CHAUTAUQUA TO OPEN MONDAY

Splendid Program Arranged for Marion This Year-High Class Attractions to be Presented

Next Monday the Big Redpath Chautauqua will open with one of the finest programs yet presented. Evetything possible has been done by the Redpath program builders to make this year's Chautauqua full of high class entertainment and up-tothe minute lectures.

The Collegian Male Quartet, a notable singing and brass quartet will be the opening attraction. The Collegians are not only singers and instrumentalists but are also capital entertainers. At night after a popular concert by the Collegians Hon. Charles H. Brough, well-known educator and former governor of Arkaneas will give his popular lecture "America's Leadership of the World" He holds the degree of doctor of philosophy from John Hopkins University being one of the few men who have served as governors of American commonwealths to receive this degree. He is well known as a writon state and national problems.

On the second afternoon some of the most popular scenes from favorite light operas will be given b the Montague Light Opera Company. The members of this company are experienced concert musicians and dramatic entertainers whos abilities have been tested by many seasons of successful Chautauqua tours in every part of the United States. Selections will be given from "Robin Hood," "The Mikado" "Madame Butterfly" and other light opera successes which insures a most pleasant afternoon's

Great Comedy, "Friendly Enemies," a Chautauqua Attraction

"Friendly Enemies" is one of the most popular of recent comedy successes. Scores of cities throughout the country have alternately laughed and wept over this irresistible comedy drama whose plot grows out of the conflicting convictions of two lifelong friends. A complete production of "Friendly Enemies" will be given at the coming Redpath Chautauqua by a cast of experienced Broadway actors organized by William J. Keighley, manager of the Naw York City Producing Department of the Redpath Bureau.

BRIDGE MEETING HERE TUESDAY

Union and Crittenden County Representatives Meet in Joint Session

Some forty or more citizens of Morganfield and Sturgis, representing the Kiwanis Clubs of these cities drove over from Union county Tuesday to attend the bridge meeting held at the court house here at 1:30 o'clock Tuesday. Owing to the lack of proper advertising only a small number of Crittenden county people were present at the meeting. Previous to this the fiscal court of Union county had appropriated the sum of \$12,000 as that county's part in the construction of a proposed bridge across Tradewater river at the mouth of Cypress, the boundary line between the two counties.

County Judge E. Jeffrey Travis gave the opening address explaining the object of the meeting. He told them he wanted the bridge. He said the people of the two counties were not as closely allied as they should

Mayor Kern of Sturgis gave the next address. He advised co-operation between the two counties and said the building of the bridge would be the means of more closely uniting the people as neighbors and friends. Supt. Jenkins of the West Kentucky Coal Co. addressed the meeting and stressed the business advantages

of the bridge across Tradewater. Supt. Herbert of Bell Coal & Navication Co. said the citizens of the northern part of Crittenden deserved and ought to have the bridge. He WEDS IN TEXAS said that in the days of Daniel Boon and the Indians when they

CHAPTER XVIII-Continued. -18-

A last curve, and they knew. Over one of the sharpest and ugliest of the descending precipices, crashing down through the saplings and underbrush and striking the trunks of a score of trees on its way, the heavy car had that it was Alix's car, and with a great ery he sprang over the bank and, slipping and stumbling, followed its mad course down almost to the dry creek bed in the canyon, and fell on his knees beside the huddled figure that, erect and strong, in its striped blue gingham, had been Alix only a few short minutes ago.

She had been flung clear of the car. and although every bone in her body was broken, by some miracle the face, except for a deep cut where the brown hair met the tanned forehead, was untouched. And as he caught her in his arms and bent over her with the bitterness of death stopping his own heart, a soft, thick braid loosened and fell like the touch of her hand upon his own, and it seemed to him that in the tranquil face and in the very look of the closed and fast-shadowing eyelids he caught a glimpse of Alix's old smile.

Peter forgot everything else in the own as in this moment of their parting, when the quiet autumn woodland, shot with long shafts from the sinking sun, rang with his bitter cry:

"No, Alix-not dead! My wifemy wife!"

tle valley was beginning to ring with the tragedy. After a while some sympathetic man touched Peter on the

deep dust.

with dust and tears was star side him, and looking down at her,

he saw that it was Cherry, "Yes, Cherry?" he said, moistening

"Peter," she said, "they say Martin's living-he was screaming-" She grew deathly pale and faintness swept

over her, but she mastered it, "He "And he is living. Will you tell them If you'll fell him that, then I'll get a us all! Fred," Peter said aloud, with doctor-

"Yes, I will," Peter said, not stirring. His eyes had the look of a sleepwalker; he nodded slowly and gravely at her, like a very old man. "You-" he said to a man who had stopped his car near by and who was pressing sympathetically close. "Will you-?"

"If you'll sit in the back seat, dear, and just rest his poor head," a woman said to Cherry. Peter saw that they were lifting Martin's big, sensoless form in tender hands and carrying it through the little group. There was a shudder as Martin moaned deeply. Peter went and sat on the low bank by Alix again, and lifted one of her limp hands, and held it. Ah, if in God's mercy and goodness she might perhaps a few of us could come here nght, that one slight ray the would flood all the world with | timidly, with his reddened eyes filling | lingered on her quiet face, and still as with a regular funnel,

light for him again! But she did not stir. "Gone?" said Cherry's heartrending voice, a mere whisper, beside him. He turned upon her lifeless eyes.

"Gone," he echoed. "Oh, Alix-my darling! My own big sister!" Cherry sobbed, falling to her fallen like a boulder. And Peter saw knees and passionately kissing the peaceful face. "Oh, Alix, dearest!" The women about broke into tears. Peter pressed his hand close against his wife later that poor Joyce had not his aching eyeballs, wishing that he

might cry. "She drove here," he heard a man's voice saying in the silence, "and she must have lost control of her car for minute. Then-do you see?-the wheel slipped on the bank. Once it | tin's first kiss upon her lips. got this far, no power in God's

"No power in God's earth!" another man's voice said in solemn confirma-

tion. "Peter," Cherry said, "will you come to me as soon as you can? I shall need you." "As soon as I can," he answered

absently. The car drove away, and he heard | death.

Martin mean again as it moved. "Joyce," said a man's kind voice close beside him. He recognized the voice rather than the distressed face world. He held her close to him and of an old friend and neighbor. "Joyce. put his face against her face, and per- my dear fellow," he urged affectionatehaps she had never so truly been his ly. you everything else."

"Please," Peter answered simply. arm to say that Mrs. Lloyd had And instantly there was moving and fainted, and that if he would please clearing in the crowd, a murmuring

After a while they were at the moun-Peter roused himself, and with help tain cabin, and Kow, with tears runfrom half a dozen hands on all sides | ning down his yellow face, was helping he carried Alix up to the road and them. Then they went into the old livlaid her upon a motor robe that some | ing room, and Alix was lying there. kindly spectator had spread in the splendid, sweet, untouched, with her brave, brown forehead shadowed softsmall, slight woman with disorderly resting upon her cheeks, and her finfair hair and with her face streaked gers clasped about the stems of three

There were other flowers all about, and there were women in the room. White draperies fell with sweeping lines from the merciful veiling of the crushed figure, and Alix might have been only asleep, and dreaming some heroic dream that lent that secret pride and joy to her mouth and filled those closed eyes with a triumph they had never known in life.

Peter stood and looked down at her. and the men and women drew back. But although the muscles of his mouth twitched, he did not weep. He looked long at her, while an utter silence filled the room and while twilight deepened into dark over the cabin and over the mountain above it.

"So that was your way out, Alix?" Peter said in the depth of his soul. That was your solution for us all? You would go out of life, away from the sunshine and the trees and the hills that you loved, so that Cherry and I should be saved? I was blind not to see it. I have been blind from the very beginning."

Silence. The room was filling with chadows. On the mantel was a deep bowl of roses that he remembered watching her cut-was it yesterday or she said faintly and wearily after a centuries ago?

"I was wrong," he said. "But I herself, "Nothing-nothing-nothing!" think you would be sorry to have me face-what I am facing now. You were always so forgiving, Alix; you could be the first to be sorry."

He put his hand over the tigerish pain that was beginning to reach his eart. Bis throat felt thick and choked, and still he did not cry.

"An hour ago," he said, "if it had been that the least thought of what was caught by that tree," she said. this meant to you might have reached me an hour ago, it would not have -tell one of these men-that if he been too late. Alix, one look into your will help me, we can drive him home. eyes an hour ago might have saved bitter groan, clinching tight the hands of the old friend who had crept in to stand beside him, "Fred, she was here, in all her health and joy and

strength only today. And now-"I know-old man-" the other man muttered. He looked anxiously at Peter's terrible face. In the stience the dog whimpered faintly. But when Peter, after an endless five minutes, turned away, it was to speak to his

friend in an almost normal voice. "I must go down and see Cherry. Fred. She took her husband to the

old house; they were living there," "Helen will stay here," the old man assured him quickly. "I'll drive you the whole world for Altx today, and down and come back here. We thought temorrow afternoon, Peter," he added

again, "and talk of her s little, and pray for her a little, and then take her to-to rest beside the old doctor-'

"I hadn't thought about that," Peter it hard to link words to thought. "But that is the way she would like it. to the old cemetery. Cherry was Thank you—and thank Helen for hanging over the bedside of her hus-

"Oh, Peter, to do anything-" the woman faltered. "She came to us, you know, when the baby was so ill-day after day-my own sister couldn't have been more to us!"

nto a waiting car, and they drove remembered.

"Thank God I don't feel it yet as shall feel it, Thompson!" he said quietly. The man who was driving gave him an anxious glance.

"You must take each day as it

comes," he answered simply. Peter nodded, folded his arms across his chest, and stared into the early dark. There was no other way to go than past the very spot where the horrer had occurred, but Thompson told seemed to know it when they passed

Nor did he give any evidence of otion when they reached the old Strickland house and entered the old hallway where Cherry had come nying in, a few short years ago, with Mar-

Two doctors, summoned from San Francisco, were here, and two nurses. Martin had been laid upon a hastily moved bed in the old study, to be spared the narrow stairs. The room was metamorphosed, the whole house moved about it as about a pivot, and there was no thought but for the man who lay, sometimes ruoaning and sometimes ominously still, waiting for

"He cannot live!" whispered Cherry, ghastly of face, and with the utter chaos of her soul and brain expressed by her tumbled frock and the carelessly pushed back and knotted masses of her hair. "His arm is broken, Peter, and his leg crushed-they don't dare touch him! And the surgeon says the spine, too-and you see his head! Oh, God! It is so terrible," she said in agony, through shut teeth, knotting her hands together; "It is too terrible that he is breathing now, that life is there now, and that they cannot hold

She led Peter into the sitting room, where the doctors were waiting.

"Is there any hope?" he asked, when Cherry had gone away on one of the restless, unnecessary journeys with which she was filling the endless hours. One man shook his head, and in the allence they heard Martin groan.

"It is possible he may weather it, of course," the older man said doubtfully. "He is coming out of that first stupor, and we may be able to tell better in a short time. The fact that he in her usual fashion. And if, for a Pfesently he was conscious that a ly by her brown hair, and her lashes is living at all indicates a tremendous few moments, the train of memory

loctor!" on a burst of tears. The study, and Peter was immediately summoned to assist them in handling the big frame of the patient. Martin was use to this very father years ago! thoroughly conscious now; his face beside the bed, her frightened eyes moving from face to face.

There was a brief consultation, then Cherry and Peter were banished.

Peter watched her with a confused ense that the whole frightful day had been a dream. Once she looked up and met his ever.

"He can't live," she said in a whis-"Perhaps not," Peter answered

very low. Cherry returned to her som-"We didn't see this end to it, did

we?" she said with a pitiful smile after a long while. "Oh, no-no!" Peter said, shutting

his eyes and with a faint, negative movement of his head. "Poor Cherry-if I could spare you all this!" knotting his fingers and feel-

ing for the first time the prick of hitter tears against his eyelids. "Oh, there is nothing you can do,"

CHAPTER XIX.

It was all strange and bewildering. thought Peter. It was not like any thing he had ever connected in his thoughts with Alix, yet it was all for

The day was warm and still, and the little church was packed with ture. In fact, both air and salt are flowers and packed with people, Wom- absorbents of moisture and it is a on were crying, and men were crying, too, rather to his dazed surprise. The organ was straining through the warm, fragrant air, and the old clergyman, whose venerable, lecnine head, in its crown of snowy hair. Peter could see clearly, spoke in a voice that was sorbs and holds water vapor more thickened with tears. Strangers, or almost strangers, had been touching Peter's hand respectfully, timidly, had been praising Alix. She had been "good" to this one, "good" to that one, ture is given up by the salt, which in they told him; she had always been so turn becomes dry as it returns the "interested" and so "happy."

Her coffin was buried in flowers. many of them the plain flowers she loved, the gillies and stock and verbena, and even the sweet, soher wallflowers that were somehow like herself. But it was the roses that scented fresh creamy buds had been places between the waxen fingers. And dill that radiant look of triumphant love | container to be filled, and proceed

the faint ghost of a smile touched the once kindly and merry mouth,

They said good-by to her at the church, the villagers and old friends who had loved her, and Peter and answered, still with the air of finding two or three men alone followed her down along the winding road that led band, who still miraculously lingered through hours of pain, but as Peter, responsive to a touch on his arm, crossed the church porch to blindly enter the waiting motor car, he saw, erect and grave, on the front sent, "Did she?" Peter asked, staring at in his decent holiday black, and with the speaker steadily. "That was like his felt hat held in his hands, Kow, claiming his right to stand beside the He went out of the house and got grave of the mistress he had loved and served so faithfully. The sight of down the mountain. Alix had driven him, in his clumsy black, instead of him over this road day before yester- the usual crisp white, and with a sad day-yesterday-no, it was today, he and tear-stained face shook Peter strangely, but he did not show a sign of pain.

The twisted low branches of oak trees threw shadows on the grave when they finally reached it, and sheep were cropping the watered grass of the graveyard. The soft autumn sky, the drift of snowy clouds across the blue, the clear shadows on brown grass under the caks, all these were familiar. But Peter still looked dazedly at his black cuff and at the turned earth next to the doctor's headstone, telling himself again that this was for Alix. How often he had seen her sitting there, with her bright face sobered and sweet, as she talked lovingly, eagerly of her father! They had often come here. Peter the more willingly because she was so sensible and

This Was Alix's Grave, Newly Covered With Flowers.

happy about it; she would pack tunch, button herself into one of the crisp blue ginghams, chatter on the road | half of the condemned men. fired by the sight of the old doctor's Cherry came to the door to say grave became too poignant and tears the "Wagon Scarfaced" died Decemcame, she always scolded berself with physicians departed at once to the that mixture of childish and maternal impatience that was so characteristic of her, and that Peter had seen her

He remembered her, a tall, awkward chalk white. Cherry, agonized, knelt girl, with a volume of Dickens slipping from her lap as she sat on a hassock by the fire, tensing her father, scolding and reproaching him. Blazing red on her high cheekbones, untidy black hair, quick tongue and ready laugh; that was the Allx of the old days, when he had criticized and patronized her, and told her that she should be more like Anne and little Cherry!

He remembered being delegated, one day, to take her into town to the dentist, and that upon discovering that the dentist was not in his office, he had taken her to the circus instead. She had been about thirteen, and had caten too many peanuts, he thought, and had lost a petticoat in full sight of the grandstand. But how grateful and happy she had been!

"Dear little old blue pettleoat!" he said. "Dear little old madcap Alix-!" There was silence, the silence of nanition, about him. He came to himself with a start. He was up on And she whispered, as if to the hills, in the cemetery-this was Alix's grave, newly covered with wilting masses of flowers, and he was keeping everybody waiting. He murmured an apology; the waiting men were all kindness and sympathy. (TO BE CONTINUED.)

Salt and Dampness.

Salt is what is calld "hygrosco pic," that is, it eagerly absorbs moiscontest between them as to which gets it. Results depend on atmospheric conditions. Ordinary atmosphere always contains a proportion of moisture, and warm air is apt to be more humid than cold, as it abreadily than cold air. Salt has such affinity for moisture that under such conditions it draws it from the air. When the air becomes dry, the moismoisture to the air.

Stories of GREAT **INDIANS**

By ELMO SCOTT WATSON

SCAR FACE CHARLEY, LEON. IDAS OF THE MODOCS

ONE April day in 1873 a party of 70 soldiers commanded by Capt. Evan Thomas suddenly found themselves in a death trap in the lava beds of northern California. Within a few minutes the murderous fire from a hidden enemy had disabled more than half of the command.

As suddenly as the Indian fire had begun, it stopped and the survivors heard a voice shouting to them: "You who are not dead had better go home; we don't want to kill you all in one day!" It was the voice of Scar Face Charley, the leader of a Modoc war party. With a force of only 21 warriors he had killed 32 and wounded 18 of the soldiers. Wearled of the slaughter, he allowed the remainder to escape. Afterwards he said: "My heart was sick at seeing so many men killed."

The career of Scar Face Charley (Chikchikam Lupalkuelatko-"Wagon Scar Faced"), called the "Leonidas of the Lava Beds," in the Modoc war, was one of strange contrasts. At the opening of the conflict he had visited the homes of many settlers and, warning them that war was coming, told them to stay quietly in their homes and the Modocs would not molest them. He had fired the opening gun of the war when soldiers "jumped" the Modoc camp in November, 1872.

When Captain Jack, the chief, wanted to make peace Charley was one of the warriors who taunted him and forced him to continue fighting. Then he protested against the murder of General Canby and Doctor Thomas calling it "unworthy of the heart of a Modoc." When he saw that the Modoc cause was hopeless he surrendered to the military and enlisted as a scout

One night Black Jim and Curly-Headed Doctor, two of the most warlike Modocs, denounced him as a traitor and threatened to kill him. Walking over to the fire and standing there in the full blaze of the burning logs, he said: "Mea, put on some more wood for I want Black Jim and the Doctor to have a good light to shoot me by." His bluff was not called.

Charley continued in the service of the soldiers until they had run Captain Jack to earth. When the chief and five others were tried before a military court for murdering the peace commissioners, he was one of the witnesses who spoke most earnestly in be-

CHIEF QUANAH PARKER, "THE WHITE COMANCHE

FEBRUARY 23, 1911, Chief O' Quanah Parker lay dying in his home, the "White House of the Comanches" near Cache, Okla. When a white doctor had falled to save his life, Quasei, the medicine man, en-Placing his arm about the dying chief, Quasei flapped his hands and imitated the call of the Great Eagle, the messenger of the Great Spirit. "Father in Heaven, this our brother is coming," he prayed. A moment later, Quanah, the son of a white mother, a chief who had lived the white man's way for 35 years, died an Indian. Quanah's mother was Cynthia Ann Judge.

Parker, a white woman who had been captured by his father Nokoni, "The Wanderer," in 1835, when she was only twelve years old. She bore him three children, two sons and a daughter. A son born in 1845 was given the name Kwaini, "fragrant." When friends of the Parker family visited the Comanche camp to persuade her to return to civilization she said, "I am happy with my husband and children. I have no desire to be anything but an Indian." In 1860 Texas Rangers under Gov. L. S. Ross attacked the Comanche camp, killed Nokoni and captured Cynthia Ann Parker and her twoyear-old daughter. The sons escaped

When the "White Indian" was restored to her people, it brought her no joy for she mourned incessantly for the Indian camp and especially for her sons. Soon afterwards, during a council with the Comanches, yome army officers told young Quanah, or Kwaina, that his mother was still alive and they tried to induce him to make his home with her. It was in vain, The boy had never known anything but Indian life. In 1864 Cynthia Ann Parker died, still mourning for her son, Quanah rose to the position of war

chief of the Comanches and in the war with the Southern Plains tribes in 1874 he was the last to surrender. When he did he encouraged his people in traveling the white man's read.

In his last years Quanah brought his mother's body from Texas and buried it near his home. Then he worked unceasingly to have a suitable memorial erected over the grave. Finally congress appropriated \$1,000 for that purpose and two weeks before Quanah dled the monument was built. The body of Quanah, the chief of the Comanches, was buried nearby, and the white mother and her Indian sop were requited at inst.

THE PRAYER OF A HORSE

By Laurence E. Cash.

O MAN, my Lord and Master, hear

Thou my prayer: Water me, feed me, keep me clean and work me in reason. O Lord, when my day's work be done give me shelter from rain, wind and cold and a cienn, dry bed in a stall wide enough for me to lie down in comfort. Do not tie my head in an unnatural po-sition or cut off my tall, which is my only defense against flies. Do not O Man, drive me rapidly down hill. O Lord, do be merciful and considerkick, strike or otherwise abuse me when I do not understand your de-sires. Prod me not with merciless spurs. Teach Thou me to understand Thy desires. Speak gently unto me, O Lord, Thy voice means more to me than whip and reins. I have a Play with me, and pet me, O Man, and I will gladly lend myself to Thee in willing service.

Have mercy on me, O Master, when I have colic, and do give me one spoonful of Di-Col-Q. It will relieve me quickly. When I have scours drench me with Di-Col-Q. And, O Master, when I be galled, have sores on shoulders or back, wire cuts, scratches, mange or swellings, apply Thou Di-Col-Q to mine affected parts and I will praise Thee for relief from mine afflictions. Di-Col-Q will enable me to bldding with delight. O Man. Di-Col-Q is just as good for

similar human ills. Remember, O Lord, Di-Col-Q is made in mercy by New York Drug Concern. 401 Lafayette Street, New York City. Praise Thou this firm for their allevi-

of beastly ills. O Master, when I fall to eat examine my mouth for the cause. Do not work me when I can not eat. Be merciful unto me, O Man, and I will serve Thee and Thy family many years

with a glad heart.
Finally, O Lord, when my youthful beauty and strength be gone, and my days of service ended, neither turn me out to starve and freeze, nor sell me to some cruel man to be tortured O Man, if Thou be financially unable to care for me in my old days, take Thou my life in the kindest way.

Hear and greeter my prayer, O my Lord, and YOUR God will reward you

With all reverence I so pray unto Thee in the name of Him, who was born in a manger.-AMEN.

FATTENING MARKET POULTRY

Great Variety of Feeds Can Be Used in Preparing Fowls-Broilers Grow Rapidly.

(Prepared by the United States Department of Agriculture.) The most desirable types of rations and the most profitable feeding periods for the different classes of poultry fattened in packing plants are discussed in Department Bulletin 1052, Rations for Feeding Poultry in the Packing House, just issued by the bureau of chemistry of the United States Department of Agriculture. Since the fleshing of poultry has become a large industry in the United States, information of the kind contained in this bulletin should be of a great deal of

The results obtained in the experiments reported in this bulletin show that a great variety of feeds can be used in fattening brollers, springs, roasters and hens, a fortunate situation since it permits the feeder to adapt his ration to market conditions by taking advantage of special prices of certain feeds and also to use feeds available locally. A growing bird, such as a brotler or spring, requires a different ration than a mature hen, which changes most of her feed into fat. A simple ration of corn meal and buttermilk is about as good as any for hens. Broilers fed rations containing protein concentrates, such as peanut meal, coconut oil, soy-bean meal, or ment scrap made appreciably better gains than those fed on corn meal and buttermilk. They grow rapidly and need tissue-forming feeds. Springs also respond readily to rations containing protein concentrates.

Throughout the 14-day feeding period broilers continued to gain well. which shows that this is not too long a feeding period. Springs grew very rapidly during the first 11 days, but not so rapidly, though profitably, during the remaining three days. Roasters gained well during the first two four-day periods, but not so well the last six days. It was found that the practice of feeding hens only six to eight days is well founded. The dressing and chilling shrinkage of bens. however, was much less than in the ase of brollers, springs and roasters. Any of the ordinary cereal grains

Young Plymouth Rock Broiler,

supply the necessary carbohydrates and fats. More care is needed in selecting feeds for protein, saits and vitamines. The proteins of the cereal grains are present in too small amounts and are of too poor quality to produce the best results in broilers and springs unless other protein con centrates are added. Mlik and cereals make one of the most profitable rations, as milk supplies mineral substances, vitamines and very valuable proteins. The results given in the bulletin show that peanut meal protein, as well as soy-bean meal protein, is especially valuable. The proteins of buttermilk are especially valuable, and if used in sufficiently large amounts produce very desirable results. Other protein concentrates are meat and fish scraps, cettonseed meal, conut meal and sesame-seed meal.

Corn, wheat, oats and other grains tack such mineral substances as calclum, sodium and chlorine which growing animals require. In the rations where buttermilk or skim milk is used, these ingredients are fairly well supplied. Milk also supplies vitamines. At present the milk available for poultry-fleshing purposes is largely buttermilk, fresh, condensed or pow-

Those interested in the fleshing of poultry may get this bulletin by addressing the Department of Agriculture at Washington, D. C.

Hail Insurance Rates Reduced

With the recent reductions of on Tobacco surance rates on

growing tobacco, in the face of the enormous losses to growers within the last four or five years, every grower can afford to protect himself to the limit and, with safety, go into the business of producing a crop that requires so much money, time and labor, as does tobacco, that should be insured against loss by hail storms.

Now that so many growers have gone into an organization for a more economical, business-like way of handling their crops, and the insurance companies have so lowered rates on hail insurance, there is no reason in the world for any grower to neglect the protection of his crop by ample insurance.

Better see your insurance agent right away and have him pro-tect your crop, which is likely to be destroyed any day by a hail storm. Policies become effective noon, July 10th.

What Squire Jim Wanted

By MARTHA M. WILLIAMS

. 1922, by McClure Newspaper Syndicate.

If you know the thing you want, there's always the chance of getting It by hook or crook or odd chance. But if you don't know-well, there is quite another story, as Squire Jim Lewis, poor gentleman, was to prove. He did not lack either possession or occupation. Contrariwise, he suffered an embarrassment of riches-a big farm, full-stocked with the best of everything that walked, wallowed. flew and ate, a fine substantial house, cram-full of plenishings as fine, a good name, money in bank and expectations. There did seem nothing left a reasonable man to sigh for.

Yet-there was. Just what, he did not know, acutely as he was conscious of a dully aching void. Aunt Kezlah, who kept house for him, said shrewdly she didn't know what Jimmy needed wust-to get a wife or religion. Religion would be safest-you could always backslide if the collar galledand there you were. Divorces cost money-besides, folks remembered them so long. Worst risk, though, was of things not going that far. S'pose Jimmy tied up with a woman who tried to make him eat by the books-cold bread and health-truck for breakfast-and no ple whatever, no time at all?

It galled Jimmy, even grouched him. this puzzle with no answer. The answer was not a woman-that was the surest thing he knew. Notwithstanding, he was no woman-hater, ratherone who cherished a vast, vague respect for the whole sex-so vast and vague it chilled warmer feelings.

Athwart this bewilderment flashed, rainbow wise, a human rainbow, by name Lyle Grayson. Not in any safe, conventional way, either, but by the communction of deep mud, a stalled car and a perfectly beautiful young manso beautifully spotless he seemed out of place, packing a glass shade for protection. Titularly he was driving. but the girl beside him had evidently been doing the real work. Her nose was smudged, one bare wrist deeply scratched, her eyes pools of adoration mixed with concern. She hailed Squire Jim alertly at sight, asking help in the first words. Need of it was too clear to require explanation. "Come here and make this car go through your red mud," she all but demanded. "It's -it's new to us; we're strangers, you

"Honeymooners," the squire was somehow bold enough to answer. The girl smiled deliciously, saying with frank pleasure: "Not yet, but soonprovided you get us out."

"Pretty deep," the rescuer commented, dismounting at the edge of the "If you had drove spang through the middle you might a-made it safe-it's deepest and stickiest by that far bank."

"Never mind about that-the thing is to get through it—somehow," the girl said, impatiently. "We are quite helpless. Arthur—my fiance—never pher" was a name given to the Greek tried to elope nor run a car until this morning."

"He ought to be game for wadin' in red mud," Squire Jim commented. "I won't let him," Lyle said sweetly. "He hasn't any other clothes along-you don't think he wants to be married looking like a hod-carrier?"

"Wouldn't care how I looked-if I got my girl," Squire Jim countered, thereby amazing himself. Somehow this girl had melted things inside-he had lost his sense of futility-life was no longer sapless, but teeming with high adventure. He was in mud halfthigh deep, in spite of wearing his second best suit. But that didn't matter-nothing mattered except to hear further that bewitching voice. It said: "Oh, thank you so much!" as he stopped to test the full depth and stiffness of the mud. "Lightening load's the only chance," he said, looking up. "Hand out your traps-I'll take 'em to dry land-then come back for you."

"Oh, we can never get out of the car," Lyle exclaimed in dismay. "At least I can't-have to drive, you know. But if you think you can manage with Arthur-not let him fail-" there she stopped perforce—the squire had somehow yanked her from her seat, and was carrying her over to the firm roadside. As he sat her down he said, masterfully over his shoulder: "Arthur, be | come a little bit complicated. ready-long time I reckon since you rode pick-a-back." Arthur rose up. outblushing the reddest rose, made as though to plunge in the mud, but stopped short at his sweetheart's cry: "If you do that all is off netween us."

So there was excuse for the ride he took, wishing the while he might strangle his steed. But as his feet touched earth a new terror beset him -over the hedge, half flying, hat awry, burst a tall, muscular woman, her eyes stormy, but her cheeks stained with tears. She had seen the transfer of Arthur. Instantly she clutched him, crying loudly. "I am in time, thank Ged. I turned back, finding you had not reached the minister. Heaven gulded me across fields to find and

"Here, I want the straight of this!" Squire Jim demanded. Holding Arthur tight, the newcomer answered: "The straight is-merely that I am saving my son from an adventuress, She ran off with him in her car this morning. By help of providence I have folled her. My boy is under age. She shall not ruin his life. I had rather are, I suppose, her toot,"

"Not so you'd notice it," was the retort. "Never saw either of the two till half an hour back. But if I'm a judge of small matters, she," nodding at Lyle, "is the luckiest one. Can't think how she ever took a shine to Arthur—unless she's so young she still hankers after toys." Arthur tried to spring at the squire's throat-majestic mamma restrained him, saying: "We will not stay here to bandy words with a rufflan. Come, my son -I left the car a little way back on the main road. I do hope you left nothing of value in that car," glancing scornfully at the stalled roadster.

"We will not, however, stop to inves-

tigate-even though you should have

lost your purse." "I have the license-if that's what you're concerned about," Lyle cried, springing to her feet. She had crouched, cowering upon the grassbank-now she faced Arthur, mute but with entreating eyes. He could not meet their gaze-turning, he muttered something that sounded like: "We must waft;" then went dutifully along with his natural protector. Lyle watched them disappear, the entreaty dying slowly from her glance. When they had vanished she turned to Squire Jim, trying to laugh and speak saucily-but broke down utterly and flung herself prone upon the grass, her body shaken pitifully with hard, dry sobs. He let her be for five minutes, busying himself the white with the car. Empty, he managed to drive it clear and halt it some little distance beyond its owner.

She sat up at the sound of it, her face burning, and said breathlessly: "I want to get away-to hide from all the world. Tell me where to go."

"Instead, I'll show you," said Squire Jim, handing her into the car. It took them miles on miles till in early afternoon it halted in front of a peaceful gray house, neither big nor little, try, fairs, and sales. with flowers in the yard, a gray cat on the steps, and a pretty faded woman rocking on the porch. To her Squire Jim said unsteadily: "Mary-I know what I want-you. This child has shown me a woman's worth. She is hurt-I've brought her to you for shelter and healing. Will you help to pay what we owe her?"

Very tenderly Mary Elliott murmured: "Yes."

TO EXTREMES IN PHILOSOPHY

Greek Sages Held Widely Different Views Concerning Life and All Connected Therewith.

Heraclitus, "the naturalist," a Greek sage of Ephesus, who lived about 500, B. C., was called the "weeping philosopher" because of the grim solemnity of his bearing and the utter hopelessness of his views of human life. He was, in fact, a champion pessimist. "He was the first to note," says James Wood, "how everything throughout the universe is in constant flux, and nothing permanent but in transition, from being to nothing and from nothing to being: from life to death and from death to life; that nothing is; that everything becomes; that the truth of being is becoming, that no one, nothing, is exempt from this law, the law sage, Democritus of Abdera, Thrace, who lived between 400 and 357, B. C., because of his satire at the expense of the human race. He showed much flippancy in discussing human life and viewed with supreme contempt the aspirations of man. "He laughed or jeered at the feeble powers of man," says Dr. Brewer, "so wholly in the powers of fate that nothing he did or said was uncontrolled." This ancient philosopher advanced a theory of the formation of the universe by atoms in motion, which was later developed by Epicurus and Lu-

Portia's Grab Settled.

learned judges have been puzzling over the question and have decided that she shall wear just what her brother barristers in England do. There is a safety clause in the decision, however, for it has been decreed that their gowns shall be plain black or very dark, to prevent the appearance of a woman barrister in mauve fairs and expositions received a good or pink, and also that skirts are to be "not shorter than the gown." The It was decided to recommend to the ordinary wig, which completely concenis the hair, is to be worn so that the task of ascertaining whether counsel is he or she may at times be-

Old-Time Buildings.

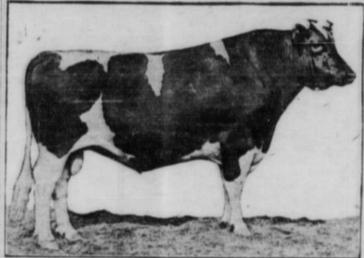

Lanciani, the archeologist, has shown that in the Rome of the Censurs trouble was experienced with high buildings. A law was passed restricting the height of fronts to 60 feet. In order to evade it, builders adopted the practice of carrying up the rear portions several stories Other laws bearing on the heights of buildings were passed in old times. There was a tendency to diminish the height of stories as the buildings increased in size, and a beight of 130 feet was probably attained. It is believed that the cellings were so low that a man could not stand upright in the rooms.

Utilitarian.

"There appears to be no longer a place in politics for the silver-tongued

"No," replied Senator Sorghum; "people have developed great commercial discernment these days. They see no reason why a man should waste see him dead than her husband. You impassioned eloquence when he isn't trying to sell something."

IMPROVEMENT OF DAIRY INDUSTRY AIMED AT BY RECENT CONFERENCE

There is a Decided Need for Improvement in Dairy Animals and in Making the Best Use of Those Now Available.

As a result of the conference of cattle. representatives of the purebred dairy cattle associations held in Washington, May 5, at the call of Dr. C. W. Larson, chief of the dairy division of the United States Department of Agriculture, a number of important recommendations were made for the improvement of the dairy industry, especially the purebred dairy cattle business. Each of the breed associations, including the Ayrshire, Brown Swiss, Guernsey, Holstein-Frieslan, and Jersey, was represented by two or more delegates. The subjects of discussion had to-do with the improvement of dairy cattle, advanced regis-

No conferences of this kind had been held for several years, and the representatives expressed the desire that this one might result in the for mation of a permanent organization to thresh out problems of mutual interest and to work for the general betterment of the industry. Figures prepared by the department showed a decided need for improvement in dairy animals and in making the best use of the improved animals that are now available. The average production of the cows of the United States is about 4,000 pounds of milk and 160 pounds of butterfat a year, while the average cow in some other countries produces almost twice as much. There are 30 million grade and scrub dairy animals in the country and less than a million purebreds. There are 4,566,664 Amer ican farms having dairy cattle, and only 208,251 of these farms have pure bred dairy cattle. It is estimated that approximately 250,000 purebred dairy bull calves born each year are not needed on the farms where purebreds are kept. Of the purebred animals that were registered last year, about 150,000 were females and less than 75,000 males, which indicates that not half of the purebred dairy bulls are

Recommend Better Sires. Among the recommendations made by the conference were those expressing approval of plans for increasing the use of purebred bulls in scrub and grade herds, and of the plans for co- feed sacks stamped or printed with operative bull associations as being the name of the manufacturer and argue with R. the best known means for distributing the brand name of the feed that was surplus buils and introducing them into new territory. Although there is a place in this country for all the purebred dairy cattle that may be produced for some time, it was the con sensus of opinion that an expert business in purebreds would help to stimu-

late interest among farmers at home. A number of questions related to advanced registry were brought up. Co-ordination of effort by and between the agricultural colleges and the breed associations was suggested, and it was ommended that these organization and institutions make special efforts to co-operate. In this connection it was suggested that the various represents What shall Portia wear when she is tives ask their associations at their called to the English bar? Five earliest meetings to appoint commit tees to meet with the Dairy Science association to see if an improved plan for making official tests of cows can be worked out, which will be agreeable to the breeders, the associations, and the colleges that send out the official

Live Stock Sales Discussed. Questions relating to private and public sales were discussed, and it was decided to suggest a meeting at an early date of all the dairy cattle assoof ethics for sales that would eliminste some of the undesirable condiattention is given to a few high prices to the neglect of average conditions,

(Prepared by the United States Department | ports of prices paid for purebred dairy of Agriculture.)

The representatives were well pleased with the accomplishments of the conference and were in favor of holding similar ones at frequent intervals. During their stay in Washington they were received by President Harding and were addressed by Secretary of Agriculture Wallace. Dr. John R. Mohler, chief of the bureau of animal industry, attended the meetings and addressed the conference. A part of the second day was spent in a visit to the department's farm at Beltsville, Maryland.

The list of associations and their representatives taking part in the conference is as follows:

Ayrshire Breeders' association: Paul O. Reymann, president, West Virginia; C. L. Burlingham, secretary, Vermont. Brown Swiss Cattle Breeders' asso-A. E. Bower, president, Ohio;

L. E. Hull, Ohio. American Guernsey Cattle club: Robert Scoville, president, New York; S. M. Shoemaker, Maryland; Karl B. Musser, New Hampshire.

Holstein - Friesian Association of America; Fred Pabst, Wisconsin; H. W. Norton, Jr., Michigan; D. D. Altken, Michigan.

REFILLING SACKS IS

Food and Drugs Act Is Violated by Some Feed Dealers.

Federal Officers Have Been Instructed to Watch for Interstate Shipments of Feeds Adulterated

or Misbranded.

Some feed dealers are refilling used -- Advertisement. originally in the sack, so that the names and brands are not true in reference to the feed in the sack after refilling, according to officials of the bureau of chemistry, United States Department of Agriculture, who are charged with the enforcement of the Food and Drugs act.

A feed dealer of lows was recently cited to a hearing under the Federal Food and Drugs act for shipping into interstate commerce a molasses feed in bags which he had refilled but which bore the name of another feed manufacturer. The sucks also bore a brand name under which the original owner of the sacks sold a stock feed of much higher grade than the feed with which the sacks were refilled.

The Federal Food and Drugs act does not require the name of the manufacturer or the brand name to appear on sacks of feed coming within its jurisdiction, according to officials of the bureau, but if the name of the manufacturer and brand are given on the sack they must be true. The Food and Drugs act prohibits the use of any statements on foods or feeds that are false or mislead-

A dealer who contemplates refilling used feed sacks on which is printed the name of another manufacturer or any statements that are not correct when applied to the product he uses in refilling the sacks should be very careful to see that all such statements are obliterated.

Inspectors have been instructed to look out for interstate shipments of stock feeds which are adulterated or misbranded in this or any other partieular. Appropriate action will be takcattle at fairs and shows; that no ani- en in all cases found to be in violation

BEES PLAY IMPORTANT PART

During Rainy Season in the Blooming Period.

Bees play an important part in the production of fruit in cross pollinating and fertilizing the flowers. They carry clations with a view to drafting a code and distribute police. Prof. W. A Price, entomologist at Purdue, says bees are especially important to the tions. Since an excessive amount of orchard owner in rainy, backward seasons, during the blooming period. When it is rainy the flies, butterflies, it was also agreed to recommend to and the wind, pollinating agents, may the associations that they send in to not function, but the bees work bethe bureau of markets and crop esti- tween showers and are often responsimates of the department regular re- ble for the success of the fruit crop.

Never Mind-Re-vitalize

YOU BET it's warm—the more need then for keeping the vitality up to par.

Vital men resist heat easily. Languid ones are floored. Re-vitalize yourself and you won't mind the weather.

Get new energy in little raisins. 1560 calories of energizing nutriment per pound in Little Sun-Maids. 75 per cent pure fruit sugar.

Wonderful because this sugar doesn't need, and, therefore, doesn't tax digestion and thus heat the blood. Yet energizes almost immediately.

Contain fatigue-resisting food-iron also. Try a box today.

Why did you brag so on Fred's rot. It is easier to join the mob than to ten home-brew?" "I had to; I gave him the recipe!"-Judge.

Each of the two tires illustrated above is a genuine Goodyear through and through.

One is the famous reliable 30 x 31/2 inch Goodyear All-Weather Tread Clincher.

Its companion is the popular 30,x 31/2 inch Goodyear Cross Rib. The Goodyear Cross Rib is built of the same high

grade Egyptian cotton fabric that goes into the All-Weather Tread Goodyear. It has a long-wearing but differently designed

tread, and sells for less money. More than 5,000,000 of these tires have been sold in the last five years.

Their fine performance has demonstrated the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer about their advantages.

VACUUM TUBE USED AS RADIO DETECTOR

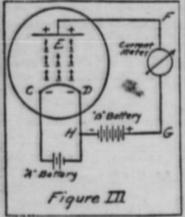

How This Device Depends on Emission and Control of Electrons for Its Operation.

Readers of the radio column are series will be valuable for reference.

past few years in the radio art have of them will be of interest.

All of these tubes, known by a vamanufacturer) depend upon the same plate circuit, until the positive charge fundamental principles for their opof brevity these will be referred to in es an oscillator.

mankind recognizes and it carries the | cuit. smallest known charge of negative electron research it had been held by ber of the electrons emitted. scientists that matter was built up of distinct particles or units which they called atoms and molecules. At first the molecule was assumed to be the smallest quantity of matter that could have a separate existence or take part in chemical action, but more vigerous research pointed to the fact that the molecule is made up of still smalfer elements which are termed atoms; that is, a molecule may be composed of several atoms. Then for a time it very smallest quantity of an element have revealed that atoms may be

called electrons. The apparent mass the observation of engineers, military of an electron is about one-eighteenhundreth part of that of an atom of hydrogen which is the smallest of the | Sweden. chemical atoms.

According to the electron theory an atom consists of a definite number of electrons grouped around a nucleus having a positive charge and so long as none of the component electrons are driven from the atom, the latter possess no detectable charge. The positive charge on the nucleus is said to be exactly neutralized by the negative charges on the electrons grouped about it.

Suppose now that by some means an electron can be detached from the atom. Then the atom becomes what is known as a positive ion and it exhibits the properties of a positively charged body, or in other words since an electron which carries a negative charge has been removed from the atom which has equal positive and negative charges, the portion of the atom now remaining has a deficiency of negative charge and acts like any positively charged body.

On the other hand if some force can be brought to bear that will add an electron to a normal atom which is neutral as far as electrical charges are measured, the result will be a ne gative ion, which will possess all the properties of a negatively charged body. An atom then which has a deficiency of electrons is called a posftive ton and one having excess of electrons is called a negative ion.

Since each electron carries a negative charge of electricity an electron represents a certain quantity of electricity. Forcing electrons to move from one point to another causes electricity to flow. The ability of any medium to conduct electricity or allow a current to flow through it depends the number of free electrons available as carriers of charges.

It has been known for many years that the space surrounding a piece of heated metal is a · conductor of electricity. It has been demonstrated more recently that this is due to the release of electrons and that if an incandescent metal be placed in a bulb exhausted of all gases, pure electrons will be liberated from the incandescent metal.

In a vacuum tube such as we are using at the present time, the piece of metal used to furnish the electrons Is called the filament and is usually made of tungsten and sometimes is coated with exides to increase the electron emission. For convenience the filament of a vacuum tube is heat-

ed by a battery current and it is this heat furnished by the battery current that constitutes the force that disiberates electrons.

Fig. III is a spherical glass bulb from which all the air and gases have been exhausted and having mounted in it a filament C-D which can be heated to incandescence by the "A" batteryconnected to it, and the metallic plate E. When the filament C-D is heated to incandescence by the "A" battery (Copy for This Department Supplied by connected across its terminals electrons are emitted. Connecting the cold plate E to the incandescent filament C-D by means of the circuit Eand a "B" battery, with its negative side connected to the filament lend urged to clip each article and paste at It and its positive side connected it in a file book. Then he was taken away in an ambuthat could exist, but later researches the globe. Officials in charge of con- lance and his death reported. Eventstruction declare it to be the most further subdivided into particles powerful vacuum tube transmitter on

the Pacific coast. Presidio, overlooking San Francisco ing that the "proof of death" was unbay, two 150-foot aerial towers to augment its efficiency, the new station will command similar stations in Salt Lake City and Chevenne.

Radiophones on German Trains.

Wireless telephone instruments will be installed on a number of important German express trains, and receiving instruments will be placed in hotels and embassies, according to an an-nouncement made recently. Experiest tribunal of England and the "will" ments conducted in a moving freight car have shown that the wireless system works well, the men engaged in the testing of the instruments being able to hold conversations with friends in Berlin. The tests were made under attaches and the diplomatic representatives of the United States and

Handling Vacuum Tubes.

When you handle the vacuum tubes of your receiver great care should be exercised that they are not knocked about or that the elements are broken. These little lamps are the heart and soul of the set. A good way to operate these tubes is to keep the glow just a little below the critical point.

#***************** ADVICE FOR AMATEURS.

The voltages applied to the plate circuits of amplifying tubes are not extremely critical and one voltage control will suffice. The detector tube, however, is often very critical and an efficient potentiometer will work wonders in controlling it.

Apparatus used for the reception of broadcasting is exactly the same as that used for the reception of code signals. The transmitting equipment, however, is different,

The use of a single wire for reception is advantageous because it lessens the amount of objectional interference in the way of static. It is equally as good as a multiple wire system for reception.

Defective "B" batteries will often cause roaring in the telephone receivers.

The electron often talked about is the smallest known quantity of negative electrical energy. In motion it makes up the electric current.

A "soft" vacuum tube is used as a detector tube and a "hard" vacuum tube as an amplifier The terms "hard" and "soft" refer to degree of evacuation.

Radio waves travel at the same speed as light, namely 180,000 miles per second.

A wavemeter is an instrument used for checking up the wave lengths of sending and receiving stations.

Gas pipe or water pipe systems may be used for grounds. the latter being more advisable. Lightning protection secured

by grounding the antenna when not in use is essential and is required by the underwriters.

ERROR IN MODEL'S JUDGMENT WOMAN HAS HISTORIC PEN

Criticism on a Par With Some Others That Have Come Under Observation,

There is an old saying that a beautiful painting judges us, not we the painting. So in most things. Most people think they are passing judgment, when in reality their lack of real knowledge is "showing them up." Wherefore, many people keep their mouths shut most of the time.

A little knowledge may be a dangerous thing, but most to be desired. Recently a man was looking at a beautiful photograph of a modern Greek girl posed in front of the Parthenon. It was a symphony of the old and new, the glory that was Greece, to quote Poe's immortal phrase again, and the home and its name. beauty that always characterizes a lovely woman.

"Isn't that a fine picture?" he asked another. The other surveyed the photograph

critically. "Yes," he said. "She's got awful surroundings, though. What did she go up in the rocks for?"

A word is enough to the wise,
