendid but rather terrifying. Half standing, half kneeling on the seat, I wait to get my chance of a shot, then suddenly the car swerves in a way that nearly throws me out—and stops. A yard or two ahead is a dry watercourse, a meter wide perhaps, and half a meter deep and full of boulders, an impassable barrier-or rather a barrier the passing of which necessitates search for a practical passage, and allows the escape of the gazelle, whose course toward the stony ground is now easy. A few minutes later we see them appear on the outline of a low

It was not long before fresh herds reaching the low stony slopes that

hill, bounding over the rocks.

speedometer of my car marks 40 miles an hour, but we are not gaining on the gazelle, who appear easily to keep their distance of four or five hundred yards ahead of us. At another sig nel we increase the pace to 50 miles an hour. The plain is level, but there are stones and little undulations and many small watercourses, merely little declivities in the surface, but none the less exciting to pass over, and the

Four Killed, One Taken Alive, It is wonderful driving on the part of the chanffeurs, and the cars sway little in the rear, in order to facilitate from side to side, and rise and fall, my turning movement, but they too are like boats in a rough sea. We are making good pace. At times, for a few closing upon the herd now, and it miles an hour, and once or twice the will be the first to come up with them. gazelle are almost within range; then but suddenly they turn aside to the

vancing cars. The Basha of Marrakesh's lithe fig ure is clearly visible as he stands in his swaying car. The gazelle pass him, and with right and left he brings down two-beautiful shooting. Kaid Hammou's car is the next, and he, too, shoots his two gazelle. Once more the herd swerves, and passing between the cars, breaks back to the rear and is allowed to escape without further molestation-all but one, a young doe, who paralyzed with fear. friend.' stands motionless, and is easily cap tured alive and unburt, to be carefully come a pet in the basha's bouse.

It may be argued that this class of bunting is not sport, that the gazelle have no chance of escape, but it is were put up, but always breaking may occur at any moment, and the away to the left they succeeded in stony surface of the ground gives the gazelle a good chance. Of the many form the northern boundary of the herds we saw the four gazelle shot Rahamna plain. At a signal from and the one taken alive were our Kald Ayadi we turn southward to seek whole bag, though we covered 100 more advantageous ground, and emerg- miles of distance on the plain alone ing from the stones our cars roll without counting out ride to and from across the level plain at a pace of 30 Marrakesh. The handling of the cars miles an hour. Game, however, is requires the greatest skill, and the scarcer here-though a great bustard shooting is by no means easy. Crayne No. 6.

ville, is another ex-service man who to create a new voting precinct, which will be known as Bloom-has become actively enlisted in the ing Rose No. 13.

ing Rose No. 13. We also found that Piney Magisterial District, which was Democracy this fall. Mr. Kinsolving was captain of the Field Artillery during the World War and served as instructor at Camp Taylor and Fort Sill.

He has perfected organizations of Cox known as Fishtrap, No. 20.

We also found that Piney Magisterial District, which was composed of two voting precincts, had the required number of voters to form a third first which was captain of the Field Artillery during the World War and served as instructor at Camp Taylor and Fort Sill.

He has perfected organizations of Cox known as Fishtrap No. 20.

Also Dycusburg Magisterial District, which was composed in the state. His estimate is that there of two precincts, contained enough voters for a new voting young women Democratic clubs in the state when this work gets under way.

precinct, therefore, we created a new voting precinct at Mexico, and it will be known as Mexico No. 8.

For metes and bounds of all voting precincts described in

AARON TOWERY GEORGE T. BELT W. R. CRUCE.

Marion Magisterial District No. 1 is divided into three Voting Precincts. Nos. 1, 2 and 7.

No. 1 is bounded as follows:

Beginning at a point in Marion, where the Salem road crosses Main Street, it being the corner also to voting Precinct crosses Main Street, it being the corner also to voting Precinct bell's place, excluding it. Then to Corbet Stephenson, excluding No. 2, running with said road to a point where the Memphis ing him; thence to R. B. Clement, excluding him; thence souled and unrestricted support of Mine road leaves the Marion and Salem road, running with the to the Ed Holoman at the intersection of the View road, in-Warren G. Harding, the Republican candidate for president, is proving a Memphis Mine road, as it now stands, passing the Givens farm, cluding him; thence to Hayward York, including him; thence to Tom Murray, including him; thence to Jim Fowler, including him; thence to Burl Walker, Jr., including him; thence With Senator Harding's attempt to substitute his own plan of world peace for the League of Nations, already for the League of Nations, already magisterial District line; thence with the Salem and Fords Ferry ing them. Thence with the Marion and Dycusburg road, to the Marion and road to the Elvis Moore place, excluding it; thence with the the old crossing of the Marion and Fredonia road; thence with Fredonia and Wallace Ferry road to the old Isaac Sisco place, Fredonia and Wallace Ferry road to the old Isaac Sisco place, same to Walter Cleghorn's, including him in Marion No. 1. leaving said place in Union District; thence to the W. B. Clemton to the beginning. This boundary forms a new voting On this point the Philadelphia Pubent place and J. I. Clement place, leaving them in the Union Me Ledger, Republican, predicts that precinct. Thence with a line of Precinct No. 7 to Ed Hollo-Senator Harding "will not arouse any man's at the intersection of the View road; thence to Tom tremendous enthusiasm in this prace Murpheys, then to Jim Fowlers then to Burl Walker, Jr., then tical nation by rallying it to take a no-ble stand on the rotted platform of the Hague Tribunal, the most pathetic the Fredonia and Marion road, leaving all these in the new precinct No. 7. Thence to Walter Cleghorn, leaving him in On the same question the St. Louis Marion District No. 1; thence with the Marion and Fredonia thence with the Dycusburg precinct line to C. S. Jackson's.

This precinct is to retain the same old voting place, known to prove that Poland's troubles can be traced to the League of Nations. The traced to the League of Nations. The League, it says, is an experiment that League, it says, is an experiment that the Court of Livingston Creek, at the ford; thence up said creek, to the League, it says, is an experiment that the Court of Livingston Creek, at the ford; thence up said creek, to the League, it says, is an experiment that is entitled to every chance to make road from the Givens farm to the Fords Ferry District line; Poor old Marionette" sollloquizes Precinct No. 2, and all on the opposite side shall vote in Marion
