Machine of One Purpose

BUTTER FAT is worth a lot of money today. To save every particle of it is the part of wise business economy. The Primrose Cream Separator is the standard in the wise dairyman.

The more you use of the Primrose separator and the longer you use it, the better you will like it. It has but one purpose—to separate cream from milk. It saves all the cream. The escape of a little cream here and there may not strike you as a serious matter, but look around a period of time and you will be astonished at the amount. That is where the Primrose separator protects your pocket-book.

The Primrose is the only cream separator that keeps oil through every bearing and last to them. This and other special and exclusive features about the machine we should like to show you. Call and let us show you just what this separator is to you as a money-saver. It is not convenient to call you and will call on you being a machine with us.
