NEWS IN BRIEF

An analysis of the whiskey situation in Chicago shows that whiskey is being sold across 3,500 bars in addition to the vast amount that is being peddled in bottles, jugs and cans.

Enactment of the legislation known as the Sweet Bill, consolidating all agencies for the relief of incapacitated veterans of the World War, pledges the government to an annual expenditure of \$500,000,000.

The activities of the gardening department of the Illinois Central System are told in an article which appears in the Illinois Central Magazine for July. The department is striving to beautify not only the property of the company but also the territory served by the railroad.

Interesting things happen at Chanute Field, located just south of Rantoul, Ill., along the lines of the Illinois Central Railroad, according to a writer in the Illinois Central Magazine for July. The article tells of a parachute jump made March 22 from an altitude of 23,700 feet, the greatest height from which a parachute leap was ever made.

Sam Brockman of Hickman was struck by lightning Saturday and was thought to be dead. The coroner was called in to hold an inquest. When he arrived he found that Mr. Brockman had revived. It is believed that he will recover.

Alma Pell, 18 year old Fayette county girl, was paroled from the reform school at Greendale Saturday so that she could wed. She married M. C. Petty of Vanceburg.

Mrs. J. E. Mithum of Hickman, was awakened by a wasp's sting one night last week, to find that the house was in flames. She called her daughter and got out just as the walls fell in.

A two days old baby was found abandoned in a mail box near Newton, Pa., Saturday. It seemed unharmed by the experience.

When the mowing machine that he was driving cut off his foot, James Sharpe, 15, of Defiance, Ohio, picked up the last member and drove to the house where he fainted from a loss of blood.

Because she married a boy of 14, Bertha Gaines, 21 of Arkansas, was arrested on a charge of kidnapping and enticement of a minor. The boy refused to leave his bride even after annulment proceedings by the court.

Because it would cost \$5 to get the ceremony performed, a couple at Portland refused to get married.

Twins were born to Mrs. Wm. Adams of Louisiana, last week that only weighed eleven and seventeen ounces at birth. They seem to be in good health.

A bill was introduced into the House last week that would prohibit girls from going on the stage or into the movies. It would also prohibit beauty contests promoted by newspapers and film corporations.

Five horses were killed by a single stroke of lightning on a farm near Clinton Kentucky Saturday.

Paris Green was scattered in a pasture near Mt. Sterling one night last week, by persons unknown. The poison was discovered in time to prevent any fatalities among the cattle.

The House and Means Committee of the House voted Friday to raise the Income Tax exemption for married men from \$2,000 to \$2,500.

An operation for appendicitis was conducted on the youngest patient on record at Paducah last week. The patient, Miss Ruth Smith, is only three years old. She will recover.

Soil building problems are receiving special attention from Livingston county farmers who are co-operating with County Agent J. C. Pace. Frank Cruce is planning to lime 40 acres with 120 tons of crushed limestone and sow sweet clover on it in preparation for alfalfa which he plans to sow later. Farmers of the county have had about 900 tons of limestone ground for use this fall.

Farm Bureau News

The Marion Milling Co. has completed the limestone shed and has on hand a quantity of limestone for sale. The present price is \$2.45 per ton.

Alfalfa

A number of Crittenden farmers plan on sowing alfalfa this August. Crop specialists at the College of Agriculture have found that August 10 to 20 is the most favorable time. Further south in the state it is usually safe to sow up to Sep. 1. Remember that the crop requires a deep fertile well drained soil and will not make a satisfactory growth on poor land. A liberal application of phosphorus will make more sure the stand. The use of limestone, an assurance of sweet soil is essential for alfalfa before it will make a satisfactory growth.

A favorable moisture condition in the soil is the first requisite in fall seeding of the legume. This condition will be present if the seed bed has been prepared early so as to store up moisture in the soil. The use of a heavy roller before seeding will bring the moisture closer to the surface and permit shallower covering of the seed. The most favorable condition for seeding is present immediately after a rain. It usually pays to wait as long as is safe to obtain this condition.

Use a clover seed drill unless the seed bed is extremely loose. Cover seed as deep as moisture conditions require. When the seed is sown broadcast a more even stand is secured by distributing one half in one direction and the other half in a cross direction. Seed from 15 to 20 lbs per acre and inoculate.

Cisco Chapel Meeting

Cisco Chapel Club will meet the fourth Friday night with the following program:

Music
The best way to Rebuild Wornout Soil; Mr. Bob Allen
Dairying in Cisco Chapel Community Grady Cisco
Recitation: School Child
The Joke Book: Each person must tell a Joke

Tubercular Testing

The County Agent received a letter from the State Veterinarian on Monday saying he was unable to send a man to start the testing work August 15. He states however that he will send a man at the earliest possible date and will notify the County Agent in advance.

The County Agent purchased two pure bred rams for Crittenden farmers at the Burbon yards sale August 11. There will be another sheep sale at Lexington August 24 of some very desirable animals. Anyone interested is urged to get in touch with Mr. Spencer. Arrangements can be made to have a sheep specialist select the animals.

The Forest Grove Community Club held a very enjoyable picnic last Saturday at the school grounds. Brother Capshaw of Tolu was present and made a very interesting address. It is reported that the amount of fried chicken consumed by the picnickers was scandalous.

The Brown School Community Club organized Monday evening with H. Vaughn president; Vice president H. Holoman; Secretary Robert Corley. They are planning an interesting program for the next meeting the third Monday in September.

How about that cover crop?

The orchard specialist from the experiment station spent Thursday and Friday in Crittenden county arranging for future work in orcharding.

TO THE VOTERS OF CRITTENDEN COUNTY

Tilene Kentucky

I wish to express to you through the columns of the Press my deep appreciation of the nice vote you gave me in the Primary Election. I also thank the people of Crittenden county for the kind and courteous treatment I received while making my canvass. As you have greatly honored me I pledge myself if elected to make you a careful, vigilant and efficient Representative.

Respectfully,
LESLIE McDONALD

RACING WILL BE BEST EVER

At the Pennyroyal Fair at Hopkinsville on August 30, 31 and September 1, 2, 3

A fair would not be a fair without horse racing. And the better the races are, and the more horses, the better the people like it.

At the Pennyroyal Fair at Hopkinsville, which this year will be given on August 30, 31, September 1, 2, and 3, the racing has always been one of its strongest drawing cards.

From the first meet of the Pennyroyal Fair the directors have paid special attention to the races with the result that each year has seen better races with corresponding better satisfaction among the patrons.

This year the races will be the best ever given with more horses entered than ever before. The same generous purses have been offered this time as in the past, but in addition a different division of the money, and one which suits the horse owners better, has been adopted. This insures the increased interest of the horsemen and that they will be on hand with more horses than in the past. This is already evident from the entries which have been made, and the stable room which has been engaged.

As usual the pari-mutuel betting machines will be on the grounds and betting as provided by the Kentucky laws, will be permitted. But nothing that smacks of book making or other forms of illegitimate gambling will be countenanced.

A number of the best horses of last season will be back again this year. Many of the horses which ran on the Pennyroyal track last year went to other exclusive racing tracks and won race after race. This was true of both the harness horses and the runners but the new horses that are coming this year promise to make it very warm for the old favorites.

Each day there will be at least eight races. There will be a trot and pace each day, best three heats in five and mile heats; there will also be two running races each day this makes a racing program that cannot be excelled and that will delight every lover of horse racing—and that is everybody.

MANY FARMERS PLAN TO SOW COVER CROPS

LEXINGTON, KY., Aug. 17.—With farmers in 50 counties enlisted with county farm agents and the extension division of the College of Agriculture in a co-operative cover crop campaign, indications are that a large acreage of these crops will be planted in Kentucky this fall to protect fields that otherwise would remain idle and unprotected during the winter, according to R. E. Stephenson, crops extension specialist from the college. A number of farmers in the state are already using this system of farming to good advantage and will continue it this fall.

A limited number of crops are available for use in this way, crimson clover and vetch being the only legumes and rye, wheat and winter oats the non-legumes. Where crimson clover succeeds it is unsurpassed. Rye is perhaps the most dependable crop since it can be seeded either early or late as the conditions demand. Best results are obtained by sowing it during the latter part of August and the first of September. This will permit its being used for early fall pasture as well as winter protection. Where soy beans and corn are grown together to be hogged off rye may be seeded early. In this way a green carpet will be furnished upon which the hogs may feed. If the hogging off is done first rye may be seeded as late as November.

GRAVE-YARD CLEANING

The G. P. Wilson graveyard near Greens Chapel will be cleaned off on Thursday August 25, everybody interested come and bring dinner and suitable tools.

AGED CITIZEN DIES NEAR HURRICANE

Mr. J. T. Wooten, aged 87, died at his home near Hurricane Camp Ground on August 4, and was buried at Hurricane on the following day. The funeral was conducted by his pastor, Rev. O. M. Capshaw, in the presence of a large crowd.

"Uncle Jim" was the eldest member of Hurricane church and had been a member for many years. He had attended Camp Meeting at that place for 30 years, missing very few services.

He was a great and good man and will be greatly missed at home and by the church.

He leaves one child, Mrs. Hannah Minner, and three grandchildren, Miss Kate, Tom, and Sylvan Minner.

SCHOOL PLAY A SUCCESS

The Pageant given at the School Auditorium Tuesday evening was a great success. The cast consisted of 100 girls and boys of the Marion City Schools. There were fairies, flowers, etc represented. A large and attentive crowd was present and by their encores and laughter proved that the play was well received.

The funds go to purchase some furniture for the primary grades of the school.

Miss Lena Holtzclaw and Miss Ethel Hard who had charge of the play are to be complimented for the huge success.

A CARD OF THANKS TO THE CRITTENDEN PEOPLE

Words will not express my gratefulness to the good people of Crittenden county for the great favor shown me in giving me the nomination for Jailer in the Republican Primary. I fully appreciate every good word and deed said and done for me by any one and the only regret I have is that all the boys could not be successful, but many who did not win did not lose for I am glad to know they quit the race with a fine roll of votes to their credit.

Give me success again in November and I will show my gratefulness by making you as dutiful an official as it is possible for any one to do. With many thanks I am yours for law and order. CHAS. T. RILEY.

NEW ROAD UNDER PROJECT

The many farmers and citizens of Fords Ferry are very much alive to the interest of a good road from Fords Ferry to Marion in order that they can take advantage of the landing at that place for all river transportation. Fords Ferry would make a splendid shipping point, the landing facilities are ideal.

If a project of this kind could be put through it would mean a great deal in competition and saving of freight rates. W. B. Wilborn, of Fords Ferry, who is very much interested in the project was in Marion this week and talked to several of the citizens and they are all interested in the project.

DARING HOLD-UP NEAR STURGIS

A daring holdup was staged near Sullivan Thursday afternoon of last week when Mr. Sam Hughes was riding along the public road a few miles from Sturgis when he was suddenly held up by three masked bandits, who told him to throw up his hands. Mr. Hughes refused and got down off his horse and reached for his knife, one of the boys then shot at him but the shot went wild and shot the horse, this frightened the bandits and they fled. Mr. Hughes made his way back to town and gave the farm but the robbers made their escape in the darkness.

MEETING AT HEBRON

The meeting conducted at Hebron by Rev. O. M. and Herschel Capshaw closed Sunday. The singing was conducted by H. O. Franklin. There were in all about 58 conversions and several additions to the church and much good was done in the community. Large crowds attended the services daily.

Harry Moore left Sunday for Paducah, where he has accepted a position in the general insurance office of E. G. Boone & Co.

PROMINENT YOUNG COUPLE WED

Saturday evening at the Methodist parsonage, Miss Jewell Hill and Mr. Wallace Thomason, both of this city were united in the bonds of matrimony. Rev. G. P. Dillon performed the ceremony.

Both bride and groom are popular young people of this city and their many friends wish them happiness.

Miss Jewell is the beautiful and talented daughter of Mr. Duke Hill of Spokane Wash. Her grandfather is Mr. Tom Hill, well known citizen of the Chapel Hill neighborhood.

Mr. Thomason is the oldest son of A. G. Thomason and is interested with his father in the ice business.

The newly wed couple left Saturday night in the groom's car for an extended honeymoon to Mammoth Cave and other places.

HAS NEW AMBITION

His Royal Highness, the American Small Boy, has a new ambition, according to Publicity Director, Mose Strouse, of the Evansville Exposition, Evansville, September 20 to October 1.

There was a time when he yearned to be President, a circus clown, a fireman, or an aviator. He now hungers to be the judge of the mouth-watering breads, fluffy biscuits, crisp cookies, luscious pies, quivering jellies, and preserved goodies at the coming fair.

"I got a letter from a small boy in this man's town recently," said Mr. Strouse, "He asked the privilege of testing and judging all the exhibits in all the culinary department. He said he could do the job better than any group of women judges the fair had ever had. I am afraid, however, that he would get sick before he got well started, and so we will have to worry along with the women judges as formerly."

Judges of all departments will have a task this year. The exhibits of live stock, women's work, farm products, boys' girls' work, fruits and vegetables, will be unusually large. The big premiums, totalling \$12,500 are the main inducements.

Entertainment features have been given much study by fair officials. Attractions from all over the country have been booked. Among them are vaudeville, music, and lesser attractions.

Persons interested in exhibiting at the fair may obtain full information by writing to the Secretary for a premium list.

TO THE VOTERS OF CRITTENDEN COUNTY

I take this method of showing my many friends my appreciation of their support in the recent primary.

I have not words to express my friendly feeling and will assure you at all times a warm place in my heart.

And to those who were pulled away from me the last few days of the campaign by the falsehoods of some of my opponents special friends, this without a doubt was the cause of my defeat. As a law-abiding citizen I must say I am not guilty in the least.

As ever your friend
E. B. HUNT

J. C. McCONNELL DIES

Mr. J. C. McConnell of Deanwood section died at his home late Saturday night after a short illness. He was 68 years of age and a respected citizen of the county and is survived by his wife and three children. Funeral services were held at the grave by Rev. Lonnie Brantley Sunday.

PLEASANT GROVE

School began on August 1 with an enrollment of fifty.

Several of the patrons were out on his first day and made interesting talks, showing they were interested and anxious to co-operate in every way for better schools. Some spelling contests were given Friday afternoon and those winning in the different grades were: Grade 2 Willard Davidson; Grade 3 Vernon Craft; Grade 4 Ruby Bebout; Grade 6 Willie Little; Grade 8 Opha Little.

SUE MOORE, Teacher

Fine Barred Roosters for sale
MRS. R. CRUCE, Crayne, Ky. 1*

Society

Miss Katherine Rice entertained at her home with a delightful lawn party Saturday evening in honor of her guests, Miss Mary Schaffer and Mr. and Mrs. Martin Stanfield of Paducah.

Those present were: Misses Mary Schaffer, Geneva Daniels, Margurite Murphy, Virginia and Evangeline Fowler, Vida Bigham, Frances Adams, Estelle Bigham, Melva Weldon, Elsie Coleman, Amy Weldon, Mrs. W. T. James, Mr. and Mrs. Martin Stanfield, Messrs. Lee Carden, Joe Nimmo, Everett Pickens, Wallace Adams, G. Mick, Lester Bigham, Carl Henderson, Marion Minner, P. Adams, Allen Rice and J. Boren.

On Friday evening August 5, a delightful dinner party was given at the home of Miss Elizabeth Rochester. The table was beautifully decorated and a color scheme of white and green was carried out in the menu. A delicious course dinner was served to the following couples:

Miss Elvah Pickens and Mr. Ira Pierce, Miss Imogene Minner and Mr. Jake Mayes, Miss Elizabeth Rochester and Mr. Raymond Small, Miss Virginia Flannery and Mr. Doyle Vaughn.

In honor of Miss Catherine Foster of Phoenix, Arizona, Miss Virginia Flannery very delightfully entertained three tables of "Hearts" on Saturday afternoon. A salad course was served at the conclusion of the game. Those who enjoyed Miss Flannery's hospitality were: Misses Catherine Hughes, Laura Butler, Catherine Foster, Rebecca Moore, Anne Elizabeth Hard, Virginia Doss, Evalyn Moore, Irene Daughtrey, Ruby and Ols Birchfield and Elizabeth Rochester.

FOOTBALL PROSPECTS BRIGHT

As September draws near, the football enthusiasts are beginning to cast about for prospects for the 1921 eleven. Mr. John Young Brown, who will coach our team this year, was in town this week and met several of the boys and was gratified by the interest manifested by the boys. Several of last years team will be back this year and they are ever looking for new material. Freda Belt, who will captain this year's team, and is acting manager for the present, has been meeting some of the boys at the ball park for preliminary workouts.

The past few years Marion has not been very successful on the gridiron, but it has long been the secret hope of every lover of the sport that our High School would stage a comeback and do battle as in the days of yore.

Already there can be heard in C. I. A. circles the murmurs of the coming gridiron strife. Marion's past defeats have been keenly felt and the gallant sons of Crittenden are coming in from hill and dale, all determined to wipe out the memory and sting of defeat and wrest the supremacy from Morganfield and Sturgis.

NOTICE TO CREDITORS

All persons having claims against the estate of Jesse W. Sherrer, deceased, are notified to present same to me at my office, properly proven, on or before the first day of the next regular November Term of the Crittenden Circuit Court.

GONE HOME

On the morning of August 3 the Death Angel silently entered the home of Dr. F. G. LaRue of Lexington, Ky., and called home one of God's old saints, Mrs. E. E. LaRue Browning. She was born February 22, 1840, being 81 years, five months and nine days old. She was married to Dr. M. W. LaRue on December 4, 1859 who died in 1876. To this union was born seven children, four girls and three boys of whom three survive her; Mrs. J. D. Threlkeld of Dawson Springs; Mrs. F. V. Matlock of Salem and Dr. F. G. LaRue of Lexington.

Sister LaRue was converted at the age of 12 years at Siloam and joined the M. E. Church and remained a faithful member of that church until the Master's voice called her home.

Mrs. LaRue was a devoted wife and loving mother, a true friend to every one, she was the soul of industry and her greatest delight was to make others happy. She was a Christian in word and deed and lived her religion every day and hour of her life. She loved her church and pastor and proved her faith in them by her works.

She visited her daughter, Mrs. Dr. Matlock, a short time before her death in her home town of Salem and it was the writers pleasure to be with her in the revival at her home church and hear her tell her hope of Heaven and immortal glory and she seemed to know the end was near as she often said to the writer "this will be the last time I shall ever visit my old home town and church" and it was the last time for in less than sixty days from that time she was sent back to her daughter, Mrs. Dr. Matlock, sleeping in the dreamless sleep of death, where her body remained until the next day when it was taken to the old home church and the funeral services were conducted by her pastor in the presence of one of the largest crowds of friends and relatives that ever attended a funeral in Salem. All that was mortal was laid to rest under the mound of flowers to await the Resurrection Morn.

We commend the religion which she professed and lived to the loved ones left behind.

May our Heavenly Father's blessing be on the children who mourn not as those who have no hope. But when the sun in all his state illumined the eastern skies,

She passed thru glory's morning gate
And walked in Paradise
A FRIEND

UNION GROVE

Mrs. T. W. Blackburn and daughter, Marie, made a trip to Princeton Friday.

Mr. T. Y. Ordway and Mr. Joe Guss were here one day last week.

Misses Recda and Hassie Stenbridge of Creswell spent one day last week with their uncle Alfred Canada.

The men of this section graveled Moore Hill last week which was badly needed.

Mrs. R. P. Canada has gone to spend a few weeks with her daughter, Mrs. I. D. Stenbridge of Creswell.

Miss Charline Spickard of Princeton is spending a few days with her cousins Marie, Leta and Mary Blackburn.

Mrs. Vera Blackburn and Arthur and James Wigginton have gone to Evansville to visit their mother who is very ill in the hospital there.

Mr. Owen Blackburn is visiting in Farmersville this week.

Mr. James Sullenger and family were the guests of Mr. and Mrs. A. Canada Monday.

Miss Vera Young of Arkansas is visiting her parents Mr. and Mrs. J. B. Young of near Mexico.

Mr. and Mrs. Reginald Spickard are the proud parents of a baby girl.

Mrs. Edd Watson of Fredonia was buried Saturday.

Mr. Alvie Stephenson of Princeton spent Saturday and Sunday with his uncle T. W. Blackburn.

Mr. A. Canada went to Marion on business Monday.

FISH TRAP

Mr. and Mrs. Tom Powell passed thru here enroute to Sturgis Wednesday.

Miss Alma McDowell of Cave Spring is visiting Mr. and Mrs. Will Edwards.

Mr. and Mrs. Frank Towery and daughter, Hazel, were guests of his sisters, Mrs. Mary Woods and Miss Maggie Towery recently.

Miss Katherine Morrow of Fish Trap spent Saturday and Sunday with Mrs. Sarah Woods.

Mrs. Elma Kemp of Dixon is visiting her parents this week.

Our school at Red Top is progressing nicely with Mrs. Mary Woods as teacher.

Mr. Walter Martin has returned from Providence for a few days.

Mrs. Mattie Babb of Fish Trap visited relatives at Providence last week.

FRANCES.

Mr. J. T. Matthews visited Mr. J. R. Brown Sunday.

Mr. Willie Brown and wife visited Mr. Jim Holcom Sunday.

Mrs. Nan Matthews and daughter and two grandchildren visited Mrs. J. W. Brown Sunday.

Miss Hattie Wheeler visited her sister, Mrs. Minnie Brashier, last week.

Mrs. Addie Miller has moved to Frances.

Mrs. Jim Holcom and children visited her sister, Mrs. Elsie Brown, Saturday.

Mr. Claud Fletcher was in Frances Saturday.

Mrs. Vada Fletcher visited Mrs. J. R. Brown Saturday.

School began at Frances Monday morning.

DEW DROPS

All dew drops are perfectly round.

Dew is deposited only on a fine, clear night.

More dew is deposited on cultivated than uncultivated land.

We get most dew after a hot summer's day and a westerly wind.

Evening dew is unhealthy, being laden with noxious exhalations.

There is no dew after a windy night; it is evaporated as fast as produced.

Dew will not stay on rose leaves, because these have an essential oil in them.

Dew rolls off cabbage and like leaves, because they are coated with a fine waxen powder.

Little or no dew is ever deposited on smooth stones, polished metal, or woollen material.

Dew is most abundant in exposed situations, there being less to arrest the radiation of the earth's heat.

Nature's wisdom is shown by the fact that plants with woolly leaves require most moisture, and it is these leaves which radiate most heat, and therefore get most dew.

HOME TOWN HELPS

STRONG PLEA FOR GARDENS

United States Commissioner of Education Urges That Last Year's Good Work Continue.

Last year more than 2,000,000 boys and girls in cities, large towns and industrial villages in the United States cultivated gardens under school direction and supervision and produced many millions of dollars' worth of vegetables and small fruits to be consumed where produced without cost for transportation and handling and without loss from deterioration on the markets. There were many thousands of boys and girls who produced more than \$50 each in what would otherwise have been idle time, and thousands of acres of land that would have lain idle if it had not been cultivated by the boys and girls yielded more than \$500 an acre.

The educational value to the children was far greater than the value of the food products. That value included health, physical vigor, habits of industry, knowledge of plant life and of the phenomena and forces of nature, and the beginning of the understanding of the fundamental moral principle that every one should gladly contribute to his own support by his own labor.

"The United States bureau of education will not be able to follow up this work this year as fully as it has for several years past," writes P. P. Claxton, United States commissioner of education, "but I hope the interest of children, teachers, superintendents and school boards will not lag and that the time will soon come when this school-directed home garden work will be recognized as a necessity and an essential part of the education of children in all cities, towns and industrial villages."

FOR BOYCOTT OF BILLBOARD

Speaker Advocates Strenuous Action Against What is Generally Recognized as a Nuisance.

Declaring the automobile has made the billboard a countrywide problem, E. T. Hartman of Boston, member of the Massachusetts Civic league, addressing a meeting of the American Civic association, said that there is no best law or method for dealing with the problem presented by the defacement of both the city and the country by outdoor advertising.

The public, he said, can bring remedies to bear when it chooses to make the effort. He suggested that one effective method would be to withhold patronage from persons and firms employing this method of publicity, and said this would settle the whole problem in a year.

MAKE FENCE ATTRACTIVE

A few morning glories or cardinal climber vines will cover that bare or unsightly fence and make it attractive.

Memorial for Heroic Dead.

The prince of Wales has brought back with him from the Antipodes a very beautiful conception of a form of memorial for the soldiers who have fallen in the great war.

He approached Ballarat, the great gold-mining city in the Australian colony of Victoria by means of a broad avenue, some fifteen miles long, lined on either side by trees, which are flourishing, and that bid are long to form a sort of foliage domed roof for the entire thoroughfare.

Each tree, planted within the last three or four years, and there are about five thousand of them, commemorates a Ballarat boy who gave his life for the empire at the front in France, on the peninsula of Gallipoli and in Palestine. Each of the trees bears the name of the soldier lad whose supreme sacrifice it is designed to recall to his kith and kin at Ballarat-London Mall.

Fight Well Worth Waging.

It pays the community to make a battle for tree treasures. It is a fight which should employ many different tactics and arms. First, perhaps, should be the selection for city planting of trees that are most nearly immune to the more dangerous pests. Next is good care, and the fostering of birds which do so much to check insect plagues. Finally comes scraping and spraying to get rid of the enemies which, like the oyster shell scale, have broken through the other lines of defense.

A good tree is worth fighting for.

The Channel Islands

"L'île au Guerdain," Jersey.

(Prepared by the National Geographic Society, Washington, D. C.)

The Channel Islands, one of the most picturesque portions of Great Britain, are geographically not a part of the British Isles at all. Victor Hugo, who wrote some of his best-known works in the islands, spoke of them as "bits of France fallen into the sea and picked up by England." But really they were in effect the home of a conqueror of Britain. They were a part of the Duchy of Normandy from which William the Conqueror went forth and to which he added the British Isles. All the remainder of Normandy finally reverted to France, but the little Channel Islands remain today a reminder that England was conquered.

These tiny islands hug the shore of France. Jersey is barely twenty miles from the French coast, and 100 miles from England. French is generally spoken in the islands; and not English law, but the old Norman law, largely abolished on the neighboring coast of Normandy, governs the actions of the islanders.

Norman in race, in language, and in laws, it can be imagined what a wrench it must have been to the islanders to be forcibly severed from Normandy. Many of the feudal lords, who held land both on the mainland and in the islands, took the side of the French king; and therefore their lands in the islands escheated to the king of England and formed the Fief le Roi, for which he still appoints a receiver general in each bailiwick to collect his feudal rents, and these are still paid, either in "quarters" of corn or their equivalent in money, for his "rents," or in fowls for his "poulage."

But among the Norman nobles the de Carterets, then among the largest landowners in Jersey, and Pierre de Preaux, governor of all the islands, remained faithful to England. The latter contrived that these islands, alone of all King John's continental possessions, should remain English, and they were refilled to the crown of England by the treaty of Westminister of 1259, which was again confirmed by the treaty of Bretigny of 1360.

So the Channel Islands have never passed under the crown of France, but have been inherited continuously by the kings of England as successors of the dukes of Normandy, in spite of continual invasions by the French.

Jersey Faithful to Charles.
In the seventeenth century, as the days of the commonwealth drew near, a great cleavage between Jersey and Guernsey took place.

Guernsey, impelled by the popular cause by its more pronounced Presbyterianism, by the feeling of betrayal which the Stuart regime in that island had produced, and strongly influenced by three prominent islanders, Peter de Beauvoir, James de Haviland, and Peter Carey, declared for the parliament. Jersey, as strongly influenced by its great feudal family of de Carteret, remained loyal to the royal cause, and in 1645 the Jersey states proclaimed their continued adherence to the king.

In the following year the prince of Wales (afterwards Charles II) sought refuge in Jersey, arriving from the Scilly Islands; and Jersey, after the execution of Charles I, was the one place in the United Kingdom to proclaim him king of England. Shortly after his proclamation he again visited the island, and was supported both with men and money by Sir George Carteret and the majority of the islanders.

Although it is nearly three hundred years since Jersey and Guernsey were at open war, yet the old rancor still lingered until the World War swept away all "smaller misunderstandings" and all Channel islanders, with the rest of Britain's sons, became brothers-in-arms.

Scenes and Artists of Jersey.
Jersey, with its wooded valleys, its winding lanes, overarched with foliage; its orchards, its miles of glistening sand, its quaint old churches and picturesque granite farmhouses, and dominated always by the magnificent ruins of Mont Orgueil castle, gives the impression of unbounded prosperity and fertility. Its lands having been owned always by a race of peasant proprietors, the country shows that it has been cultivated for its own sake by men who loved it and not by hirelings.

Naturally enough, so much beauty has bred a race of artists, the most

famous being Monamy, Le Capelain, Jean the miniaturist, Oulest, Sir John Millais, and at the present day Messrs. Lander, Le Maître, and Blampied.

Guernsey, also, is spotted, from a scenic standpoint, by miles of green houses and acres of quarries. But its cliffs and bays are magnificent, and Moulin Huet is perhaps the most lovely spot in the islands. There are still to be found some wooden walks and lanes, old stone walls and arched gateways, which are as yet unmarred by the utilitarian demands of modern agriculture and industry.

Saint Peter port, built on the side of a hill, retains a certain amount of its former picturesque quality; it is traversed by a curious succession of long granite stairways, and, with its high red-roofed houses, has a foreign appearance. "Caudébec sur les épaules de Harfleur," as Vaquerie described it when on a visit to Victor Hugo, who was then living in the islands as an exile from France.

It was during the great Frenchman's residence in Guernsey that he wrote much of his poetry and three of his best-known novels—"Les Misérables," "The Man Who Laughs," and "The Tolders of the Sea." In commemoration of his exile the French nation brought over and erected a statue to his memory in July, 1914.

Alderney, Key to the Channel.
The lesser islands, Alderney, Sark, Herm and Jethou, are comprised in the bailiwick of Guernsey.

Alderney, described by Napoleon as the shield of England, was considered, in the days before aircraft, submarines and long-range guns had revolutionized warfare, to be the key of the channel. Consequently, during the Napoleonic wars, forts were erected here by the British government at vast expense.

Rugged and inhospitable as the island looks to the wayfarer, it has a savage, untamed beauty denied to the other islands. It is surrounded by the most dangerous currents and wildest seas in the English channel. Seven miles west of Alderney lie the famous Casquet rocks, "where the carcasses of many tall ships lie buried."

No one can claim to have seen the Channel islands until he has seen Sark, which is an epitome of the beauty of them all. It contains the wooded valleys of Jersey, the brilliant lichen-covered cliffs of Guernsey, and its own carpet of wild flowers and sea-anemones, while the natural magic of its beauty is supplemented, to the latitude, by the magic-working powers of some of the old inhabitants.

The two remaining islands of the archipelago are Herm and Jethou, which lie between Sark and Guernsey. They belong to the crown, having gone through many vicissitudes and having passed through a great variety of hands.

Hip-Joint Disease Cured by Nature.

Hip-joint disease in children has been looked upon as almost always due to tuberculosis of the bones of the joint. But Dr. Halfdan Rudst of Norway asserts that 43.4 per cent of such cases are not tuberculous at all. In the course of his hospital experience he observed that a group of these children in his care which had been allowed to run freely without any restraint, at the end of three years showed just as good results as others which had been subjected to the accepted methods of treatment.

An Illustration.

"Pa, what's meant by an air of sky insurance?"

"Did you see how the cook looked when she walked out this morning and left your mother to get breakfast?"

"Yes, pa."

"Well, she wore an air of gay insurance."—Birmingham Age-Herald.

Gift for Woman Explorer.

A testimonial book containing the signatures of many notables of the British nation has been presented to Mrs. Rosita Forbes, "the greatest woman explorer," in recognition of her recent achievement in making the perilous journey to Kufra, the desert headquarters of the Senusis.

Mahometan Calendar.

The Mahometan calendar is dated from the flight of Mahomet from Mecca to Medina, in 622.

Inserting a lead pencil completes a circuit and starts in operation a new electric pencil sharpener.

ROAD BUILDING

ITALY WANTS BETTER ROADS

Experimental Institute Promoted for Study of Materials for Improved Highways.

The Italian Touring club has recently promoted an experimental institute of roads for the study of materials employed in the construction and maintenance of highways.

The objects of the institute will be to carry on laboratory experiments on the physical and mechanical characteristics of road materials; to help the progress of experimental techniques relative to highway surfacing by reproducing and studying samples of pavements worn by traffic or deteriorated otherwise; to form a collection of material samples suitable for Italian road construction; to collect all descriptive and statistical matter appertaining to Italian roads; to furnish public bodies with useful advice relating to construction and maintenance of roads, and to forward by every other means the development and betterment of road work in Italy.

The institute publishes monthly reports of its proceedings. The institute is financed by annual contributions from the Touring Club of Italy, by an annual subsidy from the ministry of public works and by annuities, gifts and charges for material tests.

The institute is under the direction of Sig. Italo Vambone, formerly chief engineer of the province of Milan. More detailed information regarding the formation of this institute is given in a recent bulletin of the Permanent International Association of Road Congresses.

TRACTOR TO IMPROVE ROADS

Contraption Invented by Colorado Man Is Intended for Smoothing and Compacting.

The Scientific American in illustrating and describing a tractor for improving highways, the invention of J. Mosca of House, Colo., says:

"The tractor is for use in soft roads, as for instance in snow or mud, where in the tractor is driven by an endless belt traveling about a fixed element and engaging the ground on the

Tractor for Use on Soft Roads.

under side of said element, and having means for preventing slipping of the belt, and wherein front wheels are provided for smoothing and compacting the roadway for the propelling means, and wherein cleaning means is provided for the belt and front wheels."

HARD ROAD IN NEW ZEALAND

Sum of \$146,000 to Be Spent in Construction of Strip of Concrete Six Miles Long.

Approximately \$146,000 is to be spent by the city of Wellington, New Zealand, in building a concrete road, 25 feet wide, to the suburb of Petone, which is six miles distant.

The new paving will occupy the center of a thoroughfare 100 feet wide which is now macadamized. Only vehicles, such as cars, motorcars and small motorbuses will be allowed on the concrete way. A special vehicle tax in addition to the present one, will be levied by Wellington, the proceeds of which will be devoted solely to the upkeep of this road. This tax applies to all motor-driven cars, and among them are also included motorcycles.

IMPROVEMENTS ARE TO COME

Establishment of Motortruck Trains Bound to Cause Reconstruction of Surfaces.

With the establishment of motortruck trains operating on a fixed schedule throughout the country improvements are bound to come. Not only will surfaces of the highways be rebuilt, but in many instances routes will be shortened to save time and money.

These improvements should be regarded as vital to the success of every community and as a necessary factor in the prosperous era before us. They represent benefits in which not a few individuals but the community at large will share.

Teach Highway Engineering.

Schools and colleges throughout the United States are to be enlisted in a national way to teach the coming generation all about highway engineering, automobile transport, traffic regulations and safety.

Dixie Highway Leads.

Of the 9,630 miles of roads to be constructed throughout the United States through the aid of federal appropriation, the Dixie highway leads the list with 395 miles.

Everything for QUALITY —nothing for show

THAT'S OUR IDEA in making CAMELS—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigarette aftertaste.

Camels are made for men who think for themselves.

Camel

Firestone

30x3 1/2 STANDARD NON-SKID

The Fastest Selling Tire In America

The increasing popular demand for the Firestone Standard 30x3 1/2 inch tire over a period of years has given us big volume. Our Plant No. 2 devoted wholly to this size tire with a capacity of 16,000 tires and 20,000 tubes per day cuts costs on every operation.

On May 2, we dropped our price to \$13.95 passing on to the car owner the full benefits of this big sales volume and this labor-saving plant. This tire has been our standard for years—four plies long staple fabric—extra gum between plies—heavy non-skid tread. The greatest value ever offered car owners. Insist on Firestone.

Our Cord Tire Values

Firestone Cord tires are made exclusively in Plant No. 1. Our process of double gum-dipping each ply of cord gives thicker insulation. The massive non-skid tread, with extra thickness where wear is most severe, gives real effectiveness in holding the car against slipping and adds many extra miles of service.

Firestone Cord tires are sold at the lowest prices in cord tire history: 30x3 1/2, \$24.50; 32x4, \$46.30; 34x4 1/2, \$54.90.

There are Firestone Dealers Everywhere to Serve You

\$13.95

ENDURANCE TEST FOR SADDLE HORSES

To Be Held Under Supervision of Government Agencies—Five-Day Test Over 300-Mile Course.

Army men and others who are alive to the country's acute under-supply of first class cavalry and general utility horses, as the shortage of them was brought painfully to light during the recent World War, are looking forward to the Endurance Test for saddle horses set for next October.

This test, designed to promote the breeding of more and better work types, and to improve the material suitable for army mounts, is to be a very severe one, conducted by representatives of the War Department, Army Remount Service and the Bureau of Animal Industry, Department of Agriculture, along with those of our great institutions maintained in the interest of pure bred horses, including the American Remount Association, Thoroughbred Endurance Test Club, National Saddle Horse Club, Arabian Horse Club of America, National Steeplechase and Hunt Association and American Hackney Horse Society. Also, its conditions make the Endurance Test of special interest to Kentuckians.

The distance (300 miles cross country) will be traversed sixty miles a day for five consecutive days, regardless of weather, over a course to be selected by the committee in charge. Each horse shall carry no less than 245 pounds, made up, according to the rules governing, of the rider's live weight, plus so much dead weight in equipment.

First prize will be \$600, the Mounted Service Cup, Blue Ribbon and the Arabian Horse Club Medal; second prize, \$400 and Red Ribbon; third prize \$300 and Yellow Ribbon; fourth prize, \$200 and White Ribbon; fifth prize, \$150 and Grey Ribbon; sixth prize \$100 and Black and White Ribbon. Prizes will be awarded on the basis of 60% for condition of the horse and 40% for speed—a standard that points to the bottom and swiftness of the thoroughbred strain as the one likely to produce the winner.

The War Department is evincing the keenest interest, because the result will further the splendid work of the Army Remount Association and the other patriotic organizations that have undertaken the work of breeding cavalry horses to answer the requirements of the army in times of peace and its imperative demands in war.

It is the opinion of experts, based on actual experience during the World War, that thoroughbred blood is necessary to the production of the cavalry mount of requisite speed, courage and endurance. Kentucky, therefore, has a paramount interest, because the fountain-head of the purest thoroughbred strain flows perpetual in this favored land of ours.

RAISE ONE CROP AFTER ANOTHER

Garden Plot Should Be Kept Busy by Successive Plantings of Different Vegetables.

COMPANION CROPPING URGED

Maximum Production Can Only Be Obtained by Careful Study and Strict Attention to Various Little Details.

(Prepared by the United States Department of Agriculture.)

Southern gardens begin to look seedy about June 10, gardens in the Middle states section are in the height of their glory, and the New England gardens are just getting well started. It seems to be a foregone conclusion on the part of most persons throughout the Southern states that southern gardens can be grown only in the spring and in the fall, with a few chance hardy crops during the winter.

The farmer of the middle section plants his spring garden, then gets busy with farm crops, and very little further attention is given the garden, unless the work is done by the women. In the New England states and parts of the Northwest where the growing season is quite short only one crop of most vegetables can be grown. In the middle section, however, two crops can often be grown on the same land, and, more important still, a continuous supply of peas, beans, sweet corn, and a number of other vegetables can be had by making successive plantings.

Grow One Crop After Another. The garden is generally the richest spot of ground on the farm, and for that reason should be expected to produce more than any other similar area.

Companion Cropping Peas and Potatoes in the Home Garden

To get maximum production, however, it is necessary to keep the land busy all the time. This can be done two ways; first by companion cropping, and, second, by following one crop with another or successive planting.

There are a number of crops that lend themselves to companion cropping. For example, where onion sets are planted in rows, say 18 inches between the rows, a row of radishes, spinach, or lettuce can be drilled between the rows of onions and be off the ground before the onions need the space. Spinach, radishes, early beets, or turnips can be planted between carrots, parsnips, and celery. A crop of snap beans can frequently be grown between the rows of tomatoes. Radish seeds may often be planted alongside a row of peas, the radishes being pulled and out of the way before the peas begin to climb the trellis or brush provided for their support or to spread over the ground. A little later in the season sweet corn or late cabbage can be planted between the rows of early Irish potatoes and make considerable of a start before the Irish potatoes are dug.

In the middle section, early peas may be followed by late cabbage, late potatoes, late snap beans, beets, or turnips. Early Irish potatoes may be followed by turnips, late snap beans, or by late sweet corn.

Plan Fall Gardens.

Fall gardens should in no case be overlooked, especially from the Middle states southward. Plantings of practically all the early spring vegetables may be made from July to September, according to locality, and be brought to maturity before early autumn frosts. By proper attention to the garden, fresh vegetables may be had through a period of about 10 months of the year in the extreme south and for about 7 months in the middle section. The season for the New England and northwestern sections is necessarily much more limited, but even here the efficiency of a garden can be greatly increased by a careful study and attention to the matter of companion cropping and successive plantings of certain vegetables.

MOST TURKEYS ARE OVERFED

Good Plan to Follow is to Feed Very Light Grain at Start—Give Poult Milk.

Turkeys on most farms are overfed. The best plan to follow is to feed very light grain at the start and give all the milk that the young poult can drink. Experienced turkey raisers tell us that the abundant use of milk is the best method of feeding poult.

Or words to that effect

IT BEATS the band.
THE WAY this thing.
KEEPS POPPING up.
THE OTHER night.
I BROKE all rules.
AND READ a high-brow book.
AND HERE'S a hot one.
THAT IT handed me.
"MANY OF us find.
THAT TASTE affords.
ONE OF the fairly.
DEPENDABLE SATISFACTIONS.
OF EVERYDAY living.
AND IT seems.
UPON LONG reflection.
THAT SATISFACTION.
COMES CLOSE to being.
THE LONG sought.
"HIGHEST GOOD."
OF COURSE that isn't.
WRITTEN WITH the case.
AND POLISH to which.

WE ARE accustomed.
BUT IT'S a mouthful.
AS YOU'LL agree if you.
JUST PUT it into good.
UNITED STATES, like this.
"SON, YOU'LL be running.
ON FOUR flat tires.
IF YOU don't hurry.
AND WRAP yourself around.
THE ONLY cigarette.
THAT SATISFIES."

"THEY Satisfy"—nothing else so well describes Chesterfields' mildness, their mellowness, their delicacy of aroma and smooth, even "body." It took the finest varieties of Turkish and Domestic tobaccos to do it—and the highest order of skill in blending them. Yes, the Chesterfield blend is a secret. It can't be copied.

Have you seen the new AIR-TIGHT tins of 80?

They Satisfy Chesterfield CIGARETTES

LIGGETT & MYERS TOBACCO CO.

A GOOD many motorists do not realize what an intimate relation there is between the life of a tube and the life of a tire.

Hartford Tubes are made to lengthen the life of Hartford Tires—of any good tires.

Let a tube have the slightest thing the matter with it, let

there be a slow leak around the valve or any imperfections in the rubber, and the tire suffers.

It is always safe to be very particular about the tubes you buy. Just as particular as we were when we selected Hartford Tires and Tubes to uphold our business reputation.

T. J. Fralick visited William Murray and family a few days last week.

J. H. East went to Marion Saturday.

Mr. and Mrs. Kenneth Joyce went to Shady Grove Saturday.

Rev. I. W. Talley filled his regular appointment at this place Saturday.

The protracted meeting will begin at this place the third Sunday. Rev. Woodson will assist Rev. Talley.

Several from this place attended the barbecue at Shady Grove Saturday.

Misses Lillie and Lucy Land and Messrs. Rexie Stenbridge and Lexie Coleman attended prayer meeting at this place Wednesday.

Mrs. Emma Coleman of Midway spent a few days with relatives in this section last week.

Mrs. Lura Sutton visited Mrs. Mable Hopkins one day last week.

Messdames Dora McConnell and Emma Coleman spent Wednesday night the guest of Mrs. Flora Stenbridge.

Mr. and Mrs. Bill Parker spent one day last week the guest of Mrs. Mable Hopkins.

Mrs. Dora McConnell, Emma Coleman Lura Sutton spent one day last week the guest of Mrs. Mable Hopkins.

CASAD.

Mr. John Daughtrey returned to his home last week.

Mrs. L. J. Daughtrey is still very sick.

Mr. Clyde Daughtrey, who spent a few days at the bedside of his mother, has returned home.

Miss Mary Belle Williams of Marion, who has been visiting friends in this neighborhood, has returned home.

Frank Phillips of Carrsville spent a few days in this neighborhood last week.

Misses Ruth Hill, Vida Bigham and Frances Adams spent a few days with Mrs. E. M. Cook and attended church at Hebron.

Mr. and Mrs. Albert Humphrey spent Friday night at the home of John Vaughn.

Rev. O. M. Capshaw closed a very successful meeting at Hebron Saturday night.

Mr. and Mrs. Herbert Easley of Illinois are spending a few days in this neighborhood.

Miss Mamie Beard of Arkansas is visiting in this neighborhood.

NOTICE!

I have within the last few days acquired possession of the CITY COAL & TRANSFER CO. and will be prepared to supply you with the best coal at the cheapest prices, which is in keeping with the policy which the CITY COAL & TRANSFER CO. has always been noted.

I will appreciate your coal trade.

Home Town Helps

NEVER FORGET "HOME TOWN"

However Humble, Sentiment Enshrines Spots in the Hearts of Its Sons and Daughters.

It isn't the fine buildings and the broad streets, the gorgeous homes and spacious gardens that count—it's the sentiment hovering around the spot that marks the "home town" as the best place on earth, writes Florence Webster Long in the Indianapolis Star. If this were not the case, only the big cities would count in the summing up of the earth's worthwhile places. And where is the cross-roads town that hasn't as many boosters as it has residents? Even the secluded homestead way off in a lonely corner of the backwoods looms up largely as the center of the universe. It's a sort of patriotism, it's a brand of native pride, and it's all mixed largely with sentiment without which life wouldn't be worth living anyway.

I can remember long ago visiting a school friend whose glowing accounts of her home had held out the glamor of a glorious prospect. I can see in memory that simple little home circle set amid the humdrum monotony of small village life, and my surprise as I contrasted it with my friend's tales. But now I know that the girl was simply describing things as they seemed to her, softened by distance, hallowed by sentiment, and tinged by the softening influence of a homesickness for the magic spot "home."

LAYING OUT FLOWER GARDEN

Even With Small Space, Much Can Be Accomplished in Making Effective Home Surroundings.

With a long narrow lot there is not much choice in the arrangement of borders and beds, but the effect will be more pleasing if the center is left in the grass, and have flower borders along the sides, while at the far end there might be a border of flowering shrubs, the shrubs starting in the corners of the side borders and running across the end of the lot, the shrub border being widest in the middle. By having a nice curve to this border which narrows down very much near the corners an effect will be obtained of recesses or alcoves, which will be more pleasing than if it were a straight line.

It is sometimes a good plan if it works in with the back of the house to have a strip of grass close to the house where the ground is raised above the main part of the lot, so one can sit there and look down on the garden, but if there is a back veranda it will answer. Instead of breaking the center of the garden up with paths, it would be better to have one leading from the house to each side border, and if a nice curve is given these will look pleasing—Housewife.

Town-Planning Pays.

Town planning is the study and analysis of all the different activities which go to make up the complex organism of a city, the analysis of the city's establishment, its growth and its future demands, with the resultant laying out of plans, laws, regulations, etc., which will insure as practicable, correct bad conditions, remove obstacles and will allow the future growth of all activities along well thought out and carefully studied lines, in such a way that each will bear proper relation to the other, function properly within itself and as a whole. Torsely, city planning is the means of bringing order out of chaos, and safeguarding the future from a recurrence of improper conditions.

Health of Trees.

Just as with folks, health is of the utmost importance in shade trees, and no agency is more potent in marring the appearance of these trees than insects, says the American Forestry Magazine of Washington. A defoliated or otherwise bedraggled shade tree is not only worse than none at all, but, as a result of insect injury, it is a menace to the health or life of similar trees in the neighborhood.

Ways of controlling most of the injurious shade-tree insects are told in Farmers' Bulletin 1160. Send for it.

City Planning in Los Angeles.

Los Angeles has a city planning commission of 51 members, appointed by the city council, who serve three years each, without compensation, 17 retiring each year. From this membership an executive committee of nine is appointed, one for the head of each of the eight divisions and one who acts as president of the commission and presiding officer of the executive committee.

Good Flowers to Plant.

The nine best annuals for planting may be listed as the snap-dragon, cosmos, calendula, cornflower, mignonette, aster, clarkia and petunia; while for the perennials Japanese iris, phlox, chrysanthemum, oriental poppies, larkspur, Canterbury bell, hollyhock, peony and columbine are very satisfactory.

IMPROVED ROADS

ROAD CONSTRUCTION IN 1920

Cost Was About Twice as Much as in 1917 on Account of Distinct Shortage of Labor.

(Prepared by the U. S. Department of Agriculture.)

Every kind of road cost about twice as much to build in 1920 as it did in 1917, according to the chief of the bureau of public roads, United States Department of Agriculture, and highway construction suffered more than any other class of work through railroad congestion, strikes, labor troubles and material shortages.

After the war there was a great public demand for improved roads. Many roads had been seriously damaged by war traffic, and it appeared that the return of men from military service would provide an abundance of labor. The army of laborers which was expected to apply for the work did not, however, materialize. On the contrary, there was a distinct shortage

Well Kept Roadside Where Weeds Are Controlled by Frequent Mowing.

of labor, and wages reached the highest levels attained in the history of the country. In 1917, competent labor could be secured for from \$1.50 to \$3 per day, but the corresponding wages in 1920 were from \$3 to \$5 for a shorter day's work.

In proportion to this demand there was also a pronounced scarcity of construction materials. Sand, gravel, stone, and cement, and materials commonly used in road work increased in price between 1917 and 1920 from 50 to 100 per cent. Naturally, these increases in cost were reflected in the prices paid to contractors for road work. Gravel roads increased from \$4,500 to \$7,250 per mile; concrete from \$21,165 to upward of \$40,000 per mile, and brick roads from \$33,000 to \$52,000 per mile.

As funds available for road construction are largely limited by statute, or by the returns from taxation, a majority of the states this year have deliberately withheld work, the plans for which had been completed, until they could obtain a greater return for their expenditure.

SCOTS USED FIRST MACADAM

Resident of Ayrshire Made His First Experiments About 1814—Roads Now Common.

Macadam roads are so common in America that national pride may well lead us to look upon them as a domestic product.

But John Macadam was a Scot, resident in Ayrshire, where he made his first experiments about 1814, according to the New York Sun. Five years later the first public roads were laid with the pavement and a grateful parliament awarded the inventor a grant of \$50,000.

In 1827, after the new pavement had been thoroughly tested, MacAdam was made surveyor general of all metropolitan roads in and about London and the use of his method became general throughout the United Kingdom.

HARDING LAUDS GOOD ROADS

President in First Message to Congress Decries Money Wasted in Improved Highways.

In no uncertain terms, President Harding expressed his opinion of the automobile, motor transport and good roads in his first message to congress. He said: "The motorcar has become an indispensable instrument in our political, social and industrial life. . . . I know of nothing more shocking than the millions of public funds wasted in improved highways—wasted, because there is no policy of maintenance. Highways must be patrolled and constantly repaired."

Hens Vary in Weight.

Egg-producing hens vary in weight, the average being about four pounds. The principal breeds of egg producers are the Leghorns, the Wyandottes, the Plymouth Rocks, the Rhode Island Reds and the Minorcas.

Work Is World Wide.

Road construction and maintenance have become world wide as, well as provincial problems and foreign governments are doing much work to ward highway development.

DEATH DEFYING AUTO POLO GAMES

Will Be a Daily Free Attraction at the

PENNYROYAL FAIR

Hopkinsville, Ky., Aug., 30, 31, Sept., 1, 2, 3

The first time such a big costly and thrilling act has ever been offered by any fair in Western Kentucky.

It is the same act and the same players, who will play at the Kentucky State Fair in Louisville.

Driving real automobiles, the players dash madly over the field in pursuit of a ball. Collisions or overturned cars are frequent, wheels are wrenched off and other things happen that will make you gasp.

Don't fail to see this great attraction.

Splendid races, fine exhibits, excellent midway shows and wonderful fireworks display at night are some of the other features of this year's program.

Write for complete catalogue.

REDUCED RATES ON ALL RAILROADS

ONE-MAN ROAD GRADER PAYS

Profitable Plan for Farmers in Community to Get Together and Purchase Implement.

Once two teams of horses and at least two men used to be required to level and grade roads. Now we have the one-man machine, which does the job in half the time and never gets tired. Like all modern devices of this nature, it is, of course, driven by gasoline.

The single operator manipulates all the levers that control the cutting blades and also takes care of the engine. All the controls are placed at his elbow.

If you live in a community where it is the custom for each man to con-

Gasoline-Driven Device Saves Time and Labor.

tribute his share of labor toward keeping the roads in condition, it will pay the men of the neighborhood to get together and purchase a one-man road grader and reduce the time and labor ordinarily necessary for this task.—Popular Science Monthly.

BETTER ROADS HELP BABIES

Farm Is Made More Accessible to Doctor and Nurse—Danger in Travel Is Reduced.

It may seem a long way from good roads to better babies, and yet the two are closely connected. America has a great rural population, throughout which babies are being born every day.

These babies and their mothers need care, the visit of the nurse, the services of the physician, often of the surgeon, and how are they to have it if between lie miles of road impassable alike to automobile or buggy?

Of what use is the little hospital at the county seat if the woman whose life depends upon its care cannot be taken there swiftly and comfortably? What difference does it make that the town physician may be a very wizard at treating diphtheria, if long before he can arrive at the farm the little throat has been closed by the deadly film, or the little heart stopped by the depressant poison?

Medical and surgical honors are generally claimed for the city—when as a matter of fact the country doctor is often possessed of a skill as complete as his heart is big.

Make the farm accessible to the doctor and nurse, make the hospital and the health center accessible to the farm. Nature and skill will do the rest.—Concord Monitor.

FOR SALE

Modern Bungalow, six rooms and sleeping porch, Splendid Location. Can give immediate possession. Call or see M. H. CANNAN

FARM JOURNAL SAYS:

A man is known by the company he keeps out of.

It's all the same to the hen whether we say "sit" or "set."

The best time to catch soft water is when it is raining hard.

It is easy for a man in health to preach patience to the sick.

We're never too old to wish we could go wading in the creek again.

Leave growling to dogs; they do it better, no matter how hard you try.

Who ever heard of a picnic without somebody sitting in the pie?

Beware of excesses of any kind. Learn, like the horse, to say "neigh."

A barking dog may never bite, but death by fright lasts just as long.

Girls nowadays must be ashamed of their ears; they never show them.

Daylight saving appears to be the only saving a good many folks can make.

Speaking of useful inventions, doesn't the strawberry shortcake just about head the list?

Freckles may have their place, but it does seem too bad to cluster them on a pretty girl's nose.

REMARKABLE REMARKS

Harold MacGrath—Hamdram isn't where you live; it's what you are.

Percy Hammond—The human knee is a joint and not an entertainment.

Policewoman Mary Hamilton—Most of the runaway girls come from Boston.

Glen Huch—Bats were made for a better purpose than to look spectators at.

Thomas A. Edison—The average college man doesn't seem to know anything.

Ray K. Moulton—Only 8 per cent of the men propose marriage of their own free will.

John D. Rockefeller, Jr.—My father does not judge a man by the cut of his clothes or by his bank account.

Hugh Fullerton—Some folks will believe anything about you so long as it is the worst.—From the Independent (New York).

POINTED PARAGRAPHS

Some men feel more at home when away.

Men admire clever women, but seldom marry them.

He who boasts of his goodness is seldom much good.

If you can't get what you like, try to like what you get.

When a man keeps his own counsel he has not much use for a lawyer.

Honesty is the best policy for those who are not rich enough to be financiers.

A clever woman is one who can make a man believe that he knows it all.

After a man gets into trouble it is easy for him to see how he might have kept out of it.

One of life's peculiarities is that the world is seldom watching when a man is doing good.

Shah was a great ball player. He pitched the 1st without and within and later put the dove out on a fly.—Chicago Daily News.

The Young Man Going Away To School

He meets young men from various sections of the state and country; he values their companionship and wants to make a good impression, first with his personality and then with his clothes.

Our long experience in selling clothes has taught us to buy the kind that will be a credit to the young man who wears away. Strictly young men's clothes are what he should wear, what he wants, and we're here to see that his wishes are fulfilled in

THIN ROADS ARE EXPENSIVE

Ordinary Rock Surface Under Motor Traffic Coming in Next Few Years.

MacAdam was years ahead of his age and years behind this one. The builders of the Appian Way knew more about building a road for a motorcar than MacAdam, strange as it may appear. It is the general opinion among road builders—an opinion greatly quickened and altered by the war—that the light stone road, be it surfaced or oil treated in what way you will, is not the road to build in the face of an avalanche of motor-trucks that is coming in the next few years. The motorcar brought oil to the road as a necessity. The water bond, which worked so well with iron tires and iron shoe hoofs, is useless against the suction of the pneumatic tire. But the oil stone road that holds the 3,000-pound car with ease will not carry the five-ton truck—and last.

The railroad builders have found that for heavy traffic it pays to use the heaviest steel rails, the finest wood for ties and the best broken stone, and plenty of it, for ballast.

Vegetables in Fall Garden.

It should be remembered that practically all vegetables grown in the spring garden can be grown also in the fall garden, and such vegetables seeds as were left over from spring plantings may be used in the fall.

No Doubt of Need.

There isn't any doubt about the need for more and better roads when automobiles and trucks are the only means of reaching (road to your city).

COAL

Coal veins three to four feet thick, good roof and floor, on railroad and River, slope mining low price labor. Will lease small or large tracts from one to twenty years on the best of terms.
