**JENNIFER'S EXPERIENCE**

At about 7:00 o'clock Monday evening, Mrs. Bertha Finney was the only visitor to the new MacFarland Furniture store.

*Farm Bureau Notes*

Next week June 29th is the 20th anniversary of the Farm Bureau in the United States. This is a week set aside by the United States Department of Agriculture for educational purposes and in order to bring to the public's attention the importance of the Farm Bureau in the national economy. The Farm Bureau is a voluntary association of farmers, organized on a county, state, and national level, for the purpose of promoting the economic and social well-being of their members. It is a national organization that is dedicated to protecting the rights of farmers and their families. The Farm Bureau provides a forum for farmers to come together and discuss the issues that are important to them.

**COOKSTOWN MAGAZINE**

The Cookstown Magazine is a local magazine that is published quarterly. It features articles on local events, history, and culture. The magazine is a valuable resource for anyone interested in learning more about the history and culture of Cookstown and the surrounding area.

**THE CIVIL RIGHTS MOVEMENT**

The Civil Rights Movement was a period of civil rights protests and demonstrations in the United States between the 1950s and 1960s. The movement was primarily concerned with ending discrimination against African Americans and other minority groups. It was marked by a series of protests and demonstrations, including the Montgomery Bus Boycott, the March on Washington, and the Selma to Montgomery Marches. The movement ultimately led to significant legislation, such as the Civil Rights Act of 1964 and the Voting Rights Act of 1965, which helped to end discrimination and segregation in the United States.

CHAPTER XV

Sunday, July 17th. It was early in the week and the Swains had been granted the rare treat of a day off. The children were with friends in the city, and the house was quiet and still. Mr. Swain, who always enjoyed a Sunday to himself, was lying on the couch in the study, lost in thought. Mrs. Swain was in the kitchen, preparing a special meal for the evening, when the telephone rang. It was a call from Mrs. Black, who lived across the street. Mrs. Black had a guest who was planning to stay with her for the weekend, and she wondered if Mrs. Swain would be willing to take care of her children while she was away. Mrs. Swain, who was always willing to help her neighbors, agreed immediately.

Mr. Swain, who was not usually a morning person, was surprised to find himself awake so early. He stretched and yawned, then got up and began to walk around the room. He looked out the window at the gardens of the neighboring houses, which were still in their night clothes. The morning sun was just beginning to rise, casting a warm glow across the room.

The children had been up early as well, and were happily playing in the garden. Mr. Swain watched them from the window, a smile spreading across his face. He knew that this was the most important thing in life, to watch his children grow and thrive.

Mrs. Swain, who had been cooking breakfast, was now attending to the children. She was passing out their breakfast and getting them ready for the day. The children were all dressed and ready to go, and Mrs. Swain was happy to see them off to school.

The day was off to a good start, and Mr. Swain knew that it would be a successful one. He returned to the couch and settled in to read a book, content in the knowledge that his children were happy and safe.
A pair of mule feet were missing, and the workers in the barn were searching for them. The barn was crowded with hay, and the mules were resting after a hard day's work. The workers were busy, but they were not making much progress. The mules were moaning and groaning, and the barn was filled with the sound of their hideous wailings.

The barn was old and dilapidated. The ceiling was sagging, and the walls were crumbling. The mules were shivering with fear, and the workers were growing restless. The barn was a dangerous place, and the workers knew it. They had been warned that the mules were dangerous, and they had been warned that the barn was dangerous. But they had no choice. They had to work, and they had to do it in the barn. It was their only choice.

The workers were tired, and they were hungry. They had been working for hours, and they were hungry. They were hungry for food, and they were hungry for rest. They were hungry for anything that would make them feel better. They were hungry for anything that would make them feel alive.

The barn was a place of danger, and the workers knew it. They knew that the mules were dangerous, and they knew that the barn was dangerous. But they had to work, and they had to do it in the barn. It was their only choice.

The workers were tired, and they were hungry. They had been working for hours, and they were hungry. They were hungry for food, and they were hungry for rest. They were hungry for anything that would make them feel better. They were hungry for anything that would make them feel alive.

CONTROL DISEASES AND INSECT ENEMIES OF VEGETABLE GARDEN

One of the tomato troubles is, Adult Female Tomato Hornworms. Two occur on each leaf, and sometimes on the stalks and in the fruit. The adults feed on the leaves, and the larvae feed on the stems, which makes the plant weak and stunted.

Tomato hornworms are large, greenish, somewhat flattened insects, with four pairs of greenish wings. They are about an inch long, and are easily recognized by their large size and conspicuous markings.

To control tomato hornworms, you can use a number of methods, including hand-picking and using insecticides. Hand-picking involves removing the adult hornworms by hand, while insecticides can be used to kill the larvae before they can do any damage to the plant.

PREPARE TO CONTROL GRASSHOPPER PESTS

Tests Made to Determine Most Effective Baits

Syrup traps are being taken on the same method that has been used for many years, but for the last 10 years to prepare for their tests, they have been using the same soft water to prepare the sugar syrup. This syrup has been mixed with a small amount of water and has been boiled. The syrup is then poured into small jars, and the jars are placed in the grass to attract the grasshoppers.

Characteristic Work of the Tomato Hornworm.

To control tomato hornworms, you can use a number of methods, including hand-picking and using insecticides. Hand-picking involves removing the adult hornworms by hand, while insecticides can be used to kill the larvae before they can do any damage to the plant.

Shelf Topiary.

Shelf topiary is a form of indoor landscaping that involves the use of small trees or shrubs placed on a shelf or ledge. The plants are trained to grow in a vertical or horizontal direction, and are often used to create a focal point or to add interest to a room.

Shelf topiary is popular because it can be used to create a sense of depth and dimension in a room, and can be used to add interest to a room without taking up too much space. It can also be used to add a touch of nature to a room, and can be used to create a relaxing and calming atmosphere.

Shelf topiary is a form of indoor landscaping that involves the use of small trees or shrubs placed on a shelf or ledge. The plants are trained to grow in a vertical or horizontal direction, and are often used to create a focal point or to add interest to a room.

Shelf topiary is popular because it can be used to create a sense of depth and dimension in a room, and can be used to add interest to a room without taking up too much space. It can also be used to add a touch of nature to a room, and can be used to create a relaxing and calming atmosphere.
Radio Instructions for Trouble Shooting

How to detect and remedy the Open Circuit, Short Circuit, and Leaksage.

Open Circuits are marked in the receiver as a "BB" or "BO" in the speaker. Some receivers are designed to make this mark at both ends of the circuit, while others show it only at one end. If an open circuit is found in the receiver, and the other end of the circuit is mended, the trouble will be remedied.

To correct an open circuit, it is necessary to locate the exact point in the circuit where the break is. This can be done by observing the current indicator. The indicator will show a rise in one section of the circuit, which will be connected with the break. The break can then be remedied.

Short Circuits are marked in the receiver by a "BB" or "BO" in the speaker. Some receivers are designed to make this mark at both ends of the circuit, while others show it only at one end. If a short circuit is found in the receiver, and the other end of the circuit is mended, the trouble will be remedied.

To correct a short circuit, it is necessary to locate the exact point in the circuit where the short is. This can be done by observing the current indicator. The indicator will show a rise in one section of the circuit, which will be connected with the short. The short can then be remedied.

Leaksage or Leaks are marked in the receiver by a "BB" or "BO" in the speaker. Some receivers are designed to make this mark at both ends of the circuit, while others show it only at one end. If leaksage is found in the receiver, and the other end of the circuit is mended, the trouble will be remedied.

To correct leaksage, it is necessary to locate the exact point in the circuit where the leak is. This can be done by observing the current indicator. The indicator will show a rise in one section of the circuit, which will be connected with the leak. The leak can then be remedied.

Baby Specialists.

THAT there are Physicians who specialize in Infant ailments you know. All Physicians understand Infant troubles all Physicians treat them. It is his profession, his duty, to know human illness from the Start to the Great Beyond.

But in serious cases he calls in the Specialist. Why? He knows as every Mother knows ought to know, that Baby is just a baby, needing special treatment, special remedies.

Can a Mother be too thoughtful? Can a Mother try to relieve Baby with a remedy that she would use for herself? Ask yourself and answer honestly.

Always remember that Baby is just a baby. And remembering this you will remember that Fletcher's Castoria is made especially for Infants and Children.

Children Cry For

CASTORIA

The False and the True.

Advertizing try to do the impossible, the outrageous. To change the habits of those who have never had need of their goods requires the greatest effort. But do you think anything so exacting appeals to the honest, thrifty, sensible baby as that which has Fletcher's Castoria in its breakfast, at all times and for all ages—just for Baby?

The big selling, the big advertising is like the old story of the tortoise that beat the hare. Every one everywhere, and everywhere, and as long as there is a hare to beat, there will be a tortoise to beat him. The tortoise in this case is the Castoria for infants, the hare is every other breakfast drink for both the small and the big. And Castoria is the Castoria for infants and Castoria is the Castoria for adults and for every one that ever had a meal.

BUILT BETTER than Cars that Cost More

A CAREFUL analysis of the construction and complete equipment of the Light-Six will convince you that it has no duplication in value in the light car class.

For instance, the mechanism of the car is based on the personal experience of the best men in the world, who are experts in their field.

The particular operation is mainly responsible for the fair balance of the Light-Six and its remarkable freedom from vibrations of all kinds. It also has an important bearing on the stability and strength of the car, for the Light-Six has no need for the heavy and ponderous collection of parts that is used in many of the other cars.

The exceptional values in the Light-Six are possible because of the care that has been taken to put the car in line with the best producers of the world. These manufacturers are practically club-like.

In such an organization each member is expected to do the very best work that can be done. Each has the right to expect that the work of his fellow member will be of a quality equal to his own.

For further information about the Light-Six you should feel sure that the Light-Six offers you as much more for your money in performance, service and economy. This Is a Steudecker Year
