ANNOUNCEMENT

To all men and women who wish to participate in any way to the Democratic Primary, on the 8th day of August, 1921, in the counties of Crittenden and Graves:

I take the method of announcing my candidacy for the office of State Senator, making a plea for men and women to give me support and to vote for me. Every Drop an Asset

As a dairy farmer you can figure out the penny what your cream is worth. You know that every particle of butter fat has a distinct value to you. You cannot afford to use a separator that makes any cream.

The Primrose Cream Separator gets every drop of cream. The principle on which it operates is as simple as the mechanism. The separator is designed to supply a large and low. Every bearing and gear is well lubricated by a sealed system.

In Primrose separators, good workmanship and excellent clear-smashing will result in obtaining the distinguishing points.

No matter what the size of your herd, the Primrose is a money-maker. Twice three cows farm one uses with profit.

The Primrose is the only separator that automatically drains out the mud from the cream when new oil is added.

Let us demonstrate this and other points. It is not convenient for you to call? Phone us and we will bring a machine out and show you how it operates and what its financial advantages are to you.
