Marion, Crittenden County, Kentucky, Friday, July 14, 1922

Number 52

GIST OF SOME LAWS GOV- ERNING MOTOR VEHICLES

It is a great wonder to us when we think of how few accidents to individuals have occurred in this county and especially in the town of Marion since the automobile has come into use. Our county courts show very few damage suits while the police courts show not a great many prosecutions for cut-outs, tail lights, speeding, etc.

Since this record is commendable and speaks well as to the law abiding spirit and general goodfellowship that the citizens of Crittenden county bear toward each other and to the rest of the world. Yet, there are some who will grow careless of the other fellows' welfare and drive recklessly around a short turn in the road and dash, without warning upon a team, a horse and buggy or a horseback rider and frighten said horse or team beyond control of its rider or driver. If it does not end in accident or injury it leaves a "bad taste" in the mouth of the rider or driver and maybe a bad feeling that he cannot overcome for an hour or two.

Now, the laws governing the operation of automobiles and other motor vehicles are many and varied, far too much so for this article, but I want to give the gist of the most common passages:

"Thou shalt not run with the cut-out open."

"Thou shalt not run without a tail light and two head lights."

"On coming up behind a pedestrian or horseback rider or occupant of a slower vehicle thou shalt sound the horn or other warning device."

"Thou shalt not drive rapidly around the corners of these Crittenden county crooked roads without sounding your horn and staying close to the right hand side of the road."

"Thou shalt always keep thy brake in good repair."

TO THE DRIVERS OF BUGGIES, WAGONS, ETC.:

"When a faster driven vehicle overtakes you and gives a signal to be allowed to pass thou shalt pull to the right side of the road immediately and permit it to pass. Don't stay in the middle of the road too long."

"Treat your neighbor as you would have him treat you and we will all love another better."

As I see it the County Judge's office is a place where every conceivable complaint may be filed, the laws for correcting same expounded and enforced gratis.

There have been coming to me complaints recently of the automobile drivers having not given fair warning on short turns in the roads or driving up behind a buggy and attempting to pass without giving a warning and being too careless and reckless in passing skittish horses, etc. The foregoing hints are based on real laws, the violation of which may be punished by a fine not exceeding \$100.

Let's do right!
Yours very truly,
E. JEFFREY TRAVIS, Co. Judge.

A FINE POTATO PATCH

Ms. Henry Swansy, who resides in the Pleasant Hill section, has a potato patch that is hard to beat in productivity. She dug from one hill the other day 83 potatoes, some big, others medium sized. Mrs. Swansy might be called a potato grower from potatoes.

A BIG CUCUMBER

Rev. W. B. Yates of this city evidently knows how to raise cucumbers as well as how to sing and to preach the Gospel. The one he brought for exhibition to this office Saturday was a "whopper". It was fourteen and one fourth inches long, seven and seven eighth inches in circumference, two and one half inches in diameter and weighed one and nine sixteenth pounds. Can you beat it?

FRIENDS ENTERTAINED

On Sunday of last week after the services of Hebron church, a number of friends were entertained at the home of Mr. and Mrs. John Vaughn. Courses were laid for fourteen. Those present were: Misses Atriel Vaughn, Harpye Herrin, Lyle Thomas, Ollie Thomas, Mattie and Bertie Lindsey and Dave Hurley. Rev. O. M. Capshaw, Messrs. George Herrin, Walker Cook, Virgil Cook, Gray Hurley, R. Horning, John Thomas and Lacy Cook.

The afternoon was spent in music and in spite of the inclement weather an enjoyable time is reported.

MOVING PICTURE SHOW AT W. O. TUCKER'S GARAGE

A moving picture show which proved to be interesting, instructive and entertaining was given at W. O. Tucker's garage one evening last week. No admission fee was charged and there was a good attendance. The audience was given a moving picture trip through the big Fordson plant at Dearborn, Mich. It also illustrated the advantages of tractors in farming and how to reduce labor costs.

BILLY YATES ON CAMPMEETING TOUR

Song Evangelist W. B. Yates left Tuesday for Blackwell, Okla., to lead the singing at the State Campmeeting. From there he will accompany the same troupe of evangelists to Des Moines, Iowa for a ten days engagement and from that place to Mt. Vernon, Ohio, where the state Campmeeting will be engaged for ten days. He also has other engagements for the summer.

AN OLD PITCHFORK

Mr. Al Dean of the Forest Grove section reports that he has on his farm one of the first steel pitchforks ever introduced in this county. The pitchfork was purchased by his father, Alexander Dean, in 1851 from a flat boat going down the river from Pittsburg, is still in a good state of preservation and has been in use on hay making occasions for 70 years. Prior to that time farmers used only wooden pitchforks, made from dogwood saplings.

Mr. Dean also says that his father was one of the first farmers of this county to thresh wheat with a threshing machine. Before this time the farmers threw their bundles of wheat onto a threshing floor and tramped it out with horses. The machine first used was of the "ground-log" make and did not have any separating attachments but left the grain and straw and chaff all piled up together. At that time it was thought to be a great invention—as much so, perhaps, as the radio-phonograph is thought at this time to be a wonderful invention.

SOME FINE APPLES

Mr. Sine Hunt, residing a few miles east of town, brought to this office a couple of very fine apples as specimens from his orchard. One of the apples measured 13 1-2 inches round one way and 12 1-2 the other way and weighed one pound. The other apple was about the same size.

OLDEST MASON DIES

B. W. Noel, aged 100, the oldest Mason in the state, died at Shelbyville Tuesday. He celebrated his birthday in March. He was twice married and outlived all his immediate relatives.

A GOOD OIL PROSPECT

Mr. E. M. Eaton, in digging a well on his farm near town, discovered what has been pronounced good evidence that oil underlies the earth in that locality. The well is only 12 feet deep and the water and the surface thereabout have a very oily appearance. Mr. Eaton took former Gov. Harding who lectured here at the Chautauqua and who is an oil man, to see his well and Mr. Harding pronounced it a good oil prospect. Who knows but that to go a little ways down a gusher might be struck?

Mr. Eaton has also discovered what he believes to be indications that a bed of ocre lies imbedded in the earth of that same farm. The well referred to above has a spring stream which shoots up from the earth with considerable force and when Mr. Eaton draws a bucket of water from the well and lets it stand for a few minutes a yellow substance settles at the bottom which has been analyzed by the State Geologist and pronounced to be ocre. Mr. Eaton has tested his ocre by mixing it with linseed oil and it proved to be excellent paint.

A CARD OF THANKS

I desire to thank each and every one for their kindness shown me and my loving husband in his last illness and especially for the beautiful floral offering and their kind and consoling words. May God's richest blessings ever rest on them.

MRS. ALA MATLOCK

PRESBYTERIANS TO BEGIN CANVASS SOON

After several weeks of preparation by the Presbyterians of Kentucky the actual canvass among the churches in this section for \$1,000,000 for Christian education will begin. It is planned to visit every church in the state and representatives from headquarters will shortly hold a conference with the Presbyterian pastors and church officers for the appointment of local committees and other detail work. The cause will be presented in the pulpits by the local pastors and by representatives from Louisville.

Locally the people are very much interested in the movement. It is planned to apportion \$300,000 to the Presbyterian seminary, \$300,000 to Center College; \$200,000 to the Kentucky College for Women; the remainder going to Sayre School, Witherspoon College, Pikeville College, Scott Academy and the Presbyterian Orphanage. The work will be finished by the end of the year.

BIG PRESBYTERIAN RALLY

On August 4th there will be held at Chapel Hill a big ALL Presbyterian Rally for all Presbyterians in Crittenden county and their friends. A very special program has been prepared and several prominent speakers have been secured. At the noon hour a basket dinner will be served. This is a preliminary notice, next week will appear the full program. All Presbyterians in Crittenden county are urged to come. Also all the friends of the various churches. Everybody come, bring a basket and enjoy the great day. Remember the date Friday, August 4th and watch for the program.

ANOTHER BIG CABBAGE HEAD

Last week was published a description of a large head of cabbage brought to this office by Mr. E. L. Nunn, of this city, and it was pronounced a "whopper." This head, however, has been excelled in size and weight by one brought in by Mr. Bert B. Stout, who resides a few miles north of town. Mr. Stout's specimen measures thirty-nine inches in circumference, twelve inches in diameter and weighs sixteen and one half pounds. Who comes next with a bigger one?

Mr. Stout also brought in a tomato 13 inches around and weighs one pound.

GRAVEYARD CLEANING

The Kilpatrick graveyard will be cleaned off the first Saturday in August. All persons who are interested will meet there on that day. Bring tools to work with, also a basket well filled. A dinner will be served on the ground. There will probably be preaching during the day.

W. H. REYNOLDS
REV. JAS. F. PRICE, Trustees.

JAMES PERRYMAN DIES

James Perryman, who fell from a cultivator while at work in his field two weeks ago and seriously injured his spinal cord, died Thursday July 6 at his home in the Franklin Mine section aged 62 years.

Funeral services were held at Union church Friday conducted by the pastor, Rev. T. C. Carter, after which the remains were laid to rest in the Union cemetery.

Mr. Perryman is survived by his wife and seven children, Nathan, Jesse, Bunk, Eph and Elbert Perryman; Mrs. Lacy Davidson and Mrs. George Yandell all of this county.

TEACHERS' EXAMINATION

A special teachers' examination will be held on July 28th and 29th for Elementary certificates. One year high school and five weeks normal training will be required to enter this examination. There are still a few vacancies for teachers who obtain certificates. This will be the last examination until September.

J. L. PARIS, Supt.

R. C. TUDOR DIES

R. C. Tudor, better known as "Little Ben" Tudor, died at the home of Charley Dempsey on Wednesday July 5, aged 70.

Funeral services were conducted by Rev. W. T. Oakley in the lawn of Claud Nesbitt's residence in the presence of a number of relatives and friends. The remains were laid to rest in the Cain graveyard.

CONFERENCE FOR SUN- DAY SCHOOL WORKERS

Miss Mary Virginia Howard, of Louisville will conduct a conference for Crittenden county's Sunday School workers Friday July 14 at the Cumberland Presbyterian church. The morning session will be at 9:30 and the afternoon session at 3:00.

Miss Howard represents the Kentucky Sunday School Association and she is particularly interested in work among young people. If you are a Sunday School worker, come; and especially do we urge the presence of all teachers and leaders of and among young people.

UNION SERVICE SUNDAY

There will be a Union service Sunday of the Presbyterian church U. S. and the Presbyterian Church U. S. A. to be held at the Main Street Presbyterian church when Dr. Baird of the Presbyterian Church U. S. will deliver a sermon on Christian education. Dr. Baird represents the joint board of the two churches on education which have recently united. Every member of both the U. S. and the U. S. A. churches are urged to come. Service to be at 7:45. All friends invited to worship with us.

Dr. Baird will also preach at the following places. Francis Saturday night. Crayne Sunday morning, Chapel Hill Sunday afternoon; Marion Sunday night.

LETTER FROM ED COOK

Casad, Ky., July 1, 1922.
Editor Press:

As I have seen printed and heard some talk of a proposition to build a bridge across Tradewater river at the mouth of Cypress creek.

Will say first. It looks like the taxpayers of Crittenden County have more to pay now than they will pay in the next ten years without taking up any new business. Let's finish what we have on hand now and get a little cash in our treasury then we can look after other things.

Second. We are all looking and waiting for the Federal Highway to bridge Tradewater at this same place or at Sullivan and this will give the two counties a good bridge or as they say closer relations and the debt will be on the Federal Government and all counties in the state of which all will be benefitted to some extent.

A bridge at this place will benefit a very few people in Crittenden county only a few people living close to Bell Mines and the Bell Mine Co. and Sturgis.

The writer was talking to a farmer who hauls for the Mine Co., a few days ago and asked him these questions: Are you in favor of a bridge being built at the mouth of Cypress creek? Ans. Yes. Should this bridge be built what good would it be to Marion and Crittenden county? Ans. To be plain in dollars and cents it would do Crittenden and Marion no good. For now Marion gets one dollar out of every one hundred paid for improvements at the mines and should this bridge be built Marion and Crittenden county would get one dollar out of every thousand spent for improvements for every dollar would go to Sturgis of course when the Federal Highway is completed and the bridge built it would benefit the traveling public for people going on long trips in autos and truck hauling like all rock roads are used but with our bad dirt roads to this place there would be little doing except by and for the Bell Mine Coal Co. The writer has lived within 15 miles of the Bell Mines for 60 years and has tried to farm and is above the average taxpayer and has never seen Bells Mines yet so what good would a bridge be to me?

For comparison what good would a bridge across the Ohio river at Fords Ferry do my friend Harry Culley?

Hoping to hear from other taxpayers for or against the proposition, I am respectfully yours,
ED COOK

SUMMER SCHOOL CLOSES

The six-weeks term of the Summer School for Teachers held at the Marion High School building, closes this week. A very successful and profitable term is reported. This is the first school of the kind held here, made necessary by the enactment of the new state law abolishing the Teachers Institute. Supt. R. E. Jagers and Prof's. Hays and Lowery are the instructors.

CHILDREN'S DAY AT MT. ZION

Last Sunday was Children's Day at Mt. Zion church. An appropriate program was carried out in the forenoon, consisting of songs, recitations, addresses, etc. An interesting talk was given by the pastor, Rev. Richardson.

At the noon hour an abundant dinner of everything good to eat was spread on the ground and everyone was invited to partake.

In the afternoon Rev. G. P. Dillon, pastor of the Marion Methodist church, preached an interesting sermon.

STATE TROOPS ORDERED TO HOPKINS COUNTY

Gov. Morrow recently ordered troops to move from Hopkinsville and Livermore to Madisonville when county authorities at that place advised him of the situation at a strip mine there proved threatening and that local authorities would be unable to handle the situation, if trouble developed as they anticipated.

JUNIOR WEEK AT LEXINGTON

After an interesting all-day ride on the train our party arrived at Lexington Sunday evening at 8:45. Sunday night Miss Morgan and Mr. Gar-site met us at the station. Mr. Gar-site took the boys to their dormitory and Miss Morgan took the girls to Patterson Hall.

After breakfast Monday morning we registered and rested a while. Many more boys and girls came Monday. Tuesday our regular camp program began. We met in the Y. M. C. A. Building for chapel exercises each morning while there. Miss Miller gave us a talk at first class period on Home Improvement, good taste in selecting rugs, curtains and wall finish and the proper hanging of pictures. After a good health talk Miss Bonner told a story "The Three Weavers" by Annie Fellows Johnson.

We lunched at twelve o'clock and rested until two o'clock, when we made ready for recreation tour. This was about the most enjoyable time of the day. We were divided into four tribes. In all games each tribe tried to win as many points as possible. After supper, just at sundown we met for Vesper or Sunset service. A minister came out from Lexington each evening and talked to us. Then we sang songs and had prayer. We were then ready for the evening program; first to the moving picture show, then to tribe entertainment. Each tribe furnished entertainment one night.

Wednesday and each day following was very much the same as Tuesday.

At chapel each morning we had demonstration teams from different counties who demonstrated the club work they were doing.

Mr. Spencer got a car and took the Crittenden county bunch around over Lexington and out to the Cemetery where we saw Henry Clay's monument.

Friday morning the winning teams in demonstration work were awarded their prize, a silver loving cup went to Graves county where it will stay until they are beaten by some other county. Why couldn't Crittenden county send a winning team next year?

After a happy week mingling with the boys and girls from other counties we said our good byes and began packing up for our journey home. We grew to love Miss Miller and we will be glad indeed to greet her at our home county camp at Chapel Hill. We are also glad to know that Miss Burnham is coming to our local sewing club at Forest Grove this month.

Our party went on the interurban to Frankfort that we might see the capital city. We passed many beautiful country places.

We arrived in Marion Sunday morning tired but happy.

It was through the generosity of the Crittenden Press and the friends who subscribed for the Press with me that I spent the delightful week in Lexington. I certainly am grateful for the help given me.

I'm hoping to go to Junior Week again some day.

—VIRGINIA TERRY.

BIG BLACKBERRY CROP

The blackberry crop of this county is reported to be unusually large this year and many pickers are in the fields. Many are being picked and canned for future use. That berries are selling on the local market for 20 and 25 cents per gallon.

Farm Bureau Notes

Hornworms Start Annual

Raid on Tobacco Plants

Tobacco growers are facing the annual task of ridding their plants of hornworms, recognized as the worst insect pest of the crop according to H. H. Jewett of the Kentucky Experiment Station. The adults or months appear from the first week in June to about the middle of August while the maximum number of worms are apparent in the field about August 15. The worms are so destructive that tobacco could not be grown successfully without the use of control measures.

Hand worming cannot be relied upon to keep tobacco free from the worms even with the most careful examination of each plant while Paris Green which formerly was used quite extensively to kill the pests is giving way to arsenate of lead. The latter material adheres to the plants longer than does Paris Green and therefore is more effective while it rarely injures the plants even when an excessive amount is used. This material has an added advantage in that it can be used during periods of unsettled or rainy weather.

The arsenate of lead is applied to the tobacco by means of a dust gun or cheese cloth sack. The old style guns are being replaced by those with fans ten inches or more in diameter and having special devices for preventing clogging at the outlet. When it is necessary to use an old style gun the arsenate should be mixed with an equal bulk of sifted wood-ashes. The dusting should be done when there is no breeze either in the morning when the dew is on the plants or in the evening.

Under average conditions from 3 to 5 pounds of the arsenate an acre is sufficient for one dusting. At least two dustings should be made while a third is sometimes necessary. When it is necessary to apply the poison as a spray from three to five pounds of the arsenate should be used to 100 gallons of water.

The Junior Club Camp

Plans are progressing for the Crittenden County Junior Agricultural Club Camp at Chapel Hill. Already a number of the club members have signified their intention of going to the camp and are anticipating a great time at that affair. Crittenden and Union county will combine in this camp and make it one of the greatest affairs of its kind.

DEATH CLAIMS MRS. BIGHAM

Mrs. Della Bigham died at her home near Crayne Monday July 3rd of typhoid fever. The deceased was a daughter of Mr. and Mrs. Willie Jennings.

Funeral services were held at Chapel Hill Tuesday conducted by Rev. H. C. Paris and Rev. E. N. Hart after which the remains were laid to rest in the Chapel Hill cemetery. Mrs. Bigham was a member of the Second Baptist church of this city. She is survived by her husband and a daughter, Ruth Jean, aged four months.

A CARD OF THANKS

We wish through the Press to express our grateful thanks to our many friends and relatives for the many kind words and deeds during the sickness and death of our beloved father, J. Frank Loyd.

May the richest blessing of Heaven rest upon each of you.—His Children.

G. B. JOHNSON INJURED BY AUTO

Mrs. G. B. Johnson was called to Providence Wednesday afternoon by the news that her husband, Green B. Johnson, was overrun by an automobile near that city and seriously injured. Mr. Johnson was taken to the home of his daughter, Mrs. Denny Spence. No further particulars of the occurrence could be had.

NEW RESIDENCE

Mr. J. C. Elder is building a handsome seven-room residence for Mrs. G. W. Perry on South Walker street. The house will be a one-story building with a veranda in front and a porch at the back. The house will be ready for occupancy about the first of August.

of Congress of March 3rd, 1877.

SUBSCRIPTION RATES
In County and Zone One\$1.50
Zone Two and Beyond\$2.00

OUR ANNIVERSARY

The Press "points with pride" to the fact that with this issue the paper starts out on the forty-fifth year of its existence. Indeed, it is some thing to be proud of. Other papers, five in number—Reporter, Monitor, Advocate, Record, News—have sprung up from time to time and after a more or less turbulent existence have disappeared. But the Press goes on, very much alive, and its subscription list is today as large as in any year past.

On July 14, 1876, the first issue of The Crittenden Press made its appearance. It was a four-page, six-column paper with the names of R. C. Walker and C. F. Champion as editors and publishers. Though very greatly admired from the first issue, yet, owing to the failure of its predecessor, The Marion Reporter, many of its friends doubted the paper's longevity. After a few issues Mr. Champion withdrew from the business, selling his interest in the paper to his partner. Newspaper men, like poets, are born, not made. As our older readers know, Mr. Walker was a splendid newspaper man, and one who had the best interest of Marion and Crittenden county at heart; and it was to him as editorial writer and newsgatherer that the Press owes its success during the twenty-seven years of his proprietorship. He built the subscription from nothing to a substantial list. Many of our present subscribers tell us with much pride that they "took the paper while Bob Walker ran it."

In 1903, owing to ill health, and wishing to retire from newspaper work and go west, Mr. Walker sold his plant to Mr. S. M. Jenkins. Though up to this time Mr. Jenkins was not versed in newspaper work, he was a splendid business manager and knew what it took to make a good newspaper. What he lacked in newspaper experience he made up in tact and as Marion grew in population, the subscription list to the Press likewise grew. By using a good deal of tact, Mr. Jenkins rarely lost a subscriber. Like all newspaper men, Mr. Jenkins sometimes sent out statements to his subscribers telling them to "come in and pay up". In a few days a disgruntled subscriber would come in and exclaim "Stop my paper." "All right Mr. Blank" the editor would reply "I've got plenty of others, but your wife wants the Press. No, she don't want it either." "Well" returned Mr. Jenkins, "I'd like to make an agreement with you. Leave it to yourself, your wife and to me. The majority wins." In a few days he would receive a check, telling him to keep his name on the list.

In 1919, after 16 years of ownership, Mr. Jenkins sold out to W. F. and W. P. Hogard. Soon after the purchase, the entire plant with all its equipment was destroyed by fire. Despite this discouragement and loss not an issue of the paper failed to appear on time. The printing outfit of J. C. Bourland was purchased and to this was added a new Linotype, and other machinery, making it one of the best printing establishments in this part of the state. During the second year as editor of the paper, Mr. W. P. Hogard retired, selling his interest to W. F. Hogard and Sons, with Mr. R. E. Wilborn manager of the Job Department.

So now in starting our forty-fifth year we promise our readers to endeavor to make the Crittenden Press compare favorably with the issues of other days.

It is reported that all crops over the country are better at this time than for the last five years. The crop in the county are looking well except in lowlands that are too wet to cultivate. Our fruit crop is ample for home consumption. The hay crop is good—one farmer, Mr. M. Nunn, has harvested forty acres of timothy and clover averaging over three tons to the acre.

The grading on the Princeton-Marion road has been completed as far as Crayne except the culverts and bridges and they are being built.

The State Commissioners in a meeting held Monday, promise to soon let the contract on the Ohio River road from here to Smithland. So things are looking more hopeful to us.

All together, let's go forward.

They are
GOOD!

GONE FROM US

Once again the grim reaper has entered our little town and demanded his toll from the walks of life here when on the morning of May 10th he called Dr. F. V. Matlock, M. D., one of our beloved citizens and Doctor of Salem. Dr. Matlock was born Feb. 18, 1867; he was converted at the age of sixteen years at the Union church of Salem and lived a faithful Christian life until his Master said come thou good and faithful one thou hast been faithful over a few things, I will make thee ruler over many things; enter thou into the joy of thy Lord.

On January 8 1894 he was united in marriage to Miss Alma LaRue, daughter of Dr. LaRue. To this union was born one daughter who lived only a short time.

Few unions have been ever more truly a sacrament than this one. Admirably suited to each other, loving each other deeply their home was indeed a happy one. Dr. Matlock was a graduate of the Jacksonian Optical College and also of the Louisville City Hospital.

Dr. Matlock was a great lover of men he was ardent in his friendship, never forgot a friend; kind and gentle in his disposition; was careful not to give offense. He said to the writer once that he considered his friends his greatest asset in life and I am sure this being true he was rich in this life as there was no man in the county who had more friends than he as he was loved by both rich and poor; white and black and it is no wonder as he was a friend to the poor and never turned down a call from the poor because they had no money to pay him. The writer was in his office one cold rainy evening when a call came for him seven miles away and after he had answered the phone he turned and said "Preacher it is a long cold trip for nothing" but he said the poor when sick need a doctor as much as the rich and I thought of what the Master said "He that giveth a cup of water in His name shall not lose his reward."

He was taken sick on Thursday March 30 and after several days of suffering at the advice of the attending physicians, Dr. Hayden of Salem Dr. Lowery of Tins and Dr. LaRue of Lexington; he was sent to the Riverside Hospital at Paducah where every thing was done for him that could be done but his illness grew worse until Wednesday May 10, 1922 when his happy spirit was released from its house of clay into the house not made with hands.

His body was sent back to his home at Salem for interment. Funeral services were conducted in the Union church at Salem where a host of those who loved him, to whom he had ministered and who had ministered to him so tenderly through his declining days had gathered in sorrow. The services were in charge of Rev. Shelby Rowe of LaCenter, Ky., assisted by the writer; the pall-bearers were composed of members of Salem Lodge 81 F. & A. M., of which he was a member. Burial services were conducted by the members of the Lodge at the grave.

The floral offerings were beautiful and the funeral service was attended by friends from near and far.

His is a peaceful rest; his noblest eulogy he made himself. Farewell Dr. Matlock we shall see you no more here but up yonder. A FRIEND

BAPTIST CHURCH TO BE DEDICATED

The Missionary Baptist church at Emmaus, this county, will be dedicated on the fifth Sunday in July. Rev. Schultz, of Princeton, will preach the dedicatory sermon. Everybody is invited to be present.

LITTLE SHORT OF MIRACLE

If Story Is True, This Englishman's Middle Name Must Surely Be Good Luck.

Lying on a path 18 months a leather wallet containing over \$140 was found by the loser after being unnoticed by hundreds that passed each day, writes an English correspondent. A dining-car conductor on the Great Western railway, who lives at Southall, left home one morning in June, 1920, and went to Old Oak Common, near Acton, where the dining cars are stored. From Acton station he walked through a private path used by the railway staff and leading to Old Oak carriage sheds. Later he went to Paddington station and worked the dining-car train to Plymouth. When he returned to London he discovered that he had lost his wallet. He had not the faintest idea where or how he had lost it, and although he made inquiries he could find no trace of it. The other morning he walked up the same private path on his way to work, as he has done scores of times since he lost the wallet, when he stopped for a moment, and looking on the bare ground just at the side of the path he was amazed to see his wallet lying there. He picked it up, and was further amazed to find that the contents had not been touched. The wallet was weather-beaten and the notes were soiled as though they had been soaked in rain, but when he found them they were dry. The path is used by hundreds of men every day.

INVALUABLE AID IN COOKING

British Journal Points Out How the Use of Thermometer Will Help the Housewife.

Every housewife is aware that the actual cooking of a dish is a very important factor of success or failure. A "hot oven" and a "moderate oven" are often referred to, and testing by holding the hand inside for a few seconds is a method frequently employed.

But there is no real dependency on such haphazard methods, since one person can bear much more heat than another. Therefore, in an efficient household a kitchen thermometer to register cooking heats should be considered as necessary as a clinical thermometer. There are two varieties of kitchen thermometers to be had. The cheaper kind is of white china, and can only be used for oven cooking. A more durable make, of brass, which costs a little more, can be used for testing frying fats, etc., and will not break so easily. An iron leg supports the thermometer, so that it stands upright and can be read at a glance when in the oven. Every degree of heat from low to high temperature is registered, and at the side the standard temperatures for cooking are printed.—Manchester Guardian Weekly.

Population in A. D. 2000.

According to Dr. Edward A. Ross, by the year A. D. 2000 the population of the United States will number about 223,000,000. Extremists are painting vivid pictures of our country, pointing out that the condition of China, Japan and India will be rivaled here. They predict a starving country with too many inhabitants and too little space in which to house them. In their minds are scenes of war, famine and misery as a result.

On the other hand, John S. Sumner, secretary of the New York Society for the Suppression of Vice, says: "Overpopulation is not a menace to the peace of the world, because there is no overpopulation. It is not the physical fact of population, but the mental and spiritual condition of people which determines the question as a menace to continued peace."

Little-Known Washington Portrait.

Discovery of a long-lost portrait of George Washington by the American artist, Gilbert Stuart, in New York city, directs attention to the Stuart portrait of Washington which hangs in Memorial hall in the State Library building at Hartford, Conn. It was bought direct from the artist by virtue of a resolution of the general assembly in May, 1800. The understanding was that it had been painted by order of a committee from South Carolina, and was then declined on the ground that it was not a portrait of Washington. A committee from Connecticut conferred with Gilbert as to a Washington portrait, and purchased the one he had painted for South Carolina.

New Harbinger of Spring.

There was a drumming roar above the city the other day, rising and waning and passing into distance. "Listen to her," said the man in the street, "that's the first plane I've heard for months. Sounds kind of good." His companion was equally pleased. "You know what that means, don't you?" he rejoined. "Means it's spring, that's what it means. We used to depend on the robins, but now a very different sort of bird flies when the weather gets decent again. Look at her, would you?" The gleam of a far-off wing as the plane banked, the sudden wind-borne stutter of sound, and spring's modern harbinger drifted beyond ken.—Portland Oregonian.

When She Has Gone.

"Woman's place is at home, and she should stay there," was the opinion of the municipal board of Versailles, France, when, some little time back, they considered a proposal to admit women in the higher municipal posts. And the report says that women should not be encouraged to apply for administrative positions, but should remember that they would do better to confine their activities to the home.

POINTED PARAGRAPHS

You can't foot a bill by kicking about it.

The average train of thought carries no freight.

It only takes an ounce of pluck to pound a bully.

Beauty is skin deep, and sometimes it is a skin game, too.

It's the fellow who minds his "p's" and "q's" who sleeps on flowery beds of "e's."

With some Christians the most satisfactory thing about the mansions in the skies is that they are free.

There is no test like time; it shows up the bad in the best of us, and reveals the good in the worst of us.

When a fellow begins to feel that he couldn't live without a certain girl he ought to marry her and see.—Chicago Daily News.

IN OTHER CITIES

A London carriage manufacturer employs more than 300 one-armed men.

Pantomime has held sway at the Drury Lane theater, in London, for the last 40 years.

New York has one telephone to every nine residents; London has one telephone to every 25.

About 60,000 is the estimated population of Venice, which is built on between 70 and 80 islets.

Aurora, Ill., pays its street car fares with little pieces of metal perforated with the letter "A." A number of these can be carried on a safety pin.

Approximately 4,000 Parisian taxicabs are now upholstered in American army olive drab as a result of the proprietor's discovery that the cloth could be purchased more cheaply than French material, says Popular Mechanics Magazine.

SHERIFF'S SALE

Crittenden Circuit Court
T. H. Cochran and Company, Pltff.
Vs. Notice of Sale
P. B. Wright, Defendant

Notice is hereby given that in pursuance to an order of the Crittenden Circuit Court entered in the above cause on the first day of July 1922, I will sell to the highest and best bidder one Chalmers Touring automobile 1920 model. Said sale to be held at Foster and Tucker Garage in the town of Marion, Crittenden county, Kentucky, promptly at 10:00 A. M. on Saturday July 29th, 1922. This property will be sold on a credit of six months and purchaser will be required to execute bond with approved surety for the payment of the purchase price.

JAMES T. WRIGHT

Sheriff Crittenden County.

Does It Pay To Worry About Appendicitis?

Can appendicitis be guarded against? Yes by preventing intestinal infection. The intestinal antiseptic, Adler-ika acts on BOTH upper and lower bowel removing ALL foul decaying matter which might start infection. EXCELLENT for gas on stomach or chronic constipation. It removes matter which you never thought was in your system and which nothing else can dislodge. One man reports it is unbelievable the awful impurities Adler-ika brought out. Haynes & Taylor, Druggists. (Advertisement)

Insects as Human Food.

Several kinds of insects were eaten by the ancient Hebrews, Greeks and Romans. Fabre, the French entomologist, once tried a dish of cooked cicadas, but found them unpalatable.

Vol. 11, No. 11, 1922

in unsafe

hogging

practical

Four demonstrations

ed this week on the farms of Harry Harpending, Sylvan Clark, Chas. LaRue and J. B. Carter. The hogs were weighed before being turned in the fields in order to know how much pork per acre will be produced. This is a splendid way to gather corn and with soy beans added the hog has balanced feed.

The Missouri Experiment Station has carried on extensive experiments with forage crops for hogs and has found that it requires on the average a little more than three pounds of grain to produce one pound of pork, on such crops as alfalfa, clover, rape sorghum and blue grass. But in dry lot feeding a little more than five pounds of grain was required to produce one pound of pork. A saving therefore of slightly less than 4 percent of the grain resulted from the use of pasture crops. The average return per bushel of corn fed to hogs on pasture was \$1.10 as compared with an average return of 66c per bushel of corn fed in dry lots. Then there is the advantage of supplying succulent feed which keeps the hog in best physical condition. The use of pasture crops also aids in controlling diseases by making possible more sanitary conditions which help keep the herd free from lice and worms.

CELEBRATE GOLDEN WEDDING

Mr. and Mrs. Robert Boyd celebrated their golden wedding on Monday August 28 at their home at Salem. A large number of neighbors, relatives and friends gathered in to assist in making joyful the fiftieth anniversary of the beginning of the married life of Mr. and Mrs. Boyd. A sumptuous dinner was served at the noon hour and was greatly enjoyed by the forty or more guests who were present. Their son, B. M. Boyd, Mrs. Boyd and grandson, Billy Boyd, of Chicago, came to enjoy the celebration.

IN MEMORY

The Angel of death visited the Chapel Hill Community and removed a friend, father and son. William Fidelia Bigham was born Sept. 4, 1889. Died August 28, 1922 at the age of 32 years, 11 months and 23 days. On October 29, 1909 he was united in marriage to Melvin Clement and to this union was born five children. She was however not spared to him or the children long for on October 28, 1918, she was called away to her everlasting rest with God. Struggling faithfully along with his children trying to keep them together, he finally married again and on March 19, 1921, was united in marriage to Alma Jennings and to this union was born one child. However a little more than a year later she fell victim to cold and died July 3, 1922 leaving him again in desperate need.

Worn out by faithful attendance upon his sick wife and two children, he himself fell victim to typhoid and in spite of all medical skill and loving ministrations and prayers passed away to rest.

Well, as he was commonly called, was a large hearted boy always ready to lend a helping hand to those in need and distress and was held in high esteem in the community. At the age of 15 he professed faith in Christ and united with the Chapel Hill church. However drawn aside by temptations of the world he wandered away into sin, but just before his death told his father that he had made his peace with God and was not afraid to die and meet his God. This bright last testimony leaves joy in the hearts of his many friends.

The heartfelt sympathy of all is extended to the father and mother, brothers and sisters, but most of all the motherless and fatherless children left alone in the world. May God in his loving kindness watch over them from the richness of his bounty provide for them in the years to come. We bid them look to God who is "The Father of the Fatherless."

your Council

the City At

Cherry street.

It was instructed

to proceed without delay to have a sidewalk built on East Belleville on the Brookshire property.

Council adjourned till Tuesday night to meet with Mr. Jenkins to discuss the electric light situation.

At Tuesday night's meeting Mr. S. M. Jenkins, representing the electric light company was present, also the Mayor and all members of the city council. The street light question was taken up. On the part of the council it was explained that after the expiration of the old franchise last May a new franchise was sold to Dr. L. L. Moore and the Council made arrangements to pay \$200 per month for street lights and until that franchise was adjudged illegal by the court, the council had no right to pay Mr. Jenkins for lighting the streets. But since the new franchise was declared illegal the council was free to make such arrangements. The Council therefore offered Mr. Jenkins \$200 per month for furnishing lights for the streets.

On the part of Mr. Jenkins it was stated that prior to the expiration of his contract he received \$300 per month for the lights and he would continue to furnish the current for the same amount per month.

The Council stated that they were furnished only \$200 per month for street lights and had no way of raising the extra \$100 however, they offered to buy \$200 worth of lights of Mr. Jenkins and let him curtail the number of lights furnished. This proposition Mr. Jenkins refused, stating he would lose money by accepting it.

The Council then adjourned.

CITY COURT NEWS

The following cases have been disposed of in the Police Court during the month of August:

John Eskew, permitting stock to run at large, fined \$5.
Noble Hill, drunkenness, \$5.00.
Willie Mills, disorderly conduct, fined \$5.

CHAPEL HILL MEETING CLOSES

The revival meeting at Chapel Hill closed last Thursday night after a very successful meeting. Rev. R. E. Reeves, of Hopkinsville, won the hearts of the people from the very first, and is a very earnest and powerful preacher. There were seven conversions and several recommitments. The entire community has been blessed and helped.

VALUABLE PLUM TREE

Evangelist Robert Lear knows how to grow plums as well as how to sing and preach. At least he has a plum tree in the back yard. It is an old tree on Elm Street. Bro. Lear with the use of a ladder, picked 45 gallons of plums from this tree.

GRAVEYARD CLEANING

Thursday, September 14 has been set as the time for cleaning off the Love Graveyard. All interested parties are requested to come, bringing tools to work with.

are to have, of Fred

omitted a

and Palestine

Miss Sarah Frances Gayle (1), Falmouth, Ky., who sailed September 1 from Seattle on the Admiral Liner President Jackson (2) for North China, where she will be engaged in evangelistic work under the Foreign Mission Board of the Southern Baptist Convention. Rev. F. B. Pearson (3) of Winchester, Ky., who was married Sept. 8 to Miss Ruth Casey, of Birmingham, Ala., will sail soon for Jerusalem to do missionary work in Palestine. A. J. Logan, of Louisville, and Rev. and Mrs. J. L. Moye, of Corydon, Ky., are also under appointment of the Board for foreign service, but have deferred their sailing in order to take further special training in this country.

WITH the sending out this season of fifty new missionaries by the Foreign Mission Board of the Southern Baptist Convention, 250 new workers have been sent to foreign fields during the 75 Million Campaign, or one-half the goal that was set in the number of workers to be provided during that movement. It is anticipated that the remaining 250 will go out during the remainder of the Campaign period that will expire in December, 1924. The workers going out this season will enter the fields of China, Japan, Africa, Palestine, Brazil, Argentina, Uruguay, Chile and Mexico.

Inasmuch as the largest missionary effort of the denomination is centered in the Orient, the larger portion of the workers sailed from Seattle Saturday, September 2, on the Admiral Liner President Jackson for stations in China and Japan. The missionaries for fields on other continents sail from New York on various lines and some of them will not depart until September 20.

Varied Types Workers Sent
Included in the list of missionaries are preachers and evangelists, teachers, doctors, nurses, one architect, one expert in domestic science, and special workers among women and children. William Earl Hines of Spartanburg, S. C., who goes to Shanghai to supervise the construction of all missionary buildings in China, enjoys the distinction of being the first architect ever sent out by the Foreign Mission Board, and his appointment indicates the vast extent of the Southern Baptist work in that country. More than half of the total number of missionaries in the employ of this board are located in China, where the results of their labors are very gratifying to the officers of the Board.

Large interest centers, also, in the launching of an intensive missionary work in Palestine, to which country there go Rev. and Mrs. Fred Bunyan Pearson of Moulton, Ala., and Rev. and Mrs. J. Walsh Watts, of Laurens, S. C. Some native missionaries are already at work in Palestine, and the outlook there is considered very encouraging, despite the present complicated political and racial controversies.

Campaign Brings Enlargement
In addition to the sending out of 250 new workers to foreign fields the 75 Million Campaign has made it possible to increase the number of native workers from 771 to 1172, to practically double the missionary equipment in the older fields of China, Japan, Africa, Italy, Brazil, Argentina, Chile, Uruguay and Mexico, and to enter the new fields of Spain, Jugoslavia, Hungary, Roumania, Southern Russia, Palestine and Siberia. Southern Baptists now have a practically unbroken string of mission fields encircling the globe, and a possible mission audience

of 900,000,000 people, or one-half the total population of the globe. And the results on the field have kept pace with the larger investment in the work and number of workers. Since the outset of the Campaign the Foreign Mission Board reports the organization of 117 new churches, 21,723 baptisms, 211 new Sunday schools with a gain of 17,576 pupils, native contributions to Baptist work of \$11,002,390.88, and \$29,542 treatments administered by missionary physicians. Churches on the foreign fields, exclusive of the Near East, now number 822 with 64,251 members. There are also 971 Sunday schools with 53,631 pupils, and 494 mission schools of all grades with 28,507 students.

Expense Rate is Low
More than \$5,250,000 net has gone from the Campaign into foreign mission work, and so economically have these funds been handled, the Board reports, that 96.24 cents out of every dollar has actually reached the foreign fields, only 3.74 cents out of each dollar being required to care for the total cost of administration. But with these larger receipts and economical administration the Board is unable to meet the demands upon it, and at its last annual meeting it was compelled to reduce the requests of the missionaries on the field for appropriation by more than \$1,000,000.

REVIVAL AT WHEATCROFT

A two weeks series of revival meetings at Wheatcroft closed Sunday with 40 conversions and renewals. The meetings were conducted by Rev. J. Colyer and Singing Evangelist Scott, both of Nashville, Tenn.

This church is owned jointly by the Cumberland Presbyterians and the Methodists, Rev. W. T. Oakley being pastor of the Presbyterians and Rev. B. B. Cox, pastor of the Methodists.

DROUGHT BROKEN

The continued drought of the last several weeks was broken by the heavy downpour of rain which visited this section Monday afternoon. From reports coming in the rain was general and heavy over the county south, east and west of town, but to the north the rain was light. rain will be a help to late corn tares and meadows in seed. It fell.

SENATOR DEBO

Senator W. Debo has been confined to his bed with a very bad cold.

SOMETHING TO THINK ABOUT

When you are sick you call in the best doctor you can get. Why not select your druggist with the same care? He is the one between you and your physician—it is he who is responsible for the carrying out of your doctor's orders.

Try us once—for whatever your drug needs. Our prompt, efficient service and reasonable prices will speak for themselves.

CAMPMEETING CLOSED

The Hurricane annual campmeeting closed Sunday evening, after a ten-days encampment. Rev. J. J. Smith had charge of the meeting and was assisted in the preaching by O. M. Capshaw, pastor at Tolu. Evangelist Billy Yates had charge of the choir which insured splendid singing. Miss Eva Yates presided at the organ.

The camps were well filled and good crowds attended throughout, the attendance at the services on the two Sundays being very large. Quite a large number of conversions are reported and several christenings.

This is the first campmeeting ground.

GAS AND OIL

F. O. Butler

NEW ARRIVALS

The following births have been reported by Dr. O. C. Cook.

Mr. and Mrs. Burnett Butler are the parents of a son born, September 1st.

Born to Mr. and Mrs. Ray Horn on September 2, a son.

Born to Rev. J. O. Belt and Mrs. Belt on September 2, a baby.

Born to Mr. and Mrs. Willie Manley, September 1, a daughter.

Born to Mr. and Mrs. Clyde Ramsey, September 4, a son.

Jupiter is the largest planet in our solar system.

The sun, if it were a hollow sphere, would hold a million globes as large as the earth.

The sun is distant from the earth 94,000,000 miles in June and 91,500,000 in December.

The light of the North Star is estimated to be 100 times stronger than that of the sun.

Although 400 times larger than the moon, the sun is 400 times farther away from the earth, making the two appear about the same size.

A mountain on the sun, if it bore the same proportion to that luminary as Mount Everest does to the earth, would be 600 miles high.

Mercury and Venus are the only planets that have no moons. Counting our own moon, the system of planets possesses no less than 27 moons.

SAID IN EARNEST

Children are poor men's riches

No legacy is so rich as honesty

Conscience cannot be compelled

OPENED TUESDAY

The Marion High and Graded Schools opened Tuesday morning with R. E. Jagers as Superintendent and Prof. E. S. Robinson as Principal of Graded School and teacher of the Eighth Grade.

The usual opening exercises were held at Graded School Auditorium with an increased enrollment over previous years. Many new pupils were enrolled and assigned to their places in the grades.

The High School in the handsome new building showed a material increase in the number enrolled, the school opened with a splendid outlook for a successful term.

OUR MISSING WORD CONTEST

The Missing Word last week was "YOUR" and should have been in the Ad of Henry & Henry between the words "that" and "loved". This weeks word will be still more difficult to find and it begins with the letter "P" and ends with "T". You will have to look close to find it. Very few of the contestants have answered correctly every time.

LETTER FROM DR. FRAZER

Joseph M. Dean,
Marion, Ky. Ford's Ferry Star Rt.
Dear Sir:

Sheep is the one branch of agriculture which has consistently made the farmer a small profit during the period of depression through which we have been passing during the last three years.

Crittenden county is well adapted to sheep raising and every farm should have a small herd. We should do all in our power to improve the quality and quantity of mutton and wool. This can be done by improving the blood lines of our flocks. The best and cheapest way we can do this is by using only pure bred sires.

The Crittenden County Fair will be held on Sept. 30, 1922 and liberal premiums will be given for the best sheep that are shown on that day. We have some good sheep in this county, but they should be better.

We want every sheep raiser in the county to bring the best sheep he has to Marion fair day. We can improve and gain much valuable information on that day. Quality is only recognized by comparison, if your sheep are better than mine it will encourage me to see your sheep. Our slogan should be, make Crittenden County a better place in which to live.

T. ATCHISON FRAZER,
Chairman Sheep Committee.

TO HOLD REVIVAL MEETING AT FRANCES

Rev. James F. Price and Rev. N. Hart left Tuesday for Frances where they together with some of each will be endeavoring to determine if there is any difference in that is, if the peanut ration mothers has made it more of a hard flesh on the off-corn.

CLEAN WATER IS NECESSARY

Nothing Discourages "Growth Impulse" Quicker Than Hog Hankering for a Drink.

Pure clean water at all times—at all times, remember—is one of the necessities for all kinds of swine. Nothing so discourages the "growth impulse" in a hog as wandering around looking for a drink of water when it is thirsty.

FEED USED WHERE PRODUCED

When Hauled About on Trucks and on Railroads the More Expensive It Becomes.

The purpose of feed is to feed livestock, and the more the feed is hauled about in trucks and on railroads the more expensive it becomes. For this reason feed should usually be fed where it is produced.

Cattle for Market

Success in growing cattle for the market depends in large degree on the kind of calves that are produced. No amount of proper feeding will overcome mistakes in breeding and conformation.

Self-Feeding Sows

Some breeders are very successful in self-feeding sows during the suckling period. Experimentally, this practice has given better results than hand feeding.

BUY STARK TREES

Now is a good time to order your fruit trees, ornamental trees, grape vines, etc., for fall delivery. See E. C. Haynes, agent for Stark Bros. Nurseries of Louisiana, Mo., 106 years in business. Stark trees grow and bear fruit. See him at Press office.

Cleanse Silver.

To keep plated silver clean and bright without constant cleaning, which is so injurious to plated articles, dissolve a small handful of borax in a basin with a little hot water and a little soap, put the silver in and let it stand for three or four hours; then pour off the suds, rinse with clean, cold water, and wipe with a soft cloth.

Mr. Ellis Nesbit and wife returned to their home in Rosiclare Sunday. Miss Reba Fritts visited Miss Belvin Hillyard Sunday.

Mr. L. Belt, father and mother visited at his home Saturday.

Had Sighed Over Cal's Hair.

My first love affair came to a climax when my sweetheart discovered that he had been carrying a "lock" of the calf's tail next to his heart for several months, under the illusion that it was a lock of my hair. He had insisted upon having a lock of my hair, but I, having none to spare, and finding that the color matched exactly that of my red calf, substituted that. It answered the purpose very well until a small boy gave the secret away. Then I was denounced as a true daughter of Eve!—Exchange.

Illinois Central System Values the Good Will of Its Patrons

In the commercial world good will is one of the most valuable assets a business can have. In the valuation of industrial companies it is frequently rated at many millions of dollars. We believe that good will is also of great value to a railway system—in fact, we believe it is one of the most valuable assets a railway system can have.

We are constantly seeking to promote good will among our patrons for the Illinois Central System. We are doing it by attempting to render a dependable, efficient transportation service; by having officers and employees who are at all times courteous and obliging to our patrons; by giving our patrons accurate information in regard to the Illinois Central System; by cooperating with our patrons and seeking their co-operation with us through their constructive criticism and suggestions.

We have sought to create for this railway system, in the consciousness of our patrons, a personality embodying the highest ideals of public service. It is toward such ideals that we are constantly striving. It is our endeavor to be of constructive service to every community, every farmer, every business man, every industrial and commercial enterprise in the territory which we serve with transportation.

We have repeatedly appealed to our patrons to work closely with us, to support us, not only with their business, but with their friendships, to fortify us with their constructive criticism and suggestions.

The Illinois Central System and its patrons are sharers of common problems. It is to our best interests to be ever mindful of the best interests of the territory we serve, and, on the other hand, we believe our patrons can best serve their own interests by doing that which will strengthen us. Representatives of all departments of the Illinois Central System are filled with a pride in their work and a desire to be of service to our patrons. They are striving to make every patron of this railway a friend and a personal interest in the Illinois Central System.

We hope that the Illinois Central System will always stand in the front ranks of the railroads of this country in having the good will of its patrons. We feel that we have been accorded us in the past, and we shall leave nothing undone in endeavoring to merit their continued support and confidence in the future. We feel that the good will of our patrons places an added responsibility upon us to serve them well, and we accept that responsibility, pleased that we have the opportunity to contribute to the upbuilding of a great and fruitful territory—the Mississippi Valley.

Criticism and suggestions are invited.

C. H. MARKHAM,
President, Illinois Central System

Standardization of Practice in the Design and Construction of Highway Bridges

Greater standardization of practice in the design and construction of highway bridges is urged by the bureau of public roads of the United States Department of Agriculture. It is believed that there is no sound reason for the amount of variation in specifications that now exists and that it results in greater cost of bridges. State officials take the same view as the bureau and a committee composed of bridge engineers has been appointed by the American Association of State Highway Officials to consider the matter. A "Manual of Practice" is being prepared, which will represent the best thought on the subject and which it is believed will be accepted by all the state highway departments. Not only will the adoption of such a manual lead to the building of bridges of good design, but it will also make possible a saving in money, as bridge companies will not be called upon to meet so much variation in design.

INFORMATION HARD TO GAIN

Statistics Concerning Roads of Different States in Some Cases Not Easily Obtained.

With the annual expenditure for roads and streets in the United States approaching the billion-dollar mark, more accurate information and better means for obtaining it seem necessary, says the bureau of public roads of the United States Department of Agriculture. One thing very much needed is the concentration of all sorts of information and statistics concerning the roads of the various states in the state highway departments.

Engineers of the department are now gathering complete information regarding the road mileage and expenditures in the United States. In many of the states much of the information desired is easily obtainable from the state highway department. In the case of Iowa the figures were obtained almost immediately. In other cases it has been necessary to send out numerous questionnaires and some-

The Brotherton-Berlin Road in Pennsylvania, Showing How It Appeared Before and After It Was Improved by a Concrete Road-Bed.

times the information has been obtained only after personal visits. In one state 1,800 questionnaires had to be sent out to bring in the needed figures, and in some it has been found that practically no records have been kept. For some of the counties in New Mexico questionnaires had to be translated into Spanish before the road officials could understand them.

BRIDGES ON IMPROVED ROADS

Few Structures Less Than 18 Feet Are Now Being Constructed, Say Engineers.

Few highway bridges with a width of roadway less than 18 feet are now being constructed on improved roads, according to engineers of the bureau of public roads of the United States Department of Agriculture. In the past some 12 feet and a good many of 16-foot width have been constructed in an effort to economize, but it has proved shortsighted economy. Only one line of traffic can pass over a 12-foot roadway, and 16 feet of width will not accommodate two lines in safety. Many of the states, such as Pennsylvania, New Jersey, Ohio and Massachusetts, have found it advisable in replacing old bridges on important roads to make them wide enough to accommodate three and four lines of traffic.

Material for Good Roads.
Federal aid roads, either completed or under construction in the United States at the end of the present fiscal year, will require approximately 50,000,000 tons of stone and gravel for the making of 28,000 miles of highway.

Farmer Begins to Compete.
With smooth, hard roads from farm to town, and a substantial 10-mile-an-hour truck to haul grain or hogs in, the farmer will begin to compete with rail and water transportation.

(Prepared by the United States Department of Agriculture.)

In the study of root, stalk, and ear rots of corn, one of the most useful discoveries that has been made is a very noticeable difference between starchy ears and horny ears in the frequency of infection and in the vigor of plants produced. These differences are discussed in Department Bulletin 1062, Relation of the Character of the Endosperm to the Susceptibility of Dent Corn to Root Rotting, by John F. Frost, assistant pathologist. The investigations were carried on jointly by the United States Department of Agriculture and Purdue university agricultural experiment station.

Ears of the dent varieties that have starchy kernels have been found to be infected with rootrot organisms more frequently than ears in the same seed lots that have horny kernels. This provides a means of selection that may help to do away with the necessity of testing every ear to determine whether from the standpoint of rootrot infection it is desirable to plant. Starchy kernels are easily distinguished from those with horny endosperms. The horny kernel is more or less translucent; that is, it lets the light pass through in the same way that oiled paper does. Starchy kernels are opaque—like a piece of chalk.

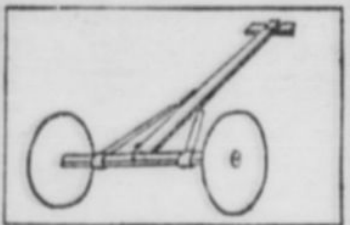

Starchy ears of dent varieties produce larger numbers of weaker growing plants, more susceptible to root rots in the field, than do ears of more horny composition.

There is an impression among corn growers that the depth of the dents is an indication of the starchiness of the kernels, but this has not been shown to be true. Chaffy kernels are usually very starchy, but starchiness is not necessarily associated with normally-matured ears that are rough. The bulletin may be obtained by addressing the department at Washington, D. C.

DEVICE AIDS BERRY GROWER

Rolling Cutter Makes It Easy to Keep Strawberry Plants Confined to Allotted Space.

This device will be found handy in keeping the strawberry bed in order through the summer season. It is a rolling cutter used to cut the runners which otherwise would spread out between the rows and set plants where they are not wanted, writes

Rolling Cutter for Berries.
D. H. Van Horn in the Nebraska Farm Journal. By running this cutter up and down the rows one can very easily keep the plants confined to the space desired. Such a device is made of two cutters from an old disk mounted on a homemade frame, as shown.

POISON SPRAY NOT HARMFUL

Heavy Coatings of Residue on Fruits and Vegetables Removed by Good Washing.

Poison sprays on fruits and vegetables will not be found by consumers in harmful quantities if growers who use them against pests and diseases follow the spraying schedule recommended by the United States Department of Agriculture. In some instances, because of heavy spraying or spraying late in the season, investigators for the department have found comparatively large quantities of spray residue on fruits and vegetables at harvest time, especially on products grown in dry climates. When heavy coatings of residue were found washing and wiping removed much of it, and peeling all of it.

Experiments along this line were undertaken by the department because of the possibility that spraying of fruits and vegetables might leave enough arsenic, lead, or copper on the surface to be injurious to the consumer. The results, obtained by analyzing sprayed fruits and vegetables from various parts of the country and presented mostly in the form of tables, are given in Department Bulletin 1077, Poisonous Metals on Sprayed Fruits and Vegetables. Copies may be obtained by addressing the department at Washington, D. C.

FIXING GRADES FOR MOHAIR

Federal Wool Specialists Are Making Careful Study of Output in Texas.

Investigations looking toward the establishment of grades for mohair are now being made by the United States Department of Agriculture. Federal wool specialists are making a careful survey of the various kinds of mohair produced in Texas.

reks... exhibition coops.

White... to furnish necessary hurdles and pens. When... exists first prize only will be awarded. Blue... 1st prize and red ribbon 2nd prize.

All cash premiums will be paid and orders for merchandise given by Mr. Hollis Franklin at the Farmers Bank and Trust Co. during week following Fair but no premiums will be paid on Fair day.

If donations and gate receipts are not sufficient to pay incidental expenses and premiums in full, all premiums will be pro-rated. General admission 25c. Children, 7-12 years, 15c.

The Committee thanks Mr. Levi Cook for the use of his park, also all parties who helped to make the Fair possible.

Precaution will be taken to prevent accidents but should any occur, no liability will be assumed by the Committee.

Committee in charge, James Alex Hill, President; Hollis Franklin, Secretary and Treasurer; Cort Pierce, Executive Committee.
