MARION HAS STREET LIGHTS

City Council and S. M. Jenkins Come to Agreement on Monday Night

The citizens of Marion are relieved of all apprehensions of remaining in darkness. At the regular meeting of the City Council Monday night, November 6, the city entered into a contract with the Marion Electric Light, Water and Ice Company to furnish street lights from that date until six months after the sale of a electric light franchise, which it is reported, has passed its second reading before the City Council.

The city agreed to pay Mr. Jenkins \$200 per month during the life of this contract and the city agreed to certain reductions in candle power of the lights where possible, which together with reduced price of coal made it possible for Mr. Jenkins to accept the proposition made him by the city.

The kilowatt charge per hour for domestic purposes is not to exceed 15 cents and the matter of day service is left with Mr. Jenkins to arrange with his customers.

MISSING WORD CONTEST WINNERS

Following are the winners in the Educational Missing Word Contest which just closed last week:

First prize: Mrs. J. R. Summer-ville with eleven correct answers.

Second prize: Dorothy Brewer with 10 correct answers.

Third prize: Neil Guess with nine correct answers.

The ten next in order are Elizabeth Lee Haynes, 8; Georgia Helen Nunn 7; Grace Condit, Gladys McDowell, Irene Postlethwait, W. L. Terry, Mary Towery Wood, Effie Aileen Hodge, Mrs. Harvey Lowry, and Verscia Stephenson, with six each.

GEIBEL-BABB

Mr. and Mrs. A. C. Babb have received a card announcing the marriage of their son, Mr. Harry Babb and Miss Olga Geibel, daughter of Mr. and Mrs. Franklin Geibel, of Rayonne, N. J., which took place on October 26, at Church of Trinity, of that city.

FIRST BAPTIST CHURCH

Sunday November 12.
Sunday School 9:30 A. M.
Preaching: 11:00 A. M., Subject God's Honor at Stake. 7:00 P. M., Only a Voice.

B. Y. P. U. Sunday, 7 P. M.
Choir practice Friday 7:00 P. M.
Everybody is cordially invited to attend these services.

B. H. DUNCAN, Pastor.

GRADED SCHOOL NOTES

In last month's notes we said that every student whose name appeared on the honor roll was an A student in everything. That was just a little misleading to the school children and to the public. A student who makes an average grade anywhere in A is an honor student and his or her name is placed on the honor roll.

MARION HIGH LOSES TO STURGIS

Football Team Loses Game to Sturgis Friday Afternoon—Win From Central City Saturday

Marion met the ancient enemy, Sturgis, last Friday and succumbed to the tune of 13 to 0. The silent blue and white warriors were very lucky in holding the Sturgis score to two touchdowns in the first half because they played mechanically and the back field was slow in getting into action when they had a chance on the offensive. Fumbles were the order of the day. Kick-offs were fumbled, forward passes were fumbled; but we are pleased that the Blue and White at least got rid of their season's epidemic of fumbles.

At the beginning of the second half after Sturgis had recovered a fumbled kick-off Marion showed the old time fight and held for downs on her own ten yard line. Then began the spirited march up the field that surpassed Sturgis's best rushing of the day. Wilson and Brown shot thru the holes following the interference put up by Dillard until the ball was on Sturgis' three yard line at which place Marion lost the ball on a fumble. Again in the fourth quarter Marion started another march toward a touchdown but the attack was launched too late and the game ended with the ball in Marion's possession on Sturgis fifteen yard line.

Travis played his usual consistent game at end, charging time after time and bringing down the man with the ball. The left side of the Sturgis line was very weak in the second half.

After their defeat at Sturgis last Friday the Blue and White visited Central City Saturday and trimmed the high school team of that place by the score of 12 to 0. The touchdowns were made by Dillard who was at fullback for part of the game and at quarter the rest of the game.

Early in the game Coach Brown removed several of the regulars and substituted the second string men in their places. Winning the game on Saturday served to put more pep in the squad and great preparations are being made for the next game which is played at Henderson on Armistice Day.

A conflict in the schedule made it necessary to play Sturgis on Friday and Central City on Saturday. Marion wants a game on November 18 which is an open date on their schedule.

HAVE A SMOKE?

Dr. S. S. Dalton of this city, has on exhibition at this office a tobacco pipe which is more than a century old, of unique workmanship and of historical interest. The pipe was picked up by a United States soldier 18 years ago in an old dug-out in Montana and has been in the possession of its present owner for five years. It is of genuine meerschaum has an elaborate design beautifully hand-carved on its bowl and is judged to be of German origin. The year 1810 is carved on the bowl.

The pipe is 15 inches long, with a curved stem, the bowl being five inches around and three inches tall. It is in good condition for use, and if any of our readers desire to try it out, he is welcome to one smoke at least.

PETRIFIED HICKORY NUT

Mr. Norval Hughes brought to this office the other day a petrified hickory nut which, he reports, he found while working in the Sullenger spar mine, in this county, at a depth of 45 feet. It is of the large shell bark variety, the hull being separated from the inner part of the nut and both portions being in a state of petrification. It would take a geologist to determine the age of the nut.

SCHOOL DISTRICTS COMBINED

Owing to the scarcity of teachers, Supt. J. L. F. Paris has combined the districts of Piney Fork and Belmont and Mr. Raymond Boucher will teach pupils of both districts at Piney Fork. Mr. B. F. Slaughter, teacher at Belmont, has been transferred to the Sisco Chapel district.

LIGHT VOTE POLLED HERE

Barkley Carries County Over McCain, Republican in Congressional Race

A light vote was polled in Crittenden county at Tuesday's election. Complete returns from all the voting precincts in the county show about the same degree of apathy in each.

In the First District Congressional race, Alben W. Barkley, Democrat, carries the county over F. Marion McCain, Republican, by 88 votes. This is the first time Crittenden county has given a majority vote for a Democratic candidate for Congress.

Herbert Morris, Hollis C. Franklin and W. E. Cox were elected members of the City Board of Education without opposition.

Following is the total vote of the county in the Congressional race by precincts:

Precinct	Barkley	McCain
Marion No. 1	19	23
Marion No. 2	33	19
Marion No. 3	26	19
Marion No. 4	12	22
Marion No. 5	18	29
Marion No. 6	16	26
Marion No. 7	22	19
Crayne	14	16
Mexico	7	18
Frances	20	16
Dycusburg	47	13
Union	15	21
Sheridan	31	18
Blooming Rose	4	5
Tolu No. 15	21	19
Tolu No. 16	10	3
Fords Ferry	31	10
Bells Mines	9	9
Rosebud	30	6
Fishtrap	17	16
Piney	11	9
Shady Grove	30	9
Total	433	545

BRIGHTMAN-NEWCOW

Mr. Raymond Newcom, of the Baker section, and Miss Elva Brightman of Blackford, came to town on Thursday, November 2, and were united in marriage at the parsonage of the First Baptist church, Rev. B. H. Duncan performing the ceremony.

They are both popular young people of their localities. Mr. and Mrs. Newcom left after the ceremony for a visit to friends at Cerulian Springs.

BREAKS ARM IN FALL

While reaching out for a suspender Thursday morning J. D. Asher, Jr., the ten year old son of Mr. and Mrs. J. D. Asher fell from his bed, breaking his left arm below the elbow in two places. The wounds were dressed and he now carries the injured arm in a sling.

About five weeks ago, J. D., while playing with other boys on the station platform at the I. C. Depot, fell and broke the same arm in three places. Perhaps the wounds of the first accident had not entirely healed.

THE WOMAN'S CLUB

The Woman's Club was entertained by Mrs. Bebe Boswell Wednesday afternoon, Nov. 1, in the Legion rooms. After the business meeting the following program was given: Crittenden County's Resources, Mrs. J. S. Henry.

Crittenden County, Mrs. Bebe Boswell.

Social Forms and Habits of Early Settlers, Mrs. Nell Guess.

Early Towns in Kentucky, Miss Elizabeth Rochester.

FOR SALE

Full-blooded, single comb, Rhode Island Red Cockerels for sale, 75c each if taken at once.

MRS. HERSHEL O. FRANKLIN,
2* Marion, Kentucky.

WILL CORAM DIES

Will Coram, formerly of this city, died at his home in Livingston county Tuesday, aged 59 years. Funeral services were conducted at Love's Chapel by Rev. W. T. Oakley. The deceased was a son of the late Sam Coram, a former jailer of this county. He is also a nephew of Mr. and Mrs. John Wes Lamb of this city.

OIL FOUND NEAR TOLU

After Several Months Work Driller Henson Strikes Crude Product at 900 Feet Depth

The oil prospect at Tolu has, it is learned from reliable sources, become an ascertained fact. Contractor Sam Hall and Driller A. G. Henson report that they have struck oil at a depth of a little less than 900 feet in the oil well being drilled near Tolu. There is no doubt, they assert, of the product being pure crude oil, but the quantity can not as yet be ascertained. The water will have to be pumped out and casing put into the well before the quantity can be known.

If the quantity comes up to expectations this discovery will be a big thing for Tolu and Crittenden county. For several years persons who profess to understand such things have as their opinion that there was oil beneath the surface of Crittenden county, but it takes nerve and money to go after it.

Four or five years ago Geologist Smith of Indianapolis, going down the Ohio river, noted the similarity of the geologic formation of the earth around Tolu and that of the oil fields of Illinois. So impressed was he by this fact that, some time later, he stopped off there to make a closer examination. It was then that he located the spot where this well is being drilled. He told the people that there was oil there and that all they had to do to get it was to go after it. The well is located on the old Foss Crider farm, now owned by W. E. Dowell, and is about one-fourth mile from Tolu and a mile from the Ohio River.

IMPORTANT TO HOLDERS OF 4-3-4 VICTORY NOTES

If you are a holder of any of the Liberty Loan 4-3-4 Victory Notes with serial numbers prefixed by letters from A to F. Look them up because they will not draw interest after December 15.

If you will bring your bonds to Marion Bank we shall be glad to collect them for you. Then if you desire to keep this money at interest where you can get it any time you need it, we will issue a time certificate of deposit.

Yours Truly,
T. J. VANDELL, Cashier.

FELL INTO CISTERN

The little five-year-old daughter of Mr. and Mrs. George W. Gass, residing a few miles from town, while playing in the yard a few days ago, fell into a cistern 21 feet deep and which contained six feet of water. The child was uninjured in the fall and when she rose from the water, she caught hold of a projecting rock and held on to it while her mother called her father, Mr. Gass and a few friends rescued the little child little the worse for the accident.

SECOND BAPTIST CHURCH

The series of revival meetings which began at the Second Baptist church Monday evening has continued thru the week, large audiences being present at each meeting. Rev. H. W. Ellis of Paducah, is doing some fine preaching and the pastor, Rev. Hosea C. Paris, is ably assisting in the work.

FAIRBAIRN-SPENCER

On Wednesday, October 25, at five o'clock P. M., Mr. John R. Spencer, of this city, and Miss Alice Fairbairn of Joliet, Ill., were united in marriage at the Fairbairn home in Joliet. It was a quiet home wedding. After the ceremony Mr. and Mrs. Spencer left for a short automobile trip through the East. They will be at home at Marion November 15.

—FOR RENT The Greer place at Fredonia, 30 acre farm, eight room house. Address J. H. NELL,
Princeton, Ky., Phone 375.

Mrs. J. A. Hughes and daughter, Miss Katherine, attended the ball game at Central City Saturday.

STILL CAPTURED LAST SATURDAY

Moonshine Still Found on Premises Of Talmage Hill Near Piney Fork, Last Saturday

On suspicion derived from previous information Sheriff J. T. Wright, Deputy P. R. Taylor and former County Attorney John A. Moore went Saturday to the home of Talmage Hill, who resides two miles from Piney Fork church, with a warrant to search the premises. Upon their arriving there Mr. Hill readily gave his permission to have his premises searched. In a barn near the house the officers discovered a still covered with sorghum fodder, which they took possession of and brought to the court house in Marion. Mr. Hill, it is said, denied all knowledge of the still being on his premises. He is reported to have further said that it was, evidently brought there by some one unknown to him on the night before while he was away from home fox hunting.

The still is of about 15 gallon capacity, is in good condition and seems to have been recently used. It is of copper throughout. The still is now at the court house and many visitors have called to see it.

Farm Bureau Notes

The Forest Grove Community Club will hold a school and community fair on Armistice Day, Nov. 11. An extensive premium list is provided. Let everybody come and have a general good time and get together on this fair day. Boost the school and boost the community. Be glad you live in a day of peace. Bring your dinner and spend the day. The schools from which entries are expected are: Oak Hall, Brown, Freedom, Glendale, Colon, Hebron and Forest Grove.

With a change in the weather a number of Crittenden farmers will be thinking seriously of killing their winter meat. In line with this question Mr. H. G. Sellands from the Experiment Station will give several meat cutting and curing demonstrations on November 15 and 16th in various parts of the county. These will give some very helpful information and everyone in the neighborhood of a demonstration should make it a point to be present. The places cannot be announced at this time but any one interested can receive a list of the demonstrations Saturday at the County Agent's office in Marion.

Pure-bred Sires

Considerable time will be spent this coming week by the County Agent and the Assistant County Agent in pure-bred sire work.

Mr. Rhodes from the College of Agriculture has charge of this work in the state of Kentucky and he will be here to assist in the eradication of scrub sires in this county. The work consists simply in getting a farmer to agree that he will use nothing but pure bred sires on the cattle, hogs, horses, sheep and chickens on his place. He is given a certificate that states he has agreed to use nothing but pure-bred sires.

The purpose in view is the improvement of the principal classes of domestic live stock in Crittenden and other counties in the State. Most farmers believe that a good sire is helpful but so many don't give it sufficient consideration and are thereby losing money thru the poorer grade of animals produced. The underlying need for improvement of live stock in the county and state is to increase efficiency in the production of meats and live stock products including dairy and poultry commodities.

Any person in the United States who keeps any kind of domestic live stock may take part in the campaign and be enrolled. It includes the boy and girl who has merely a pig or some poultry, as well as the ranch man or extensive live stock breeder. The enrollment of persons permanently engaged in raising live stock for market is especially desired.

Seed Corn Tests Complete

During the past season several varieties of seed corn have been tested in several sections of the county. The object of the test was to determine two or three of the best varieties of corn for the farmers of Crittenden

D. H. FRANKS DIES IN CALIFORNIA

Former Crittenden County Citizen Passes Away at His Home in Los Angeles Last Friday

David Hodge Franks died at his home in Los Angeles Cal., at eleven o'clock Friday, Nov. 3, of tuberculosis, aged about 68 years. The remains will arrive here Saturday morning. Funeral services will be held at the First Baptist church Sunday at 2 o'clock, conducted by the pastor, Rev. B. H. Duncan. Interment immediately after at Maple View Cemetery, the burial services being in charge of the Masonic Lodge.

Mr. Franks was well known here and had many friends. He was a son of the late John Franks, one of the early settlers of this county. He was a member of the Baptist church and also a member of the Masonic Fraternity. About 20 years ago he left here with his family for Cripple Creek, Colo., where he lived until two years ago when he moved to California.

About thirty-five years ago he was married to Miss Julia Flanary, daughter of the late T. J. Flanary, who survives him. He is also survived by two sons, Ernest and Robert Franks, both of Los Angeles and by two brothers and four sisters, John T. Franks, of Denver, Colo.; E. T. Franks of Owensboro; Mrs. Joel Farmer of Florida; Miss Addie Franks and Mrs. Tom Gill, of Texas; and Mrs. Will Hurley of this county.

A YOUNG ELECTRICIAN

Master Sidney Marshall Jenkins, the seven-year-old son of Mr. and Mrs. S. M. Jenkins, has proven himself to be a considerable electrician. When the family moved into their new home they needed the addition of a few more electric lights for the porch and out buildings and S. M., Jr., agreed to put them up. And he did, wiring the buildings and making all the necessary connections with the light plant.

MARRIED AT ELIZABETHTOWN

Miss Mary Elizabeth Kimsey, a daughter of A. C. Kimsey, of the Sheridan section, and Mr. Elkel Curnel of the same locality, went to Elizabethtown, Ill., Thursday of last week and were united in marriage, City Marshall Terrell performing the ceremony. Mr. Terry Robinson and Miss Emma Belt accompanied them. Mr. and Mrs. Curnel will make their home in Rosiclare.

A CARD OF THANKS

We desire to thank our many friends who so willingly assisted and helped us in the sad hours of affliction and death of our husband, father and grandfather. Neighbors and friends stood by us to the last and everything was done that could be done. May God's richest blessings rest on one and all.

MRS. ELLEN LOYD

J. P. Loyd, Wife and Children

county to grow. Some varieties of corn seem to be very well adapted to the soil of this county while other varieties showed up very poorly in the demonstration.

Several new varieties to this county were secured by the County Agent last spring. These were planted by some of the home varieties. Last week this corn was harvested by the demonstrators who were assisted by the Assistant County Agent. Together they husked and weighed a fraction of an acre and then computed the yield per acre. In each test the corn was planted at the same time and grown on the same kind of ground and under identical conditions as far as possible. Reeds yellow dent showed the highest yield of any variety, yielding 58.6 bushels per acre in one instance. In two tests it proved better than Boone County White. Gate Post proved to be one of the best local varieties, yielding 49.4 bushels against 48.2 for Reeds Yellow Dent in the same test. Iowa Silver Mine and Pride of Saline and Hickory King also proved good yielding varieties.

WHAT HE EXPECTED OF WIFE

Girl's Attitude Seems Unreasonable
When These Few Small Things
Were All He Wanted.

Beauty. Punctuality. Sweet temper.
Economy. Trust.

And that she should be sound asleep
when he came in.

And that he should not be questioned
regarding the hour when he returned
from poker parties.

Nor that she should make any com-
ments regarding the strangeness of the
fact that it was necessary to have on-
ion sandwiches at poker parties.

And that she should spend such even-
ings as he played poker or stayed
downtown or went to stag dinners with
friends of the feminine sex.

That she should always understand
that his flirtations were too mild for
any unbridled jealousy on her part.

That it was quite a different thing
for a man to be forgiven than for a
woman.

And that he wouldn't have his wife
make a fool of him as some wives he
knew made of their husbands.

With these clear understandings at
the start he knew that she would be
very happy with him, for he would
make her an ideal husband.

But he had been a little too pre-
cise.

She saw now why two other wives
had divorced him.

And she saved time—by refusing to
marry him!—Mary Graham Bonner in
Judge.

MADE A HIT WITH STUDENTS

"Cafeteria Work" Was Something
Which Evidently Had the Approval
of the Entire Body.

A new school for boys in Terre
Haute, Ind., is a very modern vocational
school, with band equipment, big
athletic park and cafeteria. And the
new students were much impressed by
these facilities.

On the first day of school one of the
new fellows watched a last year stu-
dent make out his program, and it
read: "Shop work, wood work, chemi-
cal laboratory work and forge work."

He studied it a little while and be-
gan writing. And this is what he
wrote: "Band work, athletic work,"
and then he hesitated, studied for a
long time and finished, "cafeteria
work."

Before he could get any farther the
old student, having seen the program,
seized it for exhibit, and it went on
record as the most popular program of
the school.

Electricity and Bullets.

At a rifle meeting in Switzerland it
was discovered that the steel-jacketed
bullets of the marksmen were swerved
from their course by the influence of
telegraph and telephone wires running
alongside the range, says the Washing-
ton Star. Experiments were then
made at Thun by placing four steel
cables parallel with the range and
about 40 yards distant from it and
sending a current of 8,000 volts
through them. The effect, it is said,
was to turn the bullets so far from
their course that the deviation
amounted to 24 yards on a range of
200 yards. The bullets on being taken
from the targets were found to be
magnetized. Next, on an artillery
range of 3,000 yards, the electro-mag-
netic influence was generated 200
yards in front of the targets and 40
yards to one side. The projectiles
were swerved 14 degrees from a
straight line.

A Doubtful Hit.

One sister in this Evansville family
is a newspaper reporter and the other
a school teacher. And the little teach-
er is much given to borrowing her sis-
ter's clothes. The good-natured re-
porter usually doesn't object, but the
other day she felt her sister had gone
too far when she wore her new silk
dress and fall hat to school. She told
her so, too.

"But I had heard the school board
would be at the building today," the
teacher excused herself, "and I want-
ed to make a hit with them."

"I bet you did," came back the dry
rejoinder, "for they all nearly went
wild about that dress when I wore it to
the school board meeting last night."—
Indianapolis News.

Davy Jones' Toll.

Lloyd's Register of Shipping records
the loss during the last quarter of 1921
of 99 steamers and 68 sailing vessels,
representing 117,926 and 38,138 tons,
gross, respectively. The causes are
given as wrecked, foundered, col-
lisioned, burned, missing, abandoned,
lost and condemned.

Of this total 7 steamers, and 17
sailing vessels were of American regis-
ter. Holland had no losses during the
period under notice. Vessels under
100 tons are excluded from the return.

NATURE KEEPS HER SECRET

Chemists Have Never Been Able to
Satisfactorily Determine the Com-
position of Wood.

Wood, with which the ancient Brit-
ons used to stain themselves, is grown
in that part of Lincolnshire, England,
which abounds with dykes and wind-
mills, and along the borders of Cam-
bridgeshire. It allowed to go to seed
the wood weed often grows to three
and four feet in height and has a pret-
ty yellow flower.

The first crop of tender green shoots
is picked in July or August, and during
the harvest men and women are to be
seen creeping along the fields on their
hands and knees all day long.

The shoots are put into large wick-
er baskets and sent to a factory, of
which there are three or four in that
part of the country. When they arrive
they are squashed into pulp and al-
lowed to ferment. Later they are made
into balls and dried.

These balls remain drying for sev-
eral weeks and are then broken into
pieces and stirred for a lengthy period.
Eventually they produce a coarse, pow-
derlike substance, deep blue in color.
Lastly the powder is damped, stored
in vats and sold to dyers and manu-
facturers of woollens and other articles
of apparel.

The enduring blue of the police-
man's uniform is obtained from wood,
and, though it is an expensive dye at
the outset, it is the cheapest in the
long run.

Chemists have tried hard to fathom
this secret of nature, but without suc-
cess; and it is doubtful if the industry
would continue to exist but for the of-
ficial desire to procure uniforms that
are durable and of fast color.

HAS RULED FROM BEGINNING

That Japanese Royal Family Has No
Name Is Proof of Assertion Long
Put Forward.

In the peaceful and isolated com-
munity it is probable that at first no
family had any special line of occupa-
tion to follow. It was when the com-
munity had made some progress that
division of labor was introduced. It is
clear from many myths that family
names in Japan were taken from the
occupations followed. When many
families came to follow the same oc-
cupation then the necessity arose for
giving distinctive names to the dif-
ferent families. Of the ruling family,
however, there was only one, and as it
had no occupation as other families
did it had no name. Nor was there
any occasion for giving it a distinctive
name; it sufficed to call it by an hon-
orific name. It was and is only when
a member of the imperial family sets
up a branch family that a distinctive
name is given.

Japan furnishes the solitary in-
stance where the ruling family has no
family name. In England, Italy, Hol-
land and other countries those who
already had family names acquired in-
fluence and ascended to the throne.
That the Japanese ruling family has
no name is a clear proof of the con-
tention that Japan has been ruled by
the same family from the beginning.
Had there been any revolution at any
time in the history of Japan—that is
to say, had the first ruling family
been supplanted by another—the pre-
sent imperial house would have a name
of its own.—Chicago Journal.

Sea Lions Invade a Lighthouse.

The keeper of Bride's island light,
below Cape Flattery, has appealed to
the federal authorities in Tacoma for
weapons and help. No sooner does he
open his door than sea lions force
their way into the house and make
free with his possessions. At night
they surround the place, barking for
admittance, until sleep is impossible.
One big fellow amuses himself by
climbing the exterior steps to the
light, to plunge headlong into the sea.
To kill one would only attract more,
for the smell of putrefying meat is
an irresistible attraction.—Scientific
American.

Invents "Ideal" Explosive.

A Minnesota inventor has com-
pounded an explosive which has dem-
onstrated remarkable qualities in re-
cent experiments. While appearing to
have great disruptive powers if closely
confined, as in a shell or drill hole, it
can be exploded only by means of a
blasting cap or electric detonator. It
is reported to give off no noxious
fumes, that it will not explode when
heated to 212 degrees Fahrenheit, that
it will not freeze, and that it cannot
be accidentally exploded by shock.

Early Crusaders Used Stills.

Few prohibitionists, says the Scien-
tific American, are aware of the shock-
ing fact that the vogue of the still in
Europe was due to the original
Crusaders, who took kindly to this
eastern recreation and brought back
with them recipes and methods that
made the still as popular an institu-
tion as the royal jester—and doubtless
helped along democracy by making it
hard at times to distinguish the king
from the clown.

Sequence and Consequence.

As showing how the combination of
drink and driver works out, we give
the terse report of Ben Quinn, an In-
dian of Kansas. He said: "First mile
too slow took drink of booze; next
mile faster, took another drink, last
mile very fast, took another drink;
then saw bridge in road, turned out
for it."

Ben is now in the hospital with a
broken arm.—Boston Evening Tran-
script.

MOLE IS MARVEL POSSESSES

Tests Show Mole Is Carnivorous Animal.

(Prepared by the United States Department of Agriculture.)
Perhaps no other animal is relatively so strong, does so much hard work in a day, or eats so much in proportion to its size and weight, as the American mole. A mole's appetite seems to be almost insatiable. When held in captivity and given food to its liking, it will sometimes eat more than its own weight in a day. This need for a large quantity of food is probably due to the intense activity of the little animal, for experiments have shown that it may be found at work at any hour of the day or night, whenever its runways require repairing or it is in need of new sources of food supplies.

From the standpoint of food habits, it would seem that moles are chiefly beneficial or at least neutral. Experiments conducted by the United States Department of Agriculture show that the mole is a carnivorous animal, though vegetable matter is occasionally found in its stomach. An examination of the stomachs of 200 moles showed that earthworms and white

grubs form the bulk of the food. Beetles and their larvae and other insects that enter the ground, spiders, centipedes, and cocoons also form a portion. In one stomach were found the remains of 71 small white grubs, in one 250 ant puparia, in one ten cutworms, and in another 12 earthworms. In captivity, moles ravenously eat beefsteak, flesh of birds, fish, or almost any sort of fresh meat, but starve to death when supplied with nothing other than grain and root crops.

The chief damage done by the mole seems to be in tearing up gardens and making unsightly ridges in lawns. Moles have been dealt with in the United States chiefly as a nuisance, but in some European countries they are trapped extensively not only to be rid of them as a pest but also to harvest their pelts. In this country it has been demonstrated that moles are never dormant, that they never hibernate. They may be trapped at any time of the year when the ground is not frozen too hard to permit the working of the trap.

DIFFERENT NAMES IN WHEAT BY-PRODUCTS

Much Confusion Caused by Use of Various Terms.

Shorts and Middlings Are Used Synonymously in Some Sections of Country—Table Shows Styles Used in Many States.

(Prepared by the United States Department of Agriculture.)

Sectional differences in the use of names for by-products of wheat are often confusing, says the United States Department of Agriculture in calling attention to the terms used in the regions growing the three principal types of wheat. The near Northwest, which includes Minnesota, the Dakotas, and parts of adjoining states, grows hard spring wheat; the Southwest, also Nebraska and Kansas, grows hard winter wheat; and the East and states as far west as Missouri and Iowa grow soft winter wheat. Of course, these areas overlap in some extent.

Most of the confusion has been caused by different names for shorts and middlings. In some parts of the country these terms are used synonymously, in others one may be used to the exclusion of the other. Where both are used there seems to be a tendency to apply the term "shorts" to the coarser materials, such as standard middlings; and the term "middlings" to the finer materials, such as red dog flour.

While there often may be considerable differences in the composition of corresponding by-products because of the differences in composition and texture of the wheat and of the slight differences in milling practice, the methods of manufacture in the different milling sections are similar and the following table, read horizontally, shows the names used in the different regions for the same by-product feed:

Northwest	Southwest	East
Brn. standard middlings	Brn. brown shorts	Brn. brown middlings
Flour mill dings	Gray shorts	Gray middlings
Red dog	White shorts	White middlings
Wheat mixed feed	Wheat mixed feed	W. h. s. t. mixed feed

"Shiptuff" is a term that has been used in the past for various wheat by-products. It has no very definite meaning, although it seems to apply only to wheat products.

AVOID UNWHOLESOME LITTER

Specialists at Iowa Station Recommend Covering Floor With Finely Cut Alfalfa.

Not many poultry keepers realize the close relation between the condition of the litter in the fowls' quarters and the health of the birds. Poultry specialists at the Iowa station say that unwholesome litter has been known to cause the death of hens, and they recommend covering the floor with finely cut alfalfa or clover.

CATER TO MARKET DEMANDS

Some Dealers Won't Handle Very Fat Hens, While Others Carefully Avoid Leghorns.

Some buyers won't touch very fat hens; they claim they can't find a sale for them; others don't want to handle Leghorns. It is a good plan to know which way the local wind blows since much of the profit of the small breeder must come from local sales.

Mr. and Mrs. J. L. Rankin and two children were guests of Mr. and Mrs. Robt. Vanhooser Saturday and Sunday.

Miss Beatrice Lamb spent last week with her sister, Mrs. Mina Walker. Mr. Jesse Hill left last week for Mr. H. E. Mayes.

Mrs. Maria Lamb and Miss Lillian Walker visited at the home of Mr. J. O. Horning one day last week. Mrs. Laura Lamb spent Sunday with Mrs. Elizabeth Travis.

Mr. and Mrs. Henry Murry and Mr. and Mrs. W. D. Drennan and baby visited Mr. J. O. Horning and family Sunday.

Mr. and Mrs. Floyd Paris and son were guests of Mr. and Mrs. W. M. Walker Sunday.

Mrs. Ada Lamb spent one night last week with her daughter, Mrs. Mina Walker.

Mr. and Mrs. A. D. Horning and children were guests of Rev. W. C. McConnell and family Saturday.

Miss Zia Corley visited Mrs. Laura Walker last week.

Miss Lillian Walker was the guest of Miss Beatrice Lamb Sunday.

FORDS FERRY

(Written for last week)

Mrs. J. L. Rankin is visiting relatives and friends at St. Louis.

G. H. Kirk of Hurricane spent one night recently the guest of M. L. Clift.

Mrs. Jane Hamilton is visiting in Marion.

Mrs. Tobe James was the guest of Mrs. Willie Truitt recently.

Mrs. Edith Brantley, who underwent an operation at Rosiclar recently, is getting along nicely.

Mrs. Louisa Clift spent one day recently the guest of Mrs. Dessie Clement.

Born to Mr. and Mrs. Al Millikan on October 23, a baby boy, Phillip. Mrs. Alvah Watson spent a few days last week visiting Mrs. Stella Hardest of Sheridan.

Mr. and Mrs. Jimmy Rankin were in Marion one day last week.

Mrs. Anice James spent one day last week the guest of Mrs. Nolan Brewer.

Mr. and Mrs. T. N. Welford visited Mr. and Mrs. James Lucas last Sunday.

Mr. and Mrs. J. L. Rankin and two children were guests of Mr. and Mrs. Robt. Vanhooser Saturday and Sunday.

Mrs. Maria Lamb and Miss Lillian Walker visited at the home of Mr. J. O. Horning one day last week. Mrs. Laura Lamb spent Sunday with Mrs. Elizabeth Travis.

Mr. and Mrs. Henry Murry and Mr. and Mrs. W. D. Drennan and baby visited Mr. J. O. Horning and family Sunday.

Mr. and Mrs. Floyd Paris and son were guests of Mr. and Mrs. W. M. Walker Sunday.

Mrs. Ada Lamb spent one night last week with her daughter, Mrs. Mina Walker.

Mr. and Mrs. A. D. Horning and children were guests of Rev. W. C. McConnell and family Saturday.

Miss Zia Corley visited Mrs. Laura Walker last week.

Miss Lillian Walker was the guest of Miss Beatrice Lamb Sunday.

Mrs. Jane Hamilton is visiting in Marion.

Mrs. Tobe James was the guest of Mrs. Willie Truitt recently.

College Sweaters

In heavy ribbed knit; Coat or Slip-Over models; the very newest in fall wear. All the shades so popular now—red, navy, brown, purple, white, etc., \$8.95

CONTROL CURCULIO BY SPRAY

Good Progress Made in Georgia in Overcoming Infestation—Big Peach Crop Produced.

One of the best peach crops ever produced in Georgia has just been harvested. It is reported to the United States Department of Agriculture. Very good progress was made in overcoming the heavy curculio infestation. All varieties, through to the close of the Elberta season, have been unusually free from curculio larvae.

Careful investigations of commercial orchards treated according to the advice of department and state specialists showed that curculio damage was not greater than an average of one wormy peach in each five-eighths bushel basket. In these orchards dropped fruit was picked up and destroyed, and cultivation for the destruction of pupae practiced, in addition to very thorough spraying.

TO DRIVE OUT TUBERCULOSIS

Plan for Eradicating Disease in Cattle From Entire Area Daily Growing in Popularity.

The plan for eradicating tuberculosis in cattle from entire areas, such as counties, is daily growing in popularity according to reports coming to the United States Department of Agriculture. The idea has taken hold in Michigan and is spreading rapidly. Already five counties have been freed of the plague, and reports from the inspector in charge for the government show that the boards of supervisors have appropriated money and made provision for co-operating with state and federal forces. When one county joins the ranks for eradication its action stimulates others to follow. The prospect of ultimately ridding the country of the disease never looked so promising as at present, say those in charge.

CULLING IS NECESSARY EVIL

Handling of Laying Hens Tends to Check Production of Eggs—Advantages Great.

Culling a flock of chickens necessitates the individual handling of every bird in the flock. While the advantages of culling are great, as indicated by the wide and growing adoption of the practice, it should be clearly recognized that the handling process in itself tends to check the production of hens that are laying. It is a necessary evil to be accomplished with as little discomfort to the hens, as well as with as little labor to culler, as possible.

POULTRY

FOWLS NEED OYSTER SHELLS

Failure to Provide Laying Hens With Proper Materials Is Sure to Cause Disaster.

"Laying hens require oyster shells and limestone grit at all times as well as mash containing animal feed," said Prof. J. G. Halpin in an address to the poultry school at the Ohio experiment station.

This statement was based on an array of valuable data gleaned from years of experimental work at the Wisconsin experimental station. The data showed conclusively that failure to provide shells and grit for the laying hens is disastrous to profitable egg production, though, contrary to popular belief, this failure does not appear to cause soft-shelled eggs.

In order to get pullets in the habit of eating oyster shells and grit at an early age, it is the practice of the experiment station to keep these essentials before the birds during the brooder stage. When the pullets are out on range a quantity of the shells and grit are put on the ground near the colony.

BETTER PROGENY BY CULLING

Wise Plan to Discard All Fowls in Flock Except Most Vigorous and Prolific Layers.

(Prepared by the United States Department of Agriculture.)

That culling the poultry flock to get rid of all those birds except the vigorous, prolific layers results in noticeable improvement in the progeny is shown by recent investigations at the United States experiment farm, Beltsville, Md. The late moulting selected from a flock of 100 Rhode Island Reds in the fall of 1920 laid seven more eggs per bird during their second year than the original flock of pullets. They were used as breeders the following spring, and the first Red pullets to commence laying in the fall of 1921

Single Comb Rhode Island Cockerel.

were found to be the offspring of these late-moulting hens. Their pullets in a period of seven months have already averaged about two dozen eggs per bird more than the original flock.

But it is not alone in number of eggs but the late-moulting's progeny excel, but also in the value of the product, as the distribution was more even, a much larger proportion of the eggs being laid during the winter months. In the last seven months the daughters of the late moulting not only averaged two dozen eggs per bird more than the original flock, but the value of their product was, figuring at the same prices, about \$1.04 per bird more during the same period. It is expected that this margin will increase during the next five months.

CHEAP POWDER FOR POULTRY

Mixture of Gasoline, Carbolic Acid and Plaster of Paris Will Eradicate Insects.

A cheap lice powder for poultry may be made by mixing three parts of gasoline and one part of crude carbolic acid with as much plaster of paris as the liquid will moisten. This is the suggestion of the Ohio station. The powder is allowed to dry before using. It may be kept in an airtight container where it retains its strength for a long period. The powder is inflammable and must be kept away from fire.

Infested fowls when thoroughly dusted are soon relieved from the attacks of lice. About 125 birds may be dusted in an hour, one pound of the mixture being needed to dust ten mature fowls. For head lice on chickens, the use of blue ointment or mercurial ointment has been found effective. One part of the ointment is mixed with two parts of vasoline and a lump of the mixture about the size of a pea is rubbed thoroughly at the base of the feathers about the head.

PROVIDE WATER FOR CHICKS

Good Plan to Have Barrel Under a Shade Tree and Let It Drip Continuously Into Pan.

A good method to furnish water to chicks is a barrel under a shade tree that continually drips into a clean pan. It will not be necessary to refill this very often and it furnishes a constant supply of fresh water as it is needed by the chicks.

POULTRY

FEED AND CARE FOR PULLETS

Most Common Mistake to Give Fowls Free Range and Compel Them to Hustle for Living.

When should an April pullet begin laying? Generally the statement is made that Leghorn pullets should begin when five to five and one-half months old; Rhode Island Reds and Wyandotte pullets take a month longer and Plymouth Rocks still another month.

An investigation made by Purdue university developed the fact that many flocks are not doing as well as they could if the young pullets were properly fed and cared for. They are often crowded in the coops at night for the little brood coop that is big enough in the spring is crowded by late fall and the chicks sweat.

The most common mistake is poor feeding. The pullets are allowed free range over the farm and compelled

In Addition to Free Range Pullets Should Be Given Plenty of Mash.

to gather most of their living. They may grow, but it is a slow growth. To hurry this growth, plenty of mash should be kept before them at all times. A very simple mash for the older pullets can be made by taking 50 pounds bran, 50 pounds shorts, and 30 pounds of high-grade tankage. This should be placed dry in a self-feeder, or trough, and the pullets induced to eat all they will of it. Some grain should be fed in addition, that the pullets may be in good flesh when ready to start laying.

KEEP YOUNG STOCK GROWING

Succulent Green Feed, Variety of Grain, Fresh Water and Shade Are of Importance.

So long as the young stock have plenty of succulent green food, a variety of grain, fresh water, shade and exercise, together with well-ventilated sleeping quarters, they will grow like the proverbial weed, but if the growth is stunted by the lack of any one of these essentials, gain is slower even when conditions become normal than it would have been. The poultry grower gets tired; surely the chickens ought to be all right for one night—but that very night is the night the chickens take to pile up. Morning finds the half-grown stock gaunted; a day or so shows them with the dirty nostrils that come when the catarrhal discharge has killed with dust.

A cold from crowding soon becomes a rumpy cold unless prompt action heads it off, and one night's neglect has cost dearly.

Keep them growing by giving more room through culling market stock as fast as it develops, and by providing shade.

MATURE CHICKENS ON RANGE

Good Summer Ration for Hens Is Mixture of Wheat, Oats and Corn, One Part Each.

Encourage mature chickens to range by feeding them sparingly. A good summer ration for hens consists of 1 part wheat, 1 part oats, and 1 part corn, by weight. More eggs are obtained where the birds are fed a little grain than when forced to depend upon "pickings" about the farm.

Cockerels to be kept for breeding purposes should be handled in a similar manner to pullets.

Young stock will do better if not compelled to pick their living with the old. There will also be less trouble from lice.

Mishapen eggs are always penalized by the market and bring an inferior price to smooth, even, perfectly shaped eggs.

Do not make the mistake of feeding too much in the early days of the fattening process. It should ever be kept in mind that the appetite must be preserved unimpaired.

Shade is one of the most important essentials during the hot months. Get the chicks into the orchard and corn field. It is not too late to plant sun flowers.

Young stock will do better if not compelled to pick their living with the old. There will also be less trouble from lice.

Mishapen eggs are always penalized by the market and bring an inferior price to smooth, even, perfectly shaped eggs.

Do not make the mistake of feeding too much in the early days of the fattening process. It should ever be kept in mind that the appetite must be preserved unimpaired.

Shade is one of the most important essentials during the hot months. Get the chicks into the orchard and corn field. It is not too late to plant sun flowers.

POULTRY

FEED AND CARE FOR PULLETS

Most Common Mistake to Give Fowls Free Range and Compel Them to Hustle for Living.

When should an April pullet begin laying? Generally the statement is made that Leghorn pullets should begin when five to five and one-half months old; Rhode Island Reds and Wyandotte pullets take a month longer and Plymouth Rocks still another month.

An investigation made by Purdue university developed the fact that many flocks are not doing as well as they could if the young pullets were properly fed and cared for. They are often crowded in the coops at night for the little brood coop that is big enough in the spring is crowded by late fall and the chicks sweat.

The most common mistake is poor feeding. The pullets are allowed free range over the farm and compelled

to gather most of their living. They may grow, but it is a slow growth. To hurry this growth, plenty of mash should be kept before them at all times. A very simple mash for the older pullets can be made by taking 50 pounds bran, 50 pounds shorts, and 30 pounds of high-grade tankage. This should be placed dry in a self-feeder, or trough, and the pullets induced to eat all they will of it. Some grain should be fed in addition, that the pullets may be in good flesh when ready to start laying.

In Addition to Free Range Pullets Should Be Given Plenty of Mash.

to gather most of their living. They may grow, but it is a slow growth. To hurry this growth, plenty of mash should be kept before them at all times. A very simple mash for the older pullets can be made by taking 50 pounds bran, 50 pounds shorts, and 30 pounds of high-grade tankage. This should be placed dry in a self-feeder, or trough, and the pullets induced to eat all they will of it. Some grain should be fed in addition, that the pullets may be in good flesh when ready to start laying.

KEEP YOUNG STOCK GROWING

Succulent Green Feed, Variety of Grain, Fresh Water and Shade Are of Importance.

So long as the young stock have plenty of succulent green food, a variety of grain, fresh water, shade and exercise, together with well-ventilated sleeping quarters, they will grow like the proverbial weed, but if the growth is stunted by the lack of any one of these essentials, gain is slower even when conditions become normal than it would have been. The poultry grower gets tired; surely the chickens ought to be all right for one night—but that very night is the night the chickens take to pile up. Morning finds the half-grown stock gaunted; a day or so shows them with the dirty nostrils that come when the catarrhal discharge has killed with dust.

A cold from crowding soon becomes a rumpy cold unless prompt action heads it off, and one night's neglect has cost dearly.

Keep them growing by giving more room through culling market stock as fast as it develops, and by providing shade.

MATURE CHICKENS ON RANGE

Good Summer Ration for Hens Is Mixture of Wheat, Oats and Corn, One Part Each.

Encourage mature chickens to range by feeding them sparingly. A good summer ration for hens consists of 1 part wheat, 1 part oats, and 1 part corn, by weight. More eggs are obtained where the birds are fed a little grain than when forced to depend upon "pickings" about the farm.

Cockerels to be kept for breeding purposes should be handled in a similar manner to pullets.

Young stock will do better if not compelled to pick their living with the old. There will also be less trouble from lice.

Mishapen eggs are always penalized by the market and bring an inferior price to smooth, even, perfectly shaped eggs.

Do not make the mistake of feeding too much in the early days of the fattening process. It should ever be kept in mind that the appetite must be preserved unimpaired.

Shade is one of the most important essentials during the hot months. Get the chicks into the orchard and corn field. It is not too late to plant sun flowers.

LOOSE FLOORS OF HOPKINSVILLE

Mr. and Mrs. Herby will positively Reopen For Business the proud parents of a son, Edna.

This Season With Two Sets of

Buyers As Usual

Mrs. Emaline Green, wife of Mrs. Nora Sunderland Monday.

Frankie Stinnett is visiting her sister, Mrs. Ralph Brown.

Mrs. James Campbell and children are visiting her mother, Mrs. Claud Bennett.

Truman McKinney and family are going to move to the Riley Brasher place.

Jake Campbell and wife were the guests of Marion Asbridge and family Sunday.

Allie Asbridge is building a house near the home of Burnett Asbridge.

Two lots of nine 700-pound steers were fed for 112 days. Forty-six pounds of silage per steer per day was practically the limit of their capacity. Lot 1 was fed 5.42 pounds of molasses per steer daily, while lot 2 was fed 8.07 pounds of molasses per steer daily. As lot 1 gained 2.48 pounds per steer daily, while lot 2 gained only 2.41 pounds per steer daily, it is evident that 2.65 pounds of molasses was wasted daily per steer in lot 2. The results in lot 2 might have been more favorable to the use of so much molasses had the cotton-

seed-molasses ration been reduced to 3.5 or 4 pounds. In the test, lot 1 consumed 1,880 pounds of silage, 218 pounds of cottonseed meal, and 218 pounds of molasses per 100 pounds gain, while lot 2 required 2 per cent more silage, 3 per cent more cottonseed meal, and 54 per cent more molasses to produce 100 pounds of gain.

While it probably helps make muscle it is otherwise of no particular benefit.

Why do hogs root? Will rings or other means of prevention have any detrimental effect on the health and progress of the animal? Experts at the Nebraska State College of Agriculture say rooting is just one of the natural propensities of swine. While it probably does help make muscle, it is otherwise of no special benefit and has no particular significance. The fact that hogs show a strong tendency to plow up alfalfa fields or tear out foundations of the buildings is no indication that they are not getting proper feed. There is no basis for the statement that rooting results from lack of mineral or protein in the ration. Hogs root for worms, roots and other food, but they seem to thrive just as well when a check is placed on the extensive use of their snouts. They also root to make a cool bed on a hot day. There is no reason why rings should not be used where hogs do material damage rooting.

One of Chief Factors During Hot Weather Is Quantity and Quality of Feed Received.

One of the factors that materially affects the efficiency of the work horse especially in hot weather is the feed he receives and the manner in which he receives it. In order that a horse may do a full day's work regularly throughout the summer months and yet maintain a presentable condition he must be fed just about to his full capacity. In order to do this and not injure his health, care and judgment must be exercised in the selection of feeds used.

The feeds best suited to form the principal components of the ration are good bright clean timothy or upland prairie hay and bright, clean, sound oats. The average horse weighing 1,500 pounds will require about 20 pounds of hay and 22 to 24 pounds of oats a day.

There is a wide variation in feed requirements of different horses of the same weight.

Work horses should have an opportunity to eat all the salt they care for.

Keep the live stock supplied with water during the hot days of summer.

There is a wide variation in feed requirements of different horses of the same weight.

Studebaker

At its new low price of \$1275 the Studebaker Special-Six Touring Car maintains Studebaker ideals of quality and performance, with added features that make it even a greater value than before.

It is known for its striking beauty just as it is for its thorough dependability. Luxurious comfort is assured by the nine-inch seat cushions of genuine leather and the long semi-elliptic springs, front and rear.

Power, flexibility and ease of handling are combined to make the Special-Six the most highly regarded five-passenger car on the market.

By manufacturing complete motors, transmissions, bodies, tops, castings, forgings and stampings, middlemen's profits on such items are eliminated and one profit only is included in Studebaker prices. Highest standards of workmanship are maintained and materials are the finest the market affords.

In the Special-Six Touring Car you will find such value and satisfaction as only Studebaker can offer.

The name Studebaker is your assurance of satisfaction.

RESIDENCE CAUGHT FIRE

On last Friday at noon a blaze started in an upper floor over the kitchen of the residence of Joe Dean, in East Marion, caused, it is thought, by a defective flue. A hole was burned through the roof, the blaze also extending into the dining room. The prompt arrival and efficient work of the fire department saved the building from destruction. The damage to the building was covered by insurance.

WILL HUDSON DIES

Rev. W. T. Oakley was called to Sullivan Sunday to conduct the funeral services of Will Hudson, son of Mr. and Mrs. Jeff Hudson, who died in an Evansville hospital Friday night. Mr. Hudson was injured recently while at work at Bells Mines and died as a result of his injuries.

SHERIFF'S SALE FOR TAXES

By virtue of taxes due the Tolu Graded School District for the year 1921 1 of one of my Deputies will on Monday the 13th day of November, 1922 between the hours of 10 o'clock A. M. and 2 o'clock P. M., at Court House door in Crittenden county, Kentucky, expose to PUBLIC SALE to the highest bidder for cash in hand, the following property (or so much thereof as may be necessary to satisfy the amount of taxes due aforesaid and costs) to-wit:

Chas. T. Riley, one town lot in Tolu 1921,	\$ 3.50
Mrs. Sue Tabor, one town lot in Tolu, Ky., 1921	15.25
J. A. Sheffield, one town lot in Tolu, Ky.	32.25
Sam Kimsey, 114 acres near Tolu, Ky.	8.50
C. E. Tabor, one town lot in Tolu, Ky.,	12.75

Thoughts After Forty.

A man's wife is dependable. Gets him off to work in the morning. Gives him a kiss. Makes him wear his over-shoes if necessary. You wouldn't want to be married to a vamp—Louisville Courier-Journal.

Familiar to Well Known to Hundreds of Marion Citizens. A familiar burden in many homes. The burden of a bad back. A lame, weak or an aching back. Often tells you of kidney ills. Doans Kidney Pills are for weak kidneys.

Here is Marion testimony. J. F. Chittenden, blacksmiths, E College St., says: Doans Kidney Pills are a mighty good kidney remedy for kidney complaint. My kidneys have they cured me of several attacks of given me a good deal of trouble at times. Just as soon as my kidneys get out of order I am troubled with severe backaches and a lameness and soreness across my kidneys. I always take Doan's Pills at these times and it only takes about a box to cure the attack. Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Chittenden had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. (advertisement)

OBITUARY

William P. Loyd was born August 1, 1836, departed this life Nov. 1, 1922. He was 86 years, two months old. He joined the Cumberland Presbyterian church at old Piney Fork about 1862. He was a charter member when the Cumberland Presbyterian church at Crayne was organized and remained a faithful member until God saw fit to take him to his reward. He was married to Miss Tabitha Thurman Feb. 25, 1859. To this union was born seven children, four girls and three boys, all but one have preceded him to their reward. He was married to his present wife, Miss Ella Minner, Nov. 7, 1904. He was loved by all who knew him. He was an honest conscientious man. A good husband, a kind father, a loving grandfather. He loved his neighbors and his neighbors loved him. His funeral was conducted by Rev. W. T. Oakley in the Cumberland Presbyterian church at Crayne in the presence of a large sympathetic congregation. The interment in Chapel Hill cemetery. He was buried beside his first wife. The floral offerings were beautiful. Thus ends the career of an old land mark.

Fact Worth Noting.

No man ever died of poison by burying the gall of malice in his own breast—Exchange.

SHERIFF'S SALE

By virtue of Execution No. 451 directed to me, which issued from the Clerk's office of the Crittenden County Circuit Court, in favor of R. W. Winters against Marion Zinc Co., for the sum of \$655.80, I or one of my Deputies, will on Monday the 12th day of November 1922 between the hours of 10 o'clock A. M. and 2 o'clock P. M., at the Court House in Crittenden county, Ky., expose to PUBLIC SALE to the highest bidder the following property (or so much thereof as may be necessary to satisfy Plaintiff's debt, interest and costs) to-wit:

Winters) thence S 66 E. 213 1-2 poles to a stake; thence N. 2 W. 38 1-2 poles to a stake; thence N. 23 E. 30 poles to a stake thence N. 33 W. 43 poles to a white oak thence N. 12 E. 14 poles to a stake in the state road thence with the meanders of said road N 87 1-2 W. 36 poles N. 74 W. 38 Poles N. 57 W. 35 poles to a stake in the center of said road; thence south 54 3-4 W. 88 poles to the beginning.

TERMS: Sale will be made on a credit of three months, bond with approved security required of the purchaser, with interest from date at the rate of 6 percent per annum, and having the force and effect of a judgment.

Witness my hand, this 7 day of October, 1922
JAMES T. WRIGHT, Sheriff, C. C.

Advance With Forethought.

There is no road too long to the man who advances deliberately and without undue haste; there are no honors too distant to the man who prepares himself for them with patience—La Brayere.

Memory Fails Small Boy.

Little Richard Castle, son of the cashier of the Bell Telephone company, on seeing his aunt, who has just returned from Seattle, where she has lived since her marriage to Fred Feltus two years ago, remarked: "I remember Aunt Helen, but I don't remember that baby." — Wichita (Kan.) Eagle.

The Ring Finger.

The fourth finger, which has less motion than the others, has the advantage of being protected by the other fingers. It owes to this circumstance a comparative immunity from injury, and this accounts for its use as the ring finger.

Tobacco Growers:

The owner of the HOPKINSVILLE LOOSE FLOOR has been a farmer all his life and his sympathies are with the efforts of the tobacco growers of this district to better their condition in any legitimate manner. I have nothing but good will for those who have joined the Association and have the same feeling toward those who have seen fit to remain outside the Association. The facilities of the HOPKINSVILLE LOOSE FLOOR will be open to those who are not in the Association and I promise the very highest care and attention to tobacco delivered to me for sale. I want your business and the small crop will receive the same careful handling as the largest crop in the county.

THE HOPKINSVILLE LOOSE FLOOR Will be Open for Business December 5th and will continue open until the close of the season. Your Tobacco will be paid for the same day it is sold. Free stalls over night for your teams.

The policy of this house has been to give special care to grading and trucking which has resulted in the highest market price being paid for tobacco sold on this floor. That policy will be continued. We have never bought or sold on our floor and will not do so. We run a commission business only and our efforts are devoted solely to getting the HIGHEST PRICE FOR YOUR TOBACCO.

If you desire weekly quotations from this market, fill in your name and address on this advertisement and return to us. Thanking you for your past favors.
