CONSTITUTION VS LEAGUE

Justice Brandeis is another of the great public servants of the nation. His great service to democracy comes not from the law courts, where he is an卓越 judge, but from the advice which he is giving his countrymen to the Constitution, it is the President's duty to negotiate treaties. It is the duty of the Senate Ste to advice, and the President and other counsel to the treaties. There is no occasion for the President to cut and run to Paris or Brussels, etc. We are now in the world to negotiate the League. It is the duty of the President and not of the Senate to negotiate the treaty and the Senate to ratify the treaty. There is no occasion for the President to cut and run to Paris or Brussels, etc.

FORDSON TRACTORS.

There are many Tractors clamoring for the patronage of the farmer. The war has charged up the price of cattle, and one would think that all the farmer had to do was to buy a Tractor and he would be on his way to a better life.

Well consider this fact—there are a great many different makes of tractors. Tractors have been on the American market for twenty years. In that time some three hundred thousand Tractors have been sold to the farmers in the United States. The Fordson Tractor has only been on the market two years, and in that time more than one hundred thousand Fordson Tractors have been sold to the farmers of the United States. Two and two make four. If the Fordson Tractor had not delivered more good work, more satisfactory work, more economical work than any other farm tractor, it would not have sold in the millions of acres from one to the other.

"The proof of the pudding is in the eating." The proof of the superior merits of the Fordson Tractor is in its ability to work.

The Fordson Tractor then asks you to buy it because it is the best for your neighbor. It asks you to buy it on its own merits. It asks you to try it, Mr. Farmer, because you have use one day in the year. All the men for the Fordson Tractor have not yet been assorted into new places where machine power can take the place of human power, where machine power can act rapidly and make power, and are being found every week, and whenever such discovery occurs, the Fordson Tractor will still more satisfac-
tory than any other form of power.

The Fordson is simple in design, and is very strongly made of the highest quality of iron and steel. It is the product of the greatest mechanical genius the world has ever known, and it is made economical at the cost of labor and after expense. The Fordson Tractor on your farm will increase the value of every foot of ground which you cultivate, and it will put more money and cents into every hour you put into the farm.

Now why not have a Fordson right away? Take up the subject with us. Come in and get the details, and the particulars. It is only a matter of time until you buy a farm Tractor. That's one of the things which can't put it off when you receive money to act promptly.
